About the Contributors

Tsan-Ming (Jason) Choi is an Associate Professor in the Institute of Textiles and Clothing at the Hong Kong Polytechnic University. His current research interests mainly focus on fashion supply chain management. He is now an Associate Editor/Editorial Board Member of journals such as IEEE Transactions on Systems, Man and Cybernetics – Part A and Journal of Fashion Marketing and Management. He has published extensively in leading business and engineering journals such as IEEE Transactions on Automatic Control, Production and Operations Management, Automatica, Decision Support Systems, European Journal of Operational Research, International Journal of Production Economics, and various other IEEE Transactions. His papers have also appeared in well-established fashion and textiles journals such as Journal of Fashion Marketing and Management, Journal of the Textile Institute, and Textile Research Journal.

* * *

Layth C. Alwan is an Associate Professor of production & operations management/quantitative methods in the Sheldon B. Lubar School of Business at the University of Wisconsin-Milwaukee. He received a Ph.D. in statistics/operations management, an M.B.A., and B.A., B.Sc. in mathematics/statistics from the University of Chicago. He specializes in operations management, statistical quality control, and forecasting. He is a member of INFORMS, POMS, ASQ, DSI, ASA, and RSS. He has also authored a textbook titled Statistical Process Analysis and is a co-author of The Practice of Business Statistics.

Susana Garrido Azevedo holds a PhD in Management. She is Assistant Professor of Logistics and Marketing at University of Beira Interior (UBI) – Portugal. She is a Research Member of the Research Unit in Business – NECE. Her research interests include logistics, ICT in logistics, and supply chain management. She has published articles in several international refereed journals and has published books in operations management, logistics and supply chain management, and also in competitiveness. Also, she is Reviewer of many journals and also international conferences. She is also Associate Editor of the International Journal of Management Science and Information Technology (IJMSIT).

Romeo Bandinelli was born in 1976. In 2002 he achieved his Bachelor Degree in Mechanical Engineering at Florence University. In 2006 he achieved Ph.D. in Industrial Engineering. He is currently a contract researcher at the Energy Engineering Department of the Engineering Faculty of the University of Florence, and his topics are related to the management engineering field. Actually he works in the field of Product Lifecycle Management (PLM) and sustainable development and manufacturing. These
scientific activities have been conducted participating both in Italian and European projects. He is co-author of 5 articles published in peer reviewed journals, whose topics deal mainly with simulation and benchmarking of distributed production systems. He is also author of more than 20 papers presented at international scientific conferences. He is an occasional Reviewer for the International Journal of Production Planning and Control and he is also member of AiIG (Associazione Italiana Ingegneria Gestionale) and CINet (Continuous Innovation Network).

**Enrico Baraldi** is Associate Professor at the Department of Engineering Sciences, section for Industrial Engineering and Management, Uppsala University. His research interests include innovation and technology management, industrial marketing and purchasing, product development, and “Science & Technology Studies” (STS). He is currently conducting a project titled “The Innovating University,” which investigates the indirect effects of two major universities’ efforts to commercialize their science. Most of Enrico Baraldi’s research is grounded in a business network approach, which he applied to such empirical settings as furniture production and distribution, biotechnologies, and sustainability. Enrico’s research has been published in, among others, such journals as *California Management Review*, *Journal of Business Research*, and *Industrial Marketing Management*.

**Helena Carvalho** is a Teaching Assistant of Industrial Engineering at Faculdade de Ciências e Tecnologia, Universidade Nova de Lisboa, Portugal. Presently, she is developing her PhD thesis in the domain of manufacturing lean-and-resilient systems. She keeps special interest in the area of supply chain management, lean, agile, green, and resilient management paradigms, and system modelling. She has several communications in international conferences and proceedings related with these topics, namely in Industrial Engineering Research Conferences. She has published articles in several international refereed journals.

**Nancy Cassill** is Professor and Department Head, Department of Textile and Apparel Technology and Management (TATM), College of Textiles, North Carolina State University. Prior to assuming Department Head responsibilities July 2008, Nancy served as Interim Department Head (6 months) and senior member in the Department (8 years), as well as faculty positions at The University of North Carolina - Greensboro and the University of North Texas. She holds degrees from Purdue University, Indiana University, and the University of Tennessee - Knoxville. Dr. Cassill’s expertise includes the areas of global textile brand management and marketing, global textile trade, strategic product management, and textile market research. Nancy works closely with industry and government personnel in developing education and research programs, has published numerous research articles, and frequently presents to industry, government and academic audiences. Her research has been funded by the Department of Commerce, USDA, National Textile Center, The New Carolina (South Carolina), North Carolina Department of Commerce, and various grants and foundations. Dr. Cassill served as President of the International Textile and Apparel Association 1997-1998, one of the discipline’s premier associations. She has served as Managing Editor, Journal of Textile and Apparel Technology and Management (JTATM). Honors and awards include Outstanding Service Extension Award (NC State), Fellow – International Textile and Apparel Association, Outstanding Research Award, Outstanding Teaching Award (UNCG), and Outstanding Advisor (UNCG).
Hyo Jung (Julie) Chang is currently a second year PhD student in the Consumer, Apparel, and Retail Studies Department at the University of North Carolina at Greensboro, U.S.A. Her research interests include social psychological aspects of apparel, consumer behavior, fashion marketing and merchandising, and sustainable consumption of consumers. Currently, she is researching the meaning of apparel and consumer behavior. She eagerly anticipates sharing what she has learned and researched with her peers and prospective students in the near future.

Chun-Hung Chiu is currently a Postdoctoral Research Associate at the City University of Hong Kong. His current research interests mainly focus on supply chain management and operations management. He has published in leading journals such as *Production and Operations Management*, *European Journal of Operational Research*, *International Journal of Production Economics*, and various *IEEE Transactions*.

Hira Cho is an Assistant Professor in the Department of Family and Consumer Sciences at California State University, Northridge. She has earned a PhD in Merchandising from Florida State University and a PhD in Clothing and Textiles from SooKmyung Women’s University in Korea. Her teaching expertise includes Fashion Merchandising, Fashion Industry, and Visual Promotion. Her research area lies in apparel customization, e-retailing, cross cultural consumer behavior, and international retailing. She has been published in *International Journal of Market Research*, *Journal of Consumer Marketing*, *International Journal of Retail and Distribution Management*, *Journal of Retailing and Consumer Services*, and *Journal of the Korea Society of Clothing and Textile*.

Lorynn Divita received her B.A. in French and B.S. in Fashion Merchandising from California State University Chico, her Master’s degree in Apparel Manufacturing Management from University of Missouri, and her Ph.D. in Textile Products Marketing from University of North Carolina Greensboro. She is an Associate Professor of Fashion Merchandising in the Department of Family and Consumer Sciences at Baylor University, where she has been since 2002. Dr. Divita teaches courses on principles of art and design, merchandise planning and control, merchandising trends and issues and textile science labs. Her research areas include global trade, the environment, and corporate competitiveness in the domestic textile and apparel industry. She has presented her research nationally and internationally and her publications have appeared in such journals as *Journal of the Textile Institute*, published in England; *Clothing and Textiles Research Journal* and *Journal of Textile and Apparel Technology and Management* in the US, and *Journal of Fashion Marketing and Management*, published in England.

Simone Guercini is Professor of Marketing at the University of Florence, Italy. He is PhD in Strategic and International Marketing at the Sant’Anna School of Pisa and Tags at the Science Policy Research Unit of the University of Sussex at Brighton. He is member of the Italian Marketing Society and participates in the annual meetings of the Industrial Marketing and Purchasing Group. His areas of research expertise are business-to-business and cross-cultural marketing, fashion industry, and branding. He has published among others in *Industrial Marketing Management*, *Journal of Business to Business Marketing*, *Journal of Fashion Marketing and Management*, *Management Decisions*, *Journal of Customer Behaviour*, and in leading marketing and management journals in Italy.

Megha Gupta is currently a second year PhD student in the Department of Consumer, Apparel, and Retail Studies at the University of North Carolina at Greensboro, U.S.A. Her research interests include consumer behavior, decision making styles, and corporate social responsibility. Currently, she is working on the ethical issues in the global apparel supply chain. Her undergraduate degree in apparel manufacturing and Master’s degree in apparel merchandising provide her with an in-depth understanding of both technicalities of the garment industry, as well as the apparel retail market. Gupta enjoys doing research and plans to make it her career.

Tzung-Pei Hong is currently a Professor at the Department of Electrical Engineering in National University of Kaohsiung. His current research interests include parallel processing, machine learning, data mining, soft computing, management Information Systems, and World Wide Web applications. Dr. Hong is a member of the Association for Computing Machinery, the IEEE, the Chinese Fuzzy Systems Association, the Taiwanese Association for Artificial Intelligence, and the Institute of Information and Computing Machinery.

Jian Huang is an Associate Professor in the School of Information Technology at the Jiangxi University of Finance and Economics. He obtained his PhD degree in Management Science and Engineering from Nanjing University, and Master of Science in Applied Mathematics from Yunnan University. He has published about 20 papers in international journals. His current research focuses on the competition and cooperation in supply chains, and the operations-marketing interface. He has refereed a number of submissions for some international journals including *European Journal of Operations Research*, *International Journal of Production Economics*, *Journal of Computational and Applied Mathematics*, *IMA Journal of Mathematical Control and Information*, and *International Journal of Services Operations and Informatics*.

Chi-Leung Hui is an Assistant Professor at the Hong Kong Polytechnic University. His research interests are IT law, e-commerce, Information Systems, and the application of intelligent computing in textile and clothing industries. He has published over 50 refereed journal papers and conference papers.

Byoungho Jin is currently the Putman and Hayes Distinguished Professor at the Department of Consumer, Apparel and Retail Studies, the University of North Carolina at Greensboro, U.S.A. Her research interests include global sourcing and supply chain management, international apparel merchandising, cross-cultural consumer behavior, and competitiveness of apparel industry in global markets. Recently, she researches consumer behaviors and retail markets in world’s two emerging markets, China and India.

**Hisashi Kurata** is an Associate Professor of Supply Chain Management at the University of Tsukuba, Graduate School of Information and Systems Engineering. He has a Ph.D. from the University of Wisconsin-Milwaukee, an M.S. from the Pennsylvania State University, and a B.S. from the University of Tokyo. His research interest includes supply chain management, marketing-operations interfaces, and inventory management. He has published in *European Journal of Operational Research, International Journal of Production Economics*, and *Journal of Revenue Management*.

**Mingming Leng** is an Associate Professor of Operations Management in the Department of Computing and Decision Sciences at Lingnan University, Hong Kong. He is currently interested in the applications of game theory in supply chain management, with an emphasis on supply chain coordination. His other research interests include marketing-operations interface, inventory management, stochastic processes, and simulation. His papers have appeared in *Operations Research, Production and Operations Management, Naval Research Logistics, IIE Transactions, European Journal of Operational Research, International Journal of Production Economics, Computers and Operations Research, INFOR*, et cetera.

**Liping Liang** is now an Assistant Professor of Operations Management in the Department of Computing and Decision Sciences at Lingnan University, Hong Kong. Prior to joining Lingnan University in January 2010, she studied at the University of British Columbia’s Sauder School of Business for her Master’s and doctoral degrees in Management Science. Dr. Liang is currently interested in operations and supply chain management, incentive mechanism design, game-theoretic modeling, and service operations. Her papers have appeared in *European Journal of Operational Research*.

**Kwan-Yu (Chris) Lo** is an Assistant Professor of the Institute of Textiles and Clothing of The Hong Kong Polytechnic University (PolyU). He teaches supply chain and quality management subjects in Hong Kong and China. He obtained his PhD in Operations Management (OM) from the PolyU’s Department of Logistics and Maritimes Studies. Prior to his PhD study, Dr. Lo obtained a Bachelor’s of Commerce with Distinction from Concordia University, Canada, and worked multiple years as a Software Engineer for ERP systems. His research interests include green production and marketing, operations management (OM), and supply chain management (SCM). He is specialized in using objective financial data in analyzing operations management issues.

**Wei-Shuo Lo** is an Assistant Professor and Director at Department of Public Finance, and also is an Assistant Professor at Institute of Business and Management in Meiho Institute of Technology. He received his MS degree in Industrial Engineering and Management Department at Chaoyang University of Technology in 1997, and received his Ph.D. degree in Information Engineering Department at I-Shou University in 2007. His current research and teaching interests are include data mining and supply chain management. He is a member of Chunghua Association of Public Finance, Taiwan Logistics Management Association, Taiwan Fuzzy Systems Association (TFSA), Electronic Business Management Society.
About the Contributors

David A. Ludwig is currently a Professor and Senior Biostatistician in the Division of Clinical Research, Department of Pediatrics, University of Miami Miller School of Medicine with a joint appointment in Public Health and Epidemiology. Prior to joining the U. of M. faculty in Pediatrics, Dr. Ludwig was Professor and Associate Director of the Georgia Prevention Institute (Pediatrics) at the Medical College of Georgia, Augusta. Prior to his work at the Medical College of Georgia, he was a Professor of Mathematics at the University of North Carolina Greensboro. At North Carolina, he was Director the University’s Statistical Consulting Center. Currently, and over the past 25 years Dr. Ludwig has been a full time statistical consultant to NASA’s Life Science Division, the Air Force Office of Scientific Research, the Army’s Institute of Surgical Research, and the Secretary of Defense for Health Affairs (DOD). Dr. Ludwig is a former Fulbright Scholar in Biostatistics.

Delisia Matthews is currently a second year PhD student in the Consumer, Apparel, and Retail Studies Department at the University of North Carolina at Greensboro, U.S.A. Matthews’ enthusiasm for consumer behavior, brand equity, and brand extensions stems from her experience working in corporate marketing research, where she served as a senior research manager for Procter & Gamble and Walmart, together with her Bachelor’s and MBA degrees in Marketing. In the near future, she looks forward to applying her corporate brand knowledge, educational background, and unique work experiences to academia as a Professor.

Giancarlo Nadin, (Ph.D.), is Adjunct Professor in Marketing at Università Cattolica del Sacro Cuore of Milan (Italy). He has worked on textile-apparel network development projects for many years as a consultant. His current academic research focuses on distribution channel management in many industries, on relationship marketing in business-to-business context, and on sustainability behavior of the consumer in a green marketing perspective. He is now involved, as a consultant, in analyzing dealer network reengineering programs at many leading Italian companies. Giancarlo has published articles in many national and international academic journals about distribution channel relationship governance, on ICT enhancement, and on sustainable consumer behavior.

Anna Nagurney is the John F. Smith Memorial Professor in the Department of Finance and Operations Management in the Isenberg School of Management at the University of Massachusetts Amherst. She is also the Founding Director of the Virtual Center for Supernetworks at UMass Amherst. She received her AB, ScB, ScM, and PhD degrees from Brown University in Providence, Rhode Island. She devotes her career to education and research that combines operations research/management science, engineering, and economics. Her focus is the applied and theoretical aspects of network systems, particularly in the areas of transportation and logistics, critical infrastructure, and in economics and finance. Her most recent book, with Q. Qiang, is Fragile Networks: Identifying Vulnerabilities and Synergies in an Uncertain World, published in 2009. She has authored or co-authored 8 other books, including Supply Chain Network Economics, and more than 140 refereed journal articles and numerous book chapters.

Bernice Pan holds a PhD and two MA degrees. Pan’s calling is in designing for people. She has been inter-weaving her professional and academic experience in the fashion and design industries since 1996. Her multi-disciplinary approach saw her steering creative direction, corporate re-branding, and business expansion for fashion and retail brands in New York, London, and Greater China. Bernice
specialises in fashion design process, strategy, & innovation. She is originally trained as an Architect at the University of Cambridge and Royal College of Art, and subsequently gained her PhD from Brunel University Design & Systems Engineering on *The Fashion System -- Mass Customisation at the Design Production Interface*. She has lectured on design management and continues to guest-lecture, tutor, and research in fashion and design. She founded Seamsystemic design research consultancy and DEPLOY demi-couture womenswear in 2005, where she is Creative & Operations Director. DEPLOY pioneers in customisable and sustainable designer-wear and is endorsed by UK Trade Investment and EU Gateway.

**Patsy Perry** is Deputy Programme Director of the MSc International Fashion Marketing degree at Heriot-Watt University in Edinburgh. She teaches in the areas of retail and fashion marketing management and her research interests are centred on ethical supply chain management in the fashion industry. As a member of the Scottish Ethical Fashion Educators Network, she is keen to inform the next generation of fashion industry professionals about ethical fashion supply chain management. She is a reviewer for the *International Journal of Retail and Distribution Management*. This book chapter is based on her PhD research into the issues and drivers surrounding CSR in global fashion supply chains.

**Jin Su** joined the Department of Human Development and Environmental Studies at Indiana University of Pennsylvania in August 2008. She received her Ph.D. in Textile Product Marketing from The University of North Carolina at Greensboro in December 2004. She received her M.S. degree in Business Management from Renmin University of China in 2000 and B.S. degree in Textile Product Design from Tianjin Polytechnic University, China, in 1993. She received Graduate Student Best Paper Award in Doctoral Category in 2005 International Textile and Apparel Association (ITAA) Annual Meeting. She has published articles in journals such as *The Journal of the Textile Institute* and *Clothing & Textiles Research Journal*. Currently, Dr. Su’s research interests include supply chain management and global aspects of textile and apparel production, distribution, and consumption.

**May Tajima** received the Ph.D. degree in Management Sciences from University of Waterloo, Canada. She is currently Assistant Professor of Operations Management in Management and Organizational Studies at The University of Western Ontario, Canada. She is the faculty coordinator for an undergraduate operations management course with an annual enrollment of more than 400 students. Her main research interest is the impact of radio frequency identification (RFID) technology on supply chain management.

**Sergio Terzi** is Researcher at University of Bergamo, Department of Industrial Engineering. In 1999, Sergio Terzi got his Bachelor’s in Production Management from the University Carlo Cattaneo of Castellanza (Italy). From the same university, in 2001 he got his Laurea degree in Economics. In 2005, Sergio Terzi got his International Doctorate (Ph.D.) from Politecnico di Milano and University of Nancy (France), presenting his doctoral dissertation on “Elements of Product Lifecycle Management: Definitions, Open Issues, and Reference Models.” Sergio Terzi collaborates with several institutes and departments of Politecnico di Milano, in the field of PLM and sustainable development and manufacturing. At Politecnico di Milano, he also teaches Product Lifecycle Management (PLM) to graduate and to business school students. At University of Bergamo, he teaches Plant Design to graduate students (Mechanical Engineering). He is author of 1 book and more than 60 papers, at national and international level and one of editors of the Sistemi Impresa Italian journal. He is member of Working Group 5.7
“Advances in Production Management Systems” promoted by the International Federation for Information Processing (IFIP). He is also convener of Working Group 5.1 “Global Product Development along the whole lifecycle” of IFIP.

**Neil Towers** is Programme Director of the MSc International Fashion Marketing degree at Heriot-Watt University in Edinburgh. He has developed his research, teaching, and scholarly activity of in the area of fashion retail marketing, supply chain management, and operations management, with particular reference to small businesses. With extensive international, industrial, and commercial experience from more than 25 years at senior management level, he has developed his internationally rated supply chain management research, innovative curriculum development, and teaching activity. He is Editor of the *International Journal of Retail and Distribution Management*, a reviewer for a number of internationally rated journals, and Deputy Senior Examiner for the Chartered Institute of Marketing.

**Min Yu** is a Doctoral Student in Business Administration with a concentration in Management Science in the Isenberg School of Management at the University of Massachusetts Amherst. She received an M.E. in Transportation Planning and Management from the School of Transportation Engineering, Tongji University, China, in 2008 and graduated with top honors and a Bachelor’s Degree in Transportation Engineering from the same school in 2005. Her research interests include: network equilibria and optimization, supply chain network design, supply chain risk management, multi-criteria decision making, transportation, supply chain, and financial networks. She has also applied mathematical modeling and analysis to supply chain networks for time-sensitive products.

**Yong Yu** is currently a Postdoctoral Research Associate at the Hong Kong Polytechnic University. He received his PhD from the Hong Kong Polytechnic University. His current research interest is in artificial intelligence, forecasting, and decision support systems.

**Xiaohang Yue** is currently an Associate Professor of Operations Management in the Sheldon B. Lubar School of Business at the University of Wisconsin-Milwaukee. He received his Ph.D. in operations management from the University of Texas at Dallas in 2002. His interest of study includes supply chain and operations management, manufacturing system design, and marketing-operations interface. He is a member of INFORMS, DSI, and POMS.

**Jin-Hui Zheng** is currently a PhD student at the Hong Kong Polytechnic University. Her research area is on fashion branding and supply chain management.
