About the Contributors

**Maria Manuela Cruz-Cunha** is currently an Associate Professor in the School of Technology at the Polytechnic Institute of Cavado and Ave, Portugal. She holds a Dipl. Eng. in the field of Systems and Informatics Engineering, an M.Sc. in the field of Information Society and a Dr.Sci in the field of Virtual Enterprises, all from the University of Minho (Portugal). She teaches subjects related with Information Systems, Information Technologies, and Organizational Models to undergraduate and postgraduate students. She supervises several PhD projects in the domain of Virtual Enterprises and Information Systems and Technologies. She regularly publishes in international peer-reviewed journals and participates on international scientific conferences. She serves as a member of Editorial Board and Associate Editor for several International Journals and for several Scientific Committees of International Conferences. She has authored and edited several books, and her work appears in more than 70 papers published in journals, book chapters, and conference proceedings. She is the co-founder and co-chair of CENTERIS – Conference on ENTERprise Information Systems.

**João Eduardo Varajão** is Professor of Information Systems Management and Software Engineering at the University of Trás-os-Montes e Alto Douro and visiting professor at EGP – University of Porto Business School. He graduated in 1995, received his Master’s degree in Computer Science in 1997 and, in 2003, received his PhD in Technologies and Information Systems, from University of Minho (Portugal). He currently supervises several Msc and PhD theses in the Information Systems field. His current research includes Information Systems management, project management and enterprise Information Systems. He has over one hundred publications, including books, book chapters, refereed publications, and communications at international conferences. He serves as associate editor and member of editorial board for international journals and has served in several committees of international conferences. He is the co-founder and co-chair of CENTERIS – Conference on ENTERprise Information Systems. He is also a member of AIS, IEICE and APSI.

***

**Agustín Orfila** is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid and a member of the Information Security Group of this department. He has a Bachelor’s degree in Physics from Universidad Complutense de Madrid and he obtained his Ph.D degree in Computer Science from Universidad Carlos III de Madrid in 2005. Dr. Orfila has several publications both in international conference proceedings and journals, and he acts as a reviewer of different ISI journals. His interests are mainly focused on the security in Information Technologies, particularly on RFID and intrusion detection systems.
Alexis Barlow is a lecturer at Glasgow Caledonian University. Her teaching and research interests are in the field of Information Systems, e-business, and supply chains. She is currently involved in teaching on a range of programmes including the BA (Hons) Management, Technology & Enterprise, MSc in Management of Information Systems, and the Master of Business Administration. Alexis is a member of the Higher Education Academy, British Academy of Management (BAM), e-business research network, and has served as track chair for the E-Business and E-Government track at the BAM conference. Alexis is currently leading a Greater Glasgow Articulation Partnership project examining student transition from college to university and is an external examiner for University of West of Scotland. She has recent publications in journals such as the International Journal of Business Science & Applied Management, International Journal of Information Technology and Management, and Electronic Commerce Research and Applications, as well as a range of book chapters.

Almudena Alcaide received a degree in (Mathematics) at Complutense University of Madrid, obtained her M. Sc. in Advanced Computing at Kings College University of London and got her PhD in Computer Science and Technology at Carlos III University of Madrid. Currently, she is a Teaching Assistant at the same University in the Computer Science Department. Her areas of interest are focused in the design and formal validation of cryptographic protocols, having several publications in conference proceedings, journals, and books. Specifically, her most recent research area is comprised into the field of Rational Cryptography, where results obtained from Games Theory are applied to the formal analysis of safe exchange protocols.

Ana Rodrigues has a Degree in Informatics and a Masters in Informatics, both from the University of Trás-os-Montes e Alto Douro. Currently Ana has the position of informatics technician at the City of Vila Pouca de Aguiar, Portugal. She also has experience in Information Technology training. She has some publications in international conferences.

Anne Smith, lectures in entrepreneurship at Glasgow Caledonian University. Anne is third generation family business and so survival, success and growth of the SME are the foundation of her research. She has over a number of years created a portfolio of companies from the old and new economy, which form the basis of longitudinal research studies. Within the portfolio are sector clusters, which include packaging, agribusiness, construction and social firms. Anne was involved at inception with the Royal Society of Edinburgh fellowships for technology transfer, through design and provision of a commercialisation programme. She is very keen to integrate this work with the old economy firms and is currently researching connectivity of these firms with Scotland’s innovation system. Finally, an action research approach with her SME portfolio has developed pedagogical thinking in learning environments and is manifested in creative and innovative developments for entrepreneurship education.

Anni Rowland-Campbell has been leading Fuji Xerox Australia’s ARC funded research in semantics for the past four years, and through that has developed networks with research organisations around the world involved in the development of semantic technologies. She has worked in a number of government and non-profit roles and is currently undertaking a PhD focusing on the impact of globalisation and semantic technologies on multinational organisations and their local operating companies in Australia. Anni is also a member of a multidisciplinary team at Semantic Transformations Pty Ltd.
About the Contributors

Antonio Paredes is a lecturer in commercial Information Systems at the Financial Economy and Operations Research, University of Seville, Spain. He earned Bachelor degrees of Philosophy and Theology, and his Ms.C. and Ph.D. in Artificial Intelligence and Computational Logic. Most part of his professional career has worked in the design and supervision of commercial databases and Information Systems for the Spanish firms Abencor and Nicsa. His main research interests are business ontologies and the Semantic Web.

Antonis Ramflos joined INTRASOFT International SA in 1997 and is currently the Research and Innovation Department Manager. Dr. Ramflos has gained considerable experience in managing R&D projects and exploiting R&D results through his participation in numerous research projects. Dr. Ramflos has several publications in journals, conferences, and books. He holds a BSc in Mathematics from the University of Sussex, UK, (1983), an MSc in Computing and Statistics from the University of Wales, College of Cardiff, UK, (1985), and a PhD in the area of Distributed Heterogeneous Databases from the University of Wales, College of Cardiff, (1991).

Beatriz Sainz de Abajo is a young telecommunications researcher in the University of Valladolid (Spain). She received the Engineer degree in telecommunications engineering from the University of Valladolid (Spain) in 2001, and has a PhD from the University of Cordoba (Spain). She has devoted all her professional life to the investigation around telecommunication regulation matters and novel telecommunication systems. Her future research interests are e-commerce, e-marketing, e-government, telecommunications policy, and also digital contents, both from the user’s standpoint, and from the competitive market vision.

Bojan Cestnik is the general manager of the software company Temida and a researcher at the Department of Knowledge Technologies at the Jožef Stefan Institute in Ljubljana, Slovenia. He obtained his PhD in Computer Science at the Faculty of Electrical Engineering and Computer Science, University of Ljubljana. His professional and research interests include knowledge-based Information Systems and machine learning. His research work has been presented at several international conferences. He has been involved in several large-scale software development and maintenance projects.

Carlos de Castro Lozano has a PhD in Sciences from the University of Cordoba (Spain). Professor of the department of Computer Science, he is the person in charge of the subjects “Interaction Person - Computer and Systems Multimedia.” Director of the group of Research EATCO (Education and Learning for Technologies of the Communication), he coordinates the Network EVA (Virtual Spaces of Learning) of the International University of Andalusia (UNIA). President of the Foundation FREE and president of AETAP (Association of Entities for the Technologies of Support for the Personal Autonomy).

Danda B. Rawat received the Bachelors of Engineering in Computer Engineering in 2002 and the Masters of Science in Information and Communication Engineering (with First class, first with distinction) in 2005 from Tribhuvan University, Kathmandu, Nepal. He worked as an instructor (assistant lecturer) in Institute of Engineering, Tribhuvan University from 2002 to 2006 and worked as a Network Engineer at Center for Information Technology, Institute of Engineering from June 2003 to July 2004. He also worked as an ICT (Information and Communication Technology) officer for Government of
Nepal from January 2004 to December 2006. He is currently working toward the PhD degree with the Department of Electrical and Computer Engineering, Old Dominion University, Norfolk, VA, USA. He has published more than 20 journal papers, book chapters, and conference papers. He has been serving as a reviewer for several IEEE conferences and manuscripts. His research interests are in the areas of wireless communications, wireless cellular/ad-hoc networks, and vehicular communications. He is the recipient of Outstanding PhD Researcher of the Year Award 2009 given by the Department of Electrical and Computer Engineering, Old Dominion University, Norfolk, VA, USA.

David G. Schwartz is a senior lecturer at the Graduate School of Business Administration at Bar-Ilan University, Israel. His main research interests are Knowledge Management, Ontology, Internet-based Systems, and Computer-mediated Communications. Since 1998 he has served as Editor of the journal Internet Research. Dr. Schwartz’s research has appeared in publications such as IEEE Intelligent Systems, International Journal of Human-Computer Studies, IEEE Transactions on Professional Communications, Advances in Management Information Systems, and the Journal of Organizational Behavior. His books include Cooperating Heterogeneous Systems, Internet-Based Knowledge Management and Organizational Memory, and the Encyclopedia of Knowledge Management. He has been a visiting scholar at Columbia University, Department of Biomedical Informatics (New York, USA) and Monash University, Faculty of Information Technology (Melbourne, Australia). Dr. Schwartz received his Ph.D. from Case Western Reserve University; MBA from McMaster University; and B.Sc. from the University of Toronto, Canada.

Dinesh Rathi is Assistant Professor in the School of Library and Information Studies at the University of Alberta. His research interests are in the area of Web 2.0, knowledge management, e-marketing, human computer interaction, text mining, email-based customer support, and help desk systems. Dinesh has an MS in Finance and a Ph.D. from the University of Illinois at Urbana-Champaign, Illinois, USA. Dinesh also has a Post-graduate Diploma in Business Administration (PGDBA) with a major in Marketing and International Business and an undergraduate degree in Mechanical Engineering. Dinesh has over five years of corporate experience. He worked with TATA International Limited, Mumbai, India for over three years in the area of international business and with Kirloskar Electric Company, Bangalore, India in the area of automation and process re-engineering.

Eduardo Galan is a Research Technician at the Security Group of the Computer Science Department of the Carlos III University of Madrid. He obtained his Computer Engineer Degree at Carlos III University of Madrid and received his M. Sc. in Computer Science and Technology from the same University. His main areas of interest are the prevention of phishing and other modalities of online fraud and the analysis of the security of Web applications and the attacks which can affect them.

Francisco J. Martínez-López, MSc in Marketing, European PhD in Business Administration, is an Associate Professor in Marketing at the University of Granada (Spain) and Assistant Professor in Marketing at the Open University of Catalonia, Barcelona (Spain). Among his main areas of interest are consumer behavior on the Internet, e-marketing, marketing channels, and KDD methodologies for marketing. He has authored academic books, chapters of academic books, and contributions to international conferences and international journals, such as Int. J. of Electronic Marketing and Retailing, Internet Research, Industrial Marketing Management, Int. J. of Management Reviews, Computers &

Christos Georgousopoulos joined INTRASOFT International S.A. in 2006 and is currently an ICT Specialist in the department of Research and Innovation Development. He holds an H.N.D. (1997) in Computer Science from British-Hellenic College, Athens, a B.Sc. (1999), and a Ph.D. (2005) in Computer Science from University of Wales, Cardiff. From 2000 to 2010 he published more than 15 research papers in journals and conferences, and contributed in the authoring of newspaper and magazine articles. His current research interests entail software engineering and innovative software development techniques, cloud-computing, and service-oriented architectures.

Gongjun Yan received his MS in Computer Science from University of Electronics Science and Technology of China in 2004 and BS in Mechanical Engineering in Sichuan Institute of Technology in 1999. Currently, he is a Ph.D candidate in Computer Science at Old Dominion University. His main research areas include wireless security and Intelligent Transportation Systems. In the area of security Gongjun is mostly interested in location security, confidentiality, and availability (the so-called CIA model). He has published about 18 papers and journals and 5 book chapters during his Ph.D research.

Gregory S. Yovanof is an Associate Professor at Athens Information Technology (AIT) and an adjunct professor at Carnegie Mellon University. He currently serves as the Graduate Program Director of the “Management of Business, Innovation and Technology” program at AIT. In April 2008, Dr. Yovanof was elected member of the BoD of Hellas-On-Line. Before joining AIT in 2002, he worked as a staff scientist at Eastman Kodak Research Labs and Hewlett-Packard Laboratories, engaged over a period of nine years in multimedia signal processing for computer peripheral devices. He has also led the development of several award-winning ICs for the DVD market as a co-founder and an executive manager at two start-up companies in Silicon Valley. Dr. Yovanof received a Ph.D degree in Communications from the University of Southern California, Los Angeles, in 1988. A holder of four patents on imaging systems, Dr. Yovanof is a senior member of the IEEE.

Hatem El-Gohary is a Senior Lecturer in Marketing at Birmingham City University Business School (Birmingham, West Midlands, UK) and Marketing Researcher at Cairo University Business School (Cairo, Egypt). He has more than 15 years of experience in academia and worked as the marketing director of a multinational company, a general manager for Egyptian company and a marketing consultant for a number on national and multinational companies. His research interest include: Electronic Marketing, Electronic Business, Electronic Commerce, Internet Marketing, and Small Business Enterprises. He has published in journals such as Journal of Business and Public Policy, Journal of International Business and Finance, International Business & Technology Review and Int. Journal of Business Science and Applied Management.

Ingrid Petrič is researcher at the Centre of Systems and Information Technologies at the University of Nova Gorica, Slovenia. She received her MSc in Information Management at the Faculty of Economics, University of Ljubljana in 2004. During her Master’s studies, she worked for a software company specializing in business software development. In 2006, she enrolled at the PhD program New Media
About the Contributors

and E-science at the Jožef Stefan International Postgraduate School and received her PhD in 2009. As a researcher at the Centre of Systems and Information Technologies, she investigates available data about autism spectrum disorders. Her research interests include database systems, data and text mining, knowledge discovery, business informatics, and bioinformatics.

**Isabel de la Torre Diez** was born in Zamora, Spain, in 1979. She received the Engineer degree in telecommunications engineering from the University of Valladolid (Spain) in 2003. Currently, she is an assistant professor in the Department of Signal Theory and Communications at the University of Valladolid, where she is working towards the Ph.D. degree. Her research has been mainly focused in development of telemedicine applications, EHRs (Electronic Health Records) standards in Ophthalmology, e-learning, and e-commerce applications.

**Jorge Blasco** is a Teaching Assistant member of the Information Security Research Group at the Computer Science Department of the Carlos III University of Madrid. He obtained his Computer Engineer degree at University Carlos III of Madrid. He also received his M. Sc. in Computer Science and Technology from the same University where he is currently a PhD candidate. Blasco has published several research papers on international conferences proceedings. His main research interests are data leakage protection technologies and steganography.

**José Manuel Gaivéo** is Adjunct Professor on Department of Information Systems of School of Business Administration, Polytechnic Institute of Setubal, since 1998, teaching Information Security, Systems Analysis, Data Modeling, and Business Intelligence. Dr. Gaiveo is the coordinator of Department of Information Systems. Holds a PhD degree in Informatics, by Open University of Lisbon with a doctoral thesis named “People on Information Security Management Systems,” a Master of Sciences degree in Organizations and Information Systems, by University of Evora, and a Licentiate’s degree in Computers and Electronics Engineering by of School of Technology, Polytechnic Institute of Setubal. Has successfully completed a Lead Auditor Course of ISO 27001:2005, and passed the examination.

**Lisa M. Given**, Ph.D., is Professor of Information Studies in the School of Information Studies (Faculty of Education), Charles Sturt University, Australia. Lisa is also an Adjunct Professor in Humanities Computing (Faculty of Arts) and Educational Policy Studies (Faculty of Education) at the University of Alberta. A former Director of the International Institute for Qualitative Methodology, Lisa has received numerous research grants and awards and has published widely on topics related to individuals’ information behaviours and qualitative inquiry. Her research interests include the social construction of knowledge, web usability, spatial analysis, information literacy, research methods, and information issues in the context of higher education. Lisa is Editor of the 2-volume set, *The Sage Encyclopedia of Qualitative Research Methods* (2008).

**Margaret McCann** is a lecturer in the Department of Strategy, Innovation and Enterprise, Glasgow Caledonian University. In her 20 years at the University she has taught predominantly within the field of Information Technology/Information Systems and how businesses can successfully exploit technology. Her current main research interests are in e-learning as well as business uses of Web 2.0 technology, and she has published several articles and book chapters in these areas. She is currently undertaking a
research project on easing the transition for college students entering university, as well as researching the use of plagiarism detection software to improve academic writing. Margaret is also a validator for the Scottish Qualification Agency and an advisor for the Scottish Information Literacy Framework.

Mário Sérgio Carvalho Teixeira is Assistant Professor at UTAD – University of Trás-os-Montes and Alto Douro. PhD in Management, UTAD. MSc and MBA, with specialisation in Marketing, Portuguese Catholic University. Post Graduate Course in Marketing Research, INDEG/ISCTE. BSc in Economics, ISEG/UTL. Teacher in MSc and BSc Degrees Courses of Marketing, Marketing Research, Entrepreneurship, Strategic Management and other Business areas. Former Director of Master in Entrepreneurship and Assistant Director of CETRAD – Center of Transdisciplinary Studies for Development. Coordination or participation in several national and international studies and research projects, such as: “National Market Study and Definition of a Marketing Strategy for Douro Wines”; “Tourism Market Research for the Douro and Trás-os-Montes Regions”.

Marlene Pinto has a Degree in Informatics and a Masters in Informatics, both from the University of Trás-os-Montes and Alto Douro, Portugal. Currently is a consultant in Business Intelligence at ADP Dealer Services Portugal. Between 2007 to 2008, she worked as a technical training specialist at the University of Trás-os-Montes and Alto Douro. She has some publications in electronic commerce area.

Miguel López Coronado is a telecommunications professor in the University of Valladolid (Spain). He was born in Barcelona, Spain; in 1950. He has a PhD in Telecommunications Engineering from the Polytechnic University of Madrid, in 1982. Since 1991 he has been devoted to the promotion of Information Society in Castille and Leon region from several positions: Director of the Technical School of Telecommunications, R&D General Manager of a Telecommunications Technological Centre, and also CEO of a cable telecommunications operator. Now, his research interests are biomedical signal, Telemedicine, Information Society, and to contribute to the promotion of the entrepreneurial character of University.

Nuno Pedro Manarte Gonçalves is a project manager and research assistant at UTAD – University of Trás-os-Montes and Alto Douro. He holds a BSc degree in Management (UTAD), with a strong marketing component where he wrote a final monograph on the subject of Database Marketing. He also completed a professional training course in website design. He is an Internet, mobile, and social media marketing enthusiast, and has a keen interest for new technologies. Previous work experience includes working as a freelance graphic designer; as a manager in a local newspaper, where he oversaw the development of a new website and a new subscriber database; and some experience in sales.

Özalp Vayvay, Ph.D., is working of Industrial Engineering Department at Marmara University. He is currently the Chairman of the Engineering Management Department at Marmara University. His current research interests include new product design, technology management, business process reengineering, enterprise resource planning systems, operations management, and supply chain management. Dr. Vayvay has been involved in R&D projects and education programs for an over the past 12 years.
Paul Strahl, for many years, has been working within the “e-Business” space, having created Fuji Xerox Australia’s e-Business processes within the Document Supplies Division. As e-Business Manager, Paul introduced Web 2.0 to the company, along with an industry-first data driven online sales model. Paul has developed a worldwide “virtual” team consisting of best of breed expertise in the areas of architecture, coding, semantics, and natural language processing. Paul is a member of a multidisciplinary team at Semantic Transformations Pty Ltd.

Pedro Pina is a lawyer and a law teacher in the Oliveira do Hospital School of Technology and Management at the Polytechnic Institute of Coimbra. He holds a law degree from the University of Coimbra Law School and a post-graduation in Territorial Development, Urbanism and Environmental Law from the Territorial Development, Urbanism and Environmental Law Studies Center (CEDOUA) at the University of Coimbra Law School. He holds a master degree in Procedural Law Studies from the University of Coimbra Law School and is currently a PhD student in the Doctoral Programme “Law, Justice, and Citizenship in the Twenty First Century” from the University of Coimbra Law School and Economics School.

Ramiro Gonçalves is an Associate Professor of Computer Science at the Trás-os-Montes e Alto Douro University, Vila Real, Portugal. He received his PhD in Computer Science from Trás-os-Montes e Alto Douro University, Portugal. He has fifteen years of experience as Information Systems' technology consultant. His current research focuses on electronic commerce and management Information Systems. It is a member of several scientific committees and has participated in several panels of the Master and Doctoral degree. Has several papers published in journals and proceeding of conferences.

Ron Beckett’s industry background is in R&D and manufacturing management associated with the aerospace industry. He has an ongoing interest in creative organisational change associated with inter-enterprise collaboration between firms and between sectors, managing innovation as a business process, and leveraging accessible knowledge and technology. Ron is continuing to research these topics with industry and university colleagues, and has published about 80 related articles or book chapters. He is currently the Managing Director of a management research and consultancy enterprise called the Reinvention Network that helps client firms during transitional growth periods, and is an Adjunct Professor at the University of Western Sydney, College of Business.

Rui Rijo is an Associate Professor of Computer Science at the Polytechnic Institute of Leiria. He has more than ten years of experience as contact centers’ technology consultant in Tokyo (Japan), Macau (China), Hong-Kong (China), São Paulo (Brazil), Kuala Lumpur (Malaysia), Madrid (Spain), Amsterdam (Holland), and Lisbon (Portugal). His current research interests include project management, software engineer, and voice over IP communications.

Sam De Silva is a Partner at Taylor Walton LLP. Taylor Walton is one of the largest law firms in the South East region outside London and has recently been voted UK Corporate Law Firm of the Year by the readers of leading corporate finance magazine, ACQ. Silva specialises in data protection, e-commerce and technology projects including outsourcing (IT, BPO and off-shoring), system development and supply, system integration, software licensing and support, and services agreements. He advises clients
in both the public and private sector and has acted for both suppliers and users of technology. He has had experience and is admitted to practice law in New Zealand, Australia, and the United Kingdom. Silva has published widely and speaks regularly on outsourcing and technology contracts and is an Associate Lecturer at the University of Surrey for the Surrey European Management School. He has also developed an online course on IT contracts for Central Law Training. Dr De Silva is also on the Law and Information Technology Committee of the English Law Society.

Serdal Bayram, PhD Candidate, received a BSc degree in Computer Engineering from Marmara University, Turkey in 2004. In 2007, he was awarded an MSc degree in Computer Engineering from Marmara University. Since 2007, he has been studying for PhD program in Engineering Management department at the same university. Since 2003, he has been working in CIO (Corporate Information Office) for Siemens in Istanbul, Turkey. Firstly, he started to be a Software Engineer in Web applications and then he continued to work as Project Manager in several internal enterprise applications. Now, his position in Siemens is Solution Consultant.

Stephan Olariu received his BSc, MSc and PhD all in Computer Science from McGill University in Montreal. Over the years Prof. Olariu has held many different roles and responsibilities as a member of numerous organizations and teams. Much of his experience has been with the design and implementation of robust protocols for wireless networks, and in particular, sensor networks and their applications. Professor Olariu is applying mathematical modeling and analytical frameworks to the resolution of problems ranging from securing communications, to predicting the behavior of complex systems, to evaluating performance of wireless networks.

Tanja Urbančič is Dean of the School of Engineering and Management at the University of Nova Gorica, Slovenia, and Head of Center for Systems and Information Technologies at the University of Nova Gorica. She is also a research fellow at the Department of Knowledge Technologies at the Jožef Stefan Institute. She received her PhD in Computer Science from the University of Ljubljana. Her current professional and research interest is mainly in knowledge management, especially in its applications to education, medicine, and public health. She is a co-author of several book chapters and journal papers in IEEE Transactions on SCM, Engineering Applications of Artificial Intelligence, Journal of Intelligent and Fuzzy Systems, Journal of Biomedical Informatics, among others.

Weiming Yang received the Bachelors of Science in Applied Mathematics in 2003 from Chengdu University of Technology, China. He received his first Master’s degree of Science in Applied Mathematics at 2005 from University of Toledo, OH and second Master’s degree of Science in Statistics in 2009 from Old Dominion University. He worked as a research assistant at ISTART lab at Old Dominion University as instructor from 2007 to 2008. He is currently working toward the PhD degree in Statistics with the Department of Mathematics and Statistics, Old Dominion University, Norfolk, VA, USA. His research interests are in the areas of binary longitudinal data, time series, estimating equation, and correlation estimation. He received the Graduate Teaching Assistant Fellowship for 2008-2009.

Wolfgang A. Halang, born 1951 in Essen, Germany, received a doctorate in mathematics from Ruhr-Universität Bochum in 1976, and a second one in computer science from Universität Dortmund in 1980.
He worked both in industry (Coca-Cola GmbH and Bayer AG) and academia (University of Petroleum and Minerals, Saudi Arabia, and University of Illinois at Urbana-Champaign), before he was appointed to the Chair of Applications-oriented Computing Science and head of the Department of Computing Science at the University of Groningen in the Netherlands. Since 1992 he holds the Chair of Computer Engineering in the Faculty of Electrical and Computer Engineering at Fernuniversität in Hagen, Germany, whose dean he was from 2002 to 2006. He was a visiting professor at the University of Maribor, Slovenia, 1997, and the University of Rome II in 1999. His research interests comprise all major areas of hard real-time computing with special emphasis on safety-related systems. He is the founder and was European editor-in-chief of the journal Real-Time Systems, member of the editorial boards of 4 further journals, co-director of the 1992 NATO Advanced Study Institute on Real-Time Computing, has authored 10 books and over 350 refereed book chapters, journal publications, and conference contributions, has edited 16 books, holds 12 patents, has given some 80 guest lectures in more than 20 countries, and is active and held offices in various professional organisations and technical committees as well as involved in the programme committees of almost 200 conferences.

**Xenia Ziouvelou** is a senior research scientist at the Research in Innovation & Entrepreneurship (RIE) Research Group and a teaching fellow at Athens Information Technology (AIT) since 2007. She holds a PhD in Industrial Economics focusing on the strategic analysis of electronic markets and an MSc in International Business both from the Department of Economics of the Lancaster University (UK). She has also been awarded with a B.Sc in Business Administration from the American College of Greece (GR).

**Yi Zhao** received her BEng degree in Computer Software Engineering in 1995, and her MEng degree in Image Processing and Pattern Recognition in 1998 both from Northwestern Polytechnic University, Xi’an, China, and her PhD degree in Pattern Recognition and Intelligent System from Shanghai Jiaotong University in 2001. In the same year she moved to Germany, where she is working with the Chair of Computer Engineering at Fernuniversität in Hagen. Her research interests include Semantic Web mining, security in Semantic Web services, knowledge discovery, and data mining.
