About the Contributors

**Katalin Tarnay** is Professor Emeritus at the University of Pannonia (Hungary). She received her M.Sc. degree at the Technical University of Budapest in 1956, Ph.D. degree at the Hungarian Academy of Sciences in 1974. She developed software tools and methods for protocol engineering first in the Central Research Institute for Physics, and later in Nokia Hungary. At the same time, she was appointed full Professor at the University of Pannonia and honorary Professor at the Budapest University of Technology. She was author of the book “Protocol Specification and Testing” (Plenum Press, New York, 1991.)

**Gusztáv Adamis** is a master teacher at the Budapest University of Technology and Economics (Hungary), Department of Telecommunications and Media Informatics. He received his M.Sc. degree from the Technical University of Budapest in 1989, and a specialized engineer degree in the field of telecommunications in 1991. He developed various software tools in the fields of mobile telecommunications and telecommunications protocols. He has more than 20 years of teaching experience in the fields of digital technology, switching theory, telecommunications protocols, and mobile systems. He has developed several course materials and held courses about Signaling System 7, GSM and other mobile protocols at various companies, like Nokia, T-Com, and the Hungarian National Telecommunications Authority.

**Tibor Dulai** graduated from the University of Pannonia (Hungary) and received his M.Sc. degree in Information Technology. After graduation, he started working on his Ph.D. thesis, which covers the research of new methods in telecommunications protocol design. By the years parallel with his Ph.D. studies, he has worked as Professor assistant at the university. This job gave him the opportunity to find the weaknesses of tutorials and educational books dealing with protocol management. Based on the feedbacks he has received from his students, he has clear ideas how to improve the education materials in this field. At present, his research topic is the effect of vehicle cooperation in the vehicle routing problem.

***

**László Bokor** graduated in 2004 with M.Sc. degree in computer engineering from the Budapest University of Technology and Economics (Hungary), Department of Telecommunications and Media Informatics. In 2006, he received an M.Sc.+ degree in bank informatics from the same university’s Faculty of Economic and Social Sciences. He is a Ph.D. candidate at the Budapest University of Technology and Economics, member of the IEEE, member of the Mobile Communications and Computing Laboratory (MC2L) and the Mobile Innovation Center of Hungary, where he participates in researches of wireless
protocols and works on advanced mobility management related projects (as FP6-IST PHOENIX and ANEMONE, EUREKA-Celtic BOSS, FP7-ICT OPTIMIX, EURESCOM P1857, EUREKA-Celtic MEVICO). His research interests include IPv6 mobility, mobile computing, next generation networks, mobile broadband networking architectures, network performance analyzing, and heterogeneous future networks. He is author of several referred papers in international scientific journals and conferences.

**Christos Bouras** obtained his Diploma and Ph.D. from the Computer Science and Engineering Department of Patras University (Greece). He is currently a Professor in the above department. He is also scientific advisor of Research Unit 6 in the Research Academic Computer Technology Institute in Patras (Greece). His research interests include analysis of performance of networking and computer systems, computer networks and protocols, telematics and new services, QoS and pricing for networks and services, e-learning, networked virtual environments, and WWW issues. He has extended professional experience in design and analysis of networks, protocols, telematics, and new services. He has published 300 papers in various well-known refereed conferences and journals. He is co-author of eight books in Greek. He has been PC member and referee in various international journals and conferences.

**Eduardo Correia** is a senior lecturer at the School of Computing at the Christchurch Polytechnic Institute of Technology (New Zealand). He is a Microsoft Certified IT Professional (Enterprise Administrator) as well as a Microsoft Certified Systems Engineer in Windows NT4, 2000, and 2003 and lectured at Rhodes University and the University of the Western Cape in South Africa. When Dr. Correia emigrated to New Zealand, he worked in the IT industry as a systems engineer and trainer for a number of years before returning to the academic environment. At CPIT, he teaches courses in operating systems and networking, particularly those focusing on Microsoft systems and technologies.

**Leopoldo Estrada-Vargas** was born in Jalisco, Mexico in 1981. He received his B.Sc. degree in electronic engineering from the Universidad de Guadalajara (Mexico), and M.Sc. degree in electrical engineering from the CINVESTAV, I.P.N. (Mexico), in 2003 and 2007, respectively. He has been research assistant of the Electrical Engineering Department, Telecommunications Section at CINVESTAV, I.P.N. He is a Ph.D. student at the Department of Electrical Engineering and Computer Sciences of CINVESTAV, I.P.N. His research interests include Internet traffic measurements and long memory stochastic processes.

**Péter Fazekas** is a full time lecturer and researcher at the Budapest University of Technology and Economics (Hungary), Department of Telecommunications, since 2001. He is with the Mobile Communications and Computing Lab since its founding, first as student, later as Ph.D. student and employee. His scientific interests cover radio resource management and medium access questions of wireless networks, as well as the capacity and performance analysis of broadband cellular networks. His recent research activities are targeting energy efficiency of cellular networks as well. He has around 20 journal and conference publications. Over the years, he led the activities of the Lab members within several international and national research projects and industrial cooperation. He held several B.Sc. and M.Sc. courses about cellular mobile systems.

**László Gyöngyösi** is a Ph.D. student since 2008 at the Budapest University of Technology and Economics (Hungary). He received his M.Sc. degree in computer science with Honors at the Budapest
University of Technology and Economics in 2008. His research interests are quantum computation and communication, quantum cryptography, quantum channels, and quantum information theory. He obtained the Sándor Csibi Ph.D. Researcher Scholarship, and he won Best Paper Awards on international conferences related to quantum computing and quantum information processing, both of them at the University of Harvard (USA).

Róbert Horváth has M.Sc. degree in electrical engineering. He is a member of the Budapest University of Technology and Economics (Hungary), Department of Telecommunications and Media Informatics. He has more than 13 years of experience in telecommunications software design and testing. His main focus is on automated testing of telecommunications protocols. Besides of his research interests, he also took part of several industrial projects including the planning and implementation of an early VoIP solution in Hungary, which consisted of authentication, authorization, accounting, interconnection of different networks, and all the necessary underlying protocols. He also took part in the test generation process for several protocols for Nokia. His publications cover the major aspects of protocol design patterns, testing methods, and formal languages used in connection with telecommunications protocol software.

Árpád Huszák received his M.Sc. degree in 2003 as an electrical engineer at the Budapest University of Technology and Economics (Hungary), Department of Telecommunications and Media Informatics. He received his Ph.D. degree in electrical and computer engineering in 2010. Currently he is working at the Department of Telecommunications as an Assistant Professor; he also joined the Mobile Innovation Center of Hungary. Since 2007, he is a member of the IEEE. Recently, he has been involved in many European projects (FP6-IST, FP7-ICT, and Celtic). His research interests focus on network protocols, mobile computing, and adaptive multimedia communication over wireless networks.

Sándor Imre was born in Budapest in 1969. He received his M.Sc. degree in electrical engineering from the Budapest University of Technology and Economics (Hungary) in 1993. Next, he started his Ph. D. studies at the same university and obtained dr. univ. degree in 1996, Ph.D. degree in 1999, and D.Sc. degree in 2007. Currently he is carrying his activities as Professor and Head of Department of Telecommunications. He is member of the Telecommunications Systems Committee of the Hungarian Academy of Sciences. He participates in the editorial board of two journals: Infocommunications Journal and Hungarian Telecommunications. He was invited to join the Mobile Innovation Center of Hungary as R&D director in 2005. His research interest includes mobile and wireless systems. Especially he has contributions on different wireless access technologies, mobility protocols, security and privacy, and reconfigurable systems.

Szilárd Jaskó was born in 1979. He received his M.Sc. degree in Information Technology engineering in 2002 at the University of Pannonia (Hungary). Since then, he has been a Ph.D. student at the same university. Since 2002, he has taught at the Department of Electrical Engineering and Information Systems of the University of Pannonia. He is interested in protocol modeling and testing, self-adaptive technologies, mobile telecommunications, and formal languages.

Gábor Jeney was born in 1975. He received his M.Sc. degree in electrical engineering in 1998 at the Budapest University of Technology and Economics (Hungary) in the field of mobile and optical com-
munications. He received his Ph.D. degree in electrical engineering in 2005 from the same university in the field of multi-user detection. He also holds an M.Sc.+ engineer-economist degree from the Budapest University of Economic Sciences and Public Administration (Hungary). He is currently a research fellow at the Mobile Innovation Center of Hungary. He is involved in several national and European Commission funded projects. He was the author/co-author of several dozens of articles published in conferences and journals. His research interest includes neutral networks, mobile and wide-band communication systems, networking, and transport protocols. Dr. Jeney is a member of HTE (Scientific Association for Info-communications), Hungary since 1999, and he is a member of IEEE since 2000. Recently, he was involved in the Technical Program Committee (TPC) of ICC 2007.

Zoltán Kanizsai is a member of the IEEE. He graduated with M.Sc. degree in computer engineering from the Budapest University of Technology and Economics (Hungary), Department of Telecommunications in 2006. He is a Ph.D. student at the same department and member of the Mobile Communications and Computing Laboratory (Hungary) and the Mobile Innovation Center of Hungary. He assists in IPv6, mobility, and multimedia related works, e.g. in former FP6-IST ANEMONE and now in FP7 ICT-OPTIMIX project. His research topics are: anycast-based IPv6 and MIPv6 optimization, Session Initiation Protocol with IMS over native IPv6 3G UMTS networks, and computer simulations of wired and wireless IPv6 networks.

Gábor Kovács has Ph.D. in electrical engineering. He works for the Department of Telecommunications and Media Informatics in the Budapest University of Technology and Economics (Hungary) as a researcher. Between 2004 and 2007, he participated in the European Union funded research project MUSE, which targeted fixed access technologies in NGN and fixed-mobile convergence, and contributed to standardization forums as TISPAN and DSL-Forum. His current research interests include business process modeling and formal modeling of telecommunications protocols.

Károly Lendvai was born in 1985. He received his M.Sc. degree in electrical engineering from the Budapest University of Technology and Economics (Hungary) in 2008. Next, he started his Ph.D. studies at the same university. Currently he is carrying his teaching and research activities as a Ph.D. student at the Department of Telecommunications of the Budapest University of Technology and Economics. He is member in several research projects at the Mobile Innovation Center of Hungary. His research interests include mobile and wireless systems, mobility modeling, MESH networks, and different security topics.

László Lois was born in 1971. He received his M.Sc. and Ph.D. degree in software engineering from the Budapest University of Technology and Economics (Hungary) in 1995 and 2005, respectively. He is currently with the Department of Telecommunications at the same university, and contributes to research, development, and educational activities. His research interests include source-coding applications, media communications, and IP television.

Dániel Muhi was born in 1979. He received his M.Sc. degree in Information Technology from the University of Pannonia (Hungary) in 2002. Since 2002, he has been associated with research work in the same university as teaching assistant. His research areas are service discovery protocols, e-learning technologies, and process-oriented modeling. He received the Pollák-Virág award from the Scientific
About the Contributors

Gábor Árpád Németh received his M.Sc. degree from the Budapest University of Technology and Economics in 2007. He is a Ph.D. student at the Department of Telecommunications and Media Informatics of the same university. His current research topic is efficient testing of telecommunications protocols in case of changing specifications.

Szabolcs Nováczki was born in 1982. He received his M.Sc. degree in electrical engineering in 2006 at the Budapest University of Technology and Economics (Hungary) in the field of mobile communications and computer architectures. He is currently a Ph.D. student at the Budapest University of Technology and Economics and a member of the Mobile Communications and Computing Laboratory (Hungary) and the Mobile Innovation Center of Hungary. He is also a student member of IEEE. His research interests include advanced network layer mobility solutions, new networking architectures, network simulation programming, and network performance analysis.

Vassilis Papapanagiotou entered the Computer Engineering and Informatics Department of the University of Patras (Greece) in 2003 and graduated in 2008; then he entered the graduate program of the same university, Department of Computer Science and Technology. He was a member of Research Unit 6 from October 2006 to December 2009. His research interests include cross-layer architectures for wireless networks, network protocols, Layer 2 and Layer 3 Quality of Service, ad-hoc networks, and network programming. He has extensive knowledge of C, C++, Java, PHP, database manipulation, Web technologies, wide area network management, and configuration of Cisco devices. He has worked for the Greek Research Network, developing modules for automatic management of QoS services and managing its networking equipment in the city of Patras. He has also participated in the GN3 Project for advancing the European GEANT3 network. Additionally, he is the co-author of three papers in international refereed conferences, one article in an international journal and two chapters in technical books.

Zoltán Pap received his M.Sc. degree in electrical engineering in 2000 at the Budapest University of Technology and Economics (Hungary). In 2002, he received another M.Sc. degree in business administration at the Corvinus University of Budapest (Hungary). From 2000 to 2006, he worked at the Budapest University of Technology and Economics on various research fields, initially as a Ph.D. student and later as research fellow. His main research topics are telecommunications networks and protocols, next generation networking, peer-to-peer networks, grid computing, advanced software technologies, and testing. He received his Ph.D. degree at the Budapest University of Technology and Economics in 2006. Since 2006, he is working at Ericsson Hungary as systems engineering expert, and in part time at the above university as research fellow.

Jan Schankin is a lecturer in the School of Computing at the Christchurch Polytechnic Institute of Technology (New Zealand). After graduating with a diploma in computer networking with distinction and completing various Cisco and Microsoft certifications, he has worked extensively on switches, routers, and servers at CPIT, and done some consulting work and research. Mr. Schankin’s interests focus principally on technical aspects of networking technologies and protocols, and certain areas of server
provider networks as well as the practical implementation of various aspects of networking in Cisco, Juniper, and Microsoft systems.

**Róbert Schulcz** graduated in 2000 with M.Sc. degree in electrical engineering from the Budapest University of Technology and Economics (Hungary), Department of Telecommunications. In 2009, he received the Master of Business Administration (MBA) degree from the same university. Between 2000 and 2003, he participated in the Ph.D. course at the Department of Telecommunications and he is currently a Ph.D. candidate at the Budapest University of Technology and Economics. He is the managing director of the Mobile Innovation Center of Hungary, where he was the testbed director previously, responsible for the setup and operation of the testbed of the Mobile Innovation Center of Hungary. He works as a researcher at the Mobile Communications and Computing Laboratory (Hungary) since 2003. His research interests include mobility, mobile computing, IMS, security of next generation wireless and heterogeneous networks, NFC, and RFID. He is member of the IEEE and the Scientific Association for Infocommunications (Hungary). He is an author of several referred papers in international scientific journals and conferences.

**Ákos Sebestyén** was born in 1977. He received his M.Sc. degree in electrical engineering at the Budapest University of Technology and Economics (Hungary), Department of Telecommunications in 2002. Now as a member of the staff of the same department, he contributes to the educational, research, and development activities. His research areas include digital broadcasting (DVB-T/S/C/H/T2), media encoding, and IP television.

**Jaydip Sen** obtained his B.Sc. degree in electrical engineering with honors at the Jadavpur University (India) in 1993, Master of technology (M.Tech.) in computer science with honors at the Indian Statistical Institute (India) in 2001, and Ph.D. in network security at the Indian Institute of Technology (India) in 2007. He has 17 years experience in the field of networking, communication, and security. He has worked in reputed organizations like Oil and Natural Gas Corporation Ltd., India, Oracle India Pvt. Ltd., and Akamai Technology Pvt. Ltd. Currently, he is leading the research and development activities in wireless communication at Tata Consultancy Services, Kolkata (India) for the last three years. He has over 16 years of research and development experience. His research areas include security in wired and wireless networks, intrusion detection systems, secure routing protocols in wireless ad hoc and sensor networks, secure multicast and broadcast communication in next generation broadband wireless networks, trust and reputation based systems, quality of service in multimedia communication in wireless networks and cross layer optimization based resource allocation algorithms in next generation wireless networks, sensor networks, and privacy issues in ubiquitous and pervasive communication. He has more than 75 publications in reputed international journals and referred conference proceedings. He has delivered expert talks and keynote lectures in a various international conferences and symposia. He is a member of ACM and IEEE. He is also an active member of the security group of IEEE 802.16 standard body and has submitted a number of proposals for the evolving 802.16m standard and ETSI. His biography has been listed in Marquis “Who’s Who in the World”, 2010 edition.

**Gyula Simon** is an Associate Professor at the University of Pannonia (Hungary), where he is the member of the Department of Computer Science and Systems Technology. He graduated from the
About the Contributors

Budapest University of Technology and Economics (Hungary) in 1991 with M.Sc. degree in electrical engineering. In 1998, he earned a Ph.D. with highest honors in electrical engineering at the Budapest University of Technology and Economics. After graduation, he joined the faculty at the same university. From 2002 to 2004, he was a research Assistant Professor at the Institute of Software Integrated Systems of the Vanderbilt University (USA). He joined the faculty of the University of Pannonia in 2005. Gyula Simon’s teaching reflects his multiple areas of expertise. He has taught courses on programming, operating systems, software engineering, measurement technology, and sensor networks. His research interest includes measurement systems, sensor networking, signal processing, and information security.

Kostas Stamos obtained his diploma, M.Sc., and Ph.D. from the Computer Engineering and Informatics Department of Patras University (Greece). He has worked for the Networking Technologies Sector of the Research Academic Computer Technology Institute, Research Unit 6 of the Research Academic Computer Technology Institute and the Greek Research and Education Network. He is also teaching at the Computer Engineering and Informatics Department at the University of Patras, and at the Technological Educational Institute of Patras. He has published eight articles in journals and 30 papers in well-known refereed conferences. He is also co-author of two technical books, several encyclopaedia articles, and of a Global Grid Forum (GGF) standard document.

Sándor Szabó was born in 1977. He received his M.Sc. degree in electrical engineering at the Budapest University of Technology and Economics (Hungary) in 2000. Next, he started his Ph.D. studies at the same university. Currently he is carrying his teaching activities as Assistant Professor at the Department of Telecommunications of the Budapest University of Technology and Economics. He leads research projects, and is also a project leader at the Mobile Innovation Center of Hungary. His research interests include mobile and wireless systems, mobility modeling, mobility management, and the integration of heterogeneous wired and wireless networks.

Homero Toral-Cruz was born in Oaxaca, Mexico, in 1980. He received his B.Sc. degree in electronic engineering at the Instituto Tecnologico de la Laguna, Torreon, Coahuila (Mexico) in 2002, and his M.Sc. and Ph.D. degrees at the Electrical Engineering Department, Telecommunications Section at the Centro de Investigacion y Estudios Avanzados del IPN, (Mexico) in 2006 and 2010, respectively. He has been research assistant of the Electrical Engineering Department, Telecommunications Section at the Centro de Investigacion y Estudios Avanzados del IPN. Presently, he is Professor at the University of Quintana Roo (Mexico). His research interests include VoIP systems, quality of service in IP networks and Internet traffic modeling.

Deni Torres-Román was born in Oriente, Cuba in 1950. He received his Ph.D. degree in Telecommunications at the Technical University of Dresden (Germany) in 1986. He is co-author of the book “Data Transmission.” He received the Telecommunications Research Prize in 1993 from the AHCIENT Association. Since 1996, he is Professor and researcher at the Department of Electrical Engineering and Computer Sciences of the Centro de Investigacion y Estudios Avanzados del IPN (Mexico). His main research involves Internet traffic measurement and modeling, network quality of service, digital communication of medium and high speed, software and hardware design for telecommunications, and modern telephony systems.
Arijit Ukil is currently working in the Innovation Labs, Tata Consultancy Services Ltd., (India) as research scientist. He is primarily engaged with the research activity on ubiquitous computing, security and privacy, and wireless networking. Before joining Tata Consultancy Services Ltd. in 2007, he has worked as scientist C in the Deference Research and Development Organization for four years, where his primary focus area was digital signal processing, embedded systems, and wireless communication for radar applications. He was mainly involved in naval-based radar systems. He has published a number of conference and journal papers of national and international repute. He has published one book chapter titled “Advanced Scheduling Schemes in 4G Systems” in the book “Fourth-Generation Wireless Networks: Applications and Innovations” published by IGI-Global in December, 2009. He has been reviewer of a number of IEEE conferences, like IEEE VTC and IEEE WCNC. He has been invited to deliver keynote lectures in many international and national conferences, like ETCC’08 in NIT Hamirpur, ICCET’09 in Singapur, NCERDM-IT’09, Jaipur, and NCETAC2010-IT, Trichy. He has delivered tutorial in ICWMC’09 on “Ubiquitous Computing”. He is enlisted in 2010 Marquis’ “Who’s Who in the World” as a renowned contributor in the field of computer science and Information Technology. He has done his B.Tech degree in Electronics and Telecommunications in 2002.

Gergely Vakulya received his M.Sc. in Information Technology at the University of Pannonia (Hungary) in 2008. Currently he is pursuing his Ph.D. in Information Science and Technology at the University of Pannonia. His main research interest is sensor networking. He gives courses on operating systems, information security, and sensor networks, and also coordinates projects of undergraduate students.

Gábor Varga graduated in 2010 with M.Sc. degree in technical informatics from the Budapest University of Technology and Economics (Hungary), Department of Telecommunications. He has also been studying economics at the Corvinus University (Hungary). He is currently working as an engineer at the Mobile Innovation Center of Hungary, where his main research interests are positioning and security in wireless networks, and indoor navigation systems. He is co-author of papers published in Hungarian and international scientific journals, and conference papers.

Giannis Zaoudis obtained his diploma at the Computer Engineering and Informatics Department of the Patras University (Greece). He is currently in the graduate program of the Computer Science and Technology department. He has worked for the Research Unit 6 of the Research Academic Computer Technology Institute and the Greek Research and Education Network. He is also participating in the GN3 Project for advancing the European GEANT3 network. His research interests include cross-layer architectures for wireless networks, network protocols and ad-hoc networks. He has extensive knowledge of C, C++, Java, PHP, database manipulation, Web technologies, and Web development. He has yet published one article in a journal and three papers in well-known refereed conferences.
