About the Authors

Leo Tan Wee Hin has a PhD in marine biology. He holds the concurrent appointments of director of the National Institute of Education, professor of biological sciences in Nanyang Technological University (Singapore), and president of the Singapore National Academy of Science. Prior to this, he was director of the Singapore Science Centre. His research interests are in the fields of marine biology, science education, museum science, telecommunications, and transportation. He has published numerous research papers in international refereed journals.

R. Subramaniam has a PhD in physical chemistry. He is an associate professor at the National Institute of Education in Nanyang Technological University (Singapore) and honorary secretary of the Singapore National Academy of Science. Prior to this, he was acting head of physical sciences at the Singapore Science Center. His research interests are in the fields of physical chemistry, science education, theoretical cosmophysics, museum science, telecommunications, and transportation. He has published several research papers in international refereed journals.

* * *

Paul Adams is a senior lecturer of education and professional studies at Newman College of Higher Education, Birmingham, UK. As a University of Warwick graduate, he became a middle school teacher and subsequently developed a passion for learning beyond “the mere acquisition of previously articulated givens.” Following master’s study at King’s College, London, he worked as an advisory teacher for Northumberland LEA. In 2001 he moved to Newman, where he works with students so that they might construct personal understandings of learning theory, health, and citizenship education, and mediate this into the social space. He is married with three small children.

John Anderson is the education technology strategy coordinator, Education Technology Strategy Management Group (Northern Ireland), responsible for the overall strategy for information and communications technology for the Northern Ireland school service.

Charoula Angeli earned BS and MS degrees in computer science, and a PhD in instructional systems technology, from Indiana University-Bloomington, USA. She has worked as a post-doctoral fellow at the Learning Research and Development Center at the University of Pittsburgh, USA (1998-1999). She is now at the University of Cyprus as a lecturer in instructional technology in the Department of Education. Her research interests include the utilization of educational technologies in K-12, the design of computer-enhanced curricula, educational software design, teacher training, teaching methodology, and the design of learning environments for the development of critical and scientific thinking skills.

Stephen Atkinson is a researcher at the Centre for Studies in Literacy, Policy, and Learning Cultures at the University of South Australia and a sessional lecturer in the Department of International Studies and Politics at the Flinders University of South Australia. In addition to work on digital media and ICTs in education, his current research interests include the cross-cultural study of reconciliation processes, the political uses of horror, local television histories, and the function of memory and amnesia in film.
Roger Austin is the head of the School of Education at the University of Ulster in Northern Ireland. He has published widely on the role of information communication technology in inter-cultural education and is currently co-directing the Dissolving Boundaries Programme.

Ann E. Barron is a professor in the instructional technology program at the University of South Florida (USA), where she teaches graduate-level courses in multimedia, instructional design, Web design, and telecommunications. She is the author of numerous books and articles related to instructional technology. Her professional presentations focus on the design and development of technology-based instruction in academic, industrial, and military environments.

As a teacher of online teaching at James Cook University (Australia), Colin Baskin describes himself as the “necessary lubricant and sometimes coolant” between teaching staff and the pressures generated by institutional moves towards new learning technologies. As a senior lecturer in the School of Education and (past) head of a multi-campus teaching development unit, he has published widely in the area of e-learning and e-learning uptake, focusing more recently on textually mediated communities of practice and the roles of information and communication technologies on transforming learning. He lives in tropical North Queensland with his family, and is based at the Cairns Campus of James Cook University.

Catherine Beavis is an associate professor of education at Deakin University (Australia). Her research interests focus on literacy, popular culture and ICT, the changing nature of literacy and text as reflected in online popular culture, and the implications of young people’s engagement with digital culture for curriculum and pedagogy in schools. Recent and current research projects include studies of the use of computer games as text in the secondary English classroom; young people’s literacy and communication practices as they engage with online multiplayer computer games; intersections between literacy, community, and identity in online popular culture; and the gendered dimensions of computer gaming.

Jared V. Berrett has enjoyed a career in the information technology industry working directly for or consulting for three major IT corporations in the United States. Eventually he and his wife decided to follow his reoccurring impressions to become a teacher, and after teaching for three different high schools in the state of Utah, he decided to pursue a PhD in teaching and learning from the University of Illinois Urbana-Champaign. At Illinois, he coordinated an online master’s degree program, was an NSF-sponsored technology trainee, and consulted with engineering faculty to improve their teaching and use of technology. He is currently a faculty member at Brigham Young University (USA) in the technology teacher education program. His research interests are in technological literacy in the K-12 setting, teaching pedagogy that promotes higher-order thinking skills, creativity in the classroom, and technology that improves student learning.

Marcie J. Bober is an associate professor of educational technology at San Diego State University (USA). There, she teaches field-based courses where students work directly with community-based clients (SeaWorld, San Diego City Schools, Kyocera Wireless, International Rescue Center) to conduct both voluntary and mandated evaluation studies. Since 1995, Dr. Bober has served as lead evaluator on several federal grants targeting our public schools—for the most part, initiatives to stimulate effective use of advanced technologies in the classroom and positively affect student learning and workforce readiness. She currently co-directs a Fund for the Improvement of Post-secondary Education (FIPSE) grant in which visualizing software has been fully integrated into the undergraduate engineering curriculum to foster engaged learning and build critical teaming skills. Dr. Bober is a frequent presenter at technology conferences focused on the design, development, and evaluation of technologies aimed at improved human performance. She consults extensively with private and public organizations interested in assessing how their interventions impact both work processes and employees (skills, knowledge, attitudes). She is also active in the school community, having taught traditionally underserved students in two local-area school districts and managed a technology-based program for students at serious academic risk.

Chris Brook is a post-doctoral research scholar in the School of Education at Edith Cowan University (Australia). He has teaching background as a classroom practitioner in the K-12 setting and has worked as a curriculum consultant in 52 schools. In addition, he has worked as an instructional designer in tertiary settings and has been actively engaged in the design and development of online learning materials. Current research includes the exploration of online learning communities and the use of ICT in school settings.
Elizabeth A. Buchanan is an assistant professor at the University of Wisconsin-Milwaukee School of Information Studies (USA), where she is also co-director of the school’s Center for Information Policy Research. Her research focuses on information ethics, ethics and technology, Internet research ethics, and distance education pedagogy, specifically improving the student experience in virtual environments, including the role of the library to support distance education. She is the editor of the 2004 Readings in Virtual Research Ethics, among many scholarly articles and book chapters.

Karen Cadiero-Kaplan is an assistant professor at San Diego State University (USA) in the Department of Policy Studies in Language and Cross-Cultural Education. Her research interests include literacy ideologies of the arts and technology, democratic practices for teacher development, and policy that impacts programming for biliteracy and English language development. Recent publications include the book, The Literacy Curriculum and Bilingual Education: A Critical Examination.

Yin Cheong Cheng is professor and director of the Centre for Research and International Collaboration of the Hong Kong Institute of Education. He is also head of the Asia-Pacific Centre for Education Leadership and School Quality, and president of the Asia-Pacific Educational Research Association (APERA). Professor Cheng has published 14 academic books and nearly 180 book chapters and academic journal articles. Some of his publications have been translated into Chinese, Hebrew, Korean, Spanish, and Thai languages. He currently serves on the advisory boards of eight international journals. Professor Cheng’s research has won him a number of international awards and recognition, including the Awards for Excellence from the Literati Club in the UK in 1994, 1996-1998, and 2001. In recent years, he has been invited to give over 30 keynote/plenary presentations by national and international organizations.

Niki Christodoulou received her bachelor’s degree in international relations and French (1985) and her master’s degree in education and TESOL (1987) from the American University in Washington, DC. From 1987-1992 she taught English as a second language to immigrants in New Jersey. From 1993-2003 she was a senior lecturer at Intercollage, Nicosia, Cyprus, and as of January 2004 she is an assistant professor teaching English at the same institution. Her research interests lie in the areas of bilingualism/bidialectalism, English language acquisition, reflective teaching, communication strategies, learning styles, learning strategies, and the teaching of Greek as a foreign language.

Christopher Essex is coordinator of instructional design and development for the Indiana University School of Education Office of Instructional Consulting (USA). He has published articles in Educational Technology, TechTrends, The Quarterly Review of Distance Education, and Distance Education in China. He has presented numerous times at educational technology conferences. He has taught at the elementary school level in Boulder, Colorado, and Bloomington, Indiana. He received his BA in English and diploma in education from the University of Colorado-Boulder, an MS in instructional systems technology from Indiana University, and in 2005 was expected to complete his PhD in instructional systems technology from Indiana University.

Moti Frank is head of the Center for the Advancement of Teaching at the Technion-Israel Institute of Technology and a senior lecturer in the Department of Education in Technology and Science. He is in charge of Technion’s e-learning project. His research interests are educational technology, e-learning, computers in education, systems thinking, and engineering education.

Dale O. Gable currently manages a Title III Professional Development Grant, which enables mainstream teachers to earn their add-on license in TESOL. She teaches ESL and Spanish at the University of Wisconsin-Eau Claire (USA), where she enjoys being a mentor to international students and faculty, and moonlighting as an interpreter in medical and legal settings. She received her master’s degree in Spanish from Middlebury College and TEFL certification from Hamline University.

Virginia E. Garland is coordinator of the graduate programs in educational administration and supervision at the University of New Hampshire (USA). She has also been a visiting professor in the Cross-Cultural Studies Department of Kobe University, Japan, and the Shanghai, Beijing, and Tianjin Institutes of Education, China. Her teaching and research interests include technology integration and international education. Dr. Garland has authored or co-authored more than 20 published articles and book chapters. She recently created an interactive Web site, “Space Exploration: Case Based Pedagogy” (http://www.ali.apple.com/ali_sites/nhli/exhibits/1000577/), selected by the Apple Learning Interchange as an exhibit of best teaching practice.
Susan E. Gibson is an associate professor in the Department of Elementary Education at the University of Alberta, Canada. Her subject area specialization is social studies education. Prior to her work in the university setting, she was an elementary and junior high school social studies teacher. Dr. Gibson’s research interests include learning to teach social studies, problem-based learning and learning to teach, preservice teachers’ historical knowledge and its influence on their thinking about pedagogy, the integration of computer technologies into teacher education, and using computers in ways that support constructivist learning principles.

J. Christine Harmes has a PhD with dual majors in instructional technology and educational measurement and research. She does extensive consulting for the Florida Department of Education, Office of Educational Technology, including supervising the development and deployment of a statewide technology survey. In the past year, she has led an instrument development project to create a Web-based technology literacy assessment to be administered to all teachers in Florida. Her research reports have twice been nominated for distinguished paper awards by the Florida Educational Research Association, and her doctoral dissertation was a finalist in the AERA-Division D Mary Outstanding Dissertation competition.

Kendall Hartley is an assistant professor of educational computing and technology at the College of Education at the University of Nevada, Las Vegas (USA). Dr. Hartley conducts research in the area of effective instructional uses of technology, and recently published articles related to hypermedia instruction in *Educational Researcher*, the *Journal of Educational Multimedia and Hypermedia*, and the *Journal of Educational Computing Research*. Before coming to the University of Nevada, Dr. Hartley taught high school science in Bellevue, Nebraska.

Stephenie M. Hewett is an assistant professor in the School of Education at The Citadel, The Military College of South Carolina located in Charleston, South Carolina (USA). She is a learner-centered educator dedicated to the mastery approach to teaching. She is a national and international speaker, and has published numerous articles on teacher preparation and technology.

Lyn C. Howell has taught in middle and high schools in states from Alaska to Florida. After earning her PhD at the University of New Mexico, she moved to Tennessee where she is an assistant professor of education at Milligan College (USA). She teaches educational technology among other classes and works with teachers and pre-service teachers helping them to integrate technology into their curriculum.

David A. Huffaker is a PhD student in media, technology, and society at Northwestern University, USA. He holds a master’s degree in communication, culture, and technology from Georgetown University. His research includes children and technology, online communities, computer-mediated communication, and educational technology. For more information, visit http://www.soc.northwestern.edu/gradstudents/huffaker.

Wei-Loong David Hung is an associate professor at the National Institute of Education (NIE) and the current head of the Learning Sciences and Technologies Academic Group at NIE (Singapore). He is associate editor of the *International Journal of Learning Technologies*, contributing editor of *Educational Technology*, and has recently been invited as an advisory board member of a newly formed *Knowledge Management* journal. Dr. Hung is one key initiator and member of the Learning Sciences Lab at NIE.

Tamara L. Jetton currently teaches in the Secondary Program at James Madison University (USA). She has held positions at the University of Utah and Texas A&M University. Her research interests include understanding how adolescents learn with text in a variety of learning environments and how they engage in discussions both in the classroom and in online environments. She has published in several journals and edited volumes that include *Reading Research Quarterly, Journal of Educational Psychology, Review of Educational Research, Educational Psychology, Educational Psychology Review, Handbook of Reading Research, and Handbook of Discourse Processes*.

Cushla Kapitzke is a senior lecturer in the School of Education at the University of Queensland (Australia). Her publications include *Literacy and Religion* (John Benjamins) and an edited volume, *Difference and Dispersion: Educational Research in a Postmodern Context* (PostPressed). She has published in *Educational Theory, Teachers College Record, Journal of Adolescent & Adult Literacy*, and *Educational Technology & Society*. Current research
interests focus on the social and educational implications for Australia of intellectual property rights law as framed by the bi-lateral Australia/U.S. Free Trade Agreement.

**Katherine J. Kemker** is completing her PhD in curriculum and instruction with an emphasis on instructional technology. Currently, she provides technical assistance with districts throughout the state of Florida on technology planning, laptop computer initiatives, and training on the integration of technology in the curriculum. In addition, she has spoken at national, state, and local conferences, such as the Annual Conference for the Association for Supervision and Curriculum Development, Florida Educational Technology Conference, and the Florida Title I Conference on “Closing the Achievement Gap with Technology.”

**Thiam-Seng Koh** is currently director of the Educational Technology Division at the Ministry of Education (MOE). He oversees all IT in education projects in research and development, ensuring that all schools in Singapore embrace IT for learning and instruction. Dr. Koh’s work is also central to the Learning Sciences Lab initiative, where he is a key collaborator from MOE to ensure that the research efforts are translated to the schools.

**Elena Landone** graduated with a degree in Spanish language and literature from the University of Milan, Italy, and attended a post-graduate master’s of online learning and communication course at the University of Florence, Italy. After a research grant for specialization in distance learning of Spanish as a second language at the Utrecht University, The Netherlands, she became a researcher at the University of Milan in 2000. Since then, she is a professor of didactics of Spanish, educational technology, Spanish culture, and Spanish language at the University of Milan. Her research activities and publications are in the fields of electronic cooperative groups and cooperative learning, collaborative electronic writing, input enhancement in language teaching, alternative evaluation, and portfolios. She is Coordinator of the Project of Study of the Electronic European Language Portfolio (ELP), co-funded by the EU Socrates/Minerva Action group (2003-2005).

**Wei-Ying Lim** is a research associate at the Learning Sciences Lab (LSL) in the National Institute of Education, Nanyang Technological University, Singapore. She has keen research interest in sustainability of educational reform, teacher epistemology, learning communities, and inquiry learning.

**Tomas A. Lipinski** completed his Juris Doctor (JD) from Marquette University Law School, before receiving his Master of Laws degree (LLM) from The John Marshall Law School and his PhD from the University of Illinois at Urbana-Champaign. Professor Lipinski has worked in a variety of legal settings including the private, public, and non-profit sectors. In summers he is a visiting associate professor at the Graduate School of Library and Information Science, University of Illinois at Urbana-Champaign. Professor Lipinski currently teaches, researches, and speaks frequently on various topics within the areas of information law and policy, especially copyright issues in schools and libraries, and serves as co-director of the Center for Information Policy Research at the University of Wisconsin-Milwaukee and an associate professor at its School of Information Studies. He has authored many articles and publications of interest to educators and librarians on the design and use of Web-based materials in education, as well as copyright and other legal issues pertinent to educators.

**Chee-Kit Looi** is head of the Learning Sciences Lab (LSL) in the National Institute of Education, Nanyang Technological University, Singapore. He is an editor of the *Journal of Computer-Assisted Learning* as well as the *International Journal of CSCL*. His research interests include scalability and sustainability issues of educational reform, computer-supported collaborative environments, inquiry learning, and knowledge organization. He has published widely in conferences, journals, and chapters of books.

**Kristina Love** lectures in the Department of Language, Literacy, and Arts Education at the University of Melbourne, Australia, having worked as a secondary English teacher prior to that. Her research interests include analysis of the spoken, written, and electronic discourses of secondary English and applications of computer technologies in literacy contexts. Her CD-ROM, “Building Understandings in Literacy and Teaching (BUILT),” uses QuickTime video of best teaching practice across the K-12 context to illustrate key principles of language and learning in pre-service and teacher professional development.
Kate Mastruserio Reynolds has served as director of TESOL and campus coordinator of ESL programming at the University of Wisconsin-Eau Claire (USA) since 2001. She holds degrees in French language and literature, and teaching English to speakers of other languages (TESOL) and literacy from the University of Cincinnati. She has taught language courses at a variety of levels in ESL and teacher preparation courses in Southern Connecticut State University, Harvard University’s Intensive English Language Program, and the University of Cincinnati. She has presented at TESOL, AAAL, ConnTESOL, OhioTESOL, Wisconsin TESOL, and written articles for the TESOL Quarterly and the Journal of Educational Technology.

Steven C. Mills is the director and chief executive officer of the Ardmore Higher Education Center. Formerly, he was a research professor at the University of Kansas, conducting research focusing on integrating technology and online learning in K-12 and college classrooms. Dr. Mills has made numerous national presentations on the subjects of technology integration and Web site design, and has authored several grants, journal articles, and two college textbooks on using technology to support teaching and learning in the classroom. He holds a PhD in instructional psychology and technology from the University of Oklahoma.

Aidan Mulkeen is a senior lecturer in education at the National University of Ireland, Maynooth. He has a specialist interest in the use of information and communications technology in education. He has done extensive research on the use and impact of ICT in schools, in Ireland and in OECD countries. Also, he is co-founder of the Dissolving Boundaries project, which uses ICT to bring learners in different communities together to develop mutual understanding and engage in educational projects.

Wan Ng is the science education lecturer at the School of Educational Studies, La Trobe University, Australia. Her experiences include working as a research fellow in Biochemistry, and serving in various capacities for the Victorian Department of Education & Training and the Victorian Curriculum & Assessment Authority. Her research interests lie in the use of ICT in education, creative and motivating science curriculum (including the Sun & Science project: http://www.latrobe.edu.au/solar), gifted education, and language/cultural influences in the learning of the sciences.

Helen Nixon is an associate professor in the Center for Studies in Literacy, Policy, and Learning Cultures in the School of Education at the University of South Australia. Her research interests include literacy and the new media, and the pedagogies of global media culture. She is particularly interested in how children’s out-of-school media popular culture interests might be used within a critical literacy/English curriculum. She is editor with Brenton Doecke and David Homer of the book English Teachers at Work (AATE/Wakefield Press, 2003) and has published widely for English/ literacy teachers and researchers.

Christopher O’Mahony is currently head of the Center-Information Technology at Saint Ignatius’ College Riverview (Australia), an independent day and boarding school for boys in Sydney, Australia. Dr. O’Mahony has been a practitioner and researcher in the field of school information systems since 1992. His doctoral thesis, through Macquarie University, concerned the evolution and evaluation of information systems in Australian schools throughout the 1990s. He is an active member of the Australian Computer Society and also of the IFIP Working Group 3.7–Information Technology for Educational Management (ITEM). Dr. O’Mahony has presented the results of his work at both national and international conferences, as well as in a number of refereed academic journals.

Ron Oliver is professor of interactive multimedia in the School of Communications and multimedia at Edith Cowan University (Australia). He has a research background in multimedia and e-learning, and currently leads a major research team at ECU in this field. He has experience in the design, development, and evaluation of multimedia and computer-based learning materials. Current research projects involve explorations and investigations of effective online teaching and learning in higher education, and exploring scalability and reusability of e-learning materials.

Ingrid Schaller is a lecturer of Spanish and English as a second language at the University of Wisconsin-Eau Claire. Her training includes a master’s degree in Spanish language and literature, a K-12 teaching license, and a number of pedagogy and methodology classes for both foreign languages and English as a second language. As a lecturer, she finds that the inherently flexible content of the global current events class described in this text is enhanced by the natural diversity of student perspectives. Outside the classroom, Ms. Schaller travels, teaches children Spanish, and is raising her own bilingual child.
Cathy Soenksen has taught middle school, high school, and college English for the past 20 years in Virginia and West Virginia, as well as teaching graduate courses for West Virginia University. She is currently employed in Harrisonburg City Public Schools (VA), where she teaches English in Project Achieve, a program designed for high school freshmen who are reading three to five years below grade level. Her most recent challenges as an educator have been in learning to address the specific reading needs of English language learners.

Agni Stylianou-Georgiou earned her BA in elementary education from the University of Cyprus in 1998 and her PhD in educational psychology from the University of Connecticut in 2003. She has worked as a teaching and research assistant at the University of Connecticut (1999-2003) and at Cyprus College, Cyprus. Currently she is an assistant professor of educational psychology at Intercollege, Nicosia. Her research interests are in the areas of hypertext, metacognition, reading comprehension, and science education. Her current research is focused on designing navigation support for hypertext environments in science, and studying issues (i.e., role of metacognition) in navigation and reading comprehension of nonlinear text. She has published in scholarly journals and conference proceedings in her areas of study.

Nicos Valanides is an associate professor of science education at the University of Cyprus. He earned a BA in physics and a BA in law from the Aristotelian University of Thessaloniki, along with a Teaching Diploma and MA in education, teaching sciences from the American University of Beirut. He also earned an MSc in instructional supervision and a PhD in curriculum and instruction and educational research from the University of Albany, State University of New York. His research interests include teacher training, methodology of teaching and curricula for science education, development of logical and scientific thinking, science-and-technology literacy, the utilization of ICT in science education, and the design of educational interventions and learning environments.

Mark van ‘t Hooft conducts research for the Research Center for Educational Technology at Kent State University (USA) and provides technical support in RCET’s SBC Ameritech Classroom. His current research focus is on the use of handheld computers in K-12 education. Prior to his work at RCET, he taught middle school and high school social studies and language arts. He holds a BA in American studies from the Catholic University of Nijmegen, The Netherlands, and an MA in history from Southwest Texas State. He is currently finishing his doctoral degree with a dual major in curriculum and instruction, and evaluation and measurement at Kent State University.

Charalambos Vrasidas is executive director of CARDET-Center for the Advancement of Research and Development in Educational Technology (Cyprus) (http://www.cardet.org) and an associate professor of learning technologies at Intercollege. His areas of interest include evaluation of educational technologies, teacher professional development, e-learning, technology integration, and media literacy. He is the author of three books and of more than 100 research papers published in scholarly journals, books, and presented at international conferences around the world. He is also a member of the executive committee of the International Council of Educational Media (http://www.icem-cime.com), a UNESCO-affiliated organization.

Leonard J. Waks is professor of educational leadership and policy studies at Temple University (USA). He earned a PhD in philosophy at the University of Wisconsin in 1968, and an EdD in social and organizational psychology from Temple in 1984. He taught philosophy at Purdue and Stanford before joining the education faculty at Temple in 1971. He is the author of Technology's School (JAI, 1995) and more than 75 peer-reviewed scholarly articles and book chapters on educational theory, technology education, philosophy of technology, and American pragmatism. He serves on the editorial boards of the Journal of Curriculum Studies, the International Journal of Technology and Design Education, and Education and Culture: The Journal of the John Dewey Society.

Patrick Wong is the head teacher of computer studies, The Mission Covenant Church Holm Glad College, Hong Kong, as well as the teacher in charge of the IT in Education Committee in his school since 1999. He is a part-time lecturer at the CITE, teaching refresher training courses for school teachers. He has been the system administrator of a QEF project, Kwun Tong Inter-School Education Net (KTIEN). His main duty was to maintain an electronic platform for sharing educational resources among five different schools in Kwun Tong.

Allan Yuen is an associate professor and head of the Division of Information and Technology Studies, Faculty of Education, The University of Hong Kong. He is also deputy director of the Center for Information Technology in
Education (CITE) since its establishment in 1998, and vice president of the Hong Kong Association for Educational Communications and Technology (HKAECT). Dr. Yuen has engaged in a number of research and development projects on information technology in education. His research interests include computer-supported collaborative learning, information technology leadership and management in education, computer studies education, and teacher education.

Michalinos Zembylas is an associate professor of Education at Intercollege, Cyprus, and an adjunct professor of teacher education at Michigan State University. He is also a member of the board of CARDET, a non-profit research and development center based in Cyprus and Singapore. His research interests are in the areas of science and technology education, curriculum theory, and philosophy of education. He has conducted extensive research in the area of emotions in teaching and learning, and participated in several research programs funded by the National Science Foundation, the European Union, and private corporations in the United States. His recent articles have appeared in *Educational Theory*, *Journal of Research in Science Teaching*, *Science Education and Teaching*, and *Teacher Education*.
