About the Contributors

Vishanth Weerakkody is a member of faculty in the Business School at Brunel University, UK. Weerakkody was previously a faculty member in the department of IS and Computing at Brunel University and he has held various IT positions in multinational organisations, including IBM UK. Weerakkody is a member of the British Computer Society, Chartered IT professional and a Fellow of the UK Higher Education Academy. He is the current editor-in-chief of the International Journal of Electronic Government Research.

Marijn Janssen is an associate professor within the information and communication technology section and director of the interdisciplinary SEPAM Master programme of the Faculty of Technology, Policy and Management at Delft University of Technology. He has been a consultant for the Ministry of Justice and received a PhD in information systems (2001). He serves on several editorial boards and is involved in the organization of a number of conferences. He published over 100 refereed publications.

Yogesh K. Dwivedi is a lecturer in the School of Business and Economics at Swansea University in the UK. He was awarded his MSc and PhD by Brunel University in the UK, receiving a Highly Commended award for his doctoral work by the European Foundation for Management and Development. His research focuses on the adoption and diffusion of ICT in organisations and in addition to authoring a book and numerous conference papers, has co-authored papers accepted for publication by journals such as Communications of the ACM, the Information Systems Journal, the European Journal of Information Systems, and the Journal of the Operational Research Society. He is Senior Editor of DATABASE for Advances in Information Systems, Managing Editor of Journal of Electronic Commerce Research, Assistant Editor of Transforming Government: People, Process and Policy and a member of the editorial board/review board of a number of other of other journals, and is a member of the Association of Information Systems, IFIP WG8.6 and the Global Institute of Flexible Systems Management, New Delhi.

***

Sarmad Alshawi has more than 15 years of academic experience and currently lectures Aviation Management and Business Intelligence at the Business School, Brunel University, UK. Dr Alshawi is an active member of research groups at Brunel, with research in Business Intelligence, Data Management, Data Warehousing, CRM and E-government. Dr Alshawi has written in internationally refereed journals, spoken at conferences world-wide, and has guest-edited special issue journals. He has participated in many research projects, and currently is a co-investigator on the EPSRC funded MATCH healthcare project.
About the Contributors

**Shafi H. Al-Shafi** is a PhD researcher at the School of Information Systems, Computing and Mathematics, Brunel University, UK. He obtained his Master in business administration MBA, (information technology) from the Faculty of Engineering and Computing, Coventry University in the UK. His research interests include e-government, impact of integration technologies, strategic management and e-commerce.

**Dimitris Askounis** is an assistant professor of management information & decision support systems in the School of Electrical and Computer Engineering at the National Technical University of Athens (NTUA). Dr. Askounis has published over 80 papers in scientific journals and international conference proceedings.

**Wael Aziz** is head of eGovernment Strategy Unit in Dubai Municipality. He obtained his MBA from Strathclyde University, UK. He holds a BSc in systems and biomedical engineering from Cairo University, Egypt, and postgraduate studies in artificial intelligence from faculty of Engineering, Al-Azhar University, Cairo. He is a member of the Egyptian Society for Engineers, International Association of Business Leaders, Germany, the Egyptian Society of Language Engineering, Egypt, e-Learning Initiative, Ministry of Communication & Information Technology, Egypt, and Arabic Bolger’s Association. His research interests include e-government, performance management, benchmarking, and excellence models.

**Lars Baacke** works as research assistant at the Institute of Information Management (http://www.iwi.unisg.ch) at the University of St. Gallen (Switzerland). During his studies of information management he continuously focused on e-government and process management. Since 2006, he works in the Competence Center Health Network Engineering (CC HNE) and is involved in the EU funded project PICTURE and other projects in the fields of public administration and public health research (http://ehealth.iwi.unisg.ch).

**Jörg Becker** is full professor for information systems and information management and head of the Department of Information Systems at the University of Muenster, Germany. In 2004 he was appointed as managing director of the European Research Center for Information Systems. Jörg Becker has written more than 350 publications. He works as editor-in-chief for the *Information Systems and e-Business Management Journal* and is editor of *Wirtschaftsinformatik*, the leading German IS journal. Jörg Becker studied business administration and economics at the University of Saarland, Germany and the University of Michigan, Ann Arbor. His research areas contain management information systems, information modeling, e-government, and data management.

**Philipp Bergener** works as PhD student and research assistant at the European Research Center for Information Systems in Münster, Germany since 2007. Before starting his PhD he worked 16 month as a student assistant on projects in the public-sector. Philipp Bergener holds a diploma degree in information systems (Wirtschaftsinformatik) from the Westphalian Wihelms-University (WWU) Münster, Germany. His research focuses on e-government, process management, data management, method engineering and e-inclusion.

Hans de Bruijn is professor of public administration at Delft University of Technology, The Netherlands. Most of his work is on multi-actor governance. Recent publications are Management in Networks: On Multi-Actor Decision Making (with Ernst ten Heuvelhof) (Routledge, 2007), and Managing Performance in the Public Sector (Routledge, 2007).

Murat Cakir is a PhD candidate at the Informatics Institute, Department of Information Systems at Middle East Technical University, Ankara, Turkey, from where he received his MSc. His current research interests are: information systems evaluation, simulation testing and verification, user based simulation systems assessment.

Lemuria D. Carter is an assistant professor at North Carolina Agricultural & Technical State University. Her primary research interests include e-government diffusion, internet voting, Web-based trust and risk perceptions. She has published in several top-tier journals including, Journal of Strategic Information Systems, Information Systems Journal, and Communications of the ACM.

Yannis Charalabidis is a computer engineer and holds a PhD in information systems engineering from National Technical University of Athens (NTUA). He has been employed for 8 years as an executive director in Singular IT Group, specializing in ERP applications in Southern Eastern Europe. Currently he is heading e-Government & eBusiness Research in the Decision Support Systems Laboratory of NTUA, planning and coordinating high-level policy making, research and pilot application projects for governments and administrations worldwide. He teaches e-government information systems, interoperability and standardization, e-participation and government transformation in NTUA and the University of Aegean.

Shefali S. Dash is working as a deputy director general at National Informatics Centre, New Delhi. Her areas of specialisation are planning and implementation of MIS, DSS, e-governance, large scale computer communication infrastructure projects for rural areas. Some of the large projects handled by her are computerization of Rajiv Gandhi National Drinking Water Mission, Community Information Centre, GRAMSAT, Warana Wired Village, etc. She has been instrumental in preparing e-governance plans for various state governments in India as well as for the government of Lao People’s Democratic Republic. She has authored number of articles which have appeared in various journals and conference proceedings.
Marco De Marco is professor of organisation at the Catholic University of Milan President elect of ItAIS, the Italian chapter of AIS, and serves as conference chair at ECIS2009. He is in the editorial boards of the Information Systems Journal, the International Journal of Digital Accounting Research, and Information Systems and E-Business Management. He serves as an expert in a government committee to evaluate ICT projects to be funded. His major interests are systems development e-government, programme evaluation and banking information systems. His latest works were published in the European Journal of Information Systems and in the Journal of Information Technology.

Torgeir Dingsøyr works with research on agile software development, software process improvement and knowledge management as a senior scientist at SINTEF Information and Communication Technology. He has published more than 50 refereed papers in this field, including articles in IEEE Transactions on Software Engineering, IEEE Software, Communications of the ACM, Information and Software Technology and Empirical Software Engineering. He is a co-author of the book Process Improvement in Practice: A Handbook for IT Companies, published by Kluwer Academic Publishers in 2004, and holds a position as adjunct associate professor at Norwegian University of Science and Technology.

Marwan Elnaghi is a researcher in e-government at the School of Information Systems, Computing and Mathematics, Brunel University, UK. He obtained his MSc in industrial and administrative sciences from City University in London, UK. He holds a BSc in electrical and electronics engineering from Nottingham University, a post graduate diploma in computing from Brunel University, and post graduate certificate in education from Institute of Education University of London, UK. He was a senior member of academic staff and a member of the academic advisory board. He was in charge of computing in general and curriculum development at the Technical Studies Institute GHQ Armed Forces UAE; where he was actively involved in developing e-learning. His research interests include e-government, e-business and e-learning. He is a member of the British Computer Society and a member of the Institution of Engineering and Technology, UK.

René Fitterer works as research associate at SAP Research Switzerland where he currently pursues his PhD in management at the University of St. Gallen. His responsibilities include design and development of the process landscaping module in PICTURE. His current research focus is on enterprise value assessment of information systems in public organizations as well as business process management. René holds a Master’s degree in information systems from Eastern Michigan University (USA).

Karsten Gareis is senior researcher at empirica, Bonn. His main fields of interest are the way information society technologies impact on ways of working, social inclusion, and regional development. In recent years he was responsible for research on user orientation of public online services in the European Commission funded eUSER project. As project coordinator he oversaw the BISER and TRANSFORM projects, which looked into transformational use of ICTs in EU regions and its relation to regional innovation cultures, economic performance and social cohesion.

Katarina Giritli-Nygren is a teacher and a PhD student in sociology at Midsweden University, lecturing on classical sociological theory. Her doctoral thesis focuses on the organisational consequences of, and the social meaning of “e”, in a local governmental setting. The aim is to study e-government as an administrative reform, from the global creation of a ‘superstandard’ to the local practice of everyday work.
Ulrike Greiner works as senior researcher and project manager at SAP Research Switzerland. Before that she worked as researcher at SAP Research Center Karlsruhe (Germany) where she was mainly involved in research on enterprise interoperability. Her current responsibilities include project management for the PICTURE project, research on business process management, user-centric process modeling and ICT value engineering in particular in e-government. Ulrike holds a PhD in computer science from the University of Leipzig (Germany).

Ivaylo Gueorguiev has been involved in a broad range of projects such as the development of the Bulgarian electronic government strategy and technology and innovation foresight initiatives as well as the management of project portfolios and software process improvement initiatives in various organizations. Mr. Gueorguiev has gained substantial experience in planning, managing and participating in the implementation of process improvement initiatives employing software engineering, information security and business management methodologies. Since 2005 Ivaylo Gueorguiev has been a program manager in the European Software Institute Center Bulgaria.

Umesh Gulla is faculty with University School of Management Studies, GGS Indraprastha University, Delhi, India. His research interests are in information systems management, outsourcing, e-commerce, e-governance, and enterprise resource planning/CRM.

M.P. Gupta is professor & chair-Information Systems & Coordinator-Center for Excellence in E-gov at the Department of Management Studies, IIT Delhi. His research interests lie in the areas of IS/IT planning and e-government. Prof. Gupta has authored the acclaimed book Government Online and edited Towards E-Government and Promise of E-Government, published by McGraw Hill, 2005. His research papers have appeared in national and international journals/conference proceedings. He was the recipient of the prestigious Humanities & Social Sciences fellowship of Shastri Indo Canadian Institute, Calgary (Canada) and a Visiting Fellow at the University of Manitoba.

Cory Allen Heidelberger is a doctoral candidate at Dakota State University. Previously he has taught high school English, speech, algebra, and physics; coached debate and oral interpretation; and written and directed plays. His blog, the Madville Times, focuses on local and state politics in South Dakota. He is a lifelong resident of Madison, South Dakota.

Tobias Hüsing is a researcher at empirica. His educational background is in economics and sociology. Tobias specialises in quantitative empirical research and has been responsible for survey methodology and statistical analysis in a variety of large scale pan-European projects. His work addresses all kinds of questions relating to gauging and benchmarking the information society from a policy perspective.
Recent work includes various perspectives of the information society: that of patients and health care providers, schools and teachers, senior citizens, regional development, specific industries and SMEs, and of citizens and users in general. In many of these, his specific interest has been in questions of e-inclusion, the digital divide. Apart from developing these for empirica projects, Tobias has worked on questionnaires and methodologies for Eurostat and the European Commission.

**Mojca Indihar Štemberger** is an associate professor of information management at the Faculty of Economics, University of Ljubljana, Slovenia. She has published more than 100 articles in scientific journals, books and conference proceedings mainly in the area of business process management, e-business and decision support systems. She has also been acting as a consultant or project manager of several business process change projects in Slovenian public and private sector. She is a member of program committee of some Slovenian and international conferences and has been a conference chair of InSITE 2007 conference.

**Jurij Jaklic** is an associate professor of information management at the Faculty of Economics, University of Ljubljana, Slovenia. His main research interests are business process renovation, business process simulation modelling, business intelligence, and data management. He has published around 100 articles in scientific journals, book chapters and conference proceedings. Since 2003, he is a member of editorial board of Slovene professional journal on information systems. He has been a consultant for business process change on several projects in public and private sector.

**Muhammad Mustafa Kamal** is a post-doctoral researcher at the Brunel Business School Brunel University in the UK. He received his PhD from Brunel University in the area of information systems, in addition, he holds two MSc’s—distributed computing systems (Greenwich University, London) and computer sciences (Punjab Institute of Computer Science, Lahore, Pakistan) and Bachelor’s degree in business administration (Punjab College of Business Administration, Lahore, Pakistan). His current research interest includes investigating enterprise application integration (EAI) adoption in the local government authorities (LGAs), electronic government (e-government) integration and IT infrastructure issues in LGAs. Dr. Kamal has acted as a business analyst in a research project that focused on the integration of customer relationship management (CRM) applications in the London Borough of Havering (co-funded by ORACLE UK). Dr. Kamal also worked as a post-doctoral research assistant on a European funded research project (Ref: proposal n° 2006/VP021/30137) namely—the REFOCUS (senior employees training on information and communication technologies) project. He has published in the *Journal of Enterprise Information Management*, and his forthcoming publications are in the *European Journal of Information Systems, Transforming Government: People, Process, and Policy*, *International Journal of Information Management, International Journal of Electronic Government Research*. He has several publications in international conferences such as AMCIS, EMcis and HICSS and book chapters. Also, he acts as an international reviewer for conferences such as HICSS, AMCIS and EMCIS. Currently, Dr. Kamal is an active editorial review board member for *International Journal of Electronic Government Research* (IJEGR).

**Jay P. Kesan** received his JD summa cum laude from Georgetown University, where he received several awards including Order of the Coif, and served as associate editor of the *Georgetown Law Journal*. After graduation, he clerked for Judge Patrick E. Higginbotham of the U.S. Court of Appeals for the
Fifth Circuit. Prior to attending law school, Jay Kesan—who also holds a PhD in electrical and computer engineering—worked as a research scientist at the IBM T.J. Watson Research Center in New York.

JinKyu Lee is an assistant professor of management science and information systems in Spears School of Business, Oklahoma State University. He holds a PhD (2007) in MIS from School of Management, University at Buffalo, Master of information systems (1999) from Griffith University, Australia, and BBA (1996) from Yonsei University, Korea. His current research interest includes new technology applications for public/commercial services, information security and privacy, and inter-organizational information sharing. Lee has published research articles in various academic journals and conferences and been involved in several NSF/NSA/DOD funded projects in e-government and information assurance areas.

Katarina Lindblad-Gidlund is associate professor and senior lecturer in social informatics at Midsweden University where she is the leader of the CITIZYS Research Group. She is also director of the international master programme of public information systems and in the editorial board of the International Journal of Public Information Systems.

Peter Loos is director of the Institute for Information Systems (IWi) at the German Research Institute for Artificial Intelligence (DFKI) and head of the chair for business administration and information systems at Saarland University. His research activities include business process management, information modelling, enterprise systems, software development as well as implementation of information systems. Loos has written several books, contributed to 30 books and published more than 100 papers in journals and proceedings.

Edephonce N. Nfuka is currently a PhD student in the Department of Computer and Systems Sciences, at Stockholm University, Sweden and an employee at the University of Dar es Salaam Computing Centre, Tanzania. He received a BSc engineering in computer and systems automation from Jose Antonio Echeverria Higher Technical University, Havana and MSc in software engineering from Universitat Politècnica de Catalunya, Barcelona. He is a member of the Association for Information Systems (AIS) and Information Systems Audit and Control Association (ISACA). He has over seven years of industrial and academic experience in the area of IT Management. His current research focuses on IT governance, specifically in the public sector in a developing country’s environment/setting.

Sevgi Ozkan is a lecturer at the Informatics Institute, Middle East Technical University, Turkey. She is a member of Information Systems Evaluation and Integration Research Group (ISEing) and a visiting research fellow at Brunel University, UK, and has a PhD in the area of information systems evaluation, with a particular focus on assessing success and effectiveness of information systems. She received her BA and her MA in engineering—electrical and information sciences from the University of Cambridge; her MSc in business information systems from the University of London, and her PhD from Middle East Technical University. She has published her work in well acclaimed journals as well as in international conferences. She is on the executive board of the European and Mediterranean Conference on Information Systems (EMCIS). She has worked for IBM UK and Motorola UK prior to her doctorate studies. Her research interests are information systems evaluation, information and communication technology management in the public sector, information technology governance, evaluation of e-government systems.
Michael Räckers works as a PhD student and research assistant at the European Research Center for Information Systems in Münster, Germany since 2006. Before starting his PhD he worked one year as a student assistant on projects in the public-sector. Räckers holds a master degree in information systems from the Westphalian Wilhelms-University (WWU) Münster, Germany. His research interests are in the field of process modeling in public and private organizations, e-government, e-inclusion and electronic service delivery.

Mysore Ramaswamy is a professor of information systems at Southern University and A&M College, Baton Rouge, Louisiana, USA. He received his PhD in information systems and decision sciences from the Louisiana State University. As a recipient of Fulbright Scholar Award for 2004-2005, he has taught a graduate course in electronic commerce at the State Engineering University of Armenia, Yerevan, Armenia and conducted research on the impact of recent innovations in information technology in emerging market economies. His research has been published in several journals including Information Systems Research, and IEEE Transactions on Knowledge and Data Engineering.

Ashwin Rao is an undergraduate student in the College of Human Ecology at Cornell University. He is an honors BS candidate in the department of Human Development. He has been an NSF funded REU fellow on the topic of disaster management since 2007 (Jin Kyu Lee, Oklahoma State University—PI). His current research interests include intelligent system designs, cross-cultural differences in perceptions of danger, and analysis of foreign disasters.

Dibakar Ray is currently working as Scientist ‘E’ at National Informatics Centre, New Delhi. His research interest is e-government and interoperability of information systems. He has experience of designing, developing and implementing various e-government applications for various levels of government. He has authored number of research papers, which have appeared in various journal and conference proceedings.

Peter Rohner heads the Competence Center Health Network Engineering (CC HNE) at the Institute of Information Management (http://ehealth.iwi.unisg.ch) and holds a lectureship at the University of St. Gallen (http://www.unisg.ch). Before, he studied information management at the University of St. Gallen (lic. oec. Inform. HSG) and received a PhD for his work about architecture and integration of distributed systems (Dr. oec. HSG). Currently, he is working in the fields of e-health (division of labor and networkability in public health) and e-government (networkability of public administrations). He is member of different expert panels (e.g. eCH and SwissICT).

Knut Rolland has over 10 years of experience from working within large organizations with collaboration technology both as a researcher and a consultant. His main interests include corporate-wide collaboration platforms, integrated operations, and the organizational dynamics involved in introducing such technologies in organizations. He is a principal consultant in the Norwegian consulting company Avenir, and holds a position as an adjunct associate professor at the department of computer and information science at the Norwegian University of Science and Technology. Dr. Rolland research has been published in numerous international conferences, books and journals, including The Information Society and Ethics and Information Technology.
Barbara Russo is an associate professor of the Faculty of Computer Science of the Free University of Bolzano-Bozen, Italy and a member of the Center for Applied Software Engineering. She has various publications on agile methods and open source development. She has participated to several national and international projects in software engineering. She has been program committee member or program chair of various conferences and referee of international journals in the sector. Her current research interests mainly focus on reliability analysis and software metrics in the agile and open source development.

Lazar Rusu is a senior lecturer in IT management in the Department of Computer and Systems Sciences at Stockholm University and Royal Institute of Technology Stockholm, Sweden. He holds a diploma in electrical engineering (MSc) from Cluj-Napoca Polytechnic Institute, a diploma in management (MSc) from Babes-Bolyai University Cluj-Napoca and a PhD in management from West University of Timisoara, Romania. Over his career, he has focused mainly in doing research on the management of information systems/information technology and has a professional experience of over 20 years both industrial and academic in the area of information technology.

Demetrios Sarantis holds an MSc in operational research and information system from London School of Economics and Political Science and he is a PhD student of decision systems at the National Technical University of Athens, Greece. His research interests include organization and implementation issues in transformational government, public sector management, process modelling and reengineering in the public sector. He gained practical experience in several multinational companies and government organizations in different countries.

Ludwig Christian Schaupp is an assistant professor at West Virginia University. His primary research interests include website success metrics, e-government adoption and diffusion, and REA. He has published in several top-tier journals including Communications of the ACM, Journal of Computer Information Systems, and Information Systems Frontiers. He has also presented at several international conferences including Americas Conference on Information Systems (AMCIS) as well as the Hawaiian International Conference on Systems Sciences (HICSS).

Rajiv C. Shah received his PhD from the Institute of Communications Research at the University of Illinois at Urbana-Champaign. Prior to that he earned a JD from the University of Illinois at Urbana-Champaign and a BS in electrical engineering from the University of Nebraska-Lincoln.

Maddalena Sorrentino researches in organization theory and organisational change, and is a professor of e-government at the University of Milan. She is the author and editor of seven books and more than 140 articles, essays, Italian and international conference communications and research reports. In 2006 Maddalena founded the ICONA Inter-departmental Centre along with a group of her university colleagues. ICONA is dedicated to organisational innovation in public administrations. Maddalena is member of the editorial boards of the Government Information Quarterly and Information Systems and e-Business Management. She is advisor to private and public institutions on themes related to organisational development.
About the Contributors

**Florian Stroh** studied computer science and business administration between 2000 and 2006 at the Technische Universität München (Germany). Since 2006 he is working as a research associate at SAP Research and is involved in the EU-funded research project PICTURE. In addition, he is a research assistant at the institute of information management of the University of St.Gallen (Switzerland).

**Giancarlo Succi** is professor with tenure at the Free University of Bolzano-Bozen, Italy, where he directs the Center for Applied Software Engineering. He was professor with tenure at the University of Alberta, Edmonton, Alberta, associate professor at the University of Calgary, Alberta, and assistant professor at the University of Trento, Italy. He coordinated several European projects, has been chair of various international conferences and referee for various international journals in software engineering. His research interests include multiple areas of software engineering, including open source development, agile methodologies, and experimental software engineering. Giancarlo Succi is a Fulbright Scholar.

**Nasrat M. Touqan** is an undergraduate student in the Spears School of Business at Oklahoma State University. He is a BS candidate in the department of Management Information Systems. He has been an NSF funded REU fellow on the topic of disaster management since 2007 (Jin Kyu Lee, Oklahoma State University—PI). His current research interests include mobile government, information systems architecture, management science methods and forecasting techniques.

**Eileen M. Trauth** is associate dean and professor, College of Information Sciences and Technology, The Pennsylvania State University. Her research is concerned with socio-cultural influences on the global information economy with a special focus on the role of gender diversity and social inclusion within the field. She has received two Fulbright Awards and grants from the National Science Foundation and Science Foundation Ireland to support her research. In addition to her work on gender, she has published papers and books on qualitative research methods, global informatics, information policy, information management and information systems skills.

**Haiko van der Voort** is an assistant professor of public administration at Delft University of Technology. He studied public administration in Leiden. He teaches organization theory and decision making theory for bachelors, masters and elective students and for professionals. He studies regulation and multi-actor governance in the public domain.

**Jing Yang** is a doctoral student of management science and information systems in Spears School of Business, Oklahoma State University. She holds a MS (2007) in statistics from Oklahoma State University and a BE (2001) in statistics from Zhongnan University of Economics and Law, China. Her current research interest includes inter-organizational information sharing, information security and training, and cross-cultural differences in deception detection.

**Benjamin Yeo** is a senior research analyst in regional economics at the Milken Institute. His expertise involves knowledge management for e-business and economic development; information systems management; and information policy studies. Some of his recent projects include *Pittsburgh’s Technology Strategy: SWOT Analysis*, a study of Pittsburgh’s technology strategy; and *Nemours Children’s Hospital: Advancing Orlando’s Life Science and Economic Development*, a research on Orlando’s newly approved Nemours Children’s Hospital. He received a PhD in information science from the College of Information Sciences and Technology at the Pennsylvania State University, USA.
**Jörg Ziemann** has studied at the University of Göttingen, the University of California (Irvine, USA) and the University of Hamburg, where he received a diploma in business computer science (Dipl.-Wirt.-Inf.). In 2004 he joined the Institute for Information Systems (IWi) at the German Research Center for Artificial Intelligence (DFKI) where he worked on various EU projects in the fields of collaborative business process management and e-government. In this area he published more than 30 articles in journals and proceedings. Currently, Jörg is working on his PhD thesis.
