About the Contributors

Alessia Agliati received a PhD in psychology of communication at the Catholic University of Milan (Italy). She is a member of the Italian Psychological Association (AIP), a regular member of the Italian Professional Board of Psychologists, and an official trainer of the facial action coding system (FACS) method. She is senior researcher at CESCOM where she took part to Myself project. Her research addresses the methods for microanalysis of nonverbal communication and emotion expression in different interactive contexts.

Ahmed Ali (ali.ahme@uwlsx.edu) is an assistant professor of instructional technology at the University of Wisconsin-La Crosse. Ali’s teaching and research interests focus on technology and pedagogy, instructional design, Web and multimedia developments and online learning. Ali has presented at national and international conferences.

Arif Altun is an associate professor of computer education and instructional technology at Hacettepe University in Ankara, Turkey. His research areas cover the socio-cognitive issues in e-learning environments, navigational processes, instructional design and hypertext research. He has published research papers and books within these domains, both in Turkish and English.

Lúcia Amante graduated in psychology from the Instituto Superior de Psicologia Aplicada (ISPA), in Lisbon, Portugal, with a specialization in educational psychology. She has obtained a master’s degree in multimedia educational communication and a PhD in sciences of education at the Universidade Aberta. She works in distance and online education at Universidade Aberta, Lisboa, Portugal. Her research interests include online education in higher education, learning technologies in children, and processes of socialization with digital media.

Chee Siang Ang is currently a PhD student at City University in London. He is particularly interested in studying computer games not only as a tool for entertainment, but also a medium for other purposes such as learning a domain of knowledge, as well as conveying information and experiences. He has obtained his master’s degree in multimedia at the University of Malaysia by conducting research on computer games and educational technologies. His fields of interest include multimedia learning, computer games, interactive narratives, cognitive and social psychology, game engines and authoring systems. His PhD research is related to social gaming and game cultures.

Luigi Anolli is a professor of communication psychology at University of Milano-Bicocca. He is also the director of the Centre for Studies in Communication Sciences (CESCOM), and oversees the
About the Contributors

Humanities and Social Sciences Department at the same university. Professor Anolli was formerly the director of the Centre for Studies and Research in Communication Psychology of the Catholic University in Milan (founded in 1993). He was involved in several research projects at national and international levels, and was co-responsible for the coordination of the University of Milano-Bicocca team in European project, Myself.

Petek Askar is a professor of computer education and instructional technology at Hacettepe University (Turkey), where she teaches and conducts research on diffusion of technology, e-learning, and development and evaluation of learning objects. She has been involved in various projects on computers in education and distance learning in Turkey. She has publications in several journals and books both in Turkish and in English.

Massimo Balestra is leading figure at the ACSE research laboratory. Balestra graduated in computer science in 1992 from the University of Milan (final paper: Implementation of a multimedia environment dedicated to employees training). With 20 years of experience, he has always dealt with training topics, focusing his attention in ACSE on e-learning. He has been responsible for ACSE in an e-learning research project funded by Murst—Italian Ministry of Research. He is coordinator of the presentation of the IST European project, e-dynamics (e-learning dynamic and ubiquitous system based on role diagramed profiles and natural language interaction. He has been scientific coordinator for ACSE in the Eureka 2235 IKF “Information and Knowledge Fusion” project. He is coordinator for the Craft European project, Myself.

Robert A. Bartsch is an associate professor of psychology at the University of Houston - Clear Lake. He regularly teaches classes in research methods, statistics, social psychology and psychological thinking. He has research interests in pedagogy, attitudes, and media effects. Additionally, for the past year, he has been a co-convener of the Teaching-Learning Enhancement Center on campus.

Emmanuel Blanchard is a PhD candidate in computer science at the University of Montréal. His research interests include but are not limited to intelligent tutoring systems, multi-agents systems, human-computer interactions, enhancement of learners' motivation and learner-centered cultural adaptation in virtual learning environments. He earned a BS in computer science from University of Bordeaux 1 and a MSc in computer science from University of Montréal.

Curt J. Bonk is a professor of instructional systems technology at Indiana University. Bonk is also a senior research fellow with the DOD’s Advanced Distributed Learning Lab. He has received the CyberStar award from the Indiana Information Technology Association, Most Outstanding Achievement award from the U.S. Distance Learning Association, and Most Innovative Teaching in a Distance Education Program award from the State of Indiana. More information about Bonk is available at http://mypage.iu.edu/~cjbonk/.

Spiros Ap. Borotis holds a BSc in mathematics from the University of Patras (Greece), and an MSc in information systems from Athens University of Economics and Business (Greece). Currently, he is a PhD candidate at Athens University of Economics and Business. In 2001 he joined ELTRUN—an organization information systems group. Since then he has worked as a researcher in several European
About the Contributors

and national research projects. His current research interests focus on e-learning, human resource development, and information systems.

Deborah Buell is an instructional designer with Shea Writing and Training Solutions, Inc. She holds a PhD in education from the University of Houston and has published articles on distance education in state and national publications. Her distance learning work includes presentations at national and international distance learning conferences. She has also edited computer information system textbooks.

Brian H. Cameron is assistant professor of information sciences and technology at The Pennsylvania State University. Prior to joining Penn State, he was director of information technology for WorldStor, Inc., a storage service provider (SSP) in Fairfax, VA. He has also held a variety of technical and managerial positions within IBM and Penn State. His primary research and consulting interests include enterprise systems integration, storage networking, emerging wireless technologies, and the use of simulations and gaming in education. He has designed and taught a variety of courses on topics that include networking, systems integration, storage networking, project management, and IT consulting.

Edward J. Caropreso (caropresoe@uncw.edu) is an associate professor of education in the Specialty Studies Department of the Watson School of Education, at the University of North Carolina, Wilmington. He has an MA and PhD in educational psychology from the University of Georgia, Athens. He teaches undergraduate and graduate courses on educational psychology, human development and learning, and educational research. His current research interests involve online learning, cognition and cognitive development, and teacher professional development.

Thomas Case is a professor of information systems at Georgia Southern University. He primarily teaches courses in data communication, digital commerce and information systems strategy and policy. Distance education technologies are used in all of his courses. His main research interests include consumer online commerce, technology adoption/diffusion and information systems pedagogy. Case has held a number of leadership roles in AIS SIGED: IAIM and Southern AIS. He has authored three textbooks and was the 2004 recipient of the Georgia Southern University Excellence in Contributions to Instruction award.

Des Casey has degrees in mathematics, computing, and education. He was a secondary school teacher and administrator before moving to the tertiary sector. He is currently with the Faculty of Information Technology at Monash University, Melbourne, Australia, where he lectures in programming and Web applications development. His research interests are in the design and implementation of models of Web-mediated education, and learning repositories.

Kristin Caverly is currently a graduate student at the University of West Georgia. She is getting her master’s and certification in business education. Her research interests include students’ use of technology in education. She is currently working as a paraprofessional at an elementary school and would like to work as a computer applications teacher after graduating.

Chaoyan Dong is a doctoral student at the program of Educational Communication and Technology at New York University. Her research interests include multimedia learning, emotional design in
multimedia learning, professional development for educators to learn and to integrate technology into teaching, and how the use of technology, (i.e., computer, video games and television) affect children’s cognitive development. Her dissertation work examines whether interface design affects users’ emotions, and if any, whether the induced emotions facilitate or hinder multimedia learning.

Irene Chen is associate professor of Urban Education at University of Houston – Downtown. Her main teaching responsibilities are instructing pre- and in-service teachers in educational technology, classroom assessment strategies, and multicultural education. She received her PhD in education from the University of Houston, with a concentration in instructional technology. Currently, she is continuing her research of the role of assessments in classrooms and examining issues related to educational technology.

Sue-Jen Chen (chensj@uncw.edu) is an assistant professor of instructional technology at the University of North Carolina, Wilmington. She teaches courses on instructional design and evaluation, online course design, computer applications in education, and needs assessment. Dr. Chen’s research interests include online learning and communication, learning environment design, cooperative/collaborative learning, problem-based learning, and interactive multimedia design.

Linda Confalonieri received a MS in psychology from the Catholic University of Milan (Italy). She is currently a PhD candidate in psychology at University of Milan Bicocca. She is working as junior researcher at the Centre for Research in Communication Science-University of Milan—Bicocca. Besides other teamwork at Emory University (GA, U.S.), she is involved in the European Myself project. Her research addresses the human-virtual agent communication processes, especially in e-learning environments.

Merrilee Cunningham is an associate professor of English at the University of Houston – Downtown. She holds a PhD from Vanderbilt University and has published many poems as well as over 20 articles on Renaissance literature, popular culture, South American educational systems, and media in national and international publications. She also edited textbooks, such as Humanities in the South, and other literary magazines.

Rita Davis serves as a professor in the Department of Management, Marketing and Corporate Communications in the College of Business and Technology at Eastern Kentucky University. She has been a teacher for 25 years. Davis teaches business communications, technology, and teacher education courses. She integrates distance education strategies in all of her courses. Davis is active in national, regional, and state professional organizations and publishes in the organizations’ professional journals. She is editor of the Kentucky Business Education Journal.

Roberta Devlin-Scherer teaches Advanced Teaching Strategies and Contemporary Assessment to graduate and undergraduate students at Seton Hall University. Research interests include reflection, uses of e-portfolios and teacher and school effectiveness. Her recently published book, Teaching for Real Learning, for Scarecrow Education Press, features a section on contests and competitions.
**Geoffrey Dick** is a senior lecturer in the School of Information Systems at the University of New South Wales. He has recently held visiting appointments at Georgia Southern University, Agder University College, the Tec de Monterrey and the Asia Europe Institute. For over 10 years, he has been involved in both delivering and researching online education. He is a past-president of IAIM—the AIS special interest group on education, and is treasurer of the Australasian chapter of AIS.

**Bing Duan** received his bachelor’s degree in English from the School of Communication Engineering of Chong Qing University (China) and his master’s degree English from the School of Electrical and Electronic Engineering, Nanyang Technological University (Singapore). His major research interests are e-learning framework for lab-based subjects, XML-based instrumentation markup language and network traffic analysis for real-time control.

**John Duncan** has taught a variety of courses for over 25 years at military schools, community colleges, and universities. Duncan taught in both the classroom and online environments and at the undergraduate and graduate levels. He received his PhD at the University of Illinois at Urbana-Champaign and an MBA from City University. John regularly presents his research findings at national and international conferences. Recent, peer-reviewed journal articles have appeared in the *Journal for Global Business Education, Community College Journal of Research and Practice, Community College Journal, Journal of Vocational Education Research,* and the *Delta Pi Epsilon Journal.* John is currently part of the faculty of Clemson University.

**Sarah Edmonson** is an instructor at Baylor College of Medicine in Houston, Texas. She divides her time between clinical practice, teaching, and informatics research. In addition to years of clinical teaching, she has designed and taught faculty development curriculum in medical informatics. Her education includes an MD from the University of Texas Southwestern Medical School in Dallas, Texas (a family medicine residency and primary care research fellowship through Baylor College of Medicine). She received her MS in health information sciences from the University of Texas.

**Abdulaziz Elfessi** (elfessi.abdu@uwlax.edu) is an associate professor in the Department of Mathematics, with interests in applied statistics and use of technology in teaching and learning. Elfessi is widely published in his field.

**Claude Frasson** is a professor in the Department of Computer Science and Operations Research at the University of Montréal. He is also the director of GRITI (Inter-university research group in intelligent tutors, grouping seven universities in Quebec, about 75 researchers) and of the HERON laboratory at the University of Montréal. He received his PhD from University of Nice (1974). His research interests are related to intelligent tutoring systems, a domain that regroups artificial intelligence, education, pedagogy, learning techniques, knowledge engineering, e-learning, and neural techniques. He is also the steering committee chairman of the international conference on intelligent tutoring systems.

**Jorge Gaytan** (jgaytan@westga.edu) is associate professor and director of business education in the Richards College of Business at the University of West Georgia. He teaches business communication, Web page design, and technology support systems courses. Research interests include: online and distributed education, instructional technology, assessment, and critical thinking. Gaytan’s publications
About the Contributors

have appeared in journals such as The Delta Pi Epsilon Journal, NABTE Review, Business Education Forum, The NBEA Yearbook, and Contemporary Education. Gaytan has received 13 teaching, 2 research, and 2 service awards in his 15-year teaching career. Further information is available at www.westga.edu/~jgaytan

Michael M. Grant is an assistant professor in the Instructional Design and Technology program at the University of Memphis. He has been working with elementary and secondary educators for over ten years. His research considers how to help faculties implement technology integration and how students represent their learning with computer technologies in different ways. Grant earned his PhD from the University of Georgia in instructional technology and was recently selected for the American Educational Research Association Special Interest Group for Instructional Technology’s 2005 Young Researcher Award.

Courtney Green is an instructional librarian and technology consultant at DePaul University. She also serves as a liaison for the School of Computer Science, Telecommunications and Information Systems, and to the Department of Psychology. She has published articles on usability testing and on the management of electronic resources by libraries, and is a regular reviewer for Library Journal and E-STREAMS. She teaches at both the undergraduate and graduate level, for DePaul’s First Year Program and its School for New Learning. Courtney earned her master’s degree in library science, as well as a BA in English and journalism, from Indiana University—Bloomington, and is currently pursuing a second master’s degree in human computer interaction at DePaul.

Sunil Hazari is associate professor in the Department of Management and Business Systems, Richards College of Business, University of West Georgia. His teaching and research interests are in the areas of business education, information security, infrastructure design of e-commerce sites, Web usability, and organizational aspects of e-learning. He has authored several peer-reviewed journal publications in information and instructional technology areas, has presented papers at national conferences, and is an editorial board member of several information system journals. Further information is available from http://www.sunilhazari.com/education.

Charles Herring received his PhD in computer science (2001) from the University of Queensland where he developed the Intelligent Control Paradigm for adaptable and adaptive software architectures. He is currently an independent software developer and consultant. He was a senior research scientist with the Distributed Systems Technology Centre (DSTC) in Brisbane. There, he was a consultant to Queensland’s Department of Defense, and to industry partners on selection and deployment of emerging technologies. Prior to DSTC he was a senior research programmer with the National Center for Supercomputing Applications in Champaign, Illinois. Dr. Herring had a distinguished career with the U.S. Department of Defense, where he led numerous research projects for agencies such as DARPA and DMSO, in the area of command and control and distributed simulation.

Atsusi Hirumi is an associate professor of instructional technology at the University of Central Florida. His research work focuses on developing systems to train and empower K-12, university, and corporate educators on the design, development and delivery of interactive distance education programs. His research concentrates on the design and sequencing of e-learning interactions. He has published over
a dozen articles, several book chapters, and has made over 50 presentations at international, national
and state conference on related topics.

**Habib Mir Hosseini** received his BSc in electronic engineering from Isfahan University of Tech-
nology (Iran), his MSc in digital electronics from Sharif University of Technology (Iran), and his PhD
in electrical engineering from the Adelaide University (South Australia). Since December 1997 he was
a research fellow with the Network Technology Research Centre (NTRC), School of EEE, Nanyang
Technological University of Singapore. He later joined School of Electrical and Electrical Engineering
of NTU in August 2000 as an assistant professor. His research interests include multimedia security,
multimedia annotation, Semantic Web, and object oriented e-learning models.

**Chao-Li Hsu** is an associate professor at National Taichung University in Taiwan, where she teaches
courses in instructional technology.

**Jun Hu** received her doctoral degree in curriculum and instruction in 1999, specialized in computer
education. She has a strong background in information technology, instructional design, and multi-
media/web design and development. She has been working as a senior designer on many large-scale
web-based training projects for Fortune 500 companies, government agencies, and universities. Her
current research interests are on the strategies and methodology for designing effective and efficient
computer-based and web-based simulation for software training.

**Jeonghee Huh** is a PhD candidate in instructional technology from the University of Central Florida,
Orlando, FL. She assisted in researching on a NASA’s virtual lab software, online reading assessment
strategies, and digital game-based learning. She assisted in designing a Web-based graduate course of/Instructional Game Design. Currently, she is assisting in the evaluation of the Greater Orlando Graduate
K-12 (GO GK-12) and the Florida Online Reading Professional Development (FOR-PD) projects. Her
research interests include the applications of innovative technology and visual literacy for blended
learning and the development of an effective instructional strategy and design model for Web-based
teaching and learning.

**Fethi A. Inan** (inanfethi@gmail.com) is in the Department of Instruction and Curriculum Leader-
ship at the University of Memphis. His research interests are design and development of online learning
environment, individual differences, adaptive hypermedia, and integration of technology into various
learning environments.

**Heather Jagman** is an instructional librarian and technology consultant, and liaison to the Biology
and Theatre Departments at DePaul University. Heather earned her Bachelor of Arts degree in English
from Loras College, and holds a Master of Science in library science from the University of Illinois in
Urbana Champaign. She has previously published in research strategies and reviews science materials
for *E-STREAMS*. Heather is also interested in studying how all types of libraries and librarians can
better market their skills and services.

**Paula Jones** serves as an instructional designer in the Instructional Development Center within the
Continuing Education and Outreach program at Eastern Kentucky University. She works with an instruc-
tional design team to design, produce, and evaluate quality distance education instructional products and courses. Ms. Jones has designed and developed numerous Web-enhanced and online courses. In addition, she is active in several professional organizations and has published/presented several articles at various national conferences. She is currently ABD (all but dissertation) in her doctoral program in instructional systems design (curriculum and instruction) at the University of Kentucky. Her current research interests focus on student perspectives in distance education and ways of utilizing instructional technology to offer more effective communication and instructional opportunities to learners.

David Judkins is an associate professor of English at the University of Houston where he specializes in Shakespeare, Renaissance literature, post-colonial literature, and travel literature. Professor Judkins has taught English online for the past six years and is the recipient of the university’s Distinguished Teaching Award for distance education. He received his PhD in English literature from Michigan State University where he specialized in early 17th century English literature.

Kagan Kalinyazgan is the general manager of YUCE Inc. He initiated the YUCE Information Technology Academy and YUCE Information Systems. He holds a BS in civil engineering from Middle East Technical University, in Ankara, Turkey. His main areas of expertise include project management, smart schools, and innovative transitions in education.

Jared Keengwe is an assistant professor at Muskingum College in Ohio. Prior to joining Muskingum College, he was an instructor at Indiana State University, where he taught courses in computer applications in education and multicultural studies. He completed his doctorate from Indiana State University in the area of curriculum and instruction.

Melissa Koenig is the library coordinator for marketing and outreach and an instructional technology consultant at DePaul University. Her liaison duties include working with the school for the New Learning, Public Services, and Communications Departments at DePaul University. She has published articles related to learning outcomes in online environments and has presented both in the United States and internationally on a variety of topics, including copyright issues (as the relate to course management systems), librarians as technology consultants, and student technology training for online learning. Melissa earned her master’s degree in library science from the University of Illinois at Urbana Champaign. She also holds an BA in psychology from Kenyon College.

Piet Kommers is associate professor at the University of Twente and part-time lecturer at the Fontys Academy in The Netherlands. His specialties are advanced learning tools like concept mapping, virtual reality and mobile learning. His research and teaching stretches from teacher education via European joint research projects to international projects under the auspices of UNESCO. His recent publications are on learner’s preconceptions and representations that express preintuitive ideas before the actual learning may start: Cognitive Support for Learning: Imagining the Unknown. <http://users.edte.utwente.nl/kommers/book.htm>. He is editor in several research journals and organizes conferences in mobile learning, e-society and Web-based communities.

Feng-Qi Lai received her PhD in educational technology from Purdue University (1997). After her graduation, Lai worked for corporations in the Chicago area until 2002. Her job titles in those corpora-
About the Contributors

Lai was director of training and, later, senior instructional designer/project manager. Lai is currently an assistant professor at Indiana State University. Her research interest focuses on designing and developing effective instructional strategies, particularly in the international arena (e.g., China). She also holds full professor status at Shanghai Normal University in Shanghai China. She currently serves as president of the Society of International Chinese in Educational Technology.

Seung-Hee Lee (seuselee@iupui.edu) is a researcher with the Kelley Direct Online Program within Kelley School of Business at Indiana University. Lee earned her PhD from Hanyang University in Seoul, Korea (2003). Lee’s major research interests are online collaboration, reflective technologies, e-learning in higher education, and online moderating/mentoring.

Stella Lee is an e-learning consultant for the criminal justice team (CJT) at the University of Hertfordshire. She has worked in the field of Web design, instructional design, e-learning development and consultation in higher education. She has a bachelor’s degree in graphic arts from Slippery Rock University in Pennsylvania and a master’s degree in communication from Stephen F. Austin University in Texas. Lee’s research interests include usability and accessibility issues, instructional technology trends in higher education, and e-learning project planning and management.

Kit H. Leung is a doctoral candidate in the Department of Educational and Counseling Psychology of the Faculty of Education at McGill University. She is an educational technologist who specializes in applied cognition situated in online collaborative inquiry, and a professional instructional designer and trainer. Her current research interests include exploring the impacts of artificial intelligence, the instructional system for virtual learning environment on learning to thinking, diagnostic cognitive assessment, and learning and teaching effectiveness.

Chun Fu Lin (Charlie) (cl194@msstate.edu) is a doctoral student as well as a teaching assistant at Mississippi State University. He received a bachelor of science degree in business administration and a MA in education from Ohio State University. His research emphasis has been on the use of computer-assisted instruction to students to whom English is their second language (ESL) or foreign language (EFL). He enjoys working in the area of multimedia instructions, using a constructivist approach in discourse context, and conducting educational research.

Keck-Voon Ling received a bachelor’s degree in English from National University of Singapore, and PhD from the University of Oxford. He is currently an associate professor with the School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore. He also holds a joint appointment as a senior scientist at Singapore Institute of Manufacturing Technology, Singapore. From 1988 to 1989, he was a defense engineer at the Singapore Defense Science Organization. He was a visiting researcher at Cambridge University’s Engineering Department in 2001 and 2006. His current research interests include model predictive control, receding horizon estimation, satellites, and GPS-related applications.

Shijuan Liu is an instructional consultant and research fellow at Kelley Direct Online Programs at Indiana University, Bloomington. She is a PhD candidate in instructional systems technology at Indiana University, where she earned an MS (2003). She also earned an MA in Chinese information processing.
from Renmin University of China, Beijing (1996), where she worked as a full-time faculty member for five years. Her major research interests include assessment and evaluation, online education, pedagogical use of technologies, and computer-assisted language learning.

**Youmei Liu** (yliu5@uh.edu) earned her EdD in instructional technology from the University of Houston. She is currently the director of the Center for Learning Enhancement in the Division of Educational Technology and Outreach. Prior to this leadership role, she was the senior instructional designer for the university. She has published widely in the areas of faculty development, academic assessments, cross-cultural learning, online learning communities, and the integration of instructional technology in teaching and learning.

**Xiaojing Liu** (xliu@indiana.edu) received her PhD in instructional systems technology. She is a research fellow for the Kelley Direct Online Program at Indiana University, Bloomington. Her research interest focuses on online learning, information systems, communities of practices, and knowledge management.

**Igor Ljubi** received his BSc and MSc in electrical engineering from the Faculty of Electrical Engineering and Computing, University of Zagreb, (1999 and 2003, respectively). He has been working at the Faculty of Electrical Engineering and Computing as an associate assistant since March, 1999. His research interests include software engineering, mobile agents, WWW programming and distance education. He is also a member of the IEEE.

**Lynn Lohmeyer** graduated from Purdue University with a MS in instructional research and design. She worked as an independent consultant for seven years, developing classroom, self-study, and online training projects for firms such as Arthur Anderson, Hewitt Associates, and Manpower International. She has been employed for the past five years for WellPoint, Inc., the nation's leading health insurance company. As part of the human resource department, she is responsible for training employees, managers, and human resource staff on human resource administrative processes and procedures.

**Thomas A. Lucey** is an assistant professor of curriculum and instruction at Illinois State University, Normal, IL. He received his degree from the University of Memphis, Memphis, TN. His research interests include financial education, social justice, teacher education, and related technology issues. Recent articles appear in *Education and Urban Society* and *Citizenship, Social and Economics Education: An International Journal*. His co-edited text, *Financial Education for Children and Youth*, is scheduled for publication in 2008.

**Wendy Maboudian** holds a Master of Education in multicultural studies and an EdD in curriculum and instruction in instructional technology from the University of Houston. She has taught ESL/EFL for over twenty years in Iran and the U.S. and has extensive experience in training and instructional design in business and industry, concentrating on workforce development. In her studies and areas of professional development, Maboudian has focused on educational equity, multicultural learning experiences, and the use of technology in adult learning environments.
Richard J. Magjuka is a professor of business administration in the Kelley School of Business. He has been the faculty chair of Kelley Direct since its inception. His primary research interests are the design and delivery of effective online education and online pedagogy.

Fabrizia Mantovani received her PhD in communication psychology from the Catholic University of Milan (Italy). She is a regular member of the Italian Professional Board of Psychologists. Mantovani is currently a research professor at the University of Milan-Bicocca, where she teaches General Psychology and carries out research at CESCOM, within the Myself European project. She is also senior researcher at the Applied Technology for Neuro-Psychology Lab of Istituto Auxologico Italiano, where she has been actively involved in several research projects funded by the European Commission. Her research interests include: affective computing and e-learning; embodied conversational agents, non-verbal communication, virtual reality applications for therapy, and training.

Justin W. Marquis is an advanced doctoral student in Indiana University’s Instructional Systems Technology Department, where he is currently finishing his dissertation: “Children without toys: How home technology use influences in-school behavior, attitudes and achievement.” He also works for his alma-mater, Dickinson College, in Carlisle, Pennsylvania, as the Web and multimedia specialist for the Office of College Relations, producing admissions videos and authoring Web pages and multimedia applications. In addition, Marquis teaches classes on the sociology of education and seminars relating to issues of literacy, education and technology. His research interests center mainly around issues of social justice and information literacy.

Rita de Cássia Veiga Marriott was a lecturer in Brazil at the Federal University of Paraná (UFPR) and at the Catholic University of Paraná (PUCPR), where she attained her MA in education. She was responsible for teacher development programs related to computer-assisted language learning (CALL) and for providing support for the implementation of distance learning courses at the UFPR Language Centre. She has several publications on distance education, ELT, and concept mapping. In the UK, where she presently lives, she is a language tutor at the Centre for Modern Languages, University of Birmingham, while giving teacher training courses and remaining a collaborator for the Research Group on Education, Communication and Technology at PUCPR.

Joseph Martinelli has over 21 years of experience in higher education—15 as an administrator at William Paterson University and five as a full-time faculty member at Seton Hall University in the Instructional Design and Technology program. He holds degrees in communication, sports science and education and is a certified K-12 English teacher. He is currently working toward an EdD degree in secondary education from Seton Hall University.

Shawn McCombs is a clinical assistant professor and manager of the Communication Technology Center in the School of Communication at the University of Houston. He currently teaches courses in Web technologies, e-health and in telemedicine. He earned his master’s of education in instructional technology from the University of Houston.

Permanand Mohan is a senior lecturer in the Department of Mathematics and Computer Science at the University of the West Indies. His research interests lie in the field of artificial intelligence and education (AIED) and other advanced technologies for teaching and learning. He was previously a
Fulbright visiting scholar at the School of Information Sciences at the University of Pittsburgh and a visiting professor at the ARIES Laboratory of the University of Saskatchewan, in Canada. He recently received an IBM Eclipse Innovation Grant to develop reusable e-learning courseware for Apache Derby, based on the learning technology standards.

**Lina Morgado** is a professor in the Department of Education at Universidade Aberta, Portugal (the Portuguese Open University). Her interests and expertise are focused on the development of an e-learning pedagogy in higher education. She designed and taught online courses on distance education, online pedagogy, virtual learning environments and educational psychology. She is course coordinator of a master’s degree in e-learning pedagogy. She is also working on a team project, concerning the development of an e-learning model for postgraduate courses at Universidade Aberta. Her research interests include online communication, psychology of online interaction, e-learning pedagogy, and the implications of e-learning and emerging technologies for relationships.

**Marcello Mortillaro** received a bachelor’s degree in psychology from the Catholic University of Milan (Italy) in 2003. Currently he is a PhD candidate in communication psychology at the Catholic University of Milan (Italy). He works as junior researcher at the Centre for Research in Communication Science (CESCOM), at University of Milan-Bicocca. His research addresses the multimodal analysis of emotional experience, namely on vocal nonverbal expression and physiological correlates of emotions. Mortillaro also took part in Myself project.

**Joyce Coleman Nichols** is associate professor and coordinator of professional and community leadership in the College of Professional Studies at the University of West Florida. She received her doctorate in higher education administration from Florida State University. Nichols received the Teaching Incentive Program Award in 2004-05. She coauthored a book entitled, *Teaching Diversity*. She has published articles in the field of multicultural education, higher education, and curriculum studies.

**Alexa North** is professor in the Department of Management and Business Systems in the Richards College of Business at the University of West Georgia. She has been a faculty member at the University of West Georgia for 12 years. She has authored and co-authored over 35 articles, three chapters in professional yearbooks, and one textbook. She also has presented research at national and regional conferences for over 25 years. Her areas of research focus on technology, interpersonal, and communication for entry-level employment. Current graduate courses are for teacher educators, including methods, curriculum, and instruction-related courses.

**Pil-Won On** is an instructional designer at Appalachian State University serving the faculty for innovating technology integration. Specialized in interactive e-learning, her research interests include online interaction, teaching and learning in gaming, and effective multimedia application. She received her master’s degree in instructional systems technology from Indiana University at Bloomington.

**Grace Onchwari** is an assistant professor of early childhood education at the University of North Dakota, College of Education and Human Development. Prior to joining the University of North Dakota, she was an instructor at the Indiana State University, where she also completed her doctorate degree in curriculum and instruction.
Sadik Serkan Pekince is the director of YUCE Information Systems. He received a BS degree from the Electrical and Electronics Department of Bilkent University, in Ankara Turkey. He works and leads on several software projects, mostly for the education industry. His main area of expertise is the development and implementation of school-based educational systems.

Drew Polly is an assistant professor in the Department of Reading and Elementary Education at the University of North Carolina at Charlotte. His research agenda focuses on examining the impact of professional development and teacher education program on teacher’s instructional practices and their student learning.

Angeliki Poulmenakou is assistant professor in information systems management. Prior to that she served as lecturer in information systems in the Informatics Department of the Athens School of Economics and Business and in the Information Systems Department of the London School of Economics and Political Science. She holds a bachelor’s degree in mathematics (Athens), and MSc and PhD degrees in information systems (London School of Economics). Her current research interests focus on information technology enabled change and particularly on the study of technological intervention in the areas of organizational learning and knowledge management, and on the study of dynamic organizational networks from an information systems perspective. Over the past years she has participated in over 15 ESPIT, IST, and Greek Government funded research projects. She has also offered consultancy work to the European Commission, DG Information Society, and to the Greek Government. Her several publications in international journals and conferences draw from the full range of activities outlined above. She has served as a member of the scientific committee of four international conferences in information systems (ICIS, ECIS, IFIP) and has acted as a referee in several international journals in the field. In 2003 she chaired the organization of the IFIP joint WG8.2 and 9.4 Conference on Information Systems and Globalization, in Athens.

Christal C. Pritchett is an assistant professor in the Office Systems Management Department of the School of Business at Alabama A&M University.

Sai-Wing Pun is currently a senior instructor in the Department of Curriculum and Instruction at the Chinese University of Hong Kong. He served as teacher, mathematics and computer studies panel chairman, vice-principal and principal in secondary schools, senior lecturer at Hong Kong Institute of Education, and publishing manager in an educational publishing house.

António Quintas-Mendes teaches in Universidade Aberta (Portugal), where he works in distance education since 1989. His academic background is in educational psychology, sociolinguistics and education. His research interests include the study of mediated communication, interpersonal and social relations in educational virtual contexts, models of online education and cyberpsychology. He teaches regularly in online courses in higher education.

Diana Ragbir is a postgraduate researcher in the Department of Mathematics and Computer Science of the University of the West Indies. She is currently pursuing a masters of philosophy degree in computer science and is studying ways to extend the IMS learning design specification with services to improve its pedagogical expressiveness. Ms. Ragbir has a BSc in computer science from the University
of the West Indies. She has worked as a research assistant and teaching assistant in the Department of Mathematics and Computer Science of the University of the West Indies and has also co-lectured an undergraduate course in computer science.

Karen Rasmussen is the chair of Engineering and Computer Technology Department, which houses graduate instructional and performance technology programs at the University of West Florida. She has worked extensively in creating Web-based learning environments for online learners through development of academic programs, support systems, and learning object content repositories. She has co-authored a textbook on e-learning and is a co-inventor of two software systems.

Olivia Realdon received a bachelor’s degree in philosophy from the Catholic University of Milan (Italy). After carrying out research in communication psychology applied to advertising and brand equities, she joined the Centre for Studies and Research in Communication Psychology of the Catholic University in Milan. Currently, she is senior researcher at CESCOM, where she took part to the Myself project. Her research interests focus on optimism, specifically on the validation of the psychological construct of optimism and optimism training through enhancing emotional competence.

Michael Rees is an associate professor at Bond University. He has 35 years teaching and research experience in computer science and Internet technology. His current areas of research expertise include user interface design and implementation for Internet and Web applications, collaborative systems for group communication and coordination, and e-learning technology. He has considerable background knowledge in scripting languages and object-oriented programming on a number of operating system platforms. He studied for a few months at the Microsoft Research Laboratories in Redmond, Washington, with the Component Applications research group. Dr Rees has authored several books, the latest of which is a practical introduction to Designing Web Interfaces.

Torsten Reiners has a diploma in information systems and continued his career at the University of Braunschweig as a research and teaching assistant. After participating in several operations research-related projects, he developed interactive, adaptive, and innovative learning tools within a larger content development project. After finishing his PhD thesis on the subject of innovative tools and methodologies for e-courses, he took a position as a post-doc at the University of Hamburg, mainly interested in storing and distribution of (adaptive) content including e-learning Web 2.0 as well as multilingual components like machine translation.

Ruth Robbins is a professor of computer information systems at the University of Houston – Downtown. She holds a doctorate from University of Houston in instructional systems technology and has published journal articles on computer literacy, learning communities, and database technology.

Odile Robotti is founder and managing director of Learning Edge SRL, a company specializing in human capital optimization (e-learning, training, and HR development). She holds an MBA from SDA Bocconi Business School, and a BA in economics from Bocconi University. Robotti is PhD candidate in cognitive psychology at UCL (UK).
Anne-Dominique Salamin received a MS in educational science. She is a professor in computing section, e-learning specialist. Her specialties are Interface ergonomy and design, multimedia (requirements, architecture and implementation), e-learning (administration, platforms, learning styles, cognitive learning, course developments), cognitive systems. She is also the RTD leader of Myself project for UAS Valais.

Antonio Santos earned his doctor of education from Indiana University and has been a researcher and consultant in the field of educational technology in several Mexican universities. He has also been a producer of instructional materials for teachers’ training at different educational and industrial organizations. Antonio has published several articles in the areas of constructivist learning environments and the use of technology in developing countries. He has also presented papers in world conferences on themes like contemporary pedagogies and collaborative learning. Antonio Santos is working today as a professor at the Universidad de las Americas Puebla in Mexico, where he has developed the pedagogical model for the distance education project.

Nancy Sardone teaches instructional design systems and production of instructional resources to graduate students in the College of Education and Human Services at Seton Hall University. She also teaches a course in computer fundamentals to freshmen students. She is currently completing her PhD degree in higher education at New York University, where her research interests include reflection in learning and active learning strategies, using instructional technology to support and enrich learning.

Imke Sassen passed the first state examination in fine arts, German language and literature, education science, and educational psychology. Since 2002, she has been a research and teaching assistant at the Institute of Information Systems at the University of Hamburg. Her research interests are centered on media education and media design. New forms of organization for effective teaching are being developed and evaluated. The main goal is the improvement of education by using multimedia, interactivity, Web-based electronic information, and communication.

Craig E. Shepherd is a doctoral student in the instructional technology program at the University of Georgia. His research focuses on using electronic portfolios to facilitate preservice teachers’ reflective practices.

Tibor Skala received his BSc in electrical engineering from the Faculty of Electrical Engineering and Computing at the University of Zagreb (2001). He works as assistant lecturer since 2002 on the Faculty of Graphic Arts. He entered the post-graduate study at the Faculty of Graphic Arts (Printing Technology course) in 2004. He is working with e-learning for past 3 years. His research interests include video and audio editing, graphic and Web design, parallel applications, and distance education.

Hyo-Jeong So is an assistant professor in the Learning Sciences & Technologies Academic Group and the Learning Sciences Lab at the National Institute of Education, Nanyang Technological University. She obtained a PhD in instructional systems technology at Indiana University. She currently conducts research on teachers’ epistemological beliefs about learning, leadership, and technology, and students’ knowledge building through collaborative inquiry in online learning environments. She has published and presented in the fields of distance education, teacher education, human-computer interaction, and
computer-supported collaborative learning. She worked as an instructional designer and consultant in higher education for several years.

Charlene W. Sox is the coordinator for business and marketing education and a professor in the Business Education program at Appalachian State University. She holds a PhD in business education from the University of South Carolina. She has presented at numerous state and national workshops and conferences and has published in business education journals. In addition, she has taken the initiative in business education curriculum development in North Carolina. She has received several awards including induction into the North Carolina Business and Information Technology Hall of Fame.

Deepak Prem Subramony is currently an assistant professor at Utah State University’s Department of Instructional Technology. He graduated from Indiana University Bloomington with a PhD in instructional systems technology. His primary area of research and professional interest involves examining the impact of Western educational technologies upon culturally diverse learner populations, with a view towards enabling the field to become more responsive to the cultural, educational, professional needs, values, standards, and expectations of the latter.

Linda F. Szul is a professor in the Department of Technology Support and Training in the Eberly College of Business and Information Technology at Indiana University of Pennsylvania (IUP). Dr. Szul received her EdD from the University of Pittsburgh and has taught at IUP since 1998. She currently serves the department as chairperson. Her prior duties included assistant chairperson/graduate coordinator. Her research agenda focuses on communications, online learning, technology integration, and assessment strategies. She has maintained a scholarly portfolio that includes referred publications and presentations delivered at international, national, regional, and local conferences. She has also been recognized nationally, regionally, and locally for teaching excellence. Dr. Szul is a member of the College Strategic Planning Committee, Department and College Graduate Curriculum committees, and the University Research Institute Advisory Council. She has served on the executive boards of the Pennsylvania Business Education Association, National Business Education Association, and as former president of the Organizational Systems Research Association.

Furkan Tari holds a BA in business informatics from Marmara University and an MS in management information systems from the University of Baltimore. He is currently working on his PhD in information systems from the University of Baltimore. He has more than six years of industry experience and five years of teaching experience. He currently serves as the chair of the Department of Information Technology at ITT Technical Institute in Owings Mills, MD.

Anna Tarocchi is a psychologist and psychotherapist, specialized in organizational psychosociology and cultural anthropology. She is a member of the Italian Trainer Association (AIF) and Italian Professional Board of Psychologists. She works at ASL Città di Milano, a public company that is part of the Italian National Health Service. She trains professionals to plan projects that are oriented to develop both professional skills and the use of information technology. She is directing the ASL multimedia library, an intranet/internet-based technology, which aims to promote the internal community to sustain the communication process, and to deliver state-of-the-art expertise from an outside perspective.
About the Contributors

Patrícia Lupion Torres is a senior lecturer at the Pontifical Catholic University of Paraná (PUCPR) where she also serves as researcher, lecturer, and head of the E-Learning Department. She is an ad hoc consultant to the Ministry of Education (MEC) in Brazil for the accreditation of Distance Learning University courses. She has a PhD in media and knowledge from the Federal University of Santa Catarina (UFSC), where she was lecturer of media and knowledge from 1999 to 2002. She researches and publishes on distance education and ICT, and has authored, co-authored, and edited 12 books on education and distance learning.

Craig Van Slyke is an associate professor of management information systems at the University of Central Florida. He teaches courses in database administration and electronic commerce, among others. Prior to joining UCF, he taught at Ohio University. Van Slyke’s current research interests focus on issues related to the adoption of information and communication technologies in distance learning. He has published in a number of journals including the Communications of the ACM, Communications of the AIS, Communications of the AIS, Decision Sciences, and Database for Advances in Information Systems, among other journals.

Pietro Venturini graduated from Boise High School (Boise, Idaho). He studied at the State University of Milan. Venturini is a partner of ACSE, and has served as IT project manager in several business application projects. Presently, he is a member of the managing board of the ACSE and is in charge the Research Department of the company.

Antonietta Vescovo is PhD candidate in communication psychology at the Catholic University of Milan (Italy). She is a regular member of the Italian Professional Board of Psychologists and official trainer of the facial action coding system (FACS). She works as junior researcher at University of Milan-Bicocca (CESCOM, Centre for Research in Communication Science), where she took part to Myself project, and collaborates with the medical psychology chair at San Paul’s Hospital in Milan. Her research areas address the study of doctor-patient communication, with special focus on nonverbal behavior.

Colin Ward holds a BA from the University of Massachusetts-Boston, having created his own major titled, A Social Analysis of the Built Environment. As a Fulbright scholar, Ward earned an MA in TESOL from the University of London. He has been teaching ESL in the U.S. for seven years. His areas of interest include second-language acquisition, content-based instruction, ESL writing instruction, and computer-assisted language learning.

Joachim Wetterling is assistant professor at the University of Twente, in The Netherlands. His specialties are media design and evaluation for education, with an accent on cost-benefit ratios and return on investment. His research and teaching stretches from national to joint European research projects in the 5th and 6th framework program, such as the Candle project.

Angela Williams (aw20@msstate.edu) is an elementary school teacher for West Clay Elementary School in Cedar Bluff, Mississippi. She began teaching there in 1987. She graduated from high school in 1983, attended one year of junior college, then transferred to Mississippi State University, completing her BS degree in elementary education (1987). She attained her master’s degree in elementary educa-
tion (1989). In 2001, she began pursuing her PhD in elementary education with a minor in instructional systems, leadership and workforce development/teacher technology.

Ann Wilson, assistant professor at Stephen F. Austin State University in Nacogdoches, Texas, teaches and researches in the areas of business communication and information technology. She received her bachelor’s and master’s degrees from Southern Arkansas University in Magnolia, Arkansas, and her doctorate from the University of Mississippi in Oxford, Mississippi. Wilson has presented papers for the Association for Business Communication (International, Southwestern, and Southeastern United States), the Association for Business Information Systems, and the National, Mountain-Plains, and Texas Business Education Associations. She has also co-authored articles in the Mountain-Plains, Georgia, and Texas Business Education journals.

Dawn E. Woodland is an associate professor in the Department of Technology Support and Training in the Eberly College of Business and Information Technology at Indiana University of Pennsylvania (IUP). Dr. Woodland has taught at IUP since 1995, having received her PhD from Southern Illinois University in Carbondale. Her teaching areas include end user support, business communication, and applied research. Her research interests include online learning methodology, online learning communities, and e-portfolio use. She currently serves the department as assistant chairperson and graduate coordinator for two master’s programs. She has served the Council of Graduate Coordinators for five years as co-chair. She is also involved in the college undergraduate and graduate curriculum committees as well as the University Graduate Committee and the Teacher Education Coordinators Council in the College of Education and Educational Technology. Dr. Woodland is past president of the Pennsylvania Business Education Association and the Organizational Systems Research Association.

Harrison Hao Yang is currently a professor of the Department of Curriculum and Instruction at the State University of New York at Oswego, and holds an adjunct professorship at the Chinese University of Hong Kong. He served as coordinator of educational technology at the Center for Instructional Technology at Florida International University, and as assistant professor and associate professor at SUNY Oswego.

Chien Yu (cyu@colled.msstate.edu) graduated from Ohio State University and is currently serving an assistant professor in the Department of Instructional Systems, Leadership and Workforce Development at Mississippi State University. She currently teaches interactive media, trends and issues in instructional systems, instructional design for industry, information technology project management, and technology issues for school administrators. Her research agenda include distance education, technology integration, educational leadership, instructional design, and media development.

Wei-Chieh Yu (wy39@colled.msstate.edu) is presently a doctoral student at Mississippi State University. He received a BSBA from Ohio State University in finance and a master of science in teaching English to students of other languages from The University of Pennsylvania. His research interests include instructional technology, education research, multicultural/global education, social linguistics and computer-assisted language learning.
About the Contributors

**Panagiotis Zaharias** holds a bachelor’s degree in informatics and a master’s degree in information systems, both from Athens University of Economics and Business (Greece). He also holds a PhD degree in usability evaluation methods of e-learning courses. His main research interest is focused on e-learning design and usability evaluation. Since 1999, he is working in the ELTRUN - Organization Information Systems Group and has participated in various European and national research projects. His research publications include more than 15 papers in scientific journals and conference proceedings. Panagiotis Zaharias is a member of ELTRUN research group and the Association for the Advancement of Computing in Education (AACE).

**Panayiotis Zaphiris** is a senior lecturer at the Centre for Human-Computer Interaction Design. Before joining City University, he was a researcher at the Institute of Gerontology at Wayne State University, where he also got his PhD in human-computer interaction (HCI). His research interests lie in human-computer interaction, with an emphasis on inclusive design and social aspects of computing. He is especially interested in HCI issues related to the elderly and people with disabilities. He is also interested in internet related research (Web usability, mathematical modeling of browsing behavior in hierarchical online information systems, online communities, e-learning, computer-aided language learning (CALL), and social network analysis of online human-to-human interactions). He is the editor of the book *User-Centered Computer Aided Language Learning*.

**Zhidong Zhang** is a doctoral candidate in the Department of Education and Psychology at McGill University in Montreal Canada. He received his master of medical education from the University of Illinois at Chicago (UIC). His research interests include the application of network in teaching and learning of statistics, medical education, and the building of the cognitive diagnostic assessment model.

**Robert Zheng** is currently an assistant professor at the University of Utah, where he teaches courses in instructional technology and in educational psychology. His research interests are in the areas of multimedia and cognition, online instructional design, and technology integration for K-12 schools. His recent studies involve online instructional design and modeling that focus on the effectiveness of various online instructional models and the cybergogy associated with the delivery of various online instructional models. He holds a doctor of education degree from Baylor University.

**Valentino Zurloni** received a PhD in psychology of communication at the Catholic University of Milan (Italy). He is a member of Italian Psychological Association (AIP) and the Italian Professional Board of Psychologists. He is senior researcher at the Centre for Research in Communication Science (CESCOM), University of Milan-Bicocca, where he took part to Myself project. His research addresses the methods for quantitative and qualitative analysis of verbal communication and emotion lexicon in different interactional contexts.
