About the Contributors

**Eugenia M. W. Ng** is an associate professor in Department of Mathematics and Information Technology and Associate Dean of Graduate School at the Hong Kong Institute of Education. She has been a research investigator of various internal and external funded projects. Her publications have appeared in Issues in Informing Science and Information Technology, Journal of Interactive Instruction Development, of Information Systems Education, Journal of Quality School Education and Annals of Cases on Information Technology. Her book chapters have appeared in Subject Teaching and Teacher Education in the New Century: Research and Innovation, and Improving student learning: Learning-oriented assessment in action, Encyclopaedia of Information Technology Curriculum Integration, Encyclopaedia of Information Communications and Technology and Encyclopaedia of Networked and Virtual Organizations. She is the editor of Comparative blended learning practices and environments, Co-editor-in-Chief of International Journal of Web-based Learning and Teaching Technologies, a member of the editorial board of Annals of Cases on Information Technology, and reviewers for Journal of Computers in Human Behavior, Journal of Interactive Learning Research and Journal of Technology and Teacher Education.

**Nikos Karacapilidis** holds a Professor position at the University of Patras (field: Management Information Systems). His research interests lie in the areas of Technology-Enhanced Learning, Intelligent Web-Based Information Systems, e-Collaboration, Knowledge Management Systems, Group Decision Support Systems, Computer-Supported Argumentation, Enterprise Information Systems and Semantic Web. He has been appointed as Editor-in-Chief of the Advances in Web-based Learning (AWBL) Book Series, as well as co-Editor-in-Chief of the International Journal of Web-Based Learning and Teaching Technologies (IJWLTT), both published by IGI Global. More detailed information about his publications list, research projects involved and professional activities can be found at http://www.mech.upatras.gr/~nikos/.

**Mahesh S. Raisinghani** is an associate professor in the Executive MBA program at the TWU School of Management. He is a Certified E-Commerce Consultant (CEC), a Certified Information Security Manager (CISM) and a Project Management Professional (PMP). Dr. Raisinghani was awarded the 2008 Excellence in Research & Scholarship award and the 2007 G. Ann Uhlir Endowed Fellowship in Higher Education Administration. He was also the recipient of TWU School of Management’s 2005 Best Professor Award for the Most Innovative Teaching Methods; 2002 research award; 2001 King/Haggar Award for excellence in teaching, research and service; and a 1999 UD-GSM Presidential Award. His research has been published in several academic journals such as IEEE Transactions on Engineering Management, Information & Management, Information Resources Management Journal, Journal of E-
About the Contributors

***

Salam Abdallah is an IS&T academic and practitioner. Dr. Abdallah has a PhD in Information Systems from Curtin University of Technology, Australia. He has worked for several years with UN Relief and Works Agency (UNRWA) overseeing ICT facilities and curriculum development at schools and vocational training centers in UNRWA's entire field of operations. He is an active participant on the Global Text Project, and a founder member of Special Interest Group of the Association of Information Systems: ICT and Global Development. Dr. Abdallah is also an active researcher in the field of Information Systems and has published articles in local and international conferences and journals. Currently he is the Coordinator for the College of Business and Administration at Abu Dhabi University, Al Ain, UAE.

Nektaria Adaktioul holds a BSc in Physics and a MSc in Environmental Physics both from the University of Athens. She is a PhD Candidate working as a Research Assistant at the Remote Sensing and Image Processing Group of the Physics Faculty at the University of Athens. She has considerable experience in the area of Remote Sensing applications and is currently working on the design, development, application and evaluation of an electronic tool-learning platform, to support remote sensing instruction at a University level. Blended learning approaches and collaborative practices consist main elements of the research. She has participated in several scientific projects in the fields of remote sensing and environmental science, both research as well as education oriented.

Veena Adlakha is a professor of Production Management at the Merrick School of Business in the University of Baltimore, Maryland. She received her M.S. degree in Mathematics from Stanford University and the Ph.D. in Operations Research from the University of North Carolina at Chapel Hill. Her research on discrete event simulation, and fixed-charge transportation problem, web-based education has appeared in several journals including Networks, EJOR, Management Science, Operations Research, OMEGA, JORS, Total Quality Management, and e-Service Journal. Dr. Adlakha served on the Southeast Asia Fulbright Peer Review Committee of the Council for International Exchange of Scholars and the State Department for 2002-2004 and served as the Executive Director of the Production and Operations Management Society (POMS) for 1990-95. She served as the managing editor of the POM journal for 1991-95. Her current research interests include fixed-charge transportation problem, total quality management and web-based education.

Anil Aggarwal is a professor of Management Information Systems in the Merrick School of Business in the University of Baltimore, Maryland. He has published in many national international journals including Computers and Operations Research, Decision Sciences, Information and Management, eService, Production and Operation Management, Journal of EUC and Total Quality Management and Business Excellence. In addition, he has edited two book on web-based education. his current research interests include web-based teaching, model-based systems, decision support systems and educational issues in MIS.
**About the Contributors**

**Manuel Ahedo**, since 2006 he has been Associate Professor in Sociology in the University Rovira i Virgili (Catalonia – Spain), where he is a member of the Research Group in Social and Organizational Analysis, and a member of the GID (Group of Pedagogical Innovation) of the Faculty of Law Sciences of the same University. He is Bachelor (5 year- Licenciatura) in History in 1988 by the University of Deusto in Spain; Bachelor (5 year- Licenciatura) in Sociology in 1997 by the UNED (Spain’s National Distance University). He made an MSc in Science and Technology Studies by the University of Edinburg (Scotland, United Kingdom) in 1998. In 2002 he obtained his PhD degree in Sociology in the University of the Basque Country (Spain). His main areas of interest are comparative social sciences, with a major focus on comparative economic and educational sociology, mainly at the European Union level. Currently he is interested in the organizational and institutional factors in comparative socio-learning systems.

**Hilary Amberg** is a graduate student in the University of Florida’s College of Education, focusing on Counselor Education.

**Anshu Arora** is an Assistant Professor (Marketing) at College of Business Administration, Savannah State University, Savannah, Georgia, USA. She is a certified Project Management Professional (PMP) from Project Management Institute (PMI), USA. She has been awarded PhD in the area of Hypermedia CMEs from the Indian Institute of Technology, Delhi. She has written about 20 papers in National and International journals of repute, presented about 15 papers in National and International Conferences. She has about a decade of industrial and academic experience. She has been actively involved in major projects with Lufthansa German Airlines, Hyundai Motor India Limited, and Siemens India. Her book – “Hypermedia – From Multimedia to Virtual Reality” was published by Prentice Hall of India in April 2004. She has also contributed a chapter on “Creativity and Innovations in Organizations” in the book: “International Encyclopaedia of Organizational Behavior” by Pentagon Press, UK.

**Roxanna Bendixen** has a Ph.D. in Rehabilitation Science and serves as a Research Assistant Professor in the College of Public Health and Health Professions. Her doctoral work focused on qualitative and quantitative assessment of healthcare services for individuals with chronic illnesses following an OT intervention. Dr. Bendixen has more than 10 years of clinical experience specializing in assessment and treatment of children with chronic illnesses and disabilities. Her research focuses on participation and quality of life in children with Duchenne muscular dystrophy and in-home training for parents of children with autism. She teaches OT theory, therapeutic skills, and adult and pediatric assessment and intervention.

**Costas Cartalis** has completed his undergraduate studies at the University of Athens (B.S. In Physics) and pursued his graduate studies (University of Michigan, Ann Arbor) completing Masters Degree in Aerospace Engineering, Masters Degree in Atmospheric Physics and PhD in Remote Sensing (1989). He has also followed a post graduate course on Strategic Information Systems at the Heriot Watt University. C. Cartalis is an Associate Professor at the Department of Applied Physics of the University of Athens and visiting Professor at the University of Thessaloniki. He is responsible for the operation of the Remote Sensing and Image Processing Research Unit within the Division of Applied Physics of the Department of Physics. He has participated in several research projects funded by either national or EU funding (mostly from DG Research). He is member of the Scientific Committee of the European Environment Agency and of the Management Board of the International Olympic Academy.
Mei-Yu Chang is a professor in National Hsinchu University of Education, Taiwan, where she teaches the instructional design, assessment and research methods. She holds her Ph.D. in Instructional Design, Development and Evaluation in Syracuse University, and her master degree in Instructional Systems Technology in Indiana University, Bloomington. Her research interests include science teaching and learning, e-Learning and assessment.

Yu-Liang Chi is an Associate Professor and Chair of Information Management in the Business College at Chung Yuan Christian University, Taiwan. He received his Master degree in Computer Science Engineering and Ph.D. degree in Industry Engineering from the Arizona State University. His current teaching and research interests focus on distributed systems integration, intelligent system design, and knowledge engineering. His research has been published in leading academic journals such as The Electronic Library, Expert Systems with Applications, and International Journal of Services and Standards.

Spyros Christodoulou is a computer engineer and member of Research Academic Computer Technology Institute in Patras, Greece since 2004. He is a graduate of Computer Engineering and Informatics Department, Patras, Greece (2001) and received his master degree in Signal Processing and Telecommunications from the same department (2003). Since 2000, he has been with CTI, published papers in a number of conferences and participated in national and European research projects.

Robert Davis is an Associate Dean and Director of Graduate Programs in the McCoy College of Business. He is also a professor in the Department of Computer Information Systems. He earned his MBA and Ph.D. degrees from the University of South Carolina and his undergraduate degree from the University of North Carolina-Pembroke. He is the co-author of Operations Management: Concepts in Manufacturing and Services. His research has been published in leading academic journals such as Decision Support Systems, Management Science, Journal of Marketing, Journal of Organizational Computing and Electronic Commerce, International Journal of Production Research, and Journal of Business Research.

Gordon Deline is a Senior Project Manager, Project and Risk Management, at CBC/Radio-Canada. Gordon has over twenty years of experience in software systems research and development in North America, Asia, and Europe, designing and implementing virtual reality, telerobotic/supervisory control, object database, supply chain, reverse logistics, and business intelligence systems. Current research interests include systems development in the context of alignment and integration with strategy and business knowledge, and distributed heterogeneous implementation teams with client/vendor/competitor membership.

Susan Donaldson is the Project Director for Dr. Jennifer Elder’s R01 grant: Fathers as in-home trainers of autistic children. She has her BSN and MSN from the University of Florida and is also a Nationally Board Certified Psychiatric-Mental Health Nurse Practitioner.

Jennifer Elder has spent the last 27 years studying autism and related child neuropsychiatric disorders. She has developed and tested a variety of in-home parent training components, evaluated the effects of a gluten-free, casein-free diet on children with autism, and participated in several interdisciplinary autism projects. She is currently the Principal Investigator on a four-year R01 grant from the National
Institute of Nursing Research at NIH ($1.1 million) to continue evaluating the effects of father-directed training for children with autism. This includes a newly developed web-enhanced component.

**Richard Ferdig** is the RCET Research Professor and Professor of Instructional Technology at Kent State University. He works within the Research Center for Educational Technology and also the School Lifespan Development & Educational Sciences. He earned his PhD in educational psychology from Michigan State University. At Kent State University, his research, teaching, and service focus on combining cutting-edge technologies with current pedagogic theory to create innovative learning environments. His research interests include online education, gaming, and what he labels a deeper psychology of technology. In addition to publishing and presenting nationally and internationally, Ferdig has also been funded to study the impact of emerging technologies.

**Dragan Gašević** is an Assistant Professor in the School of Computing and Information Systems at Athabasca University and an Adjunct Professor at Simon Fraser University. He is a recipient of Alberta Ingenuity's 2008 New Faculty Award. His research interests include semantic technologies, software language engineering, and learning technologies. He has (co-)authored around 190 research papers published. He has been serving on editorial boards of three international journals and has edited special issues in journals such as IET Software and IEEE TSE. He has been the organizer, chair, and member of program committees of many international conferences.

**Fabio Gasparetti** is a Postdoctoral Fellow at the Artificial Intelligence Lab of the Department of Computer Science and Automation, Roma Tre University. His research interests include: Personalized Search, User Modeling and Focused Crawling. He has collaborated and is still collaborating in National and International research projects regarding Internet technologies.

**George Gkotsis** is a PhD student at the Mechanical Engineering and Aeronautics Department, University of Patras. He works as a research collaborator at the E-learning Sector of the Research Academic Computer Technology Institute, Patras, Greece. He holds a M.Sc. from the Computer Engineering and Informatics Department, University of Patras (2005), where he got his Diploma (2002). His research interests include Computer Supported Collaboration Systems, Argumentation Systems, Knowledge Management and Visualization, Web Engineering and Hypertext.

**Bob Heller** obtained his Ph.D. in Experimental Psychology in 1992 at the University of Alberta and held a Post-Doctorate Research Fellowship from 1992-94, in the Centre of Excellence on Aging Research Network where he conducted research on driving, dementia, and aging. He joined the Centre for Psychology at Athabasca University in 2001 and became interested in conversational agents and their role in distance education. This research has evolved into an investigation of animated historical figures as pedagogical agents and their place in immersive worlds.

**Victor Hernandez-Gantes** received an M.S. in Agricultural Education with concentration in International Agricultural Development, and a Ph.D. in Educational Research and Evaluation from Virginia Tech. He has served as Associate Researcher at the Center on Education and Work, University of Wisconsin-Madison, as Associate Professor at Florida State, and as Senior Educational Researcher in the Center for Educational Technologies (CET)—a center sponsored by NASA—at Wheeling Jesuit University.
He currently leads the doctoral program in Career and Workforce Education at the University of South Florida. Over the years he has collaborated with organizations and faculty at a number of universities nationally and internationally. This synergistic collaboration has resulted in a number of research and demonstration projects in the areas of professional development, vocational and technical education, and the integration of mathematics and career education supported by the U.S. Department of Education, National Center for Research in Vocational Education, and NASA. He has published numerous articles on the impact of programs designed to connect school- and work-based learning on student learning and career development. Over the past decade he has been involved with online program development in graduate education and has written on topics relevant to program planning and about bridging online teaching and adult learning principles.

Maureen Hinkley, Ed.D. is a Visiting Professor of Educational Technology and School Library Media at the Graduate School of Education, at Fairfield University in the United States. Her background was first in Library and Media Studies at the University of Northern Colorado. Later, she focused her doctoral studies in the area of transcultural educational development at Teachers College Columbia University, where her dissertation research was conducted with a teacher training program in a Central and Eastern European cross-cultural setting. More recently her research is focused on teacher development and the uses of technologies for optimal learning environments.

John Hope, Ph.D., his background is teaching in New Zealand primary, intermediate and secondary schools. He left school teaching after some years as the principal of New Zealand’s largest primary school, a school featuring nationally recognised programmes for gifted students and an international reputation for use of ICT. Later in his career John became a school inspector and curriculum writer and was seconded to the University of Auckland as Director Primary Teacher Education to establish initial teacher education programmes. Following successful establishment of teacher education programmes, other University of Auckland appointments followed, including Director of the University of Auckland Principals Centre, and Associate Dean (International) positions in two faculties. He currently directs several overseas twinning degree programmes, coordinates all international activity within the Faculty of Education and has university-wide international responsibilities. Teaching and supervision interest include pedagogical applications of ICT in learning, educational leadership and gifted education. Research activity includes the same topics, but also includes research into education for international settings.

About the Contributors

Vasilis Kallistros is a computer engineer and member of Research Academic Computer Technology Institute in Patras, Greece since 1997. He is a graduate of Computer Engineering and Informatics Department of the University of Patras, Greece (1987). He holds a masters degree from Stanford University (1989). His research interests include Computer Supported Collaboration Systems, Educational Software, Web-based Information Systems, Role-based Access Control models.

Nikos Karousos holds a Diploma (1998) and a M.Sc. (2000) from the Dept. of Computer Engineering and Informatics University of Patras, Greece. He is currently a PhD student in the provision of hypertext services. He works in the E-Learning Sector of the Research Academic Computer Technology Institute, Patras, Greece. His research is focused on the areas of Hypertext/Hypermedia, Web Services, Web-based Information Systems and Knowledge Management.

Carol Kennedy, Ph.D. is the Principal Investigator for the Fordham University/University of Oregon Project, establishing the NY center of the National Center for Study of Electronic Text to help at-risk readers with learning disabilities who are ESL/ELL learners. She had been the Visiting Assistant Professor/Director of the Educational Technology Master’s Degree Program at Fairfield University Graduate School of Education, creating and teaching the integration of technology into the K-12 curriculum, on-site and in blended classes. Dr. Kennedy has created and taught online graduate teacher-education programs for Seton Hall University, The New School-Teaching and Learning With Technology Graduate Certificate Program, conducted technology integration workshops for pre-service and in-service teachers at Fordham University and Long Island University. She is a curriculum writer for the AAAS ScienceNetlinks.org/Science-in-Plain-Language Wiki, and an instructional designer for Pearson Publishing’s Virtual High School creating new courses.

Kinshuk is Professor and Director of School of Computing and Information Systems at Athabasca University, Canada. He also holds iCORE/Xerox/Markin Industrial Research Chair in Adaptivity and Personalization in Informatics.

Hsun-Ming Lee received his PhD in Industrial Engineering with a focus on information engineering from Arizona State University, USA. He is currently an Assistant Professor of Computer Information Systems in the McCoy College of Business Administration at Texas State University - San Marcos, USA. His research interests include Web engineering, decision support systems, and supply chain management. His research has been published in leading academic journals such as Decision Support Systems, Expert Systems with Applications, and International Journal of Services and Standards.
Carla Limongelli is associate professor in the Department of Computer Science and Automation at “Roma Tre” University, where she teaches computer science courses. Her research activity mainly focuses on artificial intelligence planning techniques, intelligent adaptive learning environments, user modeling, and user-adapted interaction.

Fuhua Lin is Professor of School of Computing and Information Systems of Athabasca University, Canada. He is conducting research in Intelligent Systems, Multi-Agent Systems, Virtual Reality, and their applications. Dr. Lin has more than sixty publications, including edited books, journal papers, book chapters, conference papers, and reviews. Dr. Lin’s current main research interest is in the design and the development of reasoning models and mechanism of intelligent agents that facilitate adaptive learning. Dr. Lin has taught various undergraduate as well as postgraduate courses in Mathematics, Computer Science, and Information Systems. Furthermore, he has led and actively participated in numerous national and international research projects since 1986.

Christos Mettouris is a graduate of the Computer Engineering & Informatics Department in the University of Patras. He holds a Masters degree of the same department. He is a member of the e-Learning sector of the Research Academic Computer Technology Institute (RACTI). He has published award-winning papers in national conferences and participated in national and European research projects. His research interests include Human Computer Interaction, Web-Based Information Systems, Wireless technologies and Mobile Networks.

Alessandro Micarelli is a Full Professor of Artificial Intelligence at the Roma Tre University, where he is in charge of the Artificial Intelligence Laboratory at the Department of Computer Science and Automation. His research interests include: Adaptive Web-Based Systems, Personalized Search, User Modeling, Artificial Intelligence in Education.

Dora Nousia is a senior Computer Engineer educated at the University of Patras, and currently, director of the eLearning Sector of Research Academic Computer Technology Institute(CTI), Greece. She has designed and managed large pilot projects on the utilization of ICT in schools in Greece and abroad, and she is a consultant for various aspects of the application of eLearning into the entire educational system. She leads projects related to innovative software development for communities, collaboration and distance learning.

Mike Procter obtained his BSc in Electrical Engineering in 1982 and is a registered Professional Engineer in Alberta, Canada. He has over 25 years experience in the information technology industry, with a background in realtime systems development, system and network management, project management and enterprise application deployment. He is currently an IT consultant working for Athabasca University developing software for research in animated conversational agents.

Mahesh Raisinghani, is an Associate Professor in the Executive MBA program at the TWU School of Management. He is a Certified E-Commerce Consultant (CEC) and a Project Management Professional (PMP). Dr. Raisinghani was awarded the 2008 Excellence in Research & Scholarship award and the 2007 G. Ann Uhlir Endowed Fellowship in Higher Education Administration. He was also the recipient of TWU School of Management's 2005 Best Professor Award for the Most Innovative Teaching Methods;

Filippo Sciarrone received the degree in mathematics in 1982 and the specialization in Computer Science in 1985, both at the University La Sapienza of Rome. Since 1994, he collaborates with the Department of Computer Science and Automation, of the Roma Tre University, where he has got the Ph.D. in Computer Science in 2004. His research interests mainly focus on user modeling, machine learning and e-learning. He is currently Software Division Manager of Open Informatica srl, and holds a contract for research in adaptive e-learning with CRMPA, the Research Center of Pure and Applied Mathematics of the University of Salerno. Filippo Sciarrone collaborates with the Department of Computer Science and Automation at the “Roma Tre” University, where he received the PhD degree in computer science in 2004. His research interests mainly focus on user modeling, machine learning, and e-learning. He is currently software division manager of Open Informatica srl.

Fu-Yu Shin is a teacher in Jian-Guo Elementary School in Taipei County. He teaches computer courses, such as digital image processing, media design, and applications of ICT in the school. He received his master degree in Curriculum and Instruction from National Hsichu University of Education, Taiwan in 2005.

Wernhuar Tarn was graduated from the Department of Electrical and Control Engineering, National Chaio Tung University, Taiwan in 1984. After 2 years of military service, he joined State University of New York at Buffalo and received his M.S. degree and Ph.D. from the Electrical and Computer Engineering Department in 1988 and 1992, respectively. In 2003, he was a visiting scholar of the Distance and Online Learning Center, Oxford University, UK. He is currently a professor and the chairman in the Institute of Computer Science, National Hsinchu University of Education, Taiwan. His research interests include virtual reality, web-based learning, computer, and network technologies in education.

Marco Temperini is an associate professor in the Department of Computer and System Sciences, Sapienza University of Rome, where he teaches programming techniques and programming of the Web. His recent research activity is on the theory and technology of Web-based distance learning, social and collaborative learning, and Web-based participatory planning.

Manolis Tzagarakis holds a Ph.D. in Computer Engineering & Informatics and is currently a researcher at the Research Academic Computer Technology Institute in Patras, Greece. He has published papers in international conferences and journals. His research interests are in the areas of Hypertext and Hypermedia, Knowledge Management, Collaboration Support Systems, Web-based Information Systems, Technology-enhanced Learning, and Group Decision Support Systems. He has served the program committees of several conferences and workshops.
**Gregory Valcante** earned his Master’s degree in Special Education from the College of William and Mary in Virginia and his Ph.D. from the University of Florida. He has worked as a teacher, administrator and researcher in the area of autism for 29 years and is the Director of the University of Florida Center for Autism and Related Disabilities. Dr. Valcante is a long time member of ASA. His research interests include Family Support, Collaboration & Team Building, Inclusion, Toilet Training, Social & Play Skills, and Communication Skills.

**Giulia Vaste** got the Ph.D. in Computer Science at “Roma tre” University. Currently she collaborates with CASPUR on an E-Learning project. Her research concerns Intelligent Adaptive Learning Environments.

**Victor Wang,** Ed.D., Faculty Mentor/Dissertation Chair, joined the faculty at Northcentral University, Arizona in 2009 and has been mentoring doctoral students and teaching research methods classes. Dr. Wang’s research and writing activities have focused on workforce education, the foundations of adult education, adult teaching and learning, training, transformative learning, cultural issues in vocational and adult education, distance education, human performance technology, leadership theory and practice, HRD/HRM and curriculum development. He has published over 100 journal articles, book chapters and books within eight academic years and has been a reviewer for five national and international journals. Currently he serves as the editor in chief of the International Journal of Adult Vocational Education and Technology. He has won many academic achievement awards from universities in China and in the United States, including the Distinguished Faculty Scholarly & Creative Achievement Award in 2009. Dr. Wang taught extensively as a professor in Chinese universities prior to coming to study and work in the United States in 1997. He has taught adult learners English as a second language, Chinese, computer technology, vocational and adult education courses, research methods, administrative leadership, human resource management and curriculum development for the past 20 years in university settings. Two of the books he has written and edited have been adopted as required textbooks by major universities in the United States, and in China. In addition, numerous universities worldwide including those Ivy League Universities have cataloged his books and journal articles.

**Dunwei Wen** is an Associate Professor in the School of Computing and Information Systems at Athabasca University, Canada. His research interests include Natural Language Processing, Information Retrieval, Machine Learning, Intelligent Agents, Knowledge Representation, Reasoning and Discovery, and Software Architecture for Business and E-learning. Dr. Wen’s current research aims to advance theories and techniques that facilitate accessing, sharing and reusing different forms of information and knowledge in learning communities through intelligent services such as automated question-answering, knowledge querying and text mining. He has been involved in large-scale research projects for exploration based adaptive educational environments and has published over 200 research papers in international refereed journals, conferences and book chapters. He is Founding Chair of IEEE Technical Committee on Learning Technology and editor of the SSCI indexed Journal of Educational Technology and Society (ISSN 1436-4522).
