About the Contributors

**Felix B. Tan** is Professor of Information Systems, Discipline Chair of Business Information Systems and Director of the Centre for Research on Information Systems Management (CRISM) at Auckland University of Technology, New Zealand. He is the Editor-in-Chief of the Journal of Global Information Management. He was on the Council of the Association for Information System from 2003 to 2005. He has held visiting positions with the National University of Singapore, The University of Western Ontario, Georgia State University and The University of Hawaii at Manoa. Dr. Tan is internationally known for his work in the global IT field. His other research interests include user behaviour in e-commerce, m-commerce, Web 2.0, and IS strategy, management, and governance. Dr. Tan has published in *MIS Quarterly, Information & Management, Communications of the AIS, IEEE Transactions on Engineering Management, IEEE Transactions on Personal Communications, Information Systems Journal, Journal of Information Technology, International Journal of Electronic Commerce, Communications of the ACM*, as well as other journals and refereed conference proceedings.

***

**Monica Adya** is an Associate Professor of Management at Marquette University. She received her PhD in Management Information Systems from Case Western Reserve University. Monica’s research spans two areas – (a) IT workforce spanning themes related to diversity, offshore team management, and workforce planning, and (b) knowledge management and decision systems, particularly those relevant to business forecasting. Her work has been published in *Decision Sciences, Journal of Innovative Education, Human Resource Management, IT & People, International Journal of Forecasting, Information Systems Research, Journal of Forecasting, and Journal of Global Information Management* among others. Monica has been co-investigator on several research grants including those from 3M Foundation and Naval Surface Warfare Center.

**Ana Rosa Del Águila-Obra** is Associate Professor of Management at the University of Malaga (Spain). She holds degrees in business administration (BA, major in management) and business administration (PhD). Ana has authored various books, edited by RA-MA Editorial and Alfaomega, and has published in different journals including Technovation, Facilities, Journal of Global Information Technology Management, Internet Research, Electronic Networking Applications and Policy. She has published chapters in reviewed books edited by Kluwer Academic Publishers and Idea Group Inc. She has also published in Spanish reviewed journals such as Investigaciones Europeas de Dirección y Economía de la Empresa, Economía y Empresa, Estudios Turísticos, Economía Industrial, Alta Dirección,
Esic-Market, Boletín Económico de Información Comercial Española, Revista Asturiana de Economía, Revista Europea de Dirección y Economía de la Empresa, and Información Comercial Española. Her research interests include organizational innovation, Internet technology adoption, business to business electronic commerce, inter-organizational trust, and supply chain management.

**Said S. Al-Gahtani** is an Associate Professor of computer Information Systems in the Department of Administrative Sciences at King Khalid University, Abha, Saudi Arabia. He has a BSc in systems engineering from King Fahad University of Petroleum & Minerals, MSc in computer sciences from Atlanta University, Atlanta, Georgia, and a PhD in computer-based Information Systems from Loughborough University, Loughborough, UK. His research interests include the user acceptance of Information Technologies, the modeling of IT acceptance, end-user computing, and organizational cross-cultural research. He has published journal research articles in Information Technology & People, Journal of Global Information Technology Management, Information Technology for Development, Information Resources Management Journal, and the Behaviour & Information Technology.

**Aini Aman** is a senior lecturer at Universiti Kebangsaan Malaysia (UKM), Malaysia. Since 1993, she has been involved in teaching, research and consultancy projects in the broad area of auditing, accounting and business. Her PhD involved an in-depth study of offshore software development process in UK, India, Bangladesh, and Malaysia. Her post doctoral study involved a work on Risk and Control of Offshore Outsourcing of Accounting Services that has been commissioned by the Institute of Chartered Accountants in England and Wales. Dr. Aini’s current research is accounting outsourcing in Malaysia and evaluation of e-government projects.

**Georgia Beverakis** completed her undergraduate thesis study at the University of New South Wales in 2006. She was a co-op scholar, graduating with first class honours, and is now working for Procter & Gamble in their Customer Business Development department in Sydney.

**Dubravka Cecez-Kecmanovic** is a Professor and head of Information Systems, Technology and Management at the Australian School of Business, University of New South Wales (UNSW), Sydney, Australia. Her research has spanned a wide domain from technological design and applications of formal logics in IS, to studies of social systems of information and government IS, to ethnographies of electronically mediated work and communication, to exploring social theoretic foundations of IS. Her current teaching includes research methodologies in IS. Her recent research interests include IS—organisation co-emergence, the sense-making approach to organizations and Information Systems, and critical social approaches to understanding IS and their human and social implications.

**Patrick Y. K. Chau** is a Professor of Information Systems at the University of Hong Kong. He received his PhD in business administration from the Richard Ivey School of Business at the University of Western Ontario, Canada. His current research interests include IS/IT adoption and implementation, outsourcing and knowledge management. He has published papers in journals including MIS Quarterly, Communications of the ACM, Journal of Management Information Systems, Decision Sciences, Journal of AIS, Information & Management, and Journal of Organizational Computing & Electronic Commerce.
Guoqing Chen received his PhD from Catholic University of Leuven and is currently a Professor of Information Systems at the School of Economics and Management, Tsinghua University. Dr. Chen has wide publications in international journals such as Decision Support Systems, IEEE Transactions, Information Systems, Information Sciences, et cetera. He also published several HBS cases on China. His research interests include management Information Systems, IT management, and business intelligence.

John D’Ambra holds a doctorate in Information Systems from the University of New South Wales where he is currently an Associate Professor and Academic Director of the Master of Business and Technology program. D’Ambra’s research interests include: computer-mediated communication within organisations, user perceptions of the value of the World Wide Web, and Information technology in the tourism sector. He has published extensively in leading international journals. Prior to entering academia D’Ambra’s experience in the commercial IT industry included positions at Pacific Power and the Australian Broadcasting Corporation.

Geoffrey Dick is a Senior Lecturer in Information Systems and Director of the undergraduate programmes for the Australian School of Business at the University of New South Wales. He is a reviewer on the global textbooks project, a director of the International Telework Academy, and a member of the Board of Editors for the Journal of Information and Management. His research (around 60 publications) is mainly in the areas of telecommuting (his PhD) and on-line education – he is the recipient of an ICIS prize for best paper in education. He is a visiting Professor at Georgia Southern and recently has been a visiting fellow at the University of Malaya, the Tec de Monterrey in Mexico, and Agder University College, Norway.

Xunhua Guo received his PhD from Tsinghua University and is now an Assistant Professor of Information Systems at the School of Economics and Management, Tsinghua University. He has published in journals including Communications of the ACM, Information Sciences, Information Systems Frontier, and Journal of Enterprise Information Management. His research interests include user behavior in e-commerce, Information Systems adoption, organizational change, and business intelligence.

Zixiu Guo is currently a Lecturer of Information Systems at the School of Information Systems, Technology and Management at the University of New South Wales, Sydney, Australia. She earned her PhD in Information Systems from the University of New South Wales. Her research interests include the cultural impact on computer-mediated communication adoption and use, virtual team performance, ERP implementation, and technology-mediated learning. She has had several articles published at IEEE Transactions on Professional Communication and leading international conferences.

H. I. Hamdy is Professor of mathematics and statistics at the College of Business Administration, at Kuwait University. His area of research interest includes sequential analysis, reliability analysis and life testing, applied multivariate analysis, questionnaire design and sampling surveys, and application of statistics in business. He published in several journals such as Canadian Journal of Statistics, Insurance: Mathematics and Economics.
Leelien Ken Huang is now an Assistant Professor with the Graduate Institute of Management of Technology at Feng Chia University, Taichung, Taiwan. He also holds a position as the Section Chief for planning the University Development. He received his MA in business administration from the University of Georgia-Athens, USA and DBA from Curtin University of Technology-Perth, Australia. He has substantial industry experience with banking business and technology strategy managerial positions. His current research interests include e-learning, mobile technologies, the strategic use of IT, and cross cultural research issues in IS.

Michael Kyobe is an Associate Professor of Information Systems at the University of Cape Town, South Africa. He holds a PhD in computer Information Systems and has consulted extensively with the public and private sectors in Information Systems management and computer security. His research interests include: strategic alignment, strategic Information Systems planning, computer auditing & security, IT resource utilization, and knowledge management.

One-Ki (Daniel) Lee is an Assistant Professor in the Department of Management Science and Information Systems at the University of Massachusetts Boston. He received his PhD from the City University of Hong Kong. Prior to joining City University, he has several years of industry experience in business/IT strategy development and Internet communication solution design and development in North America. His research interests include IT-enabled organizational agility, organizational IT strategy, agile project management, and organizational computing behavior. Dr. Lee’s work has appeared in many leading conferences including ICIS, HICSS, PACIS, and AMCIS, and in the Communications of the ACM.

Kai Lim is a Professor of Information Systems at City University of Hong Kong. He received his PhD from the University of British Columbia, Canada. Prior to joining City University, he was on the faculty of Case Western Reserve University and the University of Hawai’i. His research interests include e-commerce–related adoption issues, human–computer interactions, and cross-cultural issues related to Information Systems management. Kai has engaged in executive training in Hong Kong, Shanghai,
and Beijing. He has won numerous teaching awards and is one of the top-ranking teachers teaching in the City University’s EMBA programs. His work has appeared in some of the most prestigious IS journals, including Information Systems Research, Journal of Management Information Systems, and MIS Quarterly. He is serving or has served on the editorial board of Information Systems Research, MIS Quarterly, and Journal of the Association for Information Systems.

**Dhruv Nath** is Professor and Chairman of the Doctoral Program at the Management Development Institute (MDI), Gurgaon, India. Earlier, he was Senior Vice President at NIIT Ltd, a leading software and education company. Prof. Nath holds a B Tech in Electrical Engineering and a PhD in the area of Computer Science, both from IIT Delhi. He has conducted Top Management Workshops in IT and has been a consultant in the area to several organisations such as Glaxo, Unilever, Gillette, Nestle, et cetera. He has published research papers in international journals such as the IEEE Transactions on Computers, and has written two books on managing IT.

**Brian Nicholson** is a Senior Lecturer at Manchester Business School. Since 1995, he has been involved in teaching, research, and consultancy projects in the broad area of global outsourcing of software and other business processes. This has involved work in India, China, Costa Rica, Iran, Egypt, Malaysia, and Bangladesh. Dr. Nicholson’s research at the firm level has resulted in several influential publications in international journals and a book, *Global IT Outsourcing* (Cambridge University Press, 2003). Policy level consultancy studies have been undertaken for the governments of Costa Rica and Iran to stimulate software exports. In the case of Costa Rica, this resulted in production of a national level strategy. Recent work has been commissioned by the Institute of Chartered Accountants in England and Wales, titled “Risk and Control of Offshore Outsourcing of Accounting Services.”

**Koffi N’Da** is an Assistant Professor in the department of Decision Sciences and Management Information Systems at the E. Philip Saunders College of Business, Rochester Institute of Technology. His research interests include: e-commerce/e-business, Information Technologies (IT) adoption and use in developing countries, IT adoption and use by minority-owned businesses, and digital entrepreneurship.

**Antonio Padilla-Meléndez** is Associate Professor of Management at the University of Malaga (Spain). He holds degrees in economics and business administration (BA, major in management) and business administration (PhD). He is managing director of the research team “E-business.” Antonio has authored various books and published in different journals including Technovation, Facilities, Journal of Global Information Technology Management, Internet Research, and International Journal of Technology Management. He has also published chapters in reviewed books edited by Kluwer Academic Publishers and Idea Group, and papers in Spanish reviewed journals. His research interests include technological innovation in SMEs, technology adoption, and the researcher perspective in open innovation.

**Michael Parent** is Associate Professor and Director of the CIBC Centre for Corporate Governance and Risk Management at the Segal Graduate School of Business, Simon Fraser University, Vancouver, Canada. He received his MBA and PhD degrees from Queen’s University, Kingston, Canada. His current research interests centre on governance practices, e-business and social media, luxury brands, and sustainable technologies. He has published in practitioner-oriented journals like the *California Manage-*
About the Contributors

Michael Bailey is a Professor of Marketing and Business Strategy at the RIT College of Business. He has written over 50 refereed journal articles on marketing and business planning management in such peer-reviewed journals as Journal of Management Information Systems (JMIS), Journal of the Academy of Marketing Science (JAMS), California Management Review, and Business Horizons. He also serves as an editorial board member for Decision Support Systems and The Journal of the Society for Information Management (JSIM). A paper on ambush marketing he co-authored just won the “2010 Article of the Year” prize from Business Horizons. Michael has also written over 30 teaching case studies and co-authored three case teaching books. A case he recently co-authored on Second Life won the “2010 Pearson Education Prize for the Best Case Study” at the Academy of Marketing Conference.

Zeyu (Jerry) Peng is a PhD student in the Research Group of Knowledge and Innovation Management at the City University of Hong Kong and the University of Science and Technology of China Joint Advanced Research Center (Suzhou). Prior to joining the research center, he studied in Department of Management Science at University of Science and Technology of China. His research interests include the impacts of IT on individual performance, IT-enabled absorptive capacity, and the impacts of culture on IT adoption and continuance.

Ashok J. Robin is a Professor of Finance at the RIT College of Business where he also directs the Master of Science in Finance program. He has published in diverse areas such as asset pricing, dividend policy, international accounting, and corporate governance. He works on a broad range of topics concerning governance ranging from micro-issues such as director compensation/incentives to macro-issues such as how national institutional factors affect the quality of accounting information.

Alastair Robb is a Lecturer in the Business Information Systems Cluster at University of Queensland Business School. His qualifications are in Business and a PhD in Commerce (Information Systems) from the University of Queensland. Dr. Robb has held positions in the automotive industry and was a Director of a financial mutual. His research interests lie in the fields of IT governance, data quality, deceptive behaviour in communications, XBRL-based reporting systems, and systems success. He has published in peer-reviewed journals such as JGIM, IJAIS, and Communication Reports.

Gregory M. Rose is Associate Professor in the College of Business at Washington State University. He received his Ph.D. in the CIS department at Georgia State University, an M.B.A. from Binghamton University, and a B.S. in business administration from the University of Vermont. Gregory has more than 25 scholarly publications including those in journals such as MIS Quarterly, IEEE Transactions on Engineering Management, Accounting, Management and Information Technologies, European Journal of Information Systems, Psychology and Marketing, Information Systems Journal, Journal of Global Information Management, and Communications of the AIS. A 1998 ICIS doctoral consortium fellow, he has won multiple teaching awards, a post-doctoral fellowship from the University of Jyväskylä (Finland), and was an invited scholar at University of Pretoria (South Africa). His current research involves innovation theory, organizational learning, and global issues in IT. He also serves on the editorial board of the Journal of Global Information Management.

Kamel Rouibah is an Associate Professor of Information Systems, College of Business Administration (CBA) at Kuwait University. He holds a PhD in Information Systems from Ecole Polytechnique of Grenoble, France. Before joining CBA, he worked at Faculty of Technology Management at Eindhoven (Netherlands) and Institut National de la Recherche Scientifique (France). His research interests include design of Information Systems, management Information Systems, engineering data management, work-

**Hung-Pin Shih** is an Associate Professor in the Department of Computer Science, Hsuan Chuang University, Taiwan. He received his PhD from the National Chiao Tung University in Taiwan. His papers have appeared or are to appear in such journals as Information & Management, Journal of Strategic Information Systems, and Behaviour & Information Technology. His research interests include e-shopping, e-learning, CSCW, and IS/IT diffusion.

**Dong-Hee Shin** has been a faculty member at Sungkyunkwan University since 2009. Dr. Shin has been invited as a World-Class Scholar through World Class University (WCU) program by Korean Ministry of Education, Science & Technology. Prior to joining SKK University, Dr. Shin was an Assistant Professor in the College of Information Sciences and Technology at Pennsylvania State University. He has been awarded the Outstanding Research Award (2007), the Distinguished Achievement Award (2009), and the Distinguished Teaching Award (2008).

**Varadharajan Sridhar** is a Research Fellow at Sasken Communication Technologies, Bangalore, India. He received his Ph.D. from the University of Iowa, U.S.A. Dr. Sridhar taught at Ohio University and American University, USA; University of Auckland, New Zealand; SP Jain Institute, Singapore and Dubai; Indian Institute of Management Lucknow, and Management Development Institute, India. Dr. Sridhar’s primary research interests are in the area of telecommunication management, Information Security and global software development. His recent publications are in *Telecommunications Policy, Netnomics, Journal of Cases in Information Technology, Journal of Organizational End User Computing, Journal of Global Information Management, and Communications of the Association of Information Systems*. He was the recipient of the Nokia Visiting Fellowship awarded by the Nokia Research Foundation. He is a member of government committees in telecom and IT. Dr. Sridhar contributes regularly in leading Indian business newspapers on telecom policy related issues. He is the Co-Editor of *International Journal of Business Data Communications and Networking* and is on the editorial board of the *Journal of Global Information Management*. He is a member of ACM and AIS.

**Detmar W. Straub** is the J. Mack Robinson Distinguished Professor of Information Systems at Georgia State University. Detmar studies international IT, computer security, Net-enhanced organizations (e-Commerce), and IS research methods. He holds a DBA (Doctor of Business Administration; Indiana; MIS) and a PhD (Penn State; English). He has published 149 papers in journals such as *MISQ, JGIM, Management Science, ISR, JMIS, JAIS*, and a raft of other top journals. Detmar is currently Editor-in-Chief of *MIS Quarterly* and Associate Editor for the *Journal of International Management*. Former VP of Publications for AIS, he has been co-program chair for AMCIS and ICIS. He was inducted as AIS fellow (2005). He is the recipient of the Alumni Distinguished Professor Award at Georgia State University (2008), an award given to the faculty member in a 1,000 plus member faculty with the highest achievements in research, teaching, and service.
About the Contributors

**Carina de Villiers** started her career in 1979 at the University of South Africa as a Junior Lecturer in Computer Science. She joined the University of Pretoria in 1996 and is currently a Full Professor and Head of the Department of Informatics. She has a BSc (Computer Science), Higher Education Diploma, Diploma in Tertiary Education, MEd (Didactics) cum laude, Honours in Computer Science and a DCom (Informatics) degree. She has published 8 books, 16 articles in peer-reviewed international journals, and delivered more than 40 international and national conference papers. She is a member of several international bodies, National Research Foundation-rated researcher, and reviewer for a number of international journals. She is an associate editor for the Journal of Informatics Education and Research and serves on the editorial board of Information Technology for Development.

**Mo (Winnie) Wang** is a MPhil student in the Department of Information Systems, City University of Hong Kong. Before joining City University, she got her Bachelor degree in management at Renmin University of China. Her research interests are knowledge management and culture influence on IT implementation. Her research work has been presented in Pacific Asia Conference on Information Systems.

**Vanita Yadav** is an Assistant Professor of Strategic Management at the Institute of Rural Management Anand (IRMA), India. She holds a Doctorate in Management from MDI, Gurgaon, India. She has more than 6 years of work experience in research, academia, & industry. Vanita has published and presented 20 research papers in refereed International Journals like IRMJ, JGIM, IJIDE, and others, conferences and books. She has published two case studies at Harvard Business School publications. Her case study on outsourcing was ranked as the “Most Popular Case” by Asia Case Research Centre (ACRC), Hong Kong. She is on the editorial review board of the International Journal of Innovation in the Digital Economy (IJIDJE). Her research interests are in the areas of managing innovation, strategic management, outsourcing/offshoring, and corporate governance & social responsibility.

**Nan Zhang** received his PhD from Tsinghua University and is currently a postdoctoral researcher in the School of Public Policy & Management, Tsinghua University. His research interests include e-government and mobile government, ICT adoption and diffusion, and cultural issues of information management. His work has been published in journals like *Journal of Global Information Management, Information Systems Frontiers*, and *Tsinghua Science & Technology*.
