About the Contributors

Bing Wu: Head of the Computer Science Department at the Dublin Institute of Technology (DIT), Ireland. B.Sc. and M.Sc. in China, Ph.D from University of Manchester Institute of Science and Technology (UMIST), United Kingdom in 1996. Worked in the Department of Computer Science, Trinity College Dublin (1996-1998) and joined DIT in 1998. Research interests include knowledge representation and management, system engineering and re-engineering, and application of advanced computing techniques to real-world situations, such as healthcare informatics and bio-informatics, as well as industry-oriented software education. Served vice-chair of the project steering committee and general project manager for the EMERSION project, a 3-year EU Asia-Link funded project which was completed in 2006.

Xiaofei Xu: Professor and Dean of School of Software in Harbin Institute of Technology (HIT), one of Top-Nine Universities in China. B.S., M.S. and Ph.D. from HIT. Research interests include enterprise computing, interoperability, modelling, resource planning and supply chain management systems, service computing and service engineering, databases and data mining, knowledge management, software engineering, and others. Leader of more than thirty Chinese national research and international co-operation projects. Author or co-author of over 300 refereed papers, four academic books and on editorial boards of nine academic journals. A member of the Expert Group of Computer Science and Technology in the Academic Degree Committee of the State Council of China, a standing member of the Council of China Computer Federation, vice-chairman of the Council of the China ERP Technology Association and was a member of the Expert Committee of Chinese National High-Tech R&D Program on Computer Integrated Manufacturing Systems (1994-2004).

**About the Contributors**

**Thècle Alix:** Associate Professor at the University of Bordeaux 4, France. Ph.D. on production planning and control in 2001 at University Bordeaux 1. Her research activities are now carried out at IMS laboratory (UMR CNRS 5218) in the «production engineering» research group and especially in the track «Enterprise Modelling and Performance». She now mainly focuses on the modelling and characterisation of services and service activities. She has been involved in European projects: CEN-NET (China Europe Network on the NET), INTEROP (IST 508011). She is currently responsible of the studies in a department of transportation and logistics management. She teaches quality management and information system modeling in an international joint master’s degree programme led by Bordeaux 1 University in France and Harbin Institute of Technology in China.

**Kamal Bechkoum:** Dean of the School of Science and Technology at the University of Northampton, United Kingdom. Ph.D from Cranfield University in Software Techniques for Computer Aided Engineering. Over 20 years experience working in the United Kingdom higher education sector and joined the University of Northampton from the University of Derby where he was Head of the School of Computing and Assistant Dean of the Faculty of Business, Computing and Law. Prior to that, he was an Associate Dean of the School of Computing at the University of Wolverhampton. His contribution to the field of Computing Curriculum is recognised internationally and he has served as external examiner and advisor to many universities and higher education institutions both in the UK and abroad. Published over 50 papers. A Fellow of the British Computer Society, a member of the IEEE Computer Society and a Chartered IT Professional.

**Constanta-Nicoleta Bodea:** Professor in the Faculty of Cybernetics, Statistics and Economic Informatics, Economic Informatics Department at the Academy of Economic Study, Bucharest, Romania. Currently teaches artificial intelligence, data mining and project management. Coordinates numerous research projects at national level and achieved a high expertise in managing projects with multiple consortia. Author of eleven books and more than 50 refereed papers on project management, information systems, and artificial intelligence, being honored by IPMA (International Project Management Association) with the Outstanding Research Contributions in 2007.

**Jean-Paul Bourrières:** Professor at the University of Bordeaux 1, France, Director of Department LAPS (Automation and Production Science) of IMS, a research unit jointly attached to University Bordeaux 1 and CNRS (French National Centre for Scientific Research). Ingenieur Degree in Electronics and Automatic Control, Ph.D. in Theory of Control, State Docteur es Sciences Physiques. His scientific field is manufacturing science, discrete event systems and operations management in which he has published 100 refereed journal and conference papers. He was the project manager of Framework Project 6 INTEROP Network-of-Excellence on Interoperability Research for Networked Enterprises Applications and Software. In 2007 co-founded the laboratory on Enterprise Interoperability, INTEROP-VLab AISBL, Brussels, a large research network with 70 member organizations in Europe and in China, of which he currently is the president.

**Andrés Boza:** Lecturer in Management Information Systems at the School of Computer Science and the School of Industrial Engineering, Universidad Politécnica de Valencia (UPV), Spain. Ph.D. in Supply Chain Management and Enterprise Integration at the UPV. Member of the Research Centre on
About the Contributors

Production Management and Engineering (CIGIP). He has participated in the doctoral programme and in national and international projects on information systems for production management, supply chain management and performance measurement. He has published several refereed papers in books, journals and international conferences in these fields.

David Chen: Full professor at the University of Bordeaux I, France and member of IMS Laboratory (Laboratory of Integration from Materials to Systems). Ph.D. from University Bordeaux 1 in Control Theory in 1988. His research interests include enterprise modelling, integration and interoperability. His main teaching domain deals with enterprise architectures and models, modelling techniques and production management methods. Since the 1990s he has been actively involved in European research projects and working groups (such as IMPACS, CIMOSA, CIMMOD, IDEAS, UEML, ATHENA, INTEROP…) and participated in several co-operation programmes between the European Union and China in the domain of enterprise modelling and integration. A member of CEN TC 310/WG1 and ISO TC184/SC5/WG1 (modelling and architecture) and involved in IFIP WG5.12 and IFAC WG5.3 (enterprise integration and networking). Published more than 80 refereed papers in international journals and conferences.

Llanos Cuenca: Assistant Professor in Enterprise Management and Management Information Systems at the Universidad Politécnica de Valencia (UPV), Spain. Ph.D. from the UPV. Member of Research Centre on Production Management and Engineering (CIGIP). Participated as a researcher in several Spanish and European projects. Has worked on issues relating to production management, supply chain, enterprise modelling and the use of IS/IT in industrial enterprises. Currently, her research lines focus on process management, enterprise architectures and the use of IS/IT in these areas. Published several refereed papers in international conferences and journals.

Tugrul Esendal: Senior lecturer in the Department of Computing Technology at De Montfort University, United Kingdom. After a very brief industrial career as a mechanical engineer, part of which he studied programming and data processing, he returned to computing full-time and specialised in applications development and software portability. He now combines teaching, research and consultancy in various aspects of software engineering. His current areas of interest for research are teaching and learning of programming languages, software quality and metrics, and learning support requirements. He is a founding member of two interest groups in the faculty: visual programming and special needs support requirements. He is also currently involved in knowledge transfer partnerships with industry.

Horacio González-Vélez: Lecturer with the School of Computing and a researcher with the IDEAS Research Institute of the Robert Gordon University in Aberdeen, Scotland, United Kingdom. Ph.D. in Informatics from the University of Edinburgh. Received the NESTA Crucible Fellowship for interdisciplinary research on computational science in 2009 and a European Commission award for work on scientific dissemination in 2006. His research encompasses parallel computing, multi-core technologies, cloud/grid computing, and computational intelligence in distributed environments. Spent over ten years in the ICT industry working for innovation-driven companies such as Silicon Graphics and Sun Microsystems, in different commercial roles in engineering and marketing. Enthusiastic about technology and its applications, he supports joint interdisciplinary research that motivates knowledge transfer, creative thinking, and innovative products. Has published several refereed scientific contributions and presented at numerous fora across the world.
About the Contributors

**Gary Hill**: Head of Computing and Immersive Technologies at the University of Northampton, United Kingdom. His specialist area of interest/expertise is programming, with Java the preferred language. His particular passion is for Graphical Programming i.e. 2D/3D graphics, graphics & visualisation, 3D computer modelling and more recently programming mobile devices/smart phones. Having lectured programming to undergraduate and postgraduate students for the past 10 years he has always sought to make the subject as enjoyable as possible, whilst covering the key concepts required.

**Deirdre Lawless**: lecturer in Dublin Institute of Technology, Ireland, and chair of the MSc programmes in the School of Computing. She was the project manager for DIT on the EMERSION project, the 3-year EU Asia-Link project which was completed in 2006. EMERSION successfully developed an industry-oriented pedagogical model for software education in China. DIT was the lead partner of this project and was responsible for the design of the curriculum and quality assurance mechanisms and, in particular, for enshrining the industry orientation in the model. She is currently working on a range of projects including the development of a strategy for the provision of continuing professional development to industry by the School of Computing.

**Alok Mishra**: Associate Professor of Computer and Software Engineering at Atilim University, Ankara, Turkey. Ph.D. in computer science-software engineering, and dual M.Sc. degrees in computer science and applications and human resource management. His areas of interest and research are software engineering, information system, information and knowledge management and object oriented analysis and design. Published articles, book chapters and book-reviews related to software engineering and information system in refereed journals, books and conferences. Member of editorial board of many journals including *Computer Standards and Interfaces*, *Journal of Universal Computer Science*, *Computing & Informatics*, *Electronic Government - an International Journal*. Has extensive experience in distance education related to computers and management courses. Received an excellence award for online education from U21Global Singapore. Served as chief computer science examiner of the International Baccalaureate (IB) organization. Recipient of national merit scholarship and department of information technology scholarship of Government of India.

**Deepti Mishra**: Assistant Professor of Computer Engineering at Atilim University, Ankara, Turkey. Ph.D. in Computer Science (Software Engineering) and M.Sc. in Computer Science and Applications. Research interests include software process improvement, software quality, requirement engineering and databases. Published many refereed research papers and book chapters at international and national levels. Recipient of department of information technology scholarship of Government of India.

**Ciarán O’Leary**: Lecturer in the School of Computing in the Dublin Institute of Technology, Ireland. B.Sc. in Computer Applications from Dublin City University and M.Sc. in Computer Science from Trinity College, Dublin. Has been involved with several joint and franchised international programmes in the DIT over the past decade. Participated with colleagues in funded projects on international education models. Has also taught and delivered training in both China and Tanzania, and currently holds responsibility for the quality assurance of two international programmes involving partners in those countries.
Simon Rogerson: Professor Emeritus in Computer Ethics and former Director of the Centre for Computing and Social Responsibility at De Montfort University, United Kingdom. Following a successful industrial career where he held managerial posts in the computer field, he now combines research, lecturing and consultancy in the management, organisational and ethical aspects of ICT. He received the 2000 IFIP Namur Award for outstanding contribution to the creation of awareness of the social implications of ICT. In 2005 he became the first non-American to be given the prestigious SIGCAS Making a Difference Award by the Association for Computing Machinery. He is a Vice-President and the current Chairman of the Institute for the Management of Information Systems. He is editor of the Journal of Information, Communication & Ethics in Society.

Yushan Sun: Since 2002, Associate Professor at Harbin Institute of Technology at Weihai, China, and associate dean in the School of Software there since 2006. Obtained a Master’s degree in Mathematics from Heilongjiang University in 1986. Worked as a lecturer at Harbin Institute of Technology (1988-1993) and in 1993 became Associate professor. Studied as a graduate student in North Dakota State University in the United States (1995-2000) and obtained two Master’s degrees, one in Mathematics and the other in Computer Science. Worked as a software engineer for IBM (2000-2002).

Scott Turner: Pathway Leader for the B.Sc. Computing, a University Teaching Fellow, and a Teaching and Learning Co-ordinator at the University of Northampton, United Kingdom. His specialist areas are the teaching of problem-solving within computing and the application of artificial intelligence techniques.

Bruno Vallespir: Professor at the University of Bordeaux 1, France and member of IMS. Within this framework, he is manager of the «production engineering» research group (15 permanent researchers, 15 PhD students) of the IMS laboratory (UMR CNRS 5218). His research topics are production management, performance evaluation and enterprise modelling including modelling tools and design methodologies, and in particular, the research track «enterprise modelling and performance». This work rests on the research results obtained by the GRAI over the three past decades that have led it to the two methodological tools known worldwide: the GRAI model (generic architecture of control) and the GRAI method (enterprise modelling). This research track is concerned also with other concepts such as performance indicators and systems integration and engineering.

Yanqing Wang: Associate professor in the School of Management at Harbin Institute of Technology (HIT), China; previously was lecturer for seven years in the School of Software at HIT. Received B.A. and M.A. in computer science and Ph.D in management science and engineering from HIT. In 2003, worked at Dublin Institute of Technology in Ireland as a visiting scholar. His general research interests include software quality assurance at source code level and software engineering education. Particular research projects include evaluation of coding standards, improvement in the process of peer code review, and pedagogical management information systems. His peer-reviewed papers have been published in journals such as Asia-Pacific Management Review, Association for Computing Machinery Special Interest Group on Computer Science and Software Engineering Bulletin, China Soft Science Magazine and elsewhere.
