About the Contributors

Pavel Zemliansky is an associate professor of writing and rhetoric at James Madison University where he also directs the first-year composition program. Dr. Zemliansky teaches courses in composition, visual and digital rhetoric, and methods of teaching writing. He has published several books and numerous book chapters and journals articles on rhetoric and the teaching of writing.

Kirk St. Amant is an associate professor of technical communication in the Department of English at East Carolina University. He has a background in anthropology, international government, and technical communication and his research interests include intercultural exchanges via online media and international outsourcing. He has taught online and conventional courses in technical and professional communication and in intercultural communication for Texas Tech University, Mercer University, and James Madison University. He has also taught courses in e-commerce, distance education, and business communication in Ukraine as a part of the USAID-sponsored Consortium for the Enhancement of Ukrainian Management Education (CEUME).

***

Wendy Warren Austin is an associate professor in the English and Theatre Arts Department at Edinboro University of Pennsylvania, and has taught technical writing, business and professional writing, and first year composition there since 1988. She has a PhD in rhetoric and linguistics from Indiana University of Pennsylvania, an MA in rhetoric and composition from Purdue University, in addition to her BA in humanities from University of Houston. Her research interests are in plagiarism, emerging technologies, and computers and composition.

Neil P. Baird is a PhD student concentrating in rhetoric and composition at the University of Nevada, Reno, where he teaches traditional and online writing courses as a lecturer. His dissertation is a series of case studies that examine how the embodied literacies of collegiate football players function in upper-division, writing-intensive courses across the disciplines.

Matt Barton is an assistant professor of English at St. Cloud State University in St. Cloud, Minnesota. His research interests are video games, wikis, new media, rhetoric, and computers and writing. He has published in the journals Text and Technology, Computers and Composition, and Kairos, and has chapters in three forthcoming edited collections. Currently, he is serving as an assistant editor of Kairos and an associate editor of Kairosnews.
About the Contributors

**Morell D. Boone** serves as dean of the College of Technology at Eastern Michigan University. Boone also served EMU as professor and dean of learning resources and technologies from 1986 to 2001. He provided the leadership for visioning, design, and implementation of the Bruce T. Halle Library. Prior to coming to EMU, Boone was dean of learning resources at the University of Bridgeport. He is a frequent contributor to academic publications and a presenter at national and international meetings regarding the impact of information technologies on library design and services. Boone holds a PhD in instructional design, development, and evaluation from Syracuse University.

**Clint Bowers** is a professor of digital media at the University of Central Florida. He is also chief scientist of the university’s Augmented Cognition for Training in Virtual Environments Laboratory (ACTIVE). Dr. Bowers’ research interests include team training, team performance, and the use of technology in complex workplaces.

**Pam Estes Brewer** lectures in the English & Philosophy Department at Murray State University and coordinates the Professional Writing program. She is completing her doctorate in technical communication and rhetoric at Texas Tech University. Her research interests include intercultural virtual workplaces and related studies. She has presented at the Society for Technical Communication, the Association of Teachers of Technical Writing, and Computers & Writing conferences. In addition, she was part of a research team that won a $10,000 STC grant for their work concerning authors’ preferences in editing, and served on the organizing committee for the 2006 Computers & Writing Online Conference.

**H. Allen Brizee**, Purdue OWL coordinator, is a PhD candidate in rhetoric and composition at Purdue University with secondary areas in professional writing and public rhetoric. He has been teaching writing in labs and classrooms since 1996. He earned his AS (cum laude) from Northern Virginia Community College while working as a technical writer for the Department of Defense at Ft. Belvoir, Virginia. He earned his BA in English (summa cum laude) and his MA in English (composition and professional writing) from Virginia Tech. Mr. Brizee continues to work as a professional writer with the Editorial Cooperative at Purdue.

**Jan Cannon-Bowers** recently left her position as the U.S. Navy’s senior scientist for training systems to join the Institute for Simulation and Training and Digital Media Department at the University of Central Florida as an associate professor and research scientist. Her research interests are in technology-enabled learning and synthetic learning environments. To date, she has been awarded several grants to support this work, including two awards by the National Science Foundation. Dr. Cannon-Bowers has been an active researcher, with over 100 publications in scholarly publications. She is on the board of directors of the Society for Simulation in Health Care and Advisor to the national Serious Games Initiative.

**Kalyani Chatterjea** is an associate professor of geography at the Nanyang Technological University, Singapore. Her specialization is in geomorphology, geography education, and IT in geography education. She has developed many Web-based in-service training packages for teachers in Singapore, has developed several learning packages and used the new strategies such as mobile technologies and virtual environments for teaching physical geography at university level and her own research, and has also published in journals and books on topics related to her areas of specialization, in geomorphology and in geography education.
María José Crisóstomo-Acevedo is a physical therapist at Jerez Hospital, in southern Spain. She earned a BS in physical therapy, University of Seville, and a master’s degree in sports physical therapy. Her research interests include the enabling role of information systems for telemedicine and telerehabilitation. She has contributed to several books on IT and telemedicine. Her papers have been published in *Encyclopedia of IS&T 2nd Edition*, *Research on E-Health and Telemedicine*, *Thematic Health Network TM-64*, *Encyclopedia of Physical Therapies*, *Encyclopedia of Rehabilitation*, and *Encyclopedia of Human Resources Information Systems: Challenges in E-HRM*.

James Dalziel is professor of learning technology and director of the Macquarie E-Learning Centre of Excellence (MELCOE) at Macquarie University in Sydney, Australia. James leads a number of projects including: LAMS (Learning Activity Management System—www.lamsfoundation.org); MAMS (Meta Access Management System—www.federation.org.au); RAMP (Research Activityflow and Middleware Priorities—www.ramp.org.au), and ASK-OSS (the Australian Service for Knowledge of Open Source Software—www.ask-oss.mq.edu.au).

Dana Lynn Driscoll is a PhD candidate in rhetoric and composition at Purdue University with concentrations in research methodologies and writing program administration. She holds an MA in linguistics from SUNY Stony Brook and a BA in English from California University of Pennsylvania. As the Webmaster of the Purdue OWL, she has worked to implement many usability changes and continues to guide the OWL with sustainable, accessible information design. She is interested in mixed methods and participatory research methodologies, information literacy, human-language-technology interaction, and disciplinary knowledge making.

Anne-Florence Dujardin is senior lecturer on the MA course in technical communication at Sheffield Hallam University. Her research interests are in information design and e-learning.

Dev K. Dutta is a final year PhD candidate at the Richard Ivey School of Business at the University of Western Ontario. He came to Canada for his doctoral studies after working for over 12 years in the Indian IT industry as a strategy and organizational process consultant. Dev’s two main areas of research focus are strategic management and entrepreneurship. Within these broad domains, he is interested in studying different competitive contexts of firms, for example, multimarket competition, competition across geographies and national boundaries, and competitive contexts of pre-organization and nascent organization. Dev’s research has been published in the *Journal of Business Venturing* and *Entrepreneurship Theory and Practice*. In the Fall 2007, Dev will join as a full-time faculty member at the Whittemore School of Business and Economics at the University of New Hampshire.

David A. Edgell has over 10 years experience as a technical communication practitioner in the health care and information technology professions in New Mexico and Wisconsin. He graduated with a BS degree from the University of Wisconsin and currently is working towards a master's degree in the Technical Communication and Rhetoric program at Texas Tech University. His research interests include communication structures surrounding medically informed consent and patient education. He is also concerned with integrating and informing technical communication programs to meet the needs of industry and the future.
About the Contributors

Kirstie Edwards is an independent scientific and technical editor. She has been researching communications at Sheffield Hallam University for the past 6 years, where she has also been teaching a postgraduate course in editing and collaborative work since 2004. Her particular fields of interest are computer mediated communication in professional contexts and scientific writing.

Christa Ehmann Powers is vice president of education for Smarthinking, Inc., a Washington, DC-based online learning company. She has developed online training and quality control programs for hundreds of online instructors and currently manages a growing operations department of over 600 online employees. She recently co-authored Preparing Educators for Online Writing Instruction: Principles and Processes (NCTE, 2004) and co-edited a special issue of Technical Communication Quarterly (16.1, Winter 2007). Christa’s current research focuses on online teaching, learning, and employee training, empirical research methods for online settings, and distance management strategies.

Douglas Eyman is senior editor of Kairos: A Journal of Rhetoric, Technology, and Pedagogy and is completing a PhD in professional writing and digital rhetoric at Michigan State University. He has accepted a position as assistant professor of English at George Mason University. He has served on the board of directors of the Alliance for Computers and Writing and as a member of NCTE’s Instructional Technology Committee; he is currently a member of the CCCC Committee on Computers in Composition and Communication. Eyman’s research interests and publications address digital literacies, new media scholarship, electronic publication, teaching and writing in digital environments, and digital rhetoric.

Yulin Fang is an assistant professor at Department of Information Systems, City University of Hong Kong. He earned his PhD at Richard Ivey School of Business, the University of Western Ontario. His current research is focused on knowledge management, virtual team, and open source software projects. He has published papers in major journals such as Strategic Management Journal, Information & Management, Communications of the Association for Information Systems, The DATA BASE for Advances in Information Systems, and Journal of Information Systems Education. He had extensive business experience in the consulting industry.

Mona Florea is the education & curriculum materials librarian at the University of Rhode Island Library. She previously worked for Yale University Medical Historical Library, Landmark College Library, and Three Rivers Community College Library. Her interests concentrate on reference, library instruction, designing information literacy programs, and on using online course management programs to enhance library services.

James K. Ford is a doctoral student in education at the University of California, Santa Barbara. His general research interests are in writing studies, technical communication, and rhetoric. More specifically, he is interested in the way technology (namely enhanced display systems) impacts literacy practices, not only in education settings, but also in the workplace, and in common societal practices such as in political campaigns, tourism, and entertainment. His background is in technical communication and writing studies. He received his master’s degree in technical communication from Texas Tech University in 2001 and began his studies at UCSB in 2004.
Eric Franzen works for CFA Institute in Charlottesville, Virginia where he manages printing and distribution of publications. CFA Institute is a global membership organization that awards the Chartered Financial Analyst® (CFA®) designation. CFA Institute publications provide investment management research to investment professionals. Eric has a masters degree from the University of Virginia in managing information technology. Eric also holds a masters degree from George Mason University in telecommunications management. He has 15 years of experience in publishing and printing with a focus on publications technology.

Olena Igorivna Goroshko holds a PhD in linguistics. She is professor of linguistics and head of Cross-Cultural Communication and Modern Languages Department at National Technical University “Kharkiv Polytechnic Institute.” She is also affiliated with the Kharkiv Center for Gender Studies. Dr. Goroshko’s professional interests include gender and Internet studies, forensics, and distance education. She is the author of three books and more than 100 articles on communication and gendered linguistics. Her most recent book is on gender trends in the Russian-language Internet.

Geff Green is the course leader for the MA Professional Communication Programme at Sheffield Hallam University, where he teaches technical and professional communication, hypermedia design, and visual communication. His PhD research focused on South East Asian cultural history and he has extensive professional experience designing, programming and maintaining multimedia applications for organizations such as Epic Media Group PLC in the UK.

Parissa Haghirian received her master’s degree in Japanese Studies from Vienna University (1998) and was awarded a master’s degree (2000) and PhD in international management (2003) from Vienna University of Economics and Business Administration. Since 2006 she has been an assistant professor of international management at the Faculty of Liberal Arts at Sophia University, Tokyo, Japan. Her research and consulting interests include market entries into the Japanese market, intercultural knowledge transfer, and Japanese consumer behavior.

Mario Hair is a fellow of the Royal Statistical Society. He is a lecturer and a member of the Statistics Consultancy Unit at the University of Paisley. His special interests are in the psychology of survey design and the analysis of survey datasets.

Gary Hepburn obtained his PhD from the University of British Columbia in 1997 and he is currently a faculty member in the School of Education at Acadia University. He teaches at the graduate and undergraduate levels in the area of technology integration into education. His research interests are the use of open source software in education and online learning. Dr. Hepburn is interested in how educational software environments can be improved by using open source software as well as some of the related policy, financial, philosophical, sociological, and technical issues. Dr. Hepburn is also involved in the design and development of online courses. He studies the way in which emerging and established online technologies have the potential to shape learning.

Beth L. Hewett consults in online and traditional writing programs and writing center development, and she is a writing coach for graduate and post-graduate writers. She is co-author of Preparing Educators for Online Writing Instruction: Principles and Processes (NCTE, 2004), co-editor of Kai-
**About the Contributors**

**Russell J. Hewett** is a graduate student in the Scientific Computing Group, in the University of Illinois Computer Science Department. He is a co-author of “Solar Activity Monitoring” in *Space Weather: Research towards Applications in Europe* (2007, Springer) and lead author of “Multiscale Analysis of Active Region Evolution” (under review). He has spent the past 8 years working as an intern and a contractor with NASA’s Goddard Space Flight Center, and he recently held a visiting scholarship at Trinity College Dublin, in Dublin, Ireland.

**Tobias Höllerer** is an assistant professor of computer science at the University of California, Santa Barbara, where he leads a research group on Imaging, Interaction, and Innovative Interfaces. A computer science graduate from Technical University of Berlin in Germany, Höllerer did his PhD work on mobile augmented reality systems at Columbia University. Höllerer co-organized several conferences and workshops on augmented and virtual reality, including the 2006 IEEE and ACM International Symposium on Mixed and Augmented Reality. His main research interests lie in augmented and virtual reality, 3D displays and interaction, visualization, mobile and wearable computing, and adaptive user interfaces.

**Frankie S. Jones** completed her PhD in instructional technology with a concentration in human resource and organizational development at The University of Georgia in 2006. She currently works as a learning and development manager at UPS in Atlanta, Georgia. Her professional interests include virtual collaboration, learning technologies, informal learning, and international human resource development.

**Michael J. Klein,** PhD, is an assistant professor of writing and rhetoric studies at James Madison University where he teaches courses in first-year composition, technology and writing, visual rhetoric, and rhetoric of science. He holds advanced degrees in science and technology studies from Virginia Tech, in technical communication from Rensselaer, and in rhetoric and composition from the University of Arizona. His research interests include an examination of the role of rhetoric in the dissemination of scientific information to the public and the use of popular cultural in public policy debates on science and technology.

**Heinz D. Knoell** is currently visiting professor of IS at the German Department of IS of the Marmara-University in Istanbul. In the academic year 2004/2005 he was a visiting scholar at the UCLA Anderson School where he pursued a research project on the outcomes of ERP systems. He is a professor in information systems at the University of Lueneburg, Germany, and a visiting professor at the University of Wolverhampton, UK. His research interests include software project management, business process optimization and software quality assurance. Knoell received his PhD, MSc, and BSc from the University of Muenster, Germany. He is a member of AIS and the German Chapter of the ACM.
Zoran Krupka is working at the Marketing Department of University of Zagreb—Faculty of Economics and Business, teaching International Marketing and Brand Management. His research areas include: international marketing, brand management, and mergers and acquisitions. He has published several papers in the area of his interest and has been working as a consultant to several Croatian companies. Currently he is enrolled in on the PhD program at University of Zagreb.

Belinda Davis Lazarus earned a PhD in special education and applied behavior analysis from the Ohio State University. She has conducted studies and published articles in the areas of inclusion strategies for students with disabilities, virtual environments and disabilities, and assessment. Dr. Lazarus is the Director of the Master of Education in Special Education and the Special Education Distance Learning Program at the University of Michigan-Dearborn.

Diego Liberati, earned his PhD in electronic and biomedical engineering at the Milano Institute of Technology. He is the director of research, Italian National Research Council, and author of 50 papers on ISI journals. He is the editor and author of books and chapters, secretary of the Biomedical Engineering Society of the Italian Electronic Engineering Association (and Milano prize laureate in 1987), and he has chaired scientific committees for conferences and grants. He was a visiting scientist at Rockefeller University, New York University, University of California, and International Computer Science Institute, and he has directed joint projects granted by both private and public institutions and mentored dozens of pupils toward and beyond their doctorate.

Aizhong Lin is currently a research coordinator at the MELCOE (Macquarie E-Learning Center of Excellence) at Macquarie University in Sydney. His research interests include Web and Grid authentication, authorization, and collaboration, virtual organization, trust management, Peer-to-Peer service integration, and software agent. His research and development achievements include IAMSuite (Identity and Access Management Suite), AbWSIP2P (Agent-based Web Service Integration on Peer-to-Peer network), AbEPMS (Agent-based Emergent Process Management System), and about 20 published papers and book chapters.

Jayantha P. Liyanage is an associate professor of industrial asset management at the University of Stavanger (UiS), Norway. He is also the chair and a project advisor of the Center for Industrial Asset Management, and a member of the R&D group of the Center for Risk Management and Societal Safety (SEROS), at UiS. Dr. Liyanage is the Co Organizer and Coordinator of the European Research Network on Strategic Engineering Asset Management. He has earned BSc in production engineering (First Class Honours), MSc in human factors (Distinction), and PhD in offshore engineering. Dr. Liyanage is actively involved in joint industry projects both at advisory and managerial capacities, and also currently serves as the principal and external advisor for a number of PhD projects. He has published more than 75 publications in various books, international journals, and conferences over the last few years. For his performance, he has received a number of prestigious awards inclusive of University of Peradeniya Award for the Best Performance in Engineering (1995), Colombo Dockyard Award for the Best Performance in Production Engineering (1995), The Overall Best in Masters (1999), Lyse Energy Research Award for Excellent Research and Academic Contributions (2001), Society of Petroleum Engineers Best PhD Award (2003), and the Emerald Literati Club Award for Excellence (2004). He is active as a member of a number of international societies and networks. He also serves as an editorial reviewer and a member.
of international editorial boards of a number of international journals, and actively involves in national and international conferences as a member of International steering committees and program chair. His R&D interests include technology and engineering management, human-technology-organization, value added processes, decision quality and work processes, risk based decisions, asset operations, maintenance technology, sustainable industrial systems and processes, knowledge management and process intelligence, total quality, information systems, performance measurement and management, and so forth.

Jose-Aurelio Medina-Garrido is lecturer at the University of Cadiz, Spain. He has contributed to several books and articles on IT. He is a member of the GEM (Global Entrepreneurship Monitor) international project, developed by Babson College and the London Business School. He participates in several Research Groups on “Dynamic Capabilities and Strategic Change,” “Strategic Management and Human Resources,” “Global Entrepreneurship Monitor,” and “Creation of Cultural Firms.” Dr. Medina-Garrido has been a consultant for several firms.

Alan McCord serves as executive director of LTU Online, and College Professor in the College of Management at Lawrence Technological University. His teaching responsibilities focus on the University’s Doctor of Management in Information Technology program. Prior to LTU, he held senior information technology positions at the University of Michigan and Eastern Michigan University. He has consulted for several private sector businesses and higher education institutions, is the author of book chapters and articles on IT infrastructure, IT outsourcing, online learning programs, and information systems education. McCord holds a PhD in Instructional Technology from Wayne State University.

Christie L. McDaniel has a BSIS with honors and an MSIS from the School of Information and Library Science at the University of North Carolina at Chapel Hill. She is currently an adjunct assistant professor of Practice at SILS at UNC and will begin working as an associate systems engineer at Cisco Systems in fall 2007. Her research interests include gender and technology, virtual management, and networking.

Lisa D. McNair is an assistant professor of engineering education at Virginia Tech. She is co-director of the Virginia Tech Engineering Communication Center (VTECC), where she is developing communications curricula and assessment methodologies for engineering students and faculty, and conducting on-going research. Her research interests include using linguistic analysis to study cognitive design and interdisciplinary and intercultural collaborations.

Lei Meng, a native Chinese, is currently working as a localization project manager for a translation company. Lei has 4 years of localization experiences and received her MA degree in technical communication and rhetoric from Texas Tech University in 2004. She is interested in research in intercultural communication and localization.

Mutaleci Miranda, born May 3, 1971, Rio de Janeiro, Brazil, holds a bachelor’s degree in computer science (1993) and an MSc in database systems (1999), from the Military Institute of Engineering (IME/RJ). He is a Brazilian Army Officer, Engineer Corps, and has worked with combat simulation systems and electronic document management systems development. He is currently a teacher at IME and is enrolled in the PhD Program at COPPE/UFRJ, in the Computer and Systems Engineering Program.
Denise Nicholson is the director of the Applied Cognition and Training in Immersive Virtual Environments Laboratory (http://active.ist.ucf.edu/) at the University of Central Florida’s Institute for Simulation and Training. She is also a faculty member in UCF’s Modeling and Simulation Graduate Program, a Research Scientist in the College of Optics and Photonics/CREOL, and a certified modeling and simulation professional. Dr. Nicholson’s research focuses on human systems modeling, simulation and training includes virtual reality, human–agent collaboration, and adaptive human systems technologies for Department of Defense and Dual-Use Applications. She has authored/co-authored more than 40 technical publications and given numerous invited lectures/presentations.

Bolanle A. Olaniran (PhD, University of Oklahoma, 1991) is a professor in the Department of Communication Studies at Texas Tech University, Lubbock, Texas. His research areas include: computer-mediated communication, cross cultural communication, and organization communication. His works have appeared in international, national, regional journals, and several book chapters.

S.J. Overbeek, MSc is pursuing a PhD in the area of knowledge discovery and exchange in collaboration with the Radboud University Nijmegen, The Netherlands. He works at E-Office, a Dutch IT company specialized in developing virtual workplaces by using portal technology. He received the MSc in information science from Radboud University Nijmegen in 2005.

Marie C. Paretti is an assistant professor of engineering education at Virginia Tech and codirector of the Virginia Tech Engineering Communications Center (VTECC). Her work addresses the role of communication in engineering design, communication across disciplinary and cultural boundaries, and the integration of communication into engineering curricula.

Jurica Pavicic is working at the Marketing Department of University of Zagreb—Faculty of Economics and Business, teaching Marketing Strategy and Marketing for Nonprofit Organizations. His research areas include interdisciplinary interwoven approach(es) to: strategic marketing, social change, sociological concepts of communities, and nonprofit institutions. He has published widely in the above-mentioned areas and (co)authored books and chapters with several distinguished publishers: Ashgate, Lawrence Erlbaum, CAB International, and Masmedia. When he is not “absorbed” with international academic challenges and consultancies for firms and nonprofits, he travels and spends time with family and friends.

Prof. Dr. H.A. (Erik) Proper is a professor in information systems science at the Radboud University Nijmegen, The Netherlands. Erik has co-authored several journal papers, conference publications, and books. His main research interests include system theory, system architecture, business/IT alignment, conceptual modelling, information retrieval, and information discovery.

Lillian Rafeldt teaches prenursing and nursing content online and onground. Her areas of expertise include curriculum development, gerontologic and medical surgical nursing. Her professional experience includes caring for clients in multiple care settings. She also is facilitating implementation of computerized charting in a nonprofit Visiting Nurse Association as a member of the Board of Directors. Lili celebrates the nursing profession and its future!
**About the Contributors**

**Judith Ramsay** is a chartered psychologist, specialising in the psychology of human-computer interaction. She is a lecturer in psychology at the University of Paisley, UK.

**Karen Renaud** is a computer scientist, specialising in various aspects of human interaction with facilitating technologies and applications. She is a senior lecturer in the Computing Science Department of the University of Glasgow.

**D.B.B. (Daan) Rijsenbrij** is a Professor in Digital Architecture at the Radboud University Nijmegen, The Netherlands. Digital architecture is the architecture of the digital world. He firmly believes in the similarities between physical architecture (the architecture of cities, landscapes, buildings, and the interior architecture) and digital architecture (the architecture of digital business services, information provisioning, information traffic, applications, and technology infrastructures). As an independent guru in the field of digital architecture he displays his ideas under the label of “(Enterprise) Digitecture” covering the phases of architecture and design in the digital world.

**William F. Ritke-Jones** is Haas professor of English at Texas A&M University—Corpus Christi where he teaches courses in teaching ESL composition, technical communication, teaching composition, rhetorical theory and computers and composition. His research focuses on intercultural communication, especially in electronic environments, online technical communication education, computer mediated communication and adult education. He has also examined the dynamics of online collaborative groups extensively, focusing on how instructors can foster the emergence of dialogically collaborative online groups, especially in those composed of diverse people. With that goal in mind, his research currently focuses on how transformational and liberatory learning theories can be applied to online groups.

**Peter Rive** is a PhD candidate at the School of Design located at Victoria University of Wellington, New Zealand. He will be teaching New Zealand’s first university course in the virtual world, Second Life based on the School’s virtual island, MediaZone. Peter is a professional film and TV editor who has worked in almost all areas of production for the past 20 years. His company, LaunchSite, was established in 1999 as a consultancy in virtual reality and virtual worlds. It specializes in high impact VR, machinima, marketing, and knowledge management.

**Michelle Rodino-Colocino** is assistant professor in the College of Communications at Penn State University, where she teaches courses on media and culture. Her research explores the relationship between media, technology, gender, and labor. Her work has appeared in *Critical Studies in Media Communication*, the *Journal of Computer-Mediated Communication*, *Feminist Media Studies*, *New Media and Society*, and *Workplace: A Journal of Academic Labor*.

**José A. Rodrigues Nt.** is a PhD student of the Computer and Systems Engineering Program, at the Graduate School of Engineering (COPPE) of the Federal University of Rio de Janeiro (UFRJ–Brazil). He received his bachelor’s degree in systems engineering (Brazilian Naval Academy–1982) and holds an MSc in computer science and an MSc in operations research (U.S. Naval Postgraduate School–1994). He has prior experience in robotics, software engineering, C4I systems, decision support systems, distributed systems, and business processes. He currently researches KM, BPM, CSCW, and distributed systems. He is also an experienced consultant for major Brazilian companies.
Michael J. Salvo is assistant professor of technical and professional writing at Purdue University, where he teaches usability and user-centered design. He has been a usability consultant for the Purdue Online Writing Lab since 2003. He is interested in usability testing and research, and is particularly intrigued by opening spaces for user participation in technology deployment and design.

Robert Schafer is a doctoral student in the Technical Communication and Rhetoric program at Texas Tech University. Robert has 10 years experience writing, designing, and marketing for ecommerce Web sites. Currently, his research interests include intercultural communication, research methods, and cultural anthropology.

Bernd Simon, a graduate of Wirtschaftsuniversität Wien and the International Management Programme at New York University’s Stern School of Business, is a researcher at the Institute for Information Systems and New Media of Wirtschaftsuniversität Wien. As a member of the Prolifex project he is leading cutting-edge research on learning management solutions. In 2005 he cofounded Knowledge Markets, a university spin-off providing consulting services for knowledge-driven organisations. As an active contributor to the EducaNext Portal he works at the frontier of IT-supported, academic knowledge exchange. Bernd’s research on the effectiveness of educational systems and system interoperability has been disseminated through top journals and conferences.

Alan D. Smith is presently university professor of operations management at Robert Morris University, located in Pittsburgh, PA. Previously he was chair of the Department of Quantitative and Natural Sciences and coordinator of Engineering Programs at the same institution, as well as associate professor of business administration at Eastern Kentucky University. He holds concurrent PhDs in engineering systems/education from The University of Akron and in Business Administration from Kent State University. He is the author of numerous articles and book chapters.

Peter A. Smith is currently visiting research faculty at the University of Central Florida’s Institute for Simulation and Training. As part of the Augmented Cognition for Training in Virtual Environments (ACTIVE) Lab, Peter fills the role of resident games expert through his previous experience in Serious Games working with the Navy’s NETC Experimentation Lab. Peter is also an avid blogger, with experience writing for the Serious Games Initiative blog and AOL’s Second Life Insider.

Morgan Sousa is a PhD candidate at Purdue University in rhetoric and composition with a concentration in professional writing. She completed her MA in professional writing and editing at West Virginia University in the summer of 2005. Prior to her MA work, she graduated from Assumption College in 2003 with a BA in English and a minor in management. Morgan has been a member of the Purdue OWL Usability Research Team since the spring of 2006. Her research interests include usability and accessibility, OWLs, gendered patterns of searching and learning, and information design.

Jano Moreira de Souza is a professor of computer science at the Graduate School of Engineering (COPPE) and Mathematics Institute of the Federal University of Rio de Janeiro (UFRJ) (Brazil). His area of specialization is databases, and he is involved in research in fields such as CSCW, DB, DSS, KM, and GIS. He received his bachelor’s degree in mechanical engineering (1974) and his master’s degree (1978) in system engineering from UFRJ, and his PhD in information systems (1986) from the
About the Contributors

University of East Anglia (England). He has published more than 200 papers in journals and conference proceedings and supervised around 50 theses and dissertations.

Robert Sprague, JD, MBA, teaches undergraduate business law courses in the University of Wyoming College of Business. Sprague’s research interests focus on the convergence of law, business, and technology. His recent publications include an article concerning the impact of business blogs on commercial speech rights, as well as an article examining the legal consequences of employees being fired as a result of content in their personal blogs. Sprague has also recently had accepted for publication an article regarding the recent, growing phenomenon of prospective employers using Web-based social networks to preview job applicants. Prior to becoming a professor on a full-time basis, Professor Sprague held senior management positions with Internet-related companies in Silicon Valley. He has several years of experience consulting in the area of legal automation, as well as practicing law, primarily representing clients in the computer industry.

R. Todd Stephens is the technical director of the Collaboration and Online Services Group for the AT&T Corporation. Todd is responsible for setting the corporate strategy and architecture for the development and implementation of the enterprise collaborative and metadata solutions. Todd has over 130 professional and academic publications including three patents, six patent pending filings, and he writes a monthly column for Data Management Review. Todd holds degrees in mathematics and computer science from Columbus State University, an MBA degree from Georgia State University, and a PhD in information systems from Nova Southeastern University.

Julia Diedrich Sweeny received her BA, MA, and MEd at James Madison University. Her PhD is in curriculum and design with a concentration on instructional design from Virginia Tech. Her dissertation was on “Online Learning: The Student Point-of-View” (written under last name Harbeck.) She was the instructional technologist at the Center for Instructional Technology at James Madison University from 2000-2006. She is currently an assistant professor in writing and rhetoric studies at James Madison University. She lives in Virginia with her daughter and dog.

Jamie S. Switzer is an assistant professor in the Department of Journalism and Technical Communication at Colorado State University. She received her doctorate in educational technology from Pepperdine University, and also holds degrees in technical communication from Colorado State University and radio/TV/film from Texas Christian University. She has over 18 years of experience in new media technologies and mediated communication. Dr. Switzer conducts research on computer-mediated communication, new media technologies, and online mentoring. She has published in The Internet Encyclopedia, The Encyclopedia of Distance Learning, Teaching, Technologies, and Applications, Interactive Educational Multimedia, Innovative Higher Education, THE Journal, the Journal of Educational Technology Systems, the forthcoming Encyclopedia of Multimedia Technology and Networking, and the forthcoming Encyclopedia of E-Collaboration. Dr. Switzer is the founder and director of the Online Mentoring Program in the Journalism Department at CSU. She also founded the Center for Innovation in Learning Technologies in the CSU College of Business.

Judith Szerdahelyi is assistant professor of English at Western Kentucky University where she teaches multilevel composition courses, including technical writing and technology and writing, both
face-to-face and online. Her teaching and research interests include composition theory and pedagogy, computers and writing, digital literacy and multimedia writing, digital video production in higher education, and distance learning. Her publications include a co-authored textbook on writing and various academic articles published both in the U.S. and in Europe.

**Terrie Lynn Thompson**, a telecommuter for 10 years, is familiar with the virtual workplace. Her background includes research, management, facilitation, and curriculum design in higher education, high tech, not-for-profit sport, and international social development. She was a global e-learning strategist, authored an international e-learning bulletin, and awarded a WebCT Exemplary Course Award (2004). As the learning director for a Canadian NGO, she developed technology-based learning experiences focused on social development for youth and community members in developing countries. Current research interests include self-employed workers’ engagement in online communities for informal learning and quality standards for e-learning initiatives in the health care sector.

**P. (Patrick) van Bommel** received his MSc degree in computer science in 1990, and his PhD in mathematics and computer science from the Radboud University Nijmegen, The Netherlands in 1995. He is currently assistant professor at the Radboud University Nijmegen. Patrick has co-authored several journal papers, conference publications, and books. His main research interests include information modelling and information retrieval.

**Goran Vlasic** is working at the Marketing Department of University of Zagreb—Faculty of Economics and Business, teaching marketing communications, interactive marketing and marketing innovation. He presented many papers at international conferences, published 3 papers in international journals, published 18 case studies, a textbook on interactive marketing, and a book on new media management. He works as a consultant to several Croatian companies. He is researching areas of interactive marketing, relationship personalization, innovations, and high-tech marketing. Currently he is on PhD in Business Administration and Management program at Bocconi University.

**Erik Vullings** recently started working as Senior Systems Architect at TNO in the Netherlands, the third largest research organization in Western Europe. From 2004-2007, he was program manager at Macquarie University in Sydney, Australia, of several DEST-funded projects (total value $8m) in identity and access management. These projects laid the foundation for the Australian Access Federation, providing single sign-on between all 39 Australian universities, as well as providing practical open source solutions for virtual organizations. Between 1999 and 2004, he worked as systems engineer at Philips R&D and was the programme manager of a €24m FP6 Integrated Project in assembly equipment.

**Ran Wei** (PhD, Indiana University-Bloomington, 1995) is an associate professor at University of South Carolina’s School of Journalism & Mass Communications. His current research interest focuses on the adoption, use and impact of new media technology in national, organizational, and individual contexts. His publications include 32 refereed journal articles, 3 book chapters, and 1 co-authored book. Two of his papers received national awards. Dr. Wei also serves on the editorial board of 3 journals.

**Joel West** is the director of the Center for Communications Research at Texas Tech University, where he also teaches courses in advertising and public relations. His professional experience includes
About the Contributors

7 years of prepress systems management for a commercial printer, overseeing a transition from an analog/conventional to a 100% digital workflow.

**Geraldo Xexéo** received his bachelor’s degree in electronic engineering from the Military Institute of Engineering (IME/RJ) in 1988 and received his doctor of Computer and Systems Engineering degree from COPPE, Federal University of Rio de Janeiro (UFRJ – Brazil), in 1994. Since 1995, he has been a professor of computer science at UFRJ. His research is on distributed applications, information retrieval and extraction, and fuzzy logic. He is also an experienced consultant for major Brazilian companies.

**Kathleen Blake Yancey**, Kellogg W. Hunt professor of English at Florida State University, directs the graduate program in rhetoric and composition studies. Past president of the Council of Writing Program Administrators, she is also a past Chair of the Conference on College Composition and Communication. Currently president-elect of the National Council of Teachers of English. She also codirects the International Coalition on Electronic Portfolio Research. She is the author, editor, or co-editor of numerous chapters and articles as well as of 10 books, among them *Portfolios in the Writing Classroom* (1992), *Assessing Writing across the Curriculum* (1997), *Teaching Literature as Reflective Practice* (2004), and *Delivering College Composition: The Fifth Canon* (2006).

**Simeon Yates** is director of the Cultural, Communication, and Computing Research Institute at Sheffield Hallam University. Current and previous research topics include sociolinguistics of online interaction, science in the media, and gender and new media use.

**Norman E. Youngblood** is an assistant professor in the Department of Electronic Media and Communications at Texas Tech University where he teaches courses in digital media production and the interplay of electronic media and society. Prior to teaching, he worked for 3 years as an IT professional in an academic environment and was the graduate-fellow and Interim Director of the CNN World Report Television Archive at Texas Tech University. His research areas include interface design and issues related to the adoption of electronic media technology.

**Susan Youngblood** is a PhD candidate in Technical Communication and Rhetoric at Texas Tech University. Her research areas are risk communication and rhetoric of science and technology. She is particularly interested in how the Internet is used by subject matter experts to communicate with the public. Her professional experience includes private and public sector work in environmental science and public health.

**Geraldo Zimbrão** is an assistant professor of computer science at the Graduate School of Engineering (COPPE) and Mathematics Institute of the Federal University of Rio de Janeiro (UFRJ – Brazil). His area of specialization is Databases, and he is involved in research in fields such as spatial databases, GIS, query optimization, data warehouses, and database cluster. Professor Zimbrao received his bachelor’s degree in computer science (1992), his master’s degree in applied mathematics (1993) and his PhD in computer and systems engineering (1998) from the Federal University of Rio de Janeiro (Brazil).
About the Contributors

James R. Zimmerman received an AB from The University of Michigan and worked as a reporter, press secretary, cable TV anchor, news director, and Editor of Warner Communications’ Qube Program Guide. He earned the MA and PhD from Ohio State University, taught at Case Western Reserve University and Richard Stockton College, and was affiliated with West Virginia University’s Center for Executive Education. Zimmerman has served as consultant to Fortune 500 companies, is the cocreator and cofacilitator of “Communication Effectiveness Seminars,” and is a member of the Writing and Rhetoric Studies faculty at James Madison University.

Leah A. Zuidema recently joined the English Department at Dordt College in Sioux Center, Iowa, where she teaches courses in English education, business and technical writing, and composition. Her chapter is based on research that she conducted as a doctoral candidate at Michigan State University while in the Critical Studies in the Teaching of English program.
