About the Contributors

Miltiadis D. Lytras is a professor in the American College of Greece. His research focuses on Semantic Web, knowledge management and e-learning, with more than 100 publications in these areas. He has co-edited/co-edits, 25 special issues in International Journals (e.g. IEEE Transaction on Knowledge and Data Engineering, IEEE Internet Computing, IEEE Transactions on Education, Computers in Human Behaviour, Interactive Learning Environments, Journal of Knowledge Management, Journal of Computer Assisted Learning, etc) and has authored/co-edited 25 books.

Patricia Ordóñez de Pablos is a Professor in the Department of Business Administration and Accountability in the Faculty of Economics of the University of Oviedo, Spain. Her teaching and research interests focus on the areas of strategic management, knowledge management, intellectual capital measuring and reporting, and Information Technologies. She serves as Editor in Chief of “International Journal of Asian Business and Information Management” (IGI-Global) and “International Journal of Chinese Culture and Management”. She also serves as Associate Editor of “Behaviour and Information Technology” (Francis & Taylor). Additionally she serves as Executive Editor of “International Journal of Learning and Intellectual”, “International Journal of Strategic Change Management”, and “International Journal of Arab Culture, Management and Sustainable Development”, respectively. She is co-editor of “Advances in Strategic Management and Sustainable Development” Series (IGI-Global) and “Advances in Emerging Information Technology Issues” Series (IGI-Global). She has co-edited/co-edits 20 special issues in IS Thompson International Journals (such as International Journal of Technology Management; Interactive Learning Environments; Ergonomics and Human Factors in Manufacturing; Information Systems Management; among others). She has co-edited more 10 books, such as The China IT Handbook (Springer); Web 2.0: The Business Model (Springer); Technology Enhanced Learning: Best Practices (IGI-Global); Knowledge Ecology in Global Business: Managing Intellectual Capital (IGI Global); Social Web Evolution: Integrating Semantic Applications and Web 2.0 Technologies (IGI-Global); Emerging Topics And Technologies In Information Systems (IGI Global); Knowledge Networks: The social software perspective (IGI Global); Information Technology, Information Systems and Knowledge Management (Springer).

Ernesto Damiani is currently a professor at the Università degli Studi di Milano and the director of the Università degli Studi di Milano’s PhD program in computer science. He has held visiting positions at a number of international institutions, including George Mason University in Virginia, LaTrobe University in Melbourne, Australia, University of Technology in Sydney, Australia and the Institut National des Sciences Appliquées (INSA) at Lyon, France.
About the Contributors

* * *

José A. Asensio is a doctoral student at the University of Almeria (UAL), Spain. He received the BSc and MSc degrees in Computer Science from the UAL. Since 2006, he works in two national research projects on Environmental Management Systems. In 2007, he joined Applied Computing Group and then became Associate Professor, University of Almeria in 2009. Since 2003, he works as a Technician in the Unit of Support Technologies for Learning and Virtual Learning at the University of Almeria. His research interests include trading, agents & multi-agent systems (MAS), ontology-driven engineering (ODE), model-driven engineering (MDE), model transformations, and system modelling.

Cristian Bisconti achieved his PhD in Nuclear Systems in February 2006 at the University of Salento, and was rewarded with the national award Fubini for the best PhD thesis in Theoretical Atomic Physics. He carried on his studies in nuclear physics in collaboration with the Department of Atomic and Nuclear Physics at University of Granada (Spain) and the Department of Physics E. Fermi of Pisa. Since March 2008, he started working at Scuola Superiore ISUFI, University of Salento focusing on complex systems in techno-economic contexts. His research interest is in applying methodologies and tools of quantum physics to social sciences like the dynamics of inter-organizational structures and informal communities, with specific attention to the relationship between technology and organization.

Vladlena Benson, is Senior Lecturer at the Faculty of Business and Law, Kingston University, UK. Vladlena’s research interests include information management, e-learning and Web technologies, including social networking. She has published a number of papers, books, and invited chapters in the area of Information Technology. Vladlena teaches managing information, Information Systems development and information security on postgraduate and undergraduate programmes.

Santi Caballé received his PhD, Masters and Bachelors in Computer Science from the Open University of Catalonia (Barcelona, Spain). Since 2003, he has been an Assistant Professor at the Open University of Catalonia, where he became Associate Professor in 2006 teaching a variety of online courses in Computer Science in the area of Software Engineering, Information Systems and Collaborative Learning. Dr. Caballé has been involved in the organization of several international conferences, conference tracks and workshops, and has published over 60 research contributions as books, book chapters, and referred international journal and conference papers. He has also acted as editor for books and special issues of international journals. His research focuses on software engineering, e-learning and collaborative and mobile learning, and distributed, Grid and peer-to-peer technologies.

Eliana Campi has a degree in computer science engineering with a thesis on the modeling and implementation of ontology to support the local development. She is currently a research fellow at the Center for Business Innovation, University of Salento, Italy. Her expertise regards the ontology application for knowledge management, the innovative technologies and methodologies to organize knowledge bases, to index and to search information based on metadata, and the innovative approaches based on the vision of the Semantic Web.
About the Contributors

Antonella Carbonaro is an Associate Professor of Computer Science at the Department of Computer Science of the University of Bologna. She received the Italian Laurea degree in Computer Science in 1992. In 1997 she finished her Ph.D. studies at University of Ancona on Artificial Intelligent System. From 1997 to 1999, she received a research fellowship with theme of search artificial intelligence. Her current research interests concern personalization and content-based services for data and knowledge mining and personalized learning environment.

José Manuel Morales del Castillo is MLS graduate and PhD with the Information Science Department at the University of Granada. His papers have been published in different journals specialized on library and Information Science, computational intelligence, fuzzy logic and soft computing. His research lines are focused on the application of Semantic Web technologies to recommender systems, digital libraries and e-learning systems in order to improve information representation and processing.

Valerio Cisternino has a degree in computer science engineering with a thesis on the development of an environment enabling knowledge codification processes and implementing an ontology reasoned. He is a research fellow at the Center for Business Innovation, University of Salento, Italy. He participated to the development of object-oriented software systems based on open Internet standards and J2EE technologies. He is currently involved in the new product design area related to the customization of PDM systems, the design of an infrastructure for a machine workshop integration system and the modeling of business processes.

Ricardo Colomo-Palacios is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid. His research interests include applied research in Information Systems, software project management, people in software projects and social and Semantic Web. He received his PhD in Computer Science from the Universidad Politécnica of Madrid (2005). He also holds a MBA from the Instituto de Empresa (2002). He has been working as software engineer, project manager and software engineering consultant in several companies, including Spanish IT leader, INDRA. He is also an Editorial Board Member and Associate Editor for several international journals and conferences and Editor in Chief of International Journal of Human Capital and Information Technology Professionals.

Jordi Conesa is an assistant professor of Information Systems at Universitat Oberta de Catalunya, Barcelona, Spain. His research interest concerns the areas of conceptual modeling, ontologies, Semantic Web, knowledge-based systems and e-learning. His long-term goal is to develop methodologies and tools to use ontologies effectively in several application domains, such as conceptual modelling, software engineering and e-learning. He received his M.S. and Ph.D. in Software Engineering from the Technical University of Catalonia.

Angelo Corallo is assistant professor at the Center for Business Innovation and researcher at the Department of Innovation Engineering, University of Salento, Italy. His research interests encompass mainly the co-evolution of the technological and organizational innovation, with a specific focus on business ecosystems, the extended enterprise, knowledge management and collaborative working environments in project-based organizations. He is currently involved in many research projects related to technological and organizational issues both at Italian and European levels. He collaborates with Mas-
About the Contributors

sachusetts Institute of Technology (MIT) in projects related to enterprise process modeling and social network analysis.

Angel García-Crespo is the Head of the SofLab Group at the Computer Science Department in the Universidad Carlos III de Madrid and the Head of the Institute for Promotion of Innovation Pedro Juan de Lastanosa. He holds a PhD in Industrial Engineering from the Universidad Politécnica de Madrid (Award from the Instituto J.A. Artigas to the best thesis) and received an Executive MBA from the Instituto de Empresa. Professor García-Crespo has led and actively contributed to large European projects of the FP V and VI, and also in many business cooperations. He is the author of more than a hundred publications in conferences, journals and books, both Spanish and international.

Javier Criado is a doctoral student at the University of Almeria (UAL), Spain. He received the BSc and MSc degrees in Computer Science from the UAL. Since 2009, he works as a researcher in the project SOLERES of the Spanish Ministry of Science and Innovation (MICINN). In 2009, he joined Applied Computing Group. His research interests include model-driven engineering (MDE), model transformations, ontology-driven engineering (ODE), human-computer interaction (HCI) for advances on user interfaces, COTS components, trading, agents & MAS, and UML design.

Juan Manuel Cueva Lovelle is a Mining Engineer from Oviedo Mining Engineers Technical School in 1983 (Oviedo University, Spain). Ph. D. from Madrid Polytechnic University, Spain (1990). From 1985 he is a Professor at the Languages and Computers Systems Area in Oviedo University (Spain). ACM and IEEE voting member. His research interests include Object-Oriented technology, Language Processors, Human-Computer Interface, Web Engineering, Modeling Software with BPM, DSL and MDA.

Jose Emilio Labra Gayo obtained his PhD. in Computer Science Engineering in 2001 at the University of Oviedo with distinction. Since 2004, he is the Dean of the School of Computer Science Engineering from the University of Oviedo and since 2004, he is also the leader of the WESO research team that belongs to the OOTLab research group. The WESO group (Semantic Web Oviedo) collaborates with the CTIC Foundation in several projects like the development of an Information Services model based on Semantic Web for the Austrian Government or participating in several R&D projects like “Oviedo3, Integral Object-Oriented System”, “JEDI (Java Enabled Database Access Over the Internet)”, “Components and Objects Interoperability by Means of the Oviedo3 Integral Object-Oriented System”, “Applying Static Analysis Technologies to Software Quality”, “Proof Carrying Code” and “Development and implementation of a Web service for the analysis and interpretation of financial information in XBRL format.” Apart from teaching in the University of Oviedo, he has been regularly invited to teach in several doctorate or postgraduate courses in the Universidad Técnica Federico Santa María, in Chile, and the Universidad Pontificia de Salamanca, in Madrid, Spain. His research interests are Semantic Web technologies, programming languages and Web engineering, where he has published a number of papers in selected conferences and journals. He participates in several committees like the International Conference on Web Engineering, the International Workshop on Social Data on the Web, and the Web Services and Service Oriented Applications Spanish Conference.
**Jordán Pascual Espada** is a PhD student in the Computer Science Department of the University of Oviedo (Spain). He has a B.Sc. in Computer Science Engineering and a M.Sc. In Web Engineering. His research interests include the Internet of Things, exploration of new applications and associated human computer interaction issues in ubiquitous computing and emerging technologies, particularly mobile and embedded systems.

**Margaret Fitzgerald-Sisk** is a graduate student in the Work and Human Resource Education, Department of Organizational Leadership, Policy, and Development, University of Minnesota. She has worked in instructional design, development, and delivery for business and academia for more than 15 years. Her research and writing includes topics on instructional design, faculty development, program redesign, and higher education teaching.

**Juan Miguel Gomez-Berbís** is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid. He holds a PhD in Computer Science from the Digital Enterprise Research Institute (DERI) at the National University of Ireland, Galway and received his MSc in Telecommunications Engineering from the Universidad Politécnica de Madrid (UPM). He was involved in several EU FP V and VI research projects and was a member of the Semantic Web Services Initiative (SWSI). His research interests include Semantic Web, Semantic Web services, business process modelling, b2b integration and, recently, bioinformatics.

**Francesca Grippa**, PhD, is an Assistant Professor in eBusiness Management at the Scuola Superiore ISUFI, University of Salento (Lecce, Italy). Her current research interest is in applying social network analysis to business and learning communities. Francesca holds a Ph.D. in e-Business Management and a MA in Business Innovation Leadership from the University of Salento and a BS in Communication Sciences from the University of Siena, Italy. In 2005 and 2006, she was Visiting Scholar at the MIT Sloan Center for Collective Intelligence.

**Enrique Herrera-Viedma** is Senior Lecturer with the Computer Science and Artificial Intelligence Department and Associate Dean of Academic Management at the University of Granada (Spain). His research interests range from fuzzy logic, decision making systems, information retrieval, and Web quality evaluation to digital libraries. He is author of more than 50 research works published in impact journals, member of the editorial committee of *Fuzzy Set and Systems* and *Soft Computing*, top-cited researcher (Top 1%) in the engineering domain according to the “Essential Indicators” database, and has a H=17 index according to the *Web of Science* database.

**Luis Iribarne** received his BSc degree in computer science from the University of Granada, and the MSc and PhD degrees in computer science from the University of Almeria, Spain. From 1991 to 1993, he worked as a lecturer at the University of Granada. In 1993, he collaborated as IT Service Analyst at the University School of Almeria, and he served for nine years as a lecturer in the Polytechnic School at the University of Almeria. From 1993 to 1999, he worked in several national and international research projects on distributed simulation and geographic information systems (GIS). In 2001 he joined Data, Knowledge and Software Engineering Group and then became Associate Professor, University of Almeria in 2002. In 2002, he co-founded the Systems Information Group, and in 2007, he founded the

Applied Computing Group (leader). His research interests include model-driven engineering (MDE), model transformations, ontology-driven engineering (ODE), human-computer interaction (HCI) for advances on user interfaces, system modelling, component-based software development (CBSD), COTS components, trading, software services, agents & MAS, and UML design. He is an IEEE and EUROMICRO member.

Tania Kerkiri holds a Diploma in Computer Engineering and Informatics from the University of Patras and a Doctor’s degree in Semantic Web based e-learning systems (Univ Of Macedonia, Greece). Her international presence by publications on research & applications proves her expertise in: Semantic Web/e-learning & recommendation systems, e-commerce system development, and database administration over Internet applications. She is an Information Technology Consultant, System Administrator & Programmer, Personnel Trainer & Computer Science Tutor at many Companies & Universities. She is Prior-Vice President & now Secretary General of North Hellas Electrical Engineers & Inf. Institute; Greek-Technical-Chamber Member; and a National Accreditation Center certified Tutor.

Dimitris Konetas, Secretary of the Board of Directors of Greek Union of Computer Scientists, graduated from Computer Engineering & Informatics Department of University of Patras, (1992), PhD candidate at ICT-Distance Education Laboratory of University of Ioannina (“Coefficients determining success of blended learning of tele-trainers”). His research interests include: online learning environments, digital libraries, analysis of algorithms, Information Systems, vocational training/guidance, environmental education and sustainability. He worked as: Information Technology consultant, System (Librarian) Administrator in E. C. projects/personnel training programs. Currently he teaches Computer Science in the 4th Vocational Secondary School of Ioannina and Technological Educational Institution of Epirus Dept. Communications, Informatics and Management.

Marco De Maggio, PhD, in “e-business” at eBusiness Management Section of Scuola Superiore ISUFI-University of Salento, Italy. Bachelor Degree in Economics at University of Lecce, and Chartered Accountant. His research field concerns the development of methodologies for the analysis and management of organizational learning patterns inside organizations and communities of practice. His focus is mainly on the development of tools and methodologies for the monitoring of the organizational behavior responsible for social capital creation. Visiting Scholar at MIT–Boston, MA, he experimented the application of content and social network analysis supported by computer-aided systems for the improvement in the analysis of virtual communities.

Oscar Sanjuán Martínez is a Lecturer in the Computer Science Department of the University of Oviedo. Ph.D. from the Pontifical University of Salamanca in Computer Engineering. His research interests include Object-Oriented technology, Web Engineering, Software Agents, Modeling Software with BPM, DSL and MDA.

Rubens Nascimento Melo is a Senior Professor and Researcher in the field of Databases at the Computer Science Department of the Pontifical Catholic University of Rio de Janeiro, PUC-Rio. He holds a B.Sc. in Electronic Engineering (1968), a M.Sc. (1971) and a Ph.D. (1976) degree in Computer Science from the Air Force Institute of Technology (ITA) in Sao Paulo. Currently, he is Associate Pro-
fessor at PUC-Rio where he leads the Database Research Lab (TecBD). One of his current interests is the application of database technology to distance learning. In this field he has also served as Director of the Centre of Distance Education under the Vice-Rectory for Academic Affairs of PUC-Rio.

**Antoni Olivé** is a professor of Information Systems at the Universitat Politècnica de Catalunya in Barcelona. He has worked in this field during over 20 years, mainly in the university and research environments. His main interests have been, and are, conceptual modeling, requirements engineering, Information Systems design and databases. He has taught extensively on these topics. He has also conducted research on these topics, which has been published in international journals and conferences. He is a member of IFIP WG8.1 (Design and evaluation of Information Systems), where he served as chairman during 1989–1994.

**Nicolas Padilla** received his BSc and PhD degrees in computer science from the University of Almeria (Spain), and the MSc degree in computer science from the University of Granada (Spain). From 1991 to 1993, he worked as an Associate Professor at the University of Granada. From 1993 to 2002, he worked as Associate Professor in the Polytechnic School at the University of Almeria. From 2002 to 2009, he served as a lecturer and from 2009 to today, he serves as a professor, both of them in the same school at the University of Almeria. In 2007, he co-founded the Applied Computing Group (co-leader). His research interests include cooperative systems (CSCW), Model-Driven Engineering (MDE), Human-Computer Interaction (HCI), agents & MAS, and UML design.

**Giuseppina Passiante** is associate professor at the Department of Innovation Engineering and director of the Center for Business Innovation, University of Salento, Italy. Currently, her research fields concern the e-business management, and more specifically the management of learning organizations and learning processes in the net-economy. Her focus is mainly on the development of intellectual capital, both in entrepreneurial and academic organizations. She is also an expert in the development of local systems versus information and communications technologies (ICTs), ICTs and clusters approach, and complexity in economic systems. In these research fields, she has realized programs and projects, and published several papers.

**Eduardo Peis** is lecturer with the Department of Library and Information Science at the University of Granada (Spain), and one of the first doctors in Information Science in Spain. His research areas include the application of Semantic Web technologies to Web information retrieval enhancement, Information Systems and digital libraries. As a result of his academic and researching activity, he has published several works in some of the main journals in the Information Science and Computer Science areas, and presented numerous papers in international meetings and conferences.

**B. Cristina Pelayo G-Bustelo** is a Lecturer in the Computer Science Department of the University of Oviedo. Ph.D. from the University of Oviedo in Computer Engineering. Her research interests include object-Oriented technology, Web Engineering, eGovernment, Modeling Software with BPM, DSL and MDA.
About the Contributors

Alejandro Rodríguez-González is a Research Assistant and Ph.D. candidate of the Computer Science Department in University Carlos III of Madrid. He is working as researcher in Computer Science Department involved in several projects of the Spanish ministry of industry. His main research interests are Semantic Web, artificial intelligence, and the building of medical diagnosis systems using these techniques. He has a degree in Computer Science by University of Oviedo and an M.Sc in Computer Science and technology in the specialty of Artificial Intelligence. He is also studying an M.Sc in Engineering Decision Systems at University Rey Juan Carlos.

Sean Wolfgand Matsui Siqueira is an Assistant Professor at the Department of Applied Informatics, Federal University of the State of Rio de Janeiro (UNIRIO), Brazil, where he teaches courses in Databases, Information Systems and Semantic Web. He holds a M.Sc. (1999) and a Ph.D. (2005) in Computer Science, both from the Pontifical Catholic University of Rio de Janeiro (PUC-Rio), Brazil. His research interests include knowledge representation, Semantic Web, ontologies, information integration, semantic models, user models, e-learning, social Web, and music Information Systems. He has experience in the Computer Science area, with focus on Information Systems and technology enhanced learning. He has participated in some international research projects and has published more than 70 papers for conferences, journals, and books.

Jairo Francisco de Souza is an Assistant Professor at the Department of Computer Science, Federal University of the Juiz de Fora (UFJF), Brazil, where he teaches courses in Software Engineering and Semantic Web. He holds a M.Sc. (2007) from Federal University of Rio de Janeiro (UFRJ) and he is a Ph.D. candidate in the Pontifical Catholic University of Rio de Janeiro (PUC-Rio), Brazil, both in Computer Science area. His research interests include knowledge representation, Semantic Web, ontologies, information integration, and semantic models.

Nouha Taifi holds a PhD in eBusiness Management, eBusiness Management Section – Scuola Superiore ISUFI, University of Salento, Italy. She also holds a MSc in Business and Economics, International University of Dalarna, Sweden, and a BBA, University of AIKhawayn University, Ifrane. Her main research interests are information and knowledge management systems for innovation, organizational structures optimization for new knowledge creation, inter-organizational collaboration in complex product development. In the ePDM laboratory, she was also post-doc researcher in the area of new product development processes in the automotive and aerospace industries.

Robert D. Tennyson is Professor of Educational Psychology at the University of Minnesota. He is editor of a professional journal, Computers in Human Behavior. He also serves on editorial boards for four other journals. His research and publications include topics on problem solving, concept learning, intelligent systems, testing and measurement, instructional design, and advanced learning technologies. He has directed NATO sponsored workshops and advanced study institutes on automated instructional design and delivery in Spain and Norway. He has authored over 300 journal articles, books and book chapters.

Salvatore Totaro, Eng., holds a Degree in Electronic Engineering at the Politecnico of BARI (Italy). He is a Research Fellow at the eBusiness Management Section of Scuola Superiore ISUFI - University of
About the Contributors

Salento (Lecce, Italy). His areas of interest are knowledge management and artificial intelligence. He is actively involved as software, hardware and net infrastructure designer and developer in several national and international projects. He is teacher of “Data Base design for flexible historical and geographical system” and “Software packages for data base implementation” in international higher education courses.

Avgoustos Tsinakos holds a BSc in Physics (1992), MSc in Applied Artificial Intelligence (1993), an AGDDE(T) Advanced Graduate Diploma in Distance Education Technology (1999) a MDE Master in Distance Education (2000) and Ph.D. degree on “Artificial Intelligence and Internet” (2002). He is an Associate Professor, Department of Industrial Informatics, University of Kavala Institute of Technology and an Adjacent Professor of Athabasca University of Canada. He also acts as Coordinator of Master of Distance Education in Greece, on behalf of Athabasca University. He coordinated 13 research projects, is a member of European Expert Evaluators Team (2006-today) on the field of Distance Education, and participated in more than 32 world/international/national conferences as invited speaker/presenter, holding a number of publications on the area of distance learning, student modeling and artificial intelligence.

Antonio Zilli graduated in physics and is a researcher at the Center for Business Innovation, University of Salento, Italy. His research interests regard technologies that enable powerful virtual collaboration in communities and organizations. He participated in research projects on Semantic Web and on the design of technologies and tools for managing ontology and semantically annotated documents. He is one of the editors of the book ‘Semantic Knowledge Management: an Ontology-based Framework’ published by IGI Global. He is also senior researcher in the security and privacy issues of IT-based knowledge sharing in value networks.
