About the Contributors

Thanos Papadopoulos is a lecturer in Knowledge and Information Systems Management, at the School of Management, University of Southampton, UK. He obtained his PhD from Warwick Business School, University of Warwick, UK. He also obtained his diploma (Dipl-Eng – Equivalent to MEng) in computer engineering and informatics from the School of Engineering of Patras University, Greece, and his MSc in Information Systems from the Department of Informatics of the Athens University of Economics and Business, Greece. His research interests include innovation and change in public services, business transformation and networks, and Information Systems’ assessment strategies. He has been awarded the Best Paper Award in the 2007 International Conference on the Management of Healthcare and Medical Technology. He has published more than 20 papers in peer-reviewed journals and international conferences.

Panagiotis Kanellis is currently an Executive Director with Ernst & Young in Athens, Greece. Previous to that he held senior positions both in the private and public sectors where he led large transformational programmes. He was educated at Western International University in Business Administration (BSc), at the University of Ulster in Computing and Information Systems (Post-Graduate Diploma) and at Brunel University in Data Communication Systems (MSc) and Information Systems (PhD). He has taught at the Athens University of Economics and Business and is a Research Associate in the Department of Informatics and Telecommunications at the University of Athens. He has published more than 60 papers in peer-reviewed journals and international conferences. He is Fellow of the British Computer Society and a Chartered Information Technology Professional (FBCS CITP), a Chartered Engineer (CEng), a Chartered Scientist (CSci) and a Certified Information Systems Auditor (CISA).

Gülgün Afacan has BSc degree from Department of Computer Education and Instructional Technology at Middle East Technical University in 2006. After undergraduation, she was accepted to Master’s Program of Information Systems in Informatics Institute of the same university. Research focus of MSc was measurement of e-goverment and the title of MSc dissertation was E-performance of Turkey and a new e-transformation metric system. She has received MSc degree in 2009. She is currently conducting her PhD studies at the same department.
About the Contributors

Niv Ahituv is the Academic Director of the Institute of Internet Studies and the Marko and Lucie Chaoul Chair for Research in Information Evaluation at Tel Aviv University. From 1989 to 1994 he served as the Dean of Graduate School of Business Administration and from 1999 to 2002 he served as Vice President and Director General (CEO) of Tel Aviv University. In 2005 he was awarded a Life Time Achievement Award by The Israeli Association for Information Technology. Ahituv represents the Israeli Government in UNESCO in issues related to Information Technology. His main areas of interest are: information economics, IT strategy and management, and social and business implications of the Internet. On the latter issue he published a book (in Hebrew) in 2001 titled “A World without Secrets: on the Open Information Society.” He holds degrees of B.Sc. in Mathematics, MBA, and M.Sc. and Ph.D. in Information Systems Management.

Tomohide Akebe is a graduate student at Setsunan University, Graduate School of Business Administration and Information, Neyagawa City, Osaka, Japan. His research interests lie in local government personnel training in Japan, and IT vendors contributing to regional development. His research is focused on the effect of personnel training at collaboration with organizations and citizens in region, and ability of leadership of regional development. Presently he is involved in regional development projects in Neyagawa City and the empirical survey of e-governments and management levels of local governments in Japan. He has undertaken the responsibility of the development of Web applications in empirical surveys in the laboratory. His efforts in this area are useful in the conduct of questionnaire surveys.

Spyros Angelopoulos is currently a Doctoral researcher at Warwick Business School, UK. He holds a Diploma (Dipl-Eng, equivalent to MEng) in Production Engineering and Management as well as an MSc in Management Engineering from the Technical University of Crete, Greece. His current research is on the emergence and evolution of social networks within public-private partnerships and his research interests include social networks, e-government, Information Systems management and implementation in public services, business transformation, and networks, as well as complexity and transformation of organizations and socio-economic contexts. His publications include book chapters in handbooks, papers in journals, as well as presentations in conferences and workshop.

Ali Arifoglu graduated from Mathematics Department of Hacettepe University in 1978. Then, he was admitted to MSc program in Computer Engineering Department of Middle East Technical University. After MSc, he continued studies in the same department and received PhD degree. Currently, he takes roles in the e-government process of Turkey by conducting various studies and research projects. He has been working as lecturer in METU Informatics Institute since 2004. At the same time, he is the director of the e-Government Research and Development Center since 2006. He has published two books, “Software Engineering” and “e-Transformation: Roadmap, Turkey, World.”

Asim Balci holds the position of Associate Professor in the Department of Public Administration, Selçuk University, Turkey. Prof. Balci assumed advisory and managerial roles in Turkish Ministries of Health and Transportation (Turksat) between 2003 and 2010. He received his Doctorate degree from the Department of Political Science and Public Administration, Middle East Technical University, Turkey. Professor Balci has published numerous books and contributed to various journal publications and conference proceedings in the fields of public administration, as well as TQM and e-government. He has also
recently been involved in EU projects on e-government maturity model development based on citizen evaluation, and development of ubiquitous platform for citizens’ involvement in local policy-making.

**Roberta Bernardi** is about to complete her PhD in the Information System and Management Group of the Warwick Business School at the University of Warwick. Her research interests are in IT innovation of healthcare, health Information Systems, ICT for development, institution theory, and IT-enabled organisational change. Before her PhD she worked in Kenya on a Parliamentary Information System project sponsored by the United Nations.

**Jeries Besharat** is an M.Sc. candidate at the Computer Engineering and Informatics Department of Patras University. His area of expertise is Web metrics, data mining, and natural language processing. He received his diploma from the Department of Information and Communication Systems Engineering of the Aegean University.

**Sandford Borins** is Professor of Strategic Management at the Joseph L. Rotman School of Management at the University of Toronto. He is also a Research Fellow at the Ash Institute for Democratic Governance and Innovation at the Harvard Kennedy School. His interests include management narrative, Information Technology, innovation, and public management. He is the lead author of *Digital State at the Leading Edge* (University of Toronto Press, 2007), a comprehensive study of the impact of Information Technology on both politics and service delivery, based on case studies of two arguably leading edge jurisdictions, the governments of Canada and the Canadian province of Ontario. Prof. Borins writes a weekly blog at www.sandfordborins.com.

**Christos J. Bouras** obtained his Diploma and PhD from the Computer Engineering and Informatics Department, University of Patras (Greece). He is currently a Professor in the above department. Also he is a scientific advisor of Research Unit 6 in Research Academic Computer Technology Institute (CTI), Patras, Greece. His research interests include analysis of performance of networking and computer systems, computer networks and protocols, telematics and new services, QoS and pricing for networks and services, e-learning, networked virtual environments, and WWW issues. He has extended professional experience in design and analysis of networks, protocols, telematics, and new services. He has published more than 350 papers in various well-known refereed conferences and journals. He is a co-author of 8 books in Greek. He has been a PC member and referee in various international journals and conferences. He has participated in numerous R&D projects.

**Dimitris Christodoulakis** was born in Samos. He received the B.Sc. degree in Mathematics from the University of Athens (1975) and the PhD degree in Informatics from the University of Bonn (1980). From 1980 to 1983 he was a researcher at the National Informatics Centre of Germany (GMD, Bonn). Assistant and Associate Professor in Computer Engineering Dept. of Patras University (1984-1995). From 1995 until now he is a Professor in the same Dept. scientific coordinator in many research and development projects in the followings sections: knowledge and data base systems, very large volume information storage, hypertext, and natural language technology for Modern Greek. Author and co-author in many articles published in international conferences. Editor in proceedings of conventions. Responsible for proofing tools development for Microsoft Corp. From September 1997 until 2001 he
was Chairman of Computer Engineering and Informatics Dept. of Patras University and from 2001 until 2008 he was Vice President of the Department.

**Phillip Ein-Dor** received his Ph.D. in Systems and Communications Sciences from Carnegie-Mellon University in 1971. He is Professor Emeritus at Tel-Aviv University since 2003 and is now Professor at The Academic College of Tel-Aviv-Yaffo. As a founding member of the Association of Information Systems, Ein-Dor has held various positions in the organization including President (2002-2003). In 2005 he founded the Israel Chapter of AIS. He was inducted as a Fellow of AIS in 2000 and received the LEO Award in 2006. Ein-Dor was appointed founding editor of the Journal of AIS, which began publication in March 2000, and served in that role until 2002. He serves on the editorial and/or advisory boards of ten journals. Dr. Ein-Dor’s research interests have included MIS, Information System theory, artificial intelligence, economics of computers and Information Systems, technology diffusion, and the digital divide. He has published four books and some 50 papers on various aspects of Information Systems and their management.

**Deniz Türsel Eliiyi** is an Assistant Professor in the Department of Industrial Systems Engineering at Izmir University of Economics. She received her B.S., M.S., and PhD degrees in Industrial Engineering all from Middle East Technical University. She has worked as a research and teaching assistant in the Department of Industrial Engineering in Middle East Technical University, and as an instructor in the Department of Statistics in Dokuz Eylûl University. Her research interests include production planning and scheduling, port operations analysis, management Information Systems, and combinatorial optimization.

**Erkan Er** graduated from Department of Computer Education and Instructional Technology at Middle East Technical University in 2006. After undergraduate education, he started his Master’s studies in Information Systems Department of Informatics. The primary research focus was enhancement of distance education to enable better learning process. His dissertation was developing a learning management system to support synchronous distance education. He has completed MSc program in 2009. Currently, he is a PhD student in the Information Systems department and working as a research assistant.

**Dimitra Florou** is a teacher and a researcher in the New Technologies Laboratory in Communication, Education and the Mass Media in University of Athens. She is graduate of the Faculty of Political Science and Public Administration of the National and Kapodistrian University of Athens (1983), the school of Pedagogical Science (1985) and has a Master’s in “Technologies of the Information and the Communication for the Education.” She was a member of the pedagogical team of Argyroupoli Centre for Environmental Education (1998-2000) and was also in charge of the administration of the Environmental Education of the 4th District of Primary Education in Athens (2003-2008). She has collaborated with the University of Aegean (2004-2006) and the National Technical University of Athens (2007-2008) in educational programs for the teachers regarding the sustainability. She is member of the authors’ team of the school book of Social and Political Science for the 5th grade. Her research interests include education for citizenship, sustainability, and the use of social media in education.

**Marc Fudge** is a PhD student in the School of Public Affairs and Administration at Rutgers University, Newark. His research focuses on e-governance, the factors that impact public sector information and
communication technology adoption and implementation, performance measurement and improvement, and organizational theory. He is an Associate Director at the E-Governance Institute and the Associate Editor of the Journal of Public Management and Social Policy. He teaches Technology and Public Administration, Leadership and Diversity, E-Governance, The Urban Experience in the United States, and he lectures at the New Jersey Institute of Technology (NJIT).

Petros Ganos obtained his Electrical Engineering diploma from the Electrical Engineering Department, School of Engineering, University of Patras, Greece. He obtained his Ph.D. from the same department. He has worked as an R&D engineer at the Networking Technologies Sector of Research Academic Computer Technology Institute (RACTI), Greece. He is currently an employee of the Municipality of Patras at the Telecommunications and Networks Sector of the Informatics Department, and an external associate of RACTI. His research interests include network administration, broadband networks, and green ICT. He has participated in more than 20 R&D projects, and he has published 3 articles in scientific journals, and 9 research papers, 1 chapter in a book, and 1 book in Greek.

John Garofalakis is Associate Professor at the Department of Computer Engineering and Informatics, University of Patras, Greece, and Director of the applied research department “Telematics Center,” of the Research Academic Computer Technology Institute (RACTI). He is responsible and scientific coordinator of several recent European and national IT and Telematics Projects (ICT, INTERREG, etc.). His publications include more than 120 articles in refereed international journals and conferences. His research interests include Web and mobile technologies, performance analysis of computer systems, computer networks and telematics, distributed computer systems, and queuing theory.

J. Ramon Gil-Garcia is an Assistant Professor in the Department of Public Administration and the Director of the Data Center for Applied Research in Social Sciences at Centro de Investigación y Docencia Económicas (CIDtE) in Mexico City. Currently, he is also a Research Fellow at the Center for Technology in Government, University at Albany, State University of New York (SUNY) and a Faculty Affiliate at the National Center for Digital Government, University of Massachusetts Amherst. His research interests include collaborative electronic government, inter-organizational information integration, adoption and implementation of emergent technologies, digital divide policies, new public management, and multi-method research approaches.

Dimitris Gouscos is a Lecturer with the Department of Communication and Media Studies of the University of Athens and a research fellow of the Laboratory of New Technologies in Communication, Education, and the Mass Media. He has graduated (1990) and has a PhD (1998) in the department of Informatics of the National and Kapodistrian University of Athens. He has participated in European (ESPRIT, IST) and national research and development projects for informational systems, electronic services and digital learning games, while he has published over 40 papers in international scientific conferences and magazines. He has taught in the University of Aegean (2000-2002) and the University of Peloponnese (2002-2006), while he has also collaborated as a Special Consultant with the General Secretariat of Public Administration and Electronic Administration of the Ministry of Interior (2003-2004) and the General Secretariat for Information Systems of the Ministry of National Economy (1997-2002) as well,
About the Contributors

where he participated in the development of the electronic service TAXISnet. His research interests include digital communication, electronic governance, social media, and digital games.

Muhammad Mustafa Kamal is a Research Fellow at the Brunel Business School, Brunel University, UK. He received his PhD from Brunel University in the area of Information Systems (specifically focusing on Enterprise Application Integration Adoption in the Local Government Authorities), in addition, he holds two MSc degrees – Distributed Computing Systems (Greenwich University, London) and Computer Sciences (Punjab Institute of Computer Science, Lahore, Pakistan). His current research interest includes investigating and evaluating factors influencing the decision making process for EAI adoption in public sector, and e-Government/t-Government. In his recent appointment, Dr. Kamal worked as a Post-Doctoral Research Assistant on a European funded research project (Ref: proposal n° 2006/VP021/30137) namely – the REFOCUS (senioR Employees training on inFOrmation and CommUni-cation technologieS) Project. Currently, he is an active editorial review board member for International Journal of Electronic Government Research (IJEGR) and Transforming Government: People, Process and Policy (TG:PPP). He has published in several leading journals such as GIQ, IJIM, JEIM, TG:PPP, IJEGR, and several leading international conferences such as AMCIS, EMCIS, and HICSS.

Vaggelis Kapoulas obtained his Computer Engineering diploma from the Computer Engineering and Informatics Department, School of Engineering, University of Patras, Greece. He obtained his Ph.D. from the same department. He is currently an R&D engineer, and Head of Research Unit 6: Networks Telematics and New Services at Research Academic Computer Technology Institute (RACTI), Greece. His research interests include Networks, Telematics and Algorithms for Distributed Systems. He has extended professional experience in the analysis and design of networks, applications of networks and advanced network services, telematic applications, open & distance learning, and tele-working. He has participated in numerous (more than 50) R&D projects in several national and EU (co-) funded programmes. He has published more than 10 articles in scientific journals and more than 50 research papers in various well-known refereed conferences.

Athanasios Karantjias has obtained the Degree of Electrical and Computer Engineering from University of Patras in 2000 and a PhD in Computer Science from National Technical University of Athens in 2005. He is currently Assistant Professor at the Department of Computer Science of University of Piraeus. His current research interests include identification, design and evaluation of synchronous security and interoperability issues on enterprise architectures, and advanced wireless Information Systems.

Fotis Kitsios is Lecturer at University of Macedonia, Department of Technology Management. He has graduated from the Technical University of Crete with a diploma in Production and Management Engineering Department, he went on with a Master’s degree on organization and management and he did a PhD in innovation management with a specialization in services. He has worked as a consultant in several SME’s in the field of marketing, management, in adopting innovation techniques, and financing. He is also a certified auditor in quality management systems. He has been involved in the implementation and coordination of national and European research projects including: RKMonet, ISTOS, Meta-Foresight, Innoregio, Leonardo da Vinci, Ecos Ouverture, Adapt, Youthstart, and Fair. He has lectured on marketing, management, market research, strategic planning, total quality management, production
management, design technologies, data analysis, and technological forecasting at Technical University of Crete, University of Macedonia, and University of Central Greece, as Adjunct Professor, and he has jointly supervised numerous Master’s and diploma theses. He also teaches in various public and private vocational training centers and institutions. His scientific research interests mainly focus on new service and product development, innovation measurement, marketing management, and decision making.

**Antreas Koskeris** has a degree on Computer Engineering and Informatics (University of Patras - 1993). He is now Vice Director of Research Academic Computer Technology Institute’s Telematics Centre department, from its establishment, with the task to act as technical coordinator of all Department R&D projects. His previous experience includes: i) He employed in the Research Academic Computer Technology Institute (RACTI) and worked in several projects concerning computer integrated manufacturing, simulation, telematics applications and other research projects. ii) He occupied as a researcher in computer network applications for the University of Patras working in several projects (computer supported cooperative work applications, educational multimedia, electronic commerce applications). His research interests include: actions to deal with rural digital divide, regional development through ICT penetration, risk-crisis management systems, e-government, Web technologies and applications, and simulation.

**Ioannis Kotrotsos** is an M.Sc. candidate at the Computer Engineering and Informatics Department of Patras University. His area of expertise is Web metrics, data mining, and natural language processing. He received his diploma from the Computer Engineering and Informatics Department Greece.

**Athanasia Koumpouri** is an M.Sc. candidate at the Computer Engineering and Informatics Department of Patras University. Her area of expertise is text mining, data management and organization, and natural language analysis. She received her diploma from the Computer Engineering and Informatics Department Greece.

**Sadaya Kubo** is an Associate Professor at Setsunan University, Faculty of Business Administration, Neyagawa City, Osaka, Japan. He received his PhD in industrial engineering from the Osaka Institute of Technology (1999). He is the information policy and the general plan adviser and a personnel training coordinator at Several Cities. His research interests lie in industrial engineering, information management, e-governments, regional development (focusing on regional brands or personnel training, etc.), and management of local governments. He is one of the pioneers of the empirical survey using the Web technology in Japan. Presently, his research is focused on the interaction between residents and the public sector through information and communication technologies (ICT) and the essence of regional development. His publications include “Local E-Governments in Japan: IT Utilization Status and Directions” (with Tatsumi Shimada) in Global E-Government: Theory, Applications and Benchmarking (edited by Latif Al-Hakim, IGI Global, 2007).

**Nick Letch** is a Senior Lecturer in the Business School at the University of Western Australia where he teaches both undergraduate and postgraduate students and researches in the field of Business Information Systems. His PhD thesis investigated public sector Information Systems and in particular their support for citizen-administration relationships. His key research areas in e-government and knowledge
management have been published and presented in a range of national and international forums. Prior to entering academia Nick held positions in data operations and administration with a multinational IT firm as well as general management position in the in the retail sector. He continues to provide consultancy services to government and private sector organisations in areas such as Information Systems evaluation and Information Systems management and governance.

**Euripidis Loukis** is Assistant Professor of Information Systems & Decision Support Systems at the Department of Information & Communication Systems Engineering, University of the Aegean. He is also Professor at the postgraduate program of the National Academy of Public Administration, in the area of e-Government, and at the Postgraduate Program ‘Athens MBA’ of the National Technical University of Athens and the Athens University of Economics and Business, in the area of Information Systems and decision support systems. He has been member of the Strategic Planning Unit and ICTs Advisor of the Ministry to the Presidency of Government (1991-2002), Scientific Director (1994-1996) of the Operational Program for the Modernization of Public Administration (with a total budget 300.000.000 Euro) and Information Systems Advisor at the Ministry of Culture and Sport (1995-2000).

**Luis Felipe Luna-Reyes** is a Professor of Business at the Universidad de las Américas Puebla in México. He holds a Ph.D. in Information Science from the University at Albany. Luna-Reyes is also a member of the Mexican National Research System. His research focuses on electronic government and on modeling collaboration processes in the development of Information Technologies across functional and organizational boundaries.

**Aroon Manoharan** is an Assistant Professor of Public Administration at Kent State University. His research focuses on e-governance, performance measurement and reporting, organization management, public opinion research, and comparative administration. He holds an MPA from Kansas State University and a Ph.D. from Rutgers University - Newark.

**Christos D. Manolopoulos** graduated from the School of Law Economics and Political Sciences of the University of Athens (1983) and holds a PhD from the Psychology Department of the Panteion University. He is currently director of the e-Government Sector of the Research Academic Computer Technology Institute (RACTI). His research interests include virtual communities & social networks and agent-based social simulation. He has various publications in international journals and conferences and a long professional record through his participation in various e-government projects.

**Drakoulis Martakos** is an Associate Professor at the Department of Informatics and Telecommunications at the National and Kapodistrian University of Athens. He received his B.Sc. in Physics, MSc in Electronics and Radio Communications, and Ph.D. in Real-Time Computing from the same university. Professor Martakos is a consultant to public and private organizations and a project leader in numerous national and international projects. He is author or co-author of more than 100 scientific publications and a number of technical reports and studies.

**Tunc D. Medeni** is a full-time researcher in Turksat and also affiliated to various academic institutions as a part-time staff. He was awarded a PhD degree from the Japan Advanced Institute of Science
About the Contributors

Vasilis Moustakis is a Professor in Operations Management at the Technical University of Crete (TUC), Department of Production Engineering and Management and a Principal Research Investigator at the Institute of Computer Science, Foundation for Research and Technology – Hellas (FORTH) – Biomedical Informatics Laboratory. He has managed numerous R&D projects co-funded via the European Commission and the Greek Secretariat for Research and Technology and has consulted numerous companies and government agencies in Europe and the USA in his areas of expertise (Information Systems, management, economic analysis). He is the Director of the Management Systems Laboratory (http://www.logistics.tuc.gr/). He has supervised numerous PhD and MSc students at the Technical University of Crete and other Academic Institutions in Greece and abroad. He holds a Diploma in Mechanical Engineering (University of Patras, Greece, 1978), a Master’s in Engineering Administration and a Doctor of Science (both from the George Washington University, USA, 1980 and 1984, respectively.)

Keiko Nakagawa is a graduate student at Setsunan University, Graduate School of Business Administration and Information, Neyagawa City, Osaka, Japan. She is involved in an empirical survey on e-government and the management levels in the local governments of Japan. Her research interests lie in the regional brands of Japan. She studies the combination of the regional resources and activities through empirical surveys. In addition, she participates in project of building the indicator of the regional vitality in Neyagawa city and designs the street investigation. Furthermore, she is involved in the “Wagaya-Neyagawa” project, which is the practical activities constituting the cooperation between local governments and universities.

James M. Njihia is a Lecturer in Information Systems and Project Management at the School of Business, University of Nairobi, and Chairman of the Department of Management Science. He obtained his PhD from Warwick Business School in 2009 from a study on complex postcolonial contexts for Information Systems projects in developing countries, and MBA and BSc. Eng. from the University of Nairobi in 1995 and 1989, respectively. His research interests include IT project development and evaluation, strategy and Information Systems, postcolonial theory, ICT for development, philosophy of
science, critical realism, and complexity theory in management. Before joining academia in 1998, he worked on large scale infrastructure projects as a Civil Engineer, and later as a manager in an export oriented industrial investment promotion programme. He consults in project and Information Systems management for international development agencies, government, and private firms in the southern Africa region.

Flora Oikonomou was born in Megara, Greece, in 1984. She received the Diploma Degree in Computer Engineering and Informatics from the University of Patras, in 2007 and the Postgraduate degree in Computer Science and Engineering in the aforementioned department, in 2010. In her Master’s thesis she dealt with personalized Web search by creating semantic clusters of user profiles. Now she is doing her PhD thesis in personalized Web search. Flora Oikonomou has published 4 research works in international conferences in research fields concerning mobile Web technologies, data mining, personalization, and e-government. She is working in Research Academic Computer Technology Institute as researcher and developer. Her research interests include Semantic Web analysis, information retrieval, and mobile Web technologies.

Elpida Prasopoulou holds a PhD in Information Systems from the Department of Management Science and Technology of the Athens University of Economics & Business (2009), a MBA jointly awarded by the National Technical University of Athens and Athens University of Economics and Business (2001) and a BSc (Hons) in Public Administration from the Panteion University of Political and Social Sciences (1999). She worked in many research projects on e-government, identity management, and inter-organizational networks. She has also worked as an external collaborator to the General Secretariat of Research and Development (eBusiness Forum) and N.C.S.R. Demokritos. She has published in academic journals and peer reviewed conferences in Information Systems (e.g., European Journal of Information Systems, Management Science, IFIP 8.2, Bled eConference, Ethicomp, Mediterranean Conference on Information Systems). Her main research interests focus on ICT innovation in late-development countries, e-government, and the interplay of ICTs with a state’s administrative tradition.

Ronit Purian has successfully completed her doctoral dissertation under the guidance of Ahituv and Ein-Dor. She applied multiple research methods to profile the technophile individuals in organizations and society, including an evaluative study that yielded the Local E-government Index, and built a new theory of technology adoption and innovation, termed Technophilia. The impact of Information Technology on government and governance is a main research interest as well as transparency levels in business models. Dr. Purian holds BA and MA degrees in Psychology from Tel Aviv University (TAU). Research experience: Policy studies carried out with decision-makers in government, Knesset, academia and the third sector; Research director for the KMI Fellows Program (2007-9); Research fellow at the Institute of Technology and Society, TAU (2008-9); Research consultant for Henry Crown Institute of Business Research, TAU (2009-present). Work experience: Professional writer and editor for leading newspapers in Israel (1985-2005); Consultant for the national e-government unit (2005-present).

Dicle Yurdakul Şahin is a PhD candidate in Business Administration/Marketing and working as a research assistant in the Department of Business Administration at Izmir University of Economics. She received her B.S. and MBA degrees in Business Administration from Dokuz Eylül University. As
of June 2010, she completed the course stage of the Ph.D programme and she is currently in the thesis stage. Her research interests include consumer behavior, city branding, and services marketing.

Dimitrios P. Sofotassios received a B.E. degree in Computer Engineering and Informatics from University of Patras in 1989 and a PhD in 2007. He is currently Deputy Director of e-government sector of the Research Academic Computer Technology Institute (RΑCTΙ). His research interests include data structures and algorithms, production management systems, e-government architectures, standards & services, and IS security. He has published over 25 research articles in peer reviewed international journals and conferences, and he is co-author of a book on production management and a book chapter on privacy protection on electronic voting. Since 1990, he supports various teaching activities in the Computer Engineering and Informatics Department of University of Patras and was involved in a number of R&TD projects funded by the European Union, the General Secretariat for Research & Technology of Greece, and private contracts.

Pedro Soto-Acosta holds a PhD in MIS (with European Ph.D mention) and a Master’s in Technology Management from University of Murcia. He received his BA in Business Administration from University of Murcia and his BA in Accounting & Finance in Europe from Manchester Metropolitan University (UK). He attended Postgraduate Courses in Management at Harvard University (USA) and participated in the Leonardo da Vinci Programme in Bradford (UK). Pedro Soto has published in prestigious International Journals such as the European Journal of Information Systems, the International Journal of Information Management and the Information Systems Management, among others. His work has won research awards such as the ABG Award to Research and Business Spirit, the Best Research Paper Award at Information Systems One World 2007 (ISOneWorld 2007), held in Las Vegas (USA), and the Best Conference Paper Award at BITMED 2009, held in Beijing (China).

Paul Spirakis, born in 1955, obtained his Ph.D. from Harvard University, in 1982. He is currently the Director of the RACTΙ and a Full Professor in the Patras University, Greece. He was acknowledged among the top 50 scientists worldwide in Computer Science with respect to “The best Nurturers in Computer Science Research,” published by B. Kumar and Y.N. Srikant, ACM Data Mining, 2005. His research interests are algorithms and complexity and interaction of complexity and game theory. Paul Spirakis has extensively published in most of the important computer science journals and most of the significant refereed conferences contributing to over 200 scientific publications. He was elected unanimously as one of the two Vice Presidents of the Council of the EATCS.

Teta Stamati has obtained a Degree in Computer Science from National and Kapodistrian University of Athens (Greece) in 1998. She also holds an MPhil Degree in Enterprise Modelling Techniques from University of Manchester Institute of Science and Technology (UMIST) (UK), an MBA Degree from Lancaster University Business School (UK) and a PhD in Information Systems from Informatics and Telecommunication Department from National and Kapodistrian University of Athens (Greece). She has extensive experience in top management positions in leading IT companies of the Greek and European private sector. She is currently Research Fellow at the Department of Informatics and Telecommunications of National and Kapodistrian University of Athens. Her current research interests include Information Systems, electronic and mobile government, systems migration, and IT security.
About the Contributors

Yannis C. Stamatiou was born in 1968 at Volos, Greece. He is currently Assistant Professor at the Department of Mathematics at the University of Ioannina and Consultant on Cryptography and Security at the Research and Academic Computer Technology Institute, both in Greece. His interests lie in cryptography and ICT security with a focus in e-voting and e-government related security protocols and systems. He is acting as a Program Committee member in several security/cryptography related conferences as well as a reviewer for several peer reviewed scientific journals. He has published over 50 research articles in peer reviewed international journals and conferences. He has also participated as a reviewing expert three times in EU calls for proposals in security related areas.

Sofia Stamou is a Lecturer at the Department of Archives and Library Science of the Ionian University. Her area of expertise is text analysis and language processing with an emphasis on semantic analysis of textual data. Her research interests include Web searching, personalization, ontologies, text mining, and data organization. She received her Ph.D. and M.Sc. degrees from the Computer Engineering and Informatics Department of Patras University in 2002 and 2006 respectively and her B.A. in Philosophy from the University of Ioannina in 1999.

George Stylios holds a diploma in Physics from the Aristotle University of Thessaloniki (1994) and a MSc. degree at Information System and Technology (IS&T) from Department of Information Science, at City University of London, UK (2002). He is a PhD student at the department of Computer Engineering and Informatics of the Patras University in Greece.
