About the Contributors

**Susheel Chhabra** is Associate Professor of Information Technology at Lal Bahadur Shastri Institute of Management (Delhi, India) and is also acting as a programme coordinator, PGDM (MBA). His areas of research and consultancy include e-government, e-business, computer networks, and software engineering. He has published several research papers on international and national level journals. He has co-authored a textbook on human resource information systems, edited a special issue of International Journal of E-Government Research on strategic e-business model for government, and also co-authored the edited book *Integrating E-Business Models for Government Solutions: Citizen-Centric Service Oriented Methodologies and Processes* (IGI Global, USA). He is currently engaged in several consultancy and training assignments on social change for human development, e-governance, e-business, and ERP for ISID, NTPC, LBSRC, etc.

**Hakikur Rahman** (PhD) is the Project Coordinator of the Sustainable Development Networking Programme (SDNP) in Bangladesh, a global initiative of UNDP since December 1999. He also acts as the Secretary of South Asia Foundation Bangladesh Chapter. Before joining SDNP, he worked as the Director, Computer Division at Bangladesh Open University. He has written several books and many articles/papers on computer education for the informal sector and distance education. He is the Founder-Chairperson of Internet Society Bangladesh Chapter, Editor of the Monthly Computer Bichitra, Founder-Principal and Member Secretary of ICMS Computer College, Head Examiner (Computer) of the Bangladesh Technical Education Board, and Executive Director of BAERIN (Bangladesh Advanced Education Research and Information Network) Foundation. He is also involved in activities related to establishment of a IT based distance education university in Bangladesh.

**Manuel Acevedo** works since 2003 as an international consultant on ICT and Development (with government, civil society, multilateral agencies and business entities), researcher on development networks, and lecturer on ICT4D in Spanish universities. Recent engagements include working as senior advisor to the Argentinian National Programme for the Information Society Programme, strategic planning for UN Volunteers (UNV), co-production of a guide for ICT mainstreaming for the Spanish Secretariat for International Cooperation and evaluations for UNDP, UNV and civil society organizations. From 1994 to 2003 he worked with UNDP and UNV, where he set up in 2000-2003 the first e-Volunteer unit in an development agency, and was responsible for launching the programme UNITES and the UN Online Volunteer Service. He represented UNV during the first phase of the World Summit...
About the Contributors

Abdullah Almobarraz was born in Riyadh, Saudi Arabia on 1963. He finished his undergraduate education in 1990 from 1990 King Saud University, Riyadh majoring in Information Science. In 2007, he got his PhD in Information Science from University of North Texas. Currently he is working as the Head of Information Studies Department, College of Computer and Information Sciences at Imam University in Riyadh.

Abiodun O. Bada is Assistant Professor of Information Systems in the Dept. of Engineering Management & Systems Engineering at The George Washington University, Washington DC, USA. Dr. Bada received his PhD in Information Systems from the London School of Economics, University of London, UK. His research interests include the application of resource-based and institutional theories to information systems phenomena and the implementation of IT in developing countries.

Nancy Bertaux is Professor of Economics at Xavier University, Cincinnati, Ohio, USA. She holds a PhD in Economics from The University of Michigan. She has published in a wide variety of scholarly books and journals on economic development, gender and diversity, and economic history issues, with a recent research focus on the role of information technology and entrepreneurship in economic development in Africa and South Asia.

James D. Brodzinski is Dean and Professor of Management in the Graham School of Management at Saint Xavier University in Chicago, Illinois. His PhD is from Ohio University in Human Information Systems. His research examines behavioral, perceptual, and information issues in organizations as well
as occupational safety and health compliance programs. His work has appeared in various scholarly outlets including The Academy of Management Executive, Journal of Health and Human Resources Administration, HR Magazine, and Management Communication Quarterly.

**Anirban Chakrabarty** is Assistant Professor of Information Technology at Lal Bahadur Shastri Institute of Management, Delhi. He has published in journals and conferences at both National and International levels on data mining, knowledge management, and fraud detection issues. His research interest include Data mining, Object Oriented programming, Multimedia Technologies, Computer networks.

**Elaine Crable** is Professor of Management Information Systems at Xavier University, Cincinnati, Ohio, USA. She received her PhD from the University of Georgia with an MBA from Xavier University. Her research includes enterprise systems, social networking, pedagogical issues with online teaching and women’s issues in developing countries.

**Zlatko J. Kovačić** is an associate professor in the School of Information and Social Sciences at the Open Polytechnic of New Zealand. Dr. Kovačić has a varied academic background and research interests, ranging from core interests relating to IT careers, learning and teaching, to e-commerce, e-learning, time series analysis and multivariate analysis. His current research is focused on financial time series analysis (stock exchanges in former Yugoslavia in particular), social and cultural aspects of e-government and on cognitive processes in distance education using computers and communications technologies. Dr. Kovačić is editor-in-chief of the academically peer refereed journal: Interdisciplinary Journal of Information, Knowledge, and Management (http://ijikm.org), editor of the Journal of Information Technology Education (http://jite.org) and senior associate editor of Informing Science: The International Journal of an Emerging Transdiscipline (http://www.inform.nu). He is member of the Informing Science Institute and International Association for Statistical Education.

**Dr. Norbert Kuhn** was born in 1957. He studied Computer Science and Mathematics at the Technical University Kaiserslautern (Germany) and graduated in 1986. Thereafter he was a staff member of the Computer Science department of the Technical University Kaiserslautern, from where he also received his PhD in 1991 with a thesis in Computer Algebra. From 1991 to 1995 he was a member of the German Research Centre for Artificial Intelligence (DFKI) and worked on projects in the fields of Multi-Agent systems and Office Automation. In 1995 he was appointed professor at the University of Applied Sciences Trier, (Germany). He is a member of the Institute for Software Systems in Business, Environment, and Administration. His current research areas cover E-Government applications, Document Analysis systems and Human Computer Interfaces.

**Dr. Muneesh Kumar** is a Professor, at Department of Financial Studies, University of Delhi (India). His responsibilities include teaching banking and information systems related courses to students of Masters in Finance and Control (MFC) programme and supervising research. He has published several articles in international journals and presented papers in several international conferences. He has also authored three books and co-edited three books. He is associated with the several expert committees appointed by Government of India such as expert committee for IT projects of India Post and Market Participation Committee of Pension Fund Regulatory and Development Authority (PFRDA).
About the Contributors

Eva Lindgren, PhD, is a member of the Department of Language Studies at Umeå University, where she is a researcher and PhD-student supervisor. Her research interests include early language learning, writing, writing development and revision. She has published internationally in the areas of foreign language development, self-assessment, peer feedback, keystroke logging, revision and fluency. Together with Kirk Sullivan she has edited the book Computer Keystroke Logging and Writing: Methods and Applications. She is the Swedish country manager of the EU funded research project Early Language Learning in Europe (Project n°. 135632-LLP-2007-UK-KA1SCR), which takes a broad perspective on young learners’ foreign language learning processes, including variables such as the teacher, language exposure and digital media.

Meeta Mathur is Assistant Professor in the Department of Economics at University of Rajasthan, India. She has specialized in International Economics. Her research areas include insurance, telecommunications and foreign trade. She has contributed to reputed national journals, national seminars and conferences. She has rich experience of teaching and research. Her excellent academic record has motivated many students to pursue their doctorate degree in her guidance. As an economist she is exploring socio-economic dimensions to understand the economic phenomena keeping in view the international perspective. She has been associated with many professional bodies and continue to work rigorously for the growth of the discipline.

Dr. Stefan Naumann was born in 1969 and studied computer science at the Universities of Kaiserlautern and Saarbrücken (Germany). Since 2008 he is a full professor at the University of Applied Sciences Trier, Location Environmental Campus Birkenfeld. He is a member of the Institute for Software Systems in Business, Environment, and Administration. His research interests are sustainable development in conjunction with online communities and the environmental and social impacts of information technology. Especially, he is engaged within the new research field “sustainability informatics”. Within this context he investigates questions how non-professional IT users (like citizens) can be supported so that they are able to participate successfully e.g. in E-Government processes.

Adekunle Okunoye is Associate Professor of Management Information Systems at Xavier University, Cincinnati, Ohio, USA. He holds a PhD degree in Computer Science/Information Systems from University of Turku, Finland. Adekunle is a chartered information technology practitioner and member of the British Computer Society. He is also a member of Association for Information Systems. His research focuses on knowledge management, organizational implementation of IT and the resultant changes in organization, and IT & globalization. He has published in various journals, books and conference proceedings.

Bolanle A. Olaniran is a professor and interim Chair in the Department of Communication Studies at Texas Tech University, Lubbock, TX USA. He is internationally known scholar. His research includes Organization communication, Cross-cultural communication, Crisis Communication, and Communication technologies. He has authored several peer reviewed articles in discipline focus and interdisciplinary Journals (i.e., Regional, National, and International) and authored several edited book chapters in each of these areas. He edited book on e-learning. He also serves as consultant to organizations and Universities at local, national, international and government level. His works have gained recognition such as the American Communication Association’s “Outstanding Scholarship in Communication field” among others.
Eleonora Pantano, is a Post doc research fellow at University of Calabria (Italy). She holds a PH-D degree in “Psychology of Programming and Artificial Intelligence”. Her research interests are related to the applications of advanced technologies to retailing and tourism, with emphasis on the investigation of consumer behaviour in pervasive environments. She has been Assistant teacher of Integrated Marketing Communication, Engineering Faculty, University of Calabria; visiting lecturer at College of Business, University of Illinois (USA); visiting lecturer at Master in Business and Administration (MBA) Marketing Module at the Faculty of Economics & Business, University of Zagreb (HR). Furthermore, she is member of the Editorial Board of numerous international journals, guest editor of the special issue of Journal of Retailing and Consumer Services on Applications of New Technologies to Retailing, 17 (3); and of International Journal of Digital Content Technology and its Applications on Digital Contents Management for Improving Consumers Experience (in press). She was the Highly Commended Award winner of the 2008/2009 Emerald/EMRBI Business Research Award for Young Researchers.

Daniel Pimienta was born in Morocco, Applied Mathematics in Nice and hold a PhD in Computer Sciences. After creating a Software House specialized in APL, he joined IBM France (La Gaude Laboratory) and worked 12 years as Telecommunication System Architect and Planner. In 1988, he joined Union Latina, in Santo Domingo, as Scientific Advisor and Head of the REDALC project for creation of LA&C network. En 1993, he launched the Foundation Networks & Development (FUNREDES) and focused ICT4D. He is an active civil society actor in Information Society themes, especially the social impact of ICT, virtual communities and linguistic diversity. Member of several ICT4D related global groups such as Francophone virtual university, 3EL, GCNP, EUROLATIS, WINDS-LA, REDISTIC, APC, MAAYA, WSIS-AWARD, UN-GAID or Digital Solidarity Fund, he was given, in 2008, the Namur Award (IFIP WG9.2) for his comprehensive actions in the perspective of a positive social impact of ICT.

Balaji Rajendran received his BSc and MSc degrees in Computer Science from Madurai Kamaraj University, in 1998 and 2000 respectively. He is currently pursuing his PhD in Computer Science. He has worked as a lecturer in reputed institutions before moving to C-DAC (Centre for Development of Advanced Computing), formerly known as NCST, as a Scientist in 2001. Since then he has been working with C-DAC, executing various Research and Development Projects, funded by National and International agencies. He has research publications in International and National Conferences, and has also edited the proceedings of an International Conference. He has also received the PMP certification from PMI, USA, in 2005. His research interests are in the domain of Internet and Web Engineering with focus on Intelligent Systems, Security, and systems for Social Development.

Sonal G. Rawat is Assistant Professor of Information Technology at Lal Bahadur Shastri Institute of Management, Delhi. Her areas of interest are data analysis and algorithm, data structure, C++, Computer Graphics.

Stefan Richter was born in 1976 and studied computer science at the University of Applied Sciences in Birkenfeld. After his diploma thesis about an email client for blind people he worked for the SilverCreations AG which develops reading machines and workplaces for visually impaired people. He made significant contributions to the development of the “LiveReader” and the digital workplace camera named “Sceye” for document management and imaging. Since 2005 he is a member of the Institute for Software Systems in Business, Environment, and Administration and he works there in different
About the Contributors

research projects. His main research interests are accessibility for the visually impaired and blind people and document management. Now he investigates in the fields of ontology-based knowledge management and of E-Government research combining his experiences to make governmental forms accessible.

Dr. Mamta Sareen is an Associate Professor in Department of Computer Science, Kirori Mal College, University of Delhi, India. She has done her doctoral research in ‘Trust and Technology in B2B e-commerce’. In addition, she is also pursuing research in areas like e-commerce, Internet banking, etc. She is teaching various courses on information technology like software engineering, management Information systems, Data Base Management Systems, etc. to various undergraduate and post graduate courses (B.Sc, MCA, MBA) of University of Delhi and I.P University, India.

M. P. Satija, is a Professor and Head of the Department of Library and Information Science, Guru Nanak Dev University, Amritsar, India. Having done his PhD on Ranganathan studies, he has been instrumental in interpreting and propagating Ranganathan’s works and ideas to the new generation. As an author of more than a dozen books, 150 papers and 200 book reviews and many conference papers published in India and abroad. He has visited Germany, France, Finland, England, Nepal, the Netherlands, Belgium and Sri Lanka in connection with professional work. In 2005 he was invited for a year by the University of Kelaniya, Sri Lanka to serve as a Visiting Professor. There he was instrumental in instituting library and information science doctoral programme in the Department of Library of Information Science which is the first ever research degree programme in the country. Since April 2007 he is a member Advisory Board of the UDC Consortium, the Hague.

Michael Schmidt was born in 1975 and studied computer sciences at the University of Applied Science Birkenfeld and the University of Saarbrücken. After he finished his master thesis he joined the research group of Prof. Gollmer. In the research group he worked on a mathematical model of the e.coli bacteria. In 2007 he switched to the research group of Prof. Kuhn at the Institute for Software Systems in Business, Environment, and Administration. His main research interests are accessibility for the visually impaired and blind people and document management. He investigates in the field of E-Government research combining his experiences to make governmental forms accessible.

Sangeeta Sharma is a Professor of Public Administration in the Department of Public Administration at the University of Rajasthan, India. She has authored many books. Her articles have appeared in the Internationally reputed publications. Her research interests include exploring man-machine interface, development of conceptual constructs especially in the field of digital governance and ethics building. She is member of International Program Committees. Many students are pursuing Doctorate degree in her guidance. Her works on ethics and e-governance have been internationally acknowledged. She is also member of Editorial Board and has contributed in providing qualitative writings. The articulation of ideas as lucid narrations is highly appreciated.

Anders Steinvall is Senior Lecturer in English at Umeå University. His particular research interests lie in the field of cognitive linguistics and its application to lexical semantics, discourse analysis and second language learning.
Kirk P H Sullivan obtained his PhD from the University of Southampton, England and his EdD from the University of Bristol, England. He is currently Professor of Linguistics and member of the Department of Language Studies, Umeå University, Sweden. Prior to moving to Sweden he worked at Otago University, New Zealand. Together with Eva Lindgren he has edited the book Computer Key-stroke Logging and Writing: Methods and Applications. Kirk’s research interests lie at the intersection of linguistics and education.

Assunta Tavernise is a PhD in Psychology of Programming and Artificial Intelligence and collaborates with the Laboratory of Psychology at University of Calabria. Her research interests concern various scientific topics from an interdisciplinary point of view and comprise the following areas: - Educational Technology, - Virtual Worlds/Games, - Human Computer Interaction, - Edutainment, - Virtual Agents, - ICT for Cultural Heritage. At the moment, she is working on the constructivist approach to educational virtual worlds as learning environments, carrying on laboratories with students from grammar school to University. Moreover, she is carrying out studies on non verbal communication of virtual agents for the realization of didactic tutors, guides, and virtual shopper assistants. She has worked in national and international projects, among which “Virtual Museum Net of Magna Graecia” (ROP 2000–06, www.virtualmg.net) and “Connecting European Culture through New Technology - NETConnect” (Culture 2000 European Programme, http://www.netconnect-project.eu/ and http://netconnect-project.eu/index.aspx).

Neelanarayanan Venkataraman received his BSc degree in Physics from Madurai Kamaraj University, India, in 1993, his MSc degree in Computer Science from Madurai Kamaraj University, India, in 1995 and currently pursuing PhD in Computer Science at IT University of Copenhagen, Denmark. After receiving his Masters degree, he had taught Computer Science subjects in various colleges affiliated to Madurai Kamaraj University and also in Madurai Kamaraj University. In 2001, he moved to Centre for Advanced Computing (C-DAC), formerly known as National Centre for Software Technology (NCST), where he was a Scientist. In 2007 he joined IT University of Copenhagen with Danish Government Scholarship for his PhD. He is a Life Member of ISTE, CSTM certified by STQC, ISMS LA certified by IRCA, and PMP certified by PMI, USA.

Huahui Zhao obtained her doctoral degree in Applied Linguistics at the University of Bristol, United Kingdom. She is currently working as a postdoctoral researcher in online peer collaboration in the Department of Language Studies, Umeå University, Sweden. Her main research interests lie in computer-enhanced learning and teaching, classroom-based language assessment, collaborative learning, and education research methodology.
