About the Contributors

Hossana H. Aberra is a consultant with Enterprise Integration, Inc. in Alexandria, VA. While at EII, she participated as part of an Independent Verification and Validation team for SAP implementation project by reviewing the project deliverables, evaluating the implementation approach, and testing the solution. She also provided executive consulting to an Enterprise Process Analysis and Strategies Group as the resident specialist on Enterprise Architecture in support of policy compliance, portfolio management, and technology research and evaluation. Hossana holds BBA in computer information and systems science, and MS in enterprise engineering and policy.

Jose L. Aguirre holds a bachelors degree in computer systems engineering from the ITESM (Mexico) in 1980; masters in informatics engineering from ENSIMAG (France) in 1986; PhD on Informatics from INPG (France) in 1989. His research area is Artificial Intelligence with emphasis on Knowledge Based Systems. He has been full-time professor at the ITESM Campus Monterrey since 1990 until 2007. During the last years he has conducted research on Knowledge Flow Systems and the integration of AI technologies to enhance the capabilities of those systems.

Konstantinos Aivalis is chief economic advisor to ICAP SA, the leading Greek business services firm, where he supervises all economic research. He earned his BA in economics magna cum laude from the University of Athens. He also holds an MA in economics from Boston University. Mr. Aivalis has worked as an economics researcher and management consultant since 1984 and has a long experience in applied economic research. Since 1990 he follows and analyses the trends in the Greek business sector and has written ex-tensively in specialized publications and in the press. His other research interests are regional economics, technology and the knowledge economy. He has co-authored a book on the knowledge economy in Greece, which will be published soon.

Nancy Alexopoulou is a research associate at Harokopio University of Athens. She holds an MSc in Advanced information systems and a bachelor degree in Informatics from the Department of Informatics and Telecommunication of the University of Athens. Currently, she works on her PhD in agile business process execution. Her research interests include business process modeling, agile process-aware information systems and enterprise architectures.

Albert Boonstra is an associate professor at the Faculty of Management and Organization at the University of Groningen, The Netherlands. He is director of the graduate programs in Business Administration at this university. He specializes in the organizational issues that surround the use of advanced
information technologies, especially in health care environments. He conducted extensive research in this field and has served as consultant in numerous IT-management related projects. He published his research in various international journals, including the *International Journal of Project Management*, *European Journal of Information Systems*, *Journal of Information Technology*, *International Journal of Information Management* and *New Technology, Work & Employment*.

**Joseph Bradley** is an assistant professor of Accounting at the University of Idaho. He received his BA from Claremont McKenna College and his EMBA and PhD from Claremont Graduate University. His research focuses on ERP implementation issues. His research has been published in the *International Journal of Enterprise Information Systems*, *Issues in Information Systems* and the *International Journal of Accounting Information Systems*. He has presented his research at the Information Resource Management Association International Conference and Americas’ Conference on Information Systems. Prior to his academic career he spent 30 years in industry in various accounting and general management positions.

**Ramon F. Brena** is full professor at the Center of Intelligent Systems, Tecnologico de Monterrey, Mexico, since 1990, where he is head of a research group in distributed knowledge and multiagent systems. Dr. Brena holds a PhD from the INPG, Grenoble, France, where he presented a doctoral Thesis related to Knowledge in Program Synthesis. His current research and publication areas include Intelligent Agents and Multiagent Systems, Knowledge management, representation and distribution, Semantic Web, and Artificial Intelligence in general. He has been visiting professor at the U. of Texas at Dallas and the Université de Montréal. Dr Brena is member of the ACM, and is recognized as an established researcher by the official Mexican research agency, CONACyT.

**Brian H. Cameron** is professor of practice in the College of Information Sciences and Technology at The Pennsylvania State University. He is a founding member of the Enterprise Informatics and Integration Center at Penn State, an applied research group seeking to actively engage industry and non-profit organizations to solve critical issues in enterprise and supply chain integration. The main focus areas for his teaching efforts are on senior-level capstone enterprise integration, enterprise information architecture, and information technology consulting & project management courses. Dr. Cameron is currently developing new curricular materials for enterprise integration (through funding from NSF) including a textbook to be published by Wiley & Sons Publishing. He has also designed and taught executive education sessions for senior IT executives. Session topics include service oriented architecture (SOA), business process management (BPM), strategic alignment of IT & business strategies, IT governance, and IT portfolio management. Dr. Cameron currently leads corporately funded research efforts in the following areas: service-oriented architecture and business process modeling, risk analysis and management of enterprise systems integration projects, enterprise resource planning (ERP) and customer relationship management (CRM) implementation best practices and enterprise storage & information management architecture design.

**Kerstin Fink** is university professor at Innsbruck University and head of the Department of Information Systems, Operational Management and Logistics. Kerstin Fink conducts research in the field of knowledge management and measurement with special focus on small and medium-sized enterprises. She was visiting researcher at Stanford University and the University of New Orleans and is currently
About the Contributors

guest professor at the University of Linz. Kerstin Fink was awarded with the Tyrolean Chamber of Commerce Prize, the Otto-Beisheim Prize and the Innsbruck Scientific Award for excellent research in the field of knowledge management.

Shehzad Khalid Ghani is a faculty member of the Department of Computer and Information Systems in Prince Sultan University. He completed his master’s degree in information systems from University of Texas at Dallas in 2002. His research interests include: enterprise resource planning, business process reengineering, e-government, IT management, and ethical aspects of computing in society. He is the Editorial Coordinator of *Applied Computing and Informatics* magazine and a member of the Saudi Computer Society.

Manish Gupta is a PhD Candidate at State University of New York at Buffalo and an information security professional at M&T Bank, Buffalo. He obtained an MBA from SUNY-Buffalo in MIS and bachelors degree in mechanical engineering from University of Lucknow, India. He has published 3 books (one is forthcoming) in information assurance area. He has authored or co-authored more than 20 refereed research articles in leading journals, conference proceedings and books. He serves in editorial boards of 8 international journals and has served in program committees of several national and international conferences.

Călin Gurău is associate professor of Marketing at Montpellier Business School, France, since September 2004. He is a junior fellow of the World Academy of Art and Science, Minneapolis, USA. He worked as Marketing Manager in two Romanian companies and he has received degrees and distinctions for studies and research from University of Triest, Italy; University of Vienna, Austria; Duke University, USA; University of Angers, France; Oxford University and Southampton Business School and Heriot-Watt University, United Kingdom. His present research interests are focused on Marketing Strategies for High-Technology Firms and Internet Marketing. He has published more than 25 papers in internationally refereed journals, such as *International Marketing Review*, *Journal of Consumer Marketing*, and *Journal of Marketing Communications*.

Ronda Henning, CISSP-ISSAP, CISSP-ISSMP, CISM, is a senior scientist at Harris Corporation; a Melbourne, Florida based international communications company. Ms. Henning is the senior strategist for information assurance at Harris. Her past assignments include network security manager for the FAA Telecommunication Infrastructure (FTI) Program and a DARPA principal investigator on vulnerability visualization technologies. Prior to her employment at Harris, Henning worked in information security research at the National Security Agency. Henning holds an MBA from the Florida Institute of Technology, an MS in computer science from Johns Hopkins University, and a BA from the University of Pittsburgh.

Ditmar Hilpert is professor at the European School of Business (ESB), Reutlingen, Germany. He has earned a master's degree both in biotechnology and economics and holds a PhD in pharmacology and toxicology. After more than 10 years in the pharmaceutical industry, he has held the chair in Strategic Management at ESB for the last 15 years. His current research interest is in the comparison of strategic approaches of SME on an international background. Professor Hilpert also served the European Commission, DG XII, and various Business Schools as an advisor. He acts as an business angel for biotech and medtec companies.
Panagiotis Kanellis is currently a program manager with Information Society S.A. in Athens, Greece. Previous to that he held senior consulting positions with Arthur Andersen and Ernst & Young. He was educated at Western International University in Business Administration (BSc), at the University of Ulster in computing and information systems (Post-Graduate Diploma), and at Brunel University in data communication systems (MSc) and information systems (PhD). He is a research associate in the Department of Informatics and Telecommunications at the National and Kapodistrian University of Athens and an adjunct faculty member at the Athens University of Economics and Business having published more than 50 papers in international peer-reviewed journals and conferences.

Helmut Krcmar has held the chair for Information Systems at the Information Technology Department of the Technische Universität München (TUM) since October 1, 2002. He is a member of the Information Technology Department, a secondary member of the Economics Department, and a member of the Carl von Linde Academy. Since 2004, he has been a member of the board of the elite graduate program in finance and information management (FIM) in the elite network of Bavaria, Germany. Between October 2003 and May 2007, he was academic director of the ¡communicate! program, and has been scientific director of the Center for Digital Technology and Management (CDTM) of the Technical University of Munich since January 2004.

K. V. Krishnankutty is doctorate from Indian Institute of Technology, Madras and also holds an M.Tech from the same Institute. He has guided PhDs and has many national and international papers to his credit. He has headed several boards and has successfully carried out consultancy for many organizations. He is a professor at the Department of Business Administration, College of Engineering, Trivandrum. He is a fellow of the Indian Institution of Industrial Engineering.

Gita A. Kumta has around 30 years experience in industry predominantly in the area of business analysis and consultancy in financial systems. Presently Dr. Kumta is head of the Information Systems faculty at School of Business Management, SVKM’s NMIMS University, Mumbai, India and specializes in Information Systems and Knowledge Management. She did her Masters in Statistics from Indian Statistical Institute, Calcutta, India, and has a diploma in bank management from National Institute of Bank Management, Mumbai. She completed her doctoral thesis on Funds Management in District Central Co-operative Banks in Maharashtra through University of Mumbai, India.

Euripidis Loukis is assistant professor of Information Systems and Decision Support Systems at the Department of Information and Communication Systems of the University of the Aegean. Formerly he has been information systems advisor at the Ministry to the Presidency of the Government and at the Ministry of Culture, and also National Representative of Greece in the ‘Interchange of Data between Administration Program’ (IDA) and the ‘Telematics for Administration Program’ of the European Commission. Also he has lectured in the National Technical University of Athens, in the National Academy of Public Administration and in the University of Thessaly. He has participated in many national and international research programs, and authored numerous journal and conference papers; one of them has been honoured with the International Award of the American Society of Mechanical Engineers (ASME) Controls and Diagnostcs Committee.
Vincent A. Mabert is Emeritus Professor of Operations Management in Kelley School of Business, Indiana University. He conducts research and consults in the areas of supply chain management, work force planning, order scheduling, enterprise resource planning systems, new product development, and manufacturing system design. His publications include articles in *Management Science*, *Decision Sciences*, *IIE Transactions*, *Journal of Operations Management*, *The Accounting Review*, and the *Academy of Management Journal*. Routinely he consults with the Rand Corporation concerning supply chain management issues for the United States military. He has been active and held officer positions in a number of professional societies including Industrial Engineering, INFORMS, APICS, and Decision Sciences. Professor Mabert is vice president of the Harvey Foundation, a Fellow of the Decision Sciences Institute, and Editor-in-Chief of the *Production & Inventory Management Journal*.

Drakoulis Martakos is an associate professor at the Department of Informatics and Telecommunications at the National and Kapodistrian University of Athens. He received his BSc in Physics, MSc in electronics and radio communications and PhD in real-time computing from the same university. Professor Martakos is a consultant to public and private organizations and a project leader in numerous national and international projects. He serves on the Board of the Hellenic Chapter of the Association of Information Systems (AIS) and he is the author or co-author of more than 70 scientific publications and a number of technical reports and studies.

Andrea Masini is an assistant professor of Operations and Technology Management at the London Business School. Andrea’s research focuses on the strategic and organizational impact of information technology innovations. He studies the mechanisms through which IT investments generate adaptive capabilities and become a source of competitive advantage. By assessing the effectiveness of different IT strategies in different organizational and environmental contexts, his research provides useful insights to firms that want to maximize the value of their IT investments. He is author of various articles appeared in international journals and he actively consults for private and public organizations on themes related to ICT and technological innovation.

Charlotte Mason is professor of Marketing at the Terry College of Business at the University of Georgia where she is Head of the Department of Marketing and Distribution and Director of the Coca-Cola Center for Marketing Studies. Formerly she was at the Kenan-Flagler Business School at the University of Chapel Hill. She received BS and MS degrees in industrial engineering, MS in statistics, and Ph.D. in Business from Stanford University. Before joining academia she worked for Procter & Gamble and Booz, Allen and Hamilton. Her current research addresses the use of customer databases and strategic CRM issues. Her research is published in Marketing Science, *Journal of Marketing Research*, and other leading journals. Charlotte serves on several editorial boards and is co-author of *The Marketing Game!*, a strategic marketing simulation.

Sanjay Mathrani has been a supply chain manager at Navman Wireless New Zealand until recently. He will be joining the School of Engineering and Advanced Technology (SEAT) at Massey University as a Lecturer in Product Development soon. He has more than twenty years of product development, manufacturing, and supply chain experience. He has held senior managerial positions in various multinationals and organizations of repute including Alstom, Ruston & Hornsby, and David Brown. He has been a practitioner and super user of ERP and business intelligence systems. He holds a B Tech
in mechanical engineering, masters in management sciences, and a postgraduate diploma in computer management. He is pursuing a PhD study to evaluate the impact of enterprise systems on organizational functions and processes and its link to business benefits. His research interests are in information and knowledge management, project and supply chain management, product development and manufacturing operations, and enterprise service-oriented architectures. He has published several papers in international conferences and journals and is an invited speaker at various international Universities.

**Alok Mishra** is associate professor of Computer and Software Engineering at Atilim University, Ankara Turkey. He had his PhD in Computer Science (Software Engineering) besides dual Masters in Computer Science & Applications and Human Resource Management. His areas of interest and research are software engineering, information system, information & knowledge management and object oriented analysis & design. He had extensive experience of distance and online education related to computers and management courses. He has published articles, book chapters and book-reviews related to software engineering and information system in refereed journals, books and conferences including International Journal of Information Management, Government Information Quarterly, IET-Software, Behaviour and Information Technology, Public Personnel Management, European Journal of Engineering Education, International Journal of Information Technology and Management.

**Gary P. Moynihan** is a professor in the Department of Industrial Engineering, The University of Alabama. He received BS (chemistry) and MBA (operations management) degrees from Rensselaer Polytechnic Institute, and a PhD (industrial engineering) from the University of Central Florida. While at The University of Alabama, he has taught, developed and expanded courses in information systems design, project management, life cycle costing and engineering economics. His primary areas of research specialization are information systems development, economic analysis, project management, and manufacturing operations analysis.

**Valentin Nicolescu** studied Economics at the University of Hohenheim, Germany. Since 2003, he has been technical head of the SAP Hochschul Competence Center (SAP University Competence Center (SAP HCC)) at the Technische Universität München. His responsibilities in this role include operating SAP training systems for third-level institutions throughout Germany, and providing SAP training to third-level lecturers. His focus areas are the products in the SAP NetWeaver platform and teaching classic ERP with SAP R/3 and mySAP ERP. He is a certified SAP Technology and Development Consultant for SAP XI and a Technology Consultant for Web AS and Enterprise Portal.

**Mara Nikolaidou** is an assistant professor of Information Technology at Harokopio University of Athens. She holds a PhD and a bachelor degree in computer science from the Department of Informatics and Telecommunication of the University of Athens. She is a member of IEEE and ISCA. Her research interests include software and information system engineering, e-government and digital libraries.

**S. Padmanaban**, BCom, MBA (Panjab), CISA, is currently professor-Systems at SDM Institute for Management Development, Mysore, India. Mr. Padmanaban has about 30+ years experience in IT (Information Technology) industry, having worked in India and Zambia (CMC Ltd, Zambia State Insurance Corporation Ltd, et al), in capacities ranging from systems analyst to director (Operations). He has directed and coordinated many large IT/IS projects, including Indian Railways Passenger Reservation...
System, Kandla Port Trust MIS, ZSIC General Insurance. Audited and advised banks on IS Security, Audit, and Control systems. He has lectured at University of Zambia, Indian Institute of Management, Tata Institute of Social Sciences, State Bank of India, Bank of Baroda Staff Colleges, National Insurance Academy. Co-authored and published articles, case reviews, and cases. Research interests include: integrated information systems (in-house ERP); systems integration, systems audit/security/control; quality assurance; public systems--especially railways/transport; financial and allied services, specifically insurance and banking, and EIS/MIS.

Christian Ploder is a Research Assistant at the Department of Information Systems, Operational Management and Logistics at the University of Innsbruck and Ph.D. student. In his Ph.D. thesis he is developing a model for diagnosing knowledge intensive business processes. Since working at the Department he is a lecturer for Information System Basic Course, Project & Knowledge Management, author of different journals and papers presented on international conferences. His research interests include knowledge management focused on small and medium-sized enterprises as well as the topic of knowledge intensive processes.

Mateja Podlogar is assistant professor of Information Systems, head of eProcurement Laboratory and head of Supply Chain RFID LivingLab at the Faculty of Organizational Sciences, University of Maribor. Her current research includes: eCommerce in supply chain, RFID systems and new eBusiness models in supply chain, web based ERP systems, ERP systems integration of all supply chain participants, business process reengineering, business data and information systems auditing. She intensively cooperates with the industry, other universities and she is involved in several EU projects. She is also a university advocate of ISACA of the Faculty of Organizational Sciences.

Mohammad Abdur Rashid is a senior lecturer of Computer, Information and Communications Engineering at Massey University, New Zealand. He received MScEng degree in electronics engineering specializing in engineering cybernetics systems from the Technical University of Wroclaw in 1978 and PhD from the University of Strathclyde, UK in 1986. Dr. Rashid is a co-author of Enterprise Resource Planning: Global Opportunities and Challenges. He has publications in international journals and conferences covering his areas of research. His research interests are multimedia communication networks, embedded systems design, network protocols and performance studies, mobile wireless multimedia communication and ERP systems.

Rogério Atem de Carvalho holds a BSc in computer science and MSc and DSc in industrial engineering, and is a teacher and researcher at the Federal Center for Technological Education of Campos - CEFET Campos, Brazil. He is the Brazilian representative for the IFIP/Unesco Working Group on Enterprise Information Systems, and is a Founder Member of the IEEE SMC Society Technical Committee on EIS. His research on FOS-ERP was awarded by IFIP in 2006 and jointly by IFIP and IEEE in 2007. He is a consultant for government and private sectors and authored many book chapters and research papers on ERP, ECM, decision support systems, production planning and control, and project management.

Aleda V. Roth is the Burlington Industries distinguished professor of Supply Chain Management at Clemson University. She was the principal investigator of Global Supply Chain Management Futures
About the Contributors

Initiative, supported by SAP AG; and member of the Supply Chain Management Thought Leaders Roundtable. She is an internationally recognized empirical scholar in service and manufacturing operations strategy. Her research is motivated by theoretical and practical explanations of how firms can best deploy their global supply chains, operations, and technology strategies for competitive advantage. Dr. Roth has more than 150 publications to her credit; and her work has been distinguished by 51 research awards and 27 grants. She holds senior editorial positions for Management Science, Production and Operations Management (POM), Journal of Operations Management (JOM), Decision Sciences (DSJ), Journal of Supply Chain Management and others. She served as president of the Production and Operations Management Society (POMS); was named the 2006 OM Scholar at the Academy of Management; and is a fellow of the Decision Sciences Institute, POMS, and UK Advanced Institute of Management Research (AIM). Dr. Roth is a member of the Conference Board’s Performance Excellence Council has consulted with corporate staff at leading global companies. She worked in top management for a decade before earning her PhD in at Ohio State University, where she also received her BS. She received her MSPH in biostatistics from UNC-Chapel Hill.

Ioakeim Sapounas is research and teaching assistant and PhD Candidate at the Department of Information and Communication Systems of the University of the Aegean. He has graduated from the Economics Department of the University of Piraeus. Also he holds an Msc in total quality management from the same University. Currently he is also a financial management specialist at the Hellenic Telecommunications Organization (OTE S.A.). His research interests include information systems investment, business value and complemenary factors. He has published several journal and conference papers in the above areas.

Tobias Schoenherr is assistant professor of Supply Chain Management at the Eli Broad College of Business, Michigan State University. Dr. Schoenherr holds a PhD in operations management and decision sciences from Indiana University, Bloomington, from where he also obtained his BSc and MB. He also holds a Diplom-Betriebswirt (FH) from the European School of Business, Reutlingen University, Germany, and is an APICS certified supply chain professional (CSCP). Dr. Schoenherr’s research focuses on supply chain management, purchasing, ERP systems, and global manufacturing. His work has appeared or is forthcoming in the Journal of Operations Management, the Journal of Supply Chain Management, the International Journal of Operations and Production Management, OMEGA - The International Journal of Management Science, Business Horizons, the Journal of Purchasing and Supply Management, the International Journal of Procurement Management, the International Journal of Integrated Supply Management, and PRACTIX, among others. Dr. Schoenherr has been active in several professional associations, including DSI, ISM and APICS.

Darshana Sedera is a post doctoral fellow with the Australian Research Council (ARC) and a senior lecturer in the Faculty of IT at the Queensland University of Technology (QUT), Brisbane, Australia. He received his doctor of philosophy for the dissertation titled “Enterprise Systems Success Measurement Model” in 2006 from QUT. His research interests include: Enterprise Systems Lifecycle Management, Information Systems evaluations and success, and Knowledge Management. Dr. Sedera has authored / co-authored over 40 refereed publications in reputed journals and conferences including the Journal of the Association for Information Systems (JAIS) and the International Conference on Information Systems (ICIS).
Raj Sharman is a faculty member in the Management Science and Systems Department at SUNY Buffalo, NY. He received his BTech and MTech degree from IIT Bombay, India and his MS degree in Industrial Engineering and PhD in computer science from Louisiana State University. His research streams include Information Assurance, Extreme Events, and improving performance on the Web. His papers have been published in a number of national and international journals. He is also the recipient of several grants from the university as well as external agencies.

Ashok K. Soni is chairperson and professor of Operations and Decision Technologies and the SAP Faculty Fellow at the Kelley School of Business at Indiana University. He received a BS in aeronautical engineering from Manchester University, an MS in operations research from Strathclyde University, and an MBA and DBA from Indiana University. Professor Soni’s teaching and research interests are in the areas of enterprise applications, technology, e-business, and decision support systems. His research interests are in enterprise technologies and decision support systems. His research has appeared in Management Science, Naval Logistics Research, Omega, IIE Transactions, and European Journal of Operational Research.

Suresh Subramoniam is an assistant professor in the College of Business Administration, Prince Sultan University in Saudi Arabia. He had his BTech from Kerala university and MSIE from Louisiana State University in USA. He also holds a PhD in management from Kerala University. He has around twenty five papers to his credit published in both national and international journals as well as conferences. He is a member of APICS, USA and Indian Institution of Industrial Engineering. He is guiding doctoral research in Kerala University.

Mohamed Tounsi received his PhD in computer science speciality in artificial intelligence from University of Nantes, France in 2002. He was assistant professor at Polytechnic University of Nantes, France. He is currently chairman of computer science department and assistant professor at the Department of Computer Science, Prince Sultan University, KSA. His current research interest includes constraint programming, meta-heuristics, bioinformatics, intelligent agent and optimization algorithm.

Ganesh Vaidyanathan is an assistant professor of Decision Sciences at IUSB. He has conducted research in the areas of eCommerce, supply chain management, project management, knowledge management, technological innovation and IT value. He has authored over 25 publications in journals such as Journal of Operations Management and Communications of the ACM. He has co-invented four patents in various computer science areas. Dr. Vaidyanathan co-founded eReliable Commerce, Inc.,
About the Contributors

and has held various executive positions at Honeywell, General Dynamics, Lockheed Martin Inc., and Click Commerce Inc. Dr. Vaidyanathan launched products that include security, payment processing, procurement, logistics, ERP, SCM, and data warehousing. He has consulted with Fortune 100 companies including United Airlines, Mitsubishi, Motorola, and Honeywell in technology, business and process reengineering. Dr. Vaidyanathan holds a PhD with a focus on artificial intelligence, robotics and computer engineering from Tulane University and an MBA from the University of Chicago.

Gabriel Valerio is professor and consultant at the Center for Knowledge Systems, Tech of Monterrey, Mexico, since 2001. He has been dedicated to the researching on knowledge management tools for eight years. He is mainly interested in technological tools to support the knowledge flow and the organizational memory. He is a member of research group in Distributed Knowledge and Multiagent Systems. He is a doctor degree student of Educaative Innovation, at Virtual University, Tech of Monterrey. He has been visiting professor at the Universidad de Externado at Colombia.

M.A. Venkataramanan is Glaubinger professor of Operations and Decision Technologies and Chair of the Undergraduate Program of the Kelley School of Business at Indiana University, Bloomington. He received his PhD in business analysis and research from the Texas A&M University. His research interests include Enterprise Resource Planning, RFID, network modeling, artificial intelligence, high-speed computing and supply chain models. Venkataramanan organized and managed the Computer Information Systems (CIS) major from 1989 to 1995. He then played a key role in developing the Business Process Management program for the Kelley School of Business at Indiana University as chair of the Operations and Decision Technology Department for six years from 1997-2003. From 2005 to present he is Chair of the Undergraduate Program. His teaching interests are in the area of RFID, decision support systems, computer programming, enterprise resource planning (ERP), optimization techniques, and project management. He is one of the principle investigators in ERP research and teaching initiative at Indiana University. He has more than twenty five research articles published in a variety of journals including Operations Research, Decision Sciences, Annals of Operations Research, Naval Research Logistics, Computers and OR, EJOR, and Mathematical Modeling.

Dennis Viehland is associate professor of Information Systems at Massey University’s Auckland campus in New Zealand. His principal research area is mobile business, with secondary research interests in electronic commerce strategy, ubiquitous computing and innovative use of ICT to manage Information Age organizations. He is a co-author of Electronic Commerce 2008: A Managerial Perspective and has published in numerous international journals and conferences.

Holger Wittges obtained his PhD degree from the University of Hohenheim, Germany, under the supervision of professor Krcmar and with the topic Connecting Business Process Modeling and Workflow Implementation. He then worked for three years as an IT project leader with debitel AG in Stuttgart, Germany. Since 2004, he has been operations head of the SAP Hochschul Competence Center (SAP University Competence Center (SAP HCC)) at Technische Universität München. His current research areas are standard software, service-oriented architectures, and performance metrics in ERP systems. He is also a certified technology consultant for SAP NetWeaver—Enterprise Portal & Knowledge Management.
