About the Contributors

**Rocci Luppicini**, PhD, is an assistant professor in the Department of Communication at the University of Ottawa in Canada. He has published in a number of areas including virtual learning communities and practice (Quarterly Review Of Distance Education), research methodology on online instruction (Journal of Distance Education), issues in Higher Education, instructional design (Canadian Journal of Learning and Technology), and design research (International Journal of Technology and Design Education). His most recent edited books include, *Online Learning Communities in Education* (2007) and the *Handbook of Conversation Design For Instructional Applications* (2008).

**Rebecca Adell**, PhD, is the former coordinator of the Academic Writing Help Centre at the University of Ottawa, Canada, and currently works as the business manager of Eck MacNeely Architects in Boston, Massachusetts. Her dissertation on the history of smoke pollution regulation in nineteenth-century England was rooted in science and technology studies, with particular focus on the connections between technological advance, evolving perceptions of pollution, and the response of government and the courts to the new technological realities of the Industrial Revolution.

***

**M.Akbari** is PhD candidate at technology university of Amir Kabir (Iran, Tehran). He was granted his MSc in polymer blends and polymer recycling from technology university of Isfahan (Iran, Isfahan). His BSc is in textile field and morphology treatment of synthetic fibers. He has some papers about polymer blending and electrospinning of nano fibers.

**Stuart Allan** is professor of journalism at Bournemouth University, UK. Previous publications include the authored book *Media, Risk and Science* (2002) and the co-edited collection Environmental Risks and the Media (2000). Currently, he is co-writing with Alison Anderson, Alan Petersen and Clare Wilkinson the book *Nanotechnology, Risk and Communication* for Palgrave.

**Alison Anderson** is reader in sociology at the University of Plymouth, UK. Prior publications include *Media, Culture and the Environment* (University College London and Rutgers University Press, 1997). Her recent articles on journalistic portrayals of environmental risks, nanotechnologies, genetics and terrorism have appeared in *Science Communication*, *Knowledge, Technology and Society*, *Genetics and Society* and *Health, Risk and Society*.
Alireza Bagheri received a doctor of medicine degree from Jondi Shapour University of Medical Sciences, Iran and a PhD in medical ethics from school of medicine, Tsukuba University in Japan. Dr. Bagheri worked at the Center for Medical Ethics in Tehran where he served in a national project as the executive director to compile Iranian National Ethical Codes in medical research. He is a clinical ethics fellow at the Joint Centre for Bioethics, University of Toronto and a visiting scholar at the Center for Clinical Bioethics, Georgetown University.

Keith Bauer is an assistant professor of philosophy at Marquette University. He earned his PhD in philosophy/bioethics in 2002 from the University of Tennessee. From 2000-2001, he served as a fellow at the Institute for Ethics at the American Medical Association in Chicago. He has published in journals such as Ethics and Information Technology, The Cambridge Quarterly for Healthcare Ethics, The American Journal of Bioethics, and Theoretical Medicine and Bioethics. Dr. Bauer also holds a Master of Social Work degree. Present areas of research include electronically mediated communication, the distributive justice implications of ICT, online education, and transhumanism.

Michael Billinger received his PhD in physical anthropology from the University of Alberta in 2006. His research interests include cranial morphology, regional variation, ethnogenesis, forensic anthropology, biological taxonomy and the philosophy of biology. His dissertation, ‘Beyond the Racial Paradigm: New Perspectives on Human Biological Variation’, provides a comprehensive analysis of the ‘race problem’ in anthropology, incorporating these perspectives both theoretically and methodologically. He is currently employed by the Edmonton Police Service in Alberta, Canada. [email: msb3@ualberta.net]

Arsalan Butt is a doctoral student in Simon Fraser University’s School of Communication. In 2006, he completed an MSc in applied sciences, prior to which he did a Master’s in computer science. He also holds a data manager position at the British Columbia Children’s Hospital. Arsalan's research focuses on socio-political aspects of technology. He is particularly interested in issues related to: the use of ICTs in political communication; intellectual property protection (particularly in developing countries); health technology. Along with several years of university teaching, he has published in the fields of medicine, health technology and information technology ethics.

Adeel I. Butt is in the last year of his information technology undergraduate program at Simon Fraser University. He has been actively engaged in teaching several college level computer science and IT courses. Currently he is working in the IT industry with focus on client support and relationship building.

Jennifer Candor is the special education technology consultant for the Gahanna-Jefferson public school district in Gahanna, Ohio (USA). She has more then 15 years of experience in public education with the last 11 years, in special education. She has been the special education technology consultant for the last five of these years. She is also an adjunct professor for Ashland University, in Ashland, Ohio. In 2007, she presented at the Council for Children with Behavior Disorders (CCBD) Conference in Dallas, Texas on the behavior benefits of assistive technology – http://www.ccbd.net. Candor holds a MA in education, from The Ohio State University, as well as a BA in political science from Capital University.
Rafael Capurro is professor of information management and information ethics at the Hochschule der Medien (HdM) - Stuttgart Media University, Germany. He is the founder of the ICIE (International Center of Information Ethics) and editor in chief of IRIE (International Review of Information Ethics). He is member of the European Group on Ethics and New Technologies (EGE) to the European Commission and Information Ethics Senior Fellow, 2007-2008, Center for Information Policy Research, School of Information Studies, UW-Milwaukee, USA. Homepage: http://www.capurro.de

Daniela Cerqui, PhD, is a social and cultural anthropologist involved in the study of the relationship between technology and society and, more fundamentally, humankind. Her research focuses on the development of the new information technologies and the ‘information society’ these technologies are supposed to create.

Helen Yue-lai Chan is a PhD candidate in the School of Nursing, Hong Kong Polytechnic University. She has involved in various studies since she worked as a research assistant. Her research interest is in the area of end of life care and older people. Currently, her study is to investigate how to implement advance care planning among frail elderly people living in the long-term care facilities and their quality of life.

Matthew Charlesworth, SJ, BBusSc, MCom (Rhodes) was born in 1979 in the UK and grew up in Johannesburg, South Africa. After matriculating from St Stithians College and studying Information Systems and Strategic Management at Rhodes University in Grahamstown, South Africa, he joined the Society of Jesus in 2005. His academic interests are in the field of computer ethics and professional/curriculum issues within information systems. He is currently an intern at the Jesuit Institute - South Africa in Johannesburg. You can email Matthew at m.charlesworth@jesuitinstitute.org.za. This work is based on his master’s thesis which can be found online at http://eprints.ru.ac.za/199/

Alejandra Cortés-Pascual has a PhD in psycho-pedagogy and is professor education at the University of Zaragoza, Spain, within the field of research methods and diagnosis in education. Her research work, interests and publications are linked to education in values, ecological theory, educational technology and values, professional guidance and life histories. She is currently coordinating a national project on the media, technologies, ethics and adult education. Her belongs to a group of investigation in the University of the Basque Country (research project on values in television), as well as to the Group of Investigation Applied in Education (EtnoEdu) of the University of Zaragoza. He is educational in matters and courses of professional guidance, diagnosis in special education and evaluation.

J. José Cortez is an adjunct assistant professor in the Computer Science Department at the State University of New York (SUNY) College at Oswego and a PhD student in the Instructional Design, Development, and Evaluation (IDD&E) Department in the School of Education, at Syracuse University. Previously, he taught in College of Education and Human Services at Wright State University, in Fairborn, Ohio. Before entering the field of education, he worked in the information technology for Fortune 500 companies IBM Corporation and Digital Equipment Corporation.

Marc J. de Vries studied physics at the Vrije Universiteit Amsterdam. He is affiliate professor for reformational philosophy of technology at the Delft University of Technology and assistant professor for
philosophy and ethics of technology at the Eindhoven University of Technology, both in the Netherlands. Currently, he is the editor-in-chief of the International Journal of Technology and Design Education (published by Springer).

**Stefano Fait** is 32 and lives in Trento, Italy. He has a degree in political science (Bologna University, 2000) and a PhD in social anthropology (St. Andrews University, Scotland, 2004). He is a member of the Centre for the Anthropological Study of Knowledge and Ethics, a research institute attached to the Department of Social Anthropology at St. Andrews, of which he is also an honorary fellow. He works for “il Trentino”, a local newspaper which is part of one of the leading media companies in Italy. He is a peer reviewer for “Anthropology Matters.” His research interests include political anthropology; human rights and bioethics; racism; immigration; social and historical studies of the biomedical sciences; disability studies.

**Kenneth R. Fleischmann** is an assistant professor in the College of Information Studies of the University of Maryland, College Park. He holds degrees in computer science, anthropology, and science and technology studies. His research and teaching interests include information ethics, social informatics, and human-computer interaction. He has published articles in journals such as Communications of the ACM, Journal of the American Society for Information Science and Technology, Library Quarterly, and The Information Society. His ongoing research on the ethical implications of values embedded in information technologies is supported by the National Science Foundation.

**Sarah Flicker** is an assistant professor in the Faculty of Environmental Studies at York University in Toronto. Previously Sarah was the director of research at the Wellesley Institute. She has a doctorate in social science and health from the University of Toronto’s Department of Public Health Sciences. She was an active member of the TeenNet Research Group throughout her doctoral studies. Her research interests are in the areas of youth health, health promotion, HIV and community-based participatory research. She holds a MPH in maternal and child health from UC Berkeley and an honours degree in Anthropology from Brown University. Sarah sits on a number of community boards and believes strongly in community partnerships for research and action.

**Gerhard Fortwengel** is an associated researcher at the Institute for Medical Law, Human Resources and Health Politics at UMIT. He is currently working on his PhD thesis in the field of medical law and ethics. He received Master’s degrees in public health from Bielefeld University, Germany, as well as a Master’s degree in clinical research from Liverpool John Moores University, UK.

**Deb Gearhart** recently became the director of eCampus for Troy University. Previously Deb served as the founding director of E-Education Services at Dakota State University in Madison, South Dakota and was there for the 11 years. Before joining Dakota State she spent 10 years with the Department of Distance Education at Penn State. Deb is an associate professor for educational technology at Dakota State University teaching at both the undergraduate and graduate levels. She has co-authored a textbook entitled Designing and Developing Web-Based Instruction. Dr. Gearhart has earned a BA in Sociology from Indian University of Pennsylvania. She earned a MEd in adult education with a distance education emphasis and an MPA in Public Administration, both from Penn State. Deb completed her PhD program in Education, with a certificate in distance education, from Capella University.
About the Contributors

Adrian Guta is currently pursuing a PhD at the University of Toronto Department of Public Health Sciences. He recently completed a Master’s of social work at the University of Toronto, specializing in diversity and social justice. His research interests are in the areas of HIV, health promotion, sexual diversity, research ethics, and community-based participatory research. Adrian is currently doing a practicum at the Ontario HIV Treatment Network, as well as sitting on a number of community boards.

A. K. Haghi is professor and vice chancellor for research at University of Guilan (Iran). He also served as visiting professor of polymer science at Mahatma Gandhi University (India). He is author of more than 250 papers and contributed more than 30 chapters on books published in USA. He obtained his GCE in pure mathematics from England. He was then educated in USA where he was awarded his BSc and MSc in Engineering. He obtained his DEA and PhD from France.

Soraj Hongladarom is an associate professor of philosophy at Chulalongkorn University in Bangkok, Thailand. He has published books and articles on such diverse issues as bioethics, computer ethics, and the roles that science and technology play in the culture of developing countries. His concern is mainly on how science and technology can be integrated into the life-world of the people in the so-called Third World countries, and what kind of ethical considerations can be obtained from such relation. A large part of this question concerns how information technology is integrated in the lifeworld of the Thai people, and especially how such integration is expressed in the use of information technology in education. He is the editor, together with Charles Ess, of Information Technology Ethics: Cultural Perspectives, published by IGI.

A. Pablo Iannone, professor of philosophy at Central Connecticut State University, studied engineering, mathematics, philosophy and literature at the Universidad Nacional de Buenos Aires, received a BA in philosophy from U.C.L.A. and an MA and a PhD in philosophy from the University of Wisconsin-Madison, and pursued graduate studies in business and economics at the University of Wisconsin-Madison and Iowa State. He taught at Canada’s Dalhousie University, Perú’s Universidad Inca Garcilaso de la Vega, and the U.S. universities of Wisconsin-Madison, Texas at Dallas, Iowa State, and Florida. His publications include nine philosophy books, two literature books, and articles and reviews.

Yasmin Ibrahim is a senior lecturer in the division of Information and Media Studies at the University of Brighton where she lectures in globalisation and the media and political communication. Her main research interests include the use of the Internet for empowerment and political communication in repressed polities and diasporic communities, global governance and the development of alternative media theories in non-Western contexts.

Mathias Klang currently holds positions both at the University of Lund and the University of Göteborg. In Lund he is conducting a copyright research project aimed at developing the state of Open Access at university libraries in Sweden. In Göteborg Mathias conducts research in the field of legal
informatics with particular interest in copyright, democracy, human rights, free expression, censorship, open access and ethics. He has published several articles in these topics.

Joyce Yi-Hui Lee is a research student in Information System at the School of Management, University of Bath. Her research interests are concerned with the relationship between information systems and organizational behavior. She has wide-ranging experience in industry related to international business collaboration. Her research has been presented in several international conferences. Address: School of Management, University of Bath, Bath BA2 7AY, UK. [email: yhl20@bath.ac.uk]

Darryl Macer, PhD, is regional adviser on social and human sciences in Asia and the Pacific, Regional Unit for Social and Human Sciences in Asia and the Pacific (RUSHASAP), UNESCO Bangkok, 920 Sukhumvit Road, Prakanong, Bangkok Thailand 10110. Email: d.macer@unescobkk.org

After studying analytical philosophy in Göttingen, Germany, A. Matthias worked for fifteen years as a computer programmer, consultant, and head of the information systems group of the Computing Centre of the University of Kassel. At the same time, he received his PhD in philosophy from the Humboldt University in Berlin with a thesis on “machines as holders of rights”. He presently teaches courses in both philosophy and programming languages at the University of Kassel, Germany.

Andy Miah is reader in new media & bioethics at the University of the West of Scotland and fellow in visions of utopia and dystopia for the Institute of Ethics and Emerging technologies. He is author of ‘Genetically Modified Athletes: Biomedical Ethics, Gene Doping & Sport’ (2004, Routledge) and co-author of ‘The Medicalization of Cyberspace (2007, Routledge). He has published over 70 articles and is regularly invited to speak about the ethics of human enhancement technologies. He has been a regular participant in projects related to human enhancement and sport based at the Hastings Center, New York. He is also a member of the European Union programme NanoBio-RAISE.

Carl Mitcham, PhD, is professor of liberal arts and international studies, Colorado School of Mines, Golden, Colorado, USA. He also has associate appointments at the Center for Science and Technology Policy Research, University of Colorado, Boulder, and the European Graduate School, Saas Fee, Switzerland. His research in the philosophy of science and technology has led to a number of publications, including Thinking through Technology: The Path between Engineering and Philosophy (1994) and a 4-volume Encyclopedia of Science, Technology, and Ethics (2005). One forthcoming publication is the Oxford Handbook on Interdisciplinarity, for which he serves as a co-editor.

V. Mottaghitalab is assistant professor in faculty of engineering at university of Guilan(Iran). He graduated from ARC centre for nanostructured electromaterial of University of Wollongong, Wollongong, Australia with the PhD degree in polymer engineering in 2006. Also, BSc and MSc certificate granted to him in chemical engineering from recognized universities in Iran. He is author of more than 20 papers and a few book chapters in diverse area of engineering topic.

Tim Murphy is professor of philosophy in the Biomedical Sciences at the University of Illinois College of Medicine at Chicago. He has written on ethical aspects of genetics, assisted reproductive technology, and research ethics. He is the author of Case Studies in Biomedical Research Ethics (The MIT Press, 2004).
About the Contributors

Makoto Nakada is professor at Graduate School of Humanities and Social Sciences, the University of Tsukuba, Japan. Main topics of research and teaching: Studies on the Information Society, Studies on the transmission of information, Modern Thought(1999-2005). Home page: http://www.logos.tsukuba.ac.jp/~nakada/regis/

Busi Nkala holds a diploma in general nursing and midwifery, obtained a BA in social work from the University of Witwatersrand, and received Forgaty International Scholarship studied towards a Master’s of health science in bioethics at the University of Toronto. She has been involved in a number of HIV prevention studies. She is currently involved in methods for improving reproductive health in Africa and MRKAd5 HIV-1-Gag/Pol/Nef Vaccine Trial. Other studies include a study in collaboration with CDC which was looking at HIV acquisition among hormonal contraceptive users and MDP feasibility for Phase II Microbicides Trials. She spent 10 months participating as a member of ethics board for human research at the University of Toronto.

Cameron Norman is an assistant professor in the Department of Public Health Sciences at the University of Toronto, where he is a faculty member in the health promotion program, and the director of evaluation for the Peter A. Silverman Global eHealth Program. His research interests focus on knowledge networks, collaborative learning and action, and engaging the public in health promotion through the use of new technologies and participatory action research. Dr. Norman completed a post-doctoral fellowship in systems thinking and knowledge translation at the University of British Columbia and holds a PhD in public health from the University of Toronto, an MA in community psychology from Wilfrid Laurier University, and an honours degree in psychology from the University of Regina.

Herwig Ostermann is senior researcher at the Institute for Medical Law, Human Resources and Health Politics. His research interests encompass the field of health politics as well as public administration and management. He received a Master’s degree in international business administration from Innsbruck University, Austria and a PhD in health sciences from UMIT, Hall/Tyrol, Austria.

Samantha Mei Che Pang is a nurse by professional training, and a researcher in the field of health care and nursing ethics by scholarly endeavor. She started her career as a nurse academic in 1990, when she took up a teaching post at the Hong Kong Polytechnic University, where she now serves as head and professor in the School of Nursing. Over the past ten more years, she has taught, lectured, researched, and published in the areas of nursing ethics, caring practices, and ethics in end-of-life care. As an editorial board member of Nursing Ethics and the International Centre for Nursing Ethics, she is actively involved in studies of nursing ethics internationally.

Niki Panteli is a senior lecturer in information system at the School of Management, University of Bath. She holds a PhD from Warwick Business School, University of Warwick. Broadly defined, her research lies in the field of information and communication technologies and emergent organizational arrangements. She is currently involved in research on virtuality and interactivity within computer-mediated and mobile communication systems. Her research has published widely, such as chapters in books and has appeared in European and international journals such as Behavior and Information Technology, European Journal of Information Systems, Futures, New Technology, Work and Employment, and Journal of Business Ethics.
About the Contributors

Alan Petersen is professor of sociology, School of Politics and Law, Monash University, Melbourne, Australia. His recent research projects include an ESRC-funded study of news production in relation to nanotechnologies, undertaken with Alison Anderson and Stuart Allan (with Clare Wilkinson as the research fellow).

Darren Pullen is a lecturer in ICT, health science and professional studies in the Faculty of Education at the University of Tasmania, Australia. He has a diverse background with previous employment as a Research Fellow in the health sector, ICT consultant and classroom teacher. His research interest is in the management of change processes with a particular interest in the micro-meso-macro level relationships between technology innovations and human-machine (humachine) relationships and interactions.

Mike Ribble has worked at several different levels of education and technology. He has served as a classroom biology teacher, secondary school administrator, a network manager for a community college, a university instructor and college instructional support. He received a doctorate in educational leadership at Kansas State University. His interests include technology leadership, professional development, and working with teachers to help enhance teaching and learning with technology. He has written several articles and has presented in regional and national conferences on digital citizenship and its affect on the changes within education.

Russell W. Robbins is an assistant professor in the School of Computer Science and Mathematics at Marist College in Poughkeepsie, NY. Prior to Marist, he taught at Rensselaer Polytechnic Institute in Troy, NY. He holds degrees in business, accounting, information technology, and engineering science. His research surrounds studying, simulating, and supporting ethical problem solving. His teaching interests are software engineering and project management. He has published in Decision Support Systems and ACM Proceedings. Dr. Robbins was a finalist in the 2004 Excellence in Ethics Dissertation Proposal competition at the Institute for Ethical Business Worldwide within the University of Notre Dame.

Lynne Roberts is a research fellow at the Crime Research Centre at the University of Western Australia. Lynne has conducted both quantitative and qualitative research in and about virtual communities. Based on this research she has had 13 journal articles and book chapters published on social interaction, relationship formation, sense of community and gender-switching online; and ethical and methodological issues in conducting research in virtual environments.

Antoinette Rouvroy is doctor of laws of the European University Institute (Florence) and author of Human Genes and Neoliberal Governance: A Foucauldian Critique (Routledge-Cavendish, 2007), looking at the knowledge-power relations in the post-genomic era and addressing the issues of genetic privacy and discrimination in the context of neoliberal governance. She is particularly interested in the mechanisms of mutual production between biotechnology and cultural, political, economic and legal frameworks. Besides her interdisciplinary research interests in the law, ethics and politics of human genetics, she is also involved in research projects about the societal challenges raised by ambient intelligence and ubiquitous computing as senior researcher in the Research Centre on Information Technology Law of the University of Namur in Belgium.
Neil C. Rowe is professor and coordinator of research in computer science at the U.S. Naval Postgraduate School where he has been since 1983. He has a PhD in computer science from Stanford University (1983), and EE (1978), SM (1978), and SB (1975) degrees from the Massachusetts Institute of Technology. His main research interest is the role of deception in information processing, and he has also done research on intelligent access to multimedia databases, image processing, robotic path planning, and intelligent tutoring systems. He is the author of over 100 technical papers and a book.

Eduardo A. Rueda is professor of bioethics and social studies of science and technology at the Universidad Javeriana in Bogotá. He has been researcher and lecturer at the Basque Country University, Guest Visiting Researcher at University of Oslo and Researcher Fellow at the Latin-American Council of Social Sciences. He has authored numerous journal articles and book chapters on social and ethical implications of emergent technologies. Email: erueda@javeriana.edu.co

Martin Ryder, MA, is a development engineer for Sun Microsystems. He also serves on the adjunct faculty at the University of Colorado at Denver, teaching research methods in Information and Learning Technologies.

Heidi L. Schnackenberg is an associate professor of educational technology in the Education Departments at SUNY Plattsburgh in Plattsburgh, NY. She currently teaches both undergraduate and graduate classes on the use of technology to enhance teaching and learning in the P-12 classroom, social issues in education, and ethical issues in educational technology. Her various research interests include the integration of technology into pedagogical practices and the legal and ethical implications of western technologies in non-western and third world cultures.

David Sewry, MSc, PhD (Rhodes) is HOD of information systems at Rhodes University in Grahamstown, South Africa. He is involved in teaching information systems at all levels. After studying for his MSc and PhD at Rhodes in computer science, he went to work at South Africa’s CSIR before returning to Rhodes. He has been visiting professor at the University of Bristol in England, and Massey University in New Zealand. His research interests are: information systems curricula; data warehousing; ict in the organisation; ict for development; elearning; service level management (SLM) and agreements (SLA). You can email David at d.sewry@ru.ac.za

Roland Staudinger is full professor and chair of the Institute for Medical Law, Human Resources and Health Politics. He received a Master’s degree in Law from Salzburg University, Austria, a Master’s degree in Health Care Management from Innsbruck University, Austria, a PhD in Law from Innsbruck University, Austria and a PhD in Theoretical Medicine from Halle/Wittenberg University, Germany.

Verena Stuehlinger
Verena Stuehlinger is research assistant at the Institute for Medical Law, Human Resources and Health Politics. Her research is focused on international and national health law. She received a Master’s degree in law from Innsbruck University as well as LLM degree from Golden Gate University, SF.

John P. Sullins is an assistant professor of philosophy at Sonoma State University. PhD Binghamton University (SUNY), 2002. He specializes in; philosophy of technology, artificial intelligence/robotics,
About the Contributors

Machine morality, cognitive science, engineering and computer ethics, fencing, fight directing for the stage, and the philosophy and history of swordplay. Currently research interests are studying the technology of robotics, AI and ALife and how they inform traditional philosophical topics as well as their impacts on society and the ethical design of successful autonomous machines.

May Thorseth, PhD, associate professor at the Department of Philosophy, NTNU Norwegian University of Science and Technology. Director of Programme for Applied Ethics, NTNU. Main research field is political philosophy, ethics and argumentation theory in the context of globalisation and multicultural conflicts. Ongoing research project: “Worldwide Deliberation and Public Use of Reason Online”. Current member of the Regional Research Ethical Committee in Medicine in Mid-Norway, the National Research Ethical Committee in Medicine in Norway, and previous member of the Clinical Ethics Committee at St. Olav's Hospital, Trondheim.

Eddie Vega has been in the field of communications for over 19 years. During that time, he’s been a cameraman, video editor, graphic designer, web developer, comic book and storyboard illustrator, and an instructor. In 2001, Eddie launched VISIONES, which in Spanish means “visions”. The primary objective of the company is to meet the needs of individuals and create projects in the realm of digital media (or multimedia). He is currently an adjunct professor in the Education Departments at SUNY Plattsburgh in Plattsburgh, NY.

Seppo Visala works as CIO at the University of Tampere since 2002. His earlier academic career consists of research and teaching positions at the Finnish universities of Oulu, Vaasa and Tampere in the fields of information systems and software engineering. He reached his MA degree in mathematics and philosophy in 1977 at the University of Tampere, and PhD degree in information systems at the University of Oulu in 1993. His later research has focused on ethical issues of technology.

William A. Wallace is a professor in the Department of Decision Sciences and Engineering Systems and holds joint appointments in cognitive science and civil engineering at Rensselaer Polytechnic Institute in Troy, NY. His research interests include applying artificial intelligence to incident management and emergency response, understanding issues in trust and ethical decision making, and studying emergent and improvisational organizational behavior in disaster management. Dr. Wallace has received the International Emergency Management and Engineering Conference Award for Outstanding Long-Term Dedication, the IEEE Third Millennium Medal, and the 2004 INFORMS President’s Award for work that advances the welfare of society.

Zachary B. Warner is a graduate student pursuing his MST in adolescence education at SUNY Plattsburgh in Plattsburgh, NY. He completed his undergraduate degree in mathematics at the same institution. Zachary recently completed a thesis project that required him to design, implement and serve as an instructor for a seminar course in the university’s honors program. He plans to continue his study of education in areas such as educational technology and the social implications of education.

Kevin Warwick is professor of cybernetics at the University of Reading, England, where he carries out research in artificial intelligence, control, robotics and cyborgs. He is also director of the University KTP Centre, which links the university with small to medium enterprises and raises over £2.5 million
About the Contributors

each year in research income. He completed a PhD and research post at Imperial College, London. He subsequently held positions at Oxford, Newcastle and Warwick Universities before being offered the Chair at Reading, at the age of 33. As well as publishing over 500 research papers, Kevin’s experiments into implant technology led to him being featured as the cover story on the US magazine, ‘Wired’. Kevin has been awarded higher doctorates both by Imperial College and the Czech Academy of Sciences, Prague. He was presented with The Future of Health Technology Award in MIT, was made an honorary member of the Academy of Sciences, St. Petersburg and in 2004 received The IEE Achievement Medal. In 2000 Kevin presented the Royal Institution Christmas Lectures, entitled “The Rise of the Robots”.

Maja Whitaker is an assistant research fellow in the Department of Anatomy and Structural Biology at the University of Otago.

Clare Wilkinson is a lecturer in science communication at the Science Communication Unit, University of the West of England, Bristol, UK. Clare has published articles in journals including Science Communication, Social Science and Medicine and Qualitative Health Research. She is co-writing the book Nanotechnology, Risk and Communication with Alison Anderson, Alan Petersen and Stuart Allan for Palgrave.
