About the Contributors

Ricardo Colomo-Palacios is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid. His research interests include applied research in Information Systems, software project management, people in software projects and social and Semantic Web. He received his PhD in Computer Science from the Universidad Politécnica of Madrid (2005). He also holds a MBA from the Instituto de Empresa (2002). He has been working as Software Engineer, Project Manager and Software Engineering Consultant in several companies including Spanish IT leader INDRA. He is also an Editorial Board Member and Associate Editor for several international journals and conferences and Editor in Chief of International Journal of Human Capital and Information Technology Professionals.

Pedro Soto-Acosta is an Associate Professor of Management at the University of Murcia (Spain). He holds a PhD in Management Information Systems (MISs) and a Master’s degree in Technology Management from the University of Murcia. He received his BA in Accounting and Finance from the Manchester Metropolitan University (UK) and his BA in Business Administration from the University of Murcia. He attended postgraduate courses at Harvard University (USA). His work has been published in journals such as the European Journal of Information Systems, the International Journal of Information Management, the Information Systems Management, and the Journal of Enterprise Information Management, among others. He is also an Editorial Board Member and Associate Editor for several international journals and Chairman of various international conferences.

João Varajão, is Professor at the Department of Engineering of the University of Trás-os-Montes e Alto Douro, where he teaches undergraduate and postgraduate courses on Information Systems management, project management, and software engineering. He also supervises several Msc and PhD projects in the domain of Information Systems management, Information Systems outsourcing, and e-business. He earned his PhD and MSc from the University of Minho. His scientific interests include Information Systems management, chief Information Systems profession, enterprise Information Systems, and project management. He has over 120 publications, including books, book chapters, refereed publications, and communications at international conferences. He serves as associate editor and member of editorial board for international journals and has served in several scientific committees of international conferences. He is founder and co-chair of CENTERIS – Conference on ENTERprise Information Systems.

* * *

327
**Giner Alor-Hernandez** is a full-time Researcher of the Division of Research and Postgraduate Studies of the Instituto Tecnologico de Orizaba. He received a MSc and a PhD in Computer Science of the Center for Research and Advanced Studies of the National Polytechnic Institute (CINVESTAV), Mexico. He is involved in several Mexican research projects, and he has been a committee program member of several international conferences in computer science. His research interests include Web services, e-commerce, Semantic Web, Web 2.0, service-oriented and event-driven architectures, and enterprise application integration. He is an IEEE and ACM Member.

**Itzhak Aviv** focuses his research in the areas of software architecture, requirement engineering, Information Systems, knowledge management infrastructure, and business process modeling. He has BA in economics and management, MSc in Information Systems from Tel-Aviv University and PhD from department of Information Systems at the University of Haifa. Itzhak has extensive professional experience of 10 years in Information Systems projects, and currently he is the head of a GIS project.

**Fernando Cabezas-Isla** is a Research Assistant and a Ph.D. candidate of the Computer Science Department at Universidad Carlos III de Madrid. He holds an MSc in Computer Science from Universidad Carlos III de Madrid. He has been involved in several research projects as Software Engineer and Software Engineering consultant.

**Jorge Carrillo de Albornoz** is a PhD student at the NIL (Natural Interaction based on Language) group of the Universidad Complutense de Madrid. His research includes different fields of NLP, specially sentiment analysis and opinion mining; virtual environments, with special interest in the development of innovative user interfaces to enrich user experience and quality; and machine learning and data mining techniques. He holds a grant from the EU to fund his Ph. D, and has published several papers in journals and international projects. He has participated in 3 funded projects and worked in several international companies.

**Yannis Charalabidis** is a Computer Engineer and holds a PhD in Information Systems Engineering from National Technical University of Athens (NTUA). He has been employed for 8 years as an Executive Director in Singular IT Group. Currently he is a leading researcher in the areas of e-government and e-business, planning and coordinating high-level policy making, research, and pilot application projects for governments and administrations worldwide. He is a contributing member in several egovernment and ebusiness standardization committees. During the last 20 years he has been involved as a Project Manager or key Executive in more than 50 projects. He has published more than 100 papers in scientific books, journals, and conferences. He teaches e-government Information Systems, Interoperability and standardization, e-participation and government transformation in the University of Aegean and NTUA.

**Guillermo Cortes-Robles** obtained his Master in Science of Industrial Engineering from the Instituto Tecnológico de Orizaba and a PhD in Industrial Systems from the Institut National Polytechnique de Toulouse in France. He is today Professor of engineering science at the Instituto Tecnológico de Orizaba in the postgraduate school, specifically in the Engineering Management Master and the Industrial Engineering PhD. His research interests are application of TRIZ theory combined with several approaches:
knowledge management, decision support systems, genetic algorithms, creativity techniques, among other approaches with the aim of accelerating the innovation process. He is today an active member of the board of the Mexican TRIZ association (AMETRIZ).

**Maria Manuela Cruz-Cunha** is currently an Associate Professor in the School of Technology at the Polytechnic Institute of Cavado and Ave, Portugal. She holds a Dipl. Eng. in the field of Systems and Informatics Engineering, an M.Sci. in the field of Information Society and a Dr.Sci in the field of Virtual Enterprises, all from the University of Minho (Portugal). She teaches subjects related with Information Systems, Information Technologies and organizational models to undergraduate and post-graduate studies and supervises several PhD projects. She regularly publishes in international peer-reviewed journals and participates on international scientific conferences. She serves as a member of Editorial Board and Associate Editor for several International Journals and for several Scientific Committees of International Conferences. She has authored and edited several books and her work appears in more than 70 papers published in journals, book chapters and conference proceedings. She is founder and co-chair of CENTERIS – Conference on ENTERprise Information Systems.

**Flavius da Luz e Gorgônio** is an Associate Professor at the Department of Exact and Applied Sciences of the Federal University of Rio Grande do Norte. His research interests include applied research in Information Systems, artificial intelligence, data mining, and social networks. He received his PhD in Electrical Engineering and Computer Science (2009) from the Federal University of Rio Grande do Norte, Natal, RN, Brazil. He also holds a Master Degree (1999) and a Graduate Degree (1995) from the Federal University of Campina Grande, PB, Brazil. He has been working as Professor in several educational institutions in Brazil.

**Piotr Doskocz** received his MSc degree in computer science from Wroclaw University of Technology, Poland, in 2010. Recently he is a PhD student at the Computer Science and Management Department of the Wroclaw University of Technology. His research interests include applied research in data mining, classification, collective classification, and social network analysis. He is currently working as Software Engineer in IT company Rec-Solutions and provide expertise in research and development projects.

**Cristiane Drebes Pedron** is an Assistant Professor at ISEG (Instituto Superior de Economia e Gestão), Technical University of Lisbon, Portugal. She holds a degree in Informatics – System Analysis – and a Master’s Degree in Business by Universidade do Vale do Rio dos Sinos – UNISINOS, Brazil. She received a Ph.D. degree from ISEG, in 2009. She developed a thesis about CRM dynamic capabilities. Her research interests include customer relationship management (CRM), knowledge management (KM), enterprise resource planning (ERP), and strategic Information Technology planning.

**Joaquín Fernández-González** is the CEO of EgeoIT, Spain, and Agricultural Engineer in the Universidad Politécnica de Madrid, Executive MBA in the Instituto de Empresa de Madrid, and Specialist in R&D Projects Management and international actions in the Universidad Politécnica de Madrid.
Ángel García-Crespo is the Head of the SofLab Group at the Computer Science Department in the Universidad Carlos III de Madrid and the Head of the Institute for promotion of Innovation Pedro Juan de Lastanosa. He holds a PhD in Industrial Engineering from the Universidad Politécnica de Madrid (Award from the Instituto J.A. Artigas to the best thesis) and received an Executive MBA from the Instituto de Empresa. Professor García-Crespo has led and actively contributed to large European Projects of the FP V and VI, and also in many business cooperations. He is the author of more than a hundred publications in conferences, journals, and books, both Spanish and international.

Georgios Gionis holds a MSc. Degree in Electrical and Computer Engineer at National Technical University of Athens and a PhD in the field of Interoperability Middleware Architectures and in particular in the field of Rule-Driven Enterprise Service Bus. His research interests comprise modeling and execution of business and legal rules, definition and execution of Web-service orchestrations, Semantic Web services as well as mashup architectures and application and social web practices and tools. He is currently the technical architect of the FP7 GIC project (www.iocenter.eu) whose objective is to design interoperability prototypes that will demonstrate the collaboration among commercial tools and open source environments.

Israel González-Carrasco is an Assistant Professor in Computer Science Department of Universidad Carlos III de Madrid, Spain where he’s ending his Ph. D dissertation. He is co-author of several papers in international congress and his main lines of research are expert system, software engineering, and neural networks.

Irit Hadar is a faculty member at the Department of Information Systems at the University of Haifa. She is the head of the Software Architecture Laboratory at CRI (Caesarea Rothschild Institute for Interdisciplinary Applications of Computer Science). She has her Ph.D., M.Sc., and B.Sc. degrees from the Technion – Israel Institute of Technology. Her main research area is cognitive aspects of software architecture, design, and analysis. In particular, she focuses on cognitive processes, difficulties, and conflicts in software development, using cognitive psychology theories as analysis frameworks; visual models in software development and their influence on developers’ perceptions; and, the influence of different aspects of software engineering - economic, social, and cognitive aspects - on the final quality of the developed software.

Diego Jiménez-López is an R&D consultant in EgeoIT, Spain, and PhD candidate in the Computer Science Department at Universidad Carlos III de Madrid. He holds an MSc in Computer Science from Universidad Carlos III de Madrid. He has been involved in several research projects related to Semantic Web, e-learning, project management, and finances.

Tomasz Kajdanowicz is a Research Assistant at the Department of Computer Science and Management at the Wroclaw University of Technology, Poland. His research interests include social network analysis, machine learning, hybrid intelligent systems and multiple classifier systems. He is currently pursuing a PhD program in Computer Science at Wroclaw University of Technology. He obtained his Master in 2008. He has been working as solution Consultant, software architecture Consultant and Project Manager in several companies including Nokia Siemens Networks and Hewlett Packard.
Przemysław Kazienko received his MSc and PhD degrees in computer science with honors, both from Wrocław University of Technology, Poland, in 1991 and 2000, respectively. He obtained his habilitation degree from Silesian University of Technology, Poland, in 2009. Recently, he serves as a Professor of Wrocław University of Technology at the Institute of Informatics, Poland. He was also a Research Fellow at Intelligent Systems Research Centre, British Telecom, UK in 2008. For several years, he held the position of the Deputy Director for Development at Institute of Applied Informatics. He was a co-chair of international workshops RAAWS’05, RAAWS’06, MMAML’10, MMAML’11, and a Guest Editor of New Generation Computing and International Journal of Computer Science & Applications. He regularly serves as a member of international programme committees and the reviewer for scientific conferences and prestigious international journals. He is a member of Editorial Board of International Journal of Knowledge Society Research and International Journal of Human Capital and Information Technology Professionals. He has authored over 110 scholarly and research articles on a variety of areas related to social networks, social network analysis, knowledge management, collaborative systems, multiple model classification, data mining, recommender systems, information retrieval, data security, and XML. He also initialized and led over 20 projects chiefly in cooperation with commercial companies, including large international corporations.

Jason Wai Chow Lee has an MBA from Universiti Sains Malaysia (USM), and an M.Ed from Universiti Malaya (UM). Currently, he is a research fellow cum doctoral student in USM. His PhD thesis is on relationship marketing, focusing on outsourcing relationships in the electricals & electronics sector. His research interests also include technology management, e-learning, recycling and waste management, counterfeit products, and tourism networks.

Jasmine Yeap Ai Leen graduated with an MBA from Universiti Sains Malaysia (USM). She is currently undergoing her PhD in the field of technology management focusing on human-computer interactions in the School of Management, USM. Her research interests include areas in electronic commerce, e-retailing, online trust and loyalty, web interface design, and social-networking.

Meira Levy is a Senior Lecturer at the Department of Industrial Engineering and Management, Shenkar College of Engineering and Design, Israel, having completed a Postdoctoral Fellowship at the Department of Industrial Engineering and Management, and at Deutsche Telekom Laboratories, Ben-Gurion University of the Negev, Israel. She is also a research fellow at the University of Haifa, Department of Information Systems, Haifa, Israel. She received her Ph.D., M.Sc., and B.Sc. degrees from Technion, the Israel Institute of Technology. She has extensive experience in the software engineering industry in technical and management positions. Her research interests include: distance learning; knowledge engineering and management, both from human and technological perspectives, including: KM audit and requirements analysis methodologies, modeling and design of knowledge systems, embedding KM frameworks within business processes, identifying KM culture barriers, and knowledge representation. Her research papers have been published in conferences proceedings and in the journals Decision Support Systems, Journal of Knowledge Management, and Journal of Information Systems Education.
Bryan Soh Yuen Liew is an online Entrepreneur who has been doing business in the Web hosting and Web development industry since 2005. He attained his Master’s in Business Administration from Universiti Sains Malaysia in 2006 and is currently working as a part-time IT Lecturer at Han Chiang College, Penang.

José Luis López-Cuadrado is a Teaching Assistant at the Computer Science Department of the Universidad Carlos III de Madrid. His research interests include applied research in Artificial Intelligence, Software Integration, Web Information Systems and Process Improvement, Software Project Management and Business Information Systems. He received his M. Sc in Computer Science from the Universidad Carlos III of Madrid (2004). He has been working as software engineer, and is co-author of several publications in international congresses.

Carolina López-Nicolas (PhD, University of Murcia, Spain) is an Assistant Professor in the Department of Management and Finance at the University of Murcia, Spain. She has been a Visiting Professor at Delft University of Technology in the Netherlands and Michigan State University in USA. Her current research relates to knowledge management, Information Systems, business strategy, and mobile communications. She has published on these topics in such journals as the Information & Management, International Journal of Information Management, Technological Forecasting & Social Change, Journal of Knowledge Management, International Journal of Internet Marketing and Advertising, and the Journal of Enterprise Information Management.

Euripidis Loukis is Assistant Professor of Information Systems and Decision Support Systems at the Department of Information and Communication Systems Engineering, University of the Aegean. Also, he is teaching e-Government at the Greek National Academy of Public Administration. Formerly he has been Information Systems Advisor at the Ministry to the Presidency of the Government of Greece, Technical Director of the Program of Modernization of Greek Public Administration of the Second Community Support Framework and National Representative of Greece in the programs Telematics and IDA (Interchange of Data between Administrations) of the European Union. He has a long experience of participation in European research and development projects in the areas of e-government and e-participation, such as ICTE-PAN, ERMIONE, LEX-IS, and FEED.

Osman Mohamad has an MBA from North Dakota State University, USA, and a PhD from University of Strathclyde, Glasgow. He specializes in International Marketing, Strategic Marketing and Advance Seminar in Marketing. He has conducted Executive Development Program with a focus on marketing-related courses for both local and multinational companies. His research interests are internationalization of Malaysian firms and the impact of IT on consumption behavior. He has published articles in the Journal of Business Research, Multinational Business Review, Journal of Product and Brand Management, International Journal of Business and Management, International Review of Business Research, Malaysian Management Journal, Asian Academy of Management Journal, and Journal of International Business and Entrepreneurship to name a few.
About the Contributors

Francisco-José Molina-Castillo is Assistant Professor in Marketing at the University of Murcia. He holds a PhD in Marketing (with European PhD mention) and a Master degree on International Marketing from the University of Murcia. He received his BA in Business Administration from the University of Murcia and his BA in Accounting & Finance in Europe from Manchester Metropolitan University (UK). In the last years, he has been visiting Professor in several prestigious Universities such as Delft University of Technology (The Netherlands), Manchester University (UK), and Michigan State University (USA). The main research areas of Professor Francisco José Molina Castillo are: 1) innovation and new product development, 2) electronic marketing, and 3) new service development for mobile phones. He has published in well known academic journals such as Journal of Product Innovation Management, Industrial Marketing Management, Technovation, Information & Management, International Journal of Information Management, International Journal of Internet Marketing and Advertising, among others.

Valentina Morandi graduated in industrial engineering in 2003 and defended her PhD thesis on “Inside the black-box of R&D Cooperation” in 2008. Between 2005 and 2009 she participated in the NeP4B project, a public basic research initiative aimed at providing an IT architecture based on Semantic Web to support access to data and service in peer-to-peer networks. She is currently Research Fellow at DIMI-University of Brescia, where she participates in a pilot project of international academic technology transfer. Her main research interests involve strategic alliances and inter-organizational cooperative agreements, R&D cooperation, innovation management, and technology transfer.

Filipe Mota Pinto is an Associate Professor at the Computer Science Department of the School of Technology and Management of Polytechnic Institute of Leiria. His research interests include applied research in ontologies, knowledge extraction from databases and database marketing. He is Computer Science Engineer, MsC in Systems Information and PhD in Technologies and Information Systems. He has been working as Project Manager and later department Director in oil companies such as Repsol and CEPSA. Actually he is teaching in Polytechnic Institute of Leiria and belongs to Technology Park of Óbidos board. Also, he is the author and director of two post-graduate courses (Web Marketing and Business Intelligence courses) at IPL. He also is main chair of an International Conference to be developed in 2011 which proceedings are to be published by Lecture Notes in Computer Science Series.

José Pergentino de Araújo Neto is currently a Project Manager at CONAB and Professor at the Faculty Instituto Fátima. His research interests include applied research in distributed systems, Information Systems, software engineering, database systems, software projects in social media, and Semantic Web. He received his Bachelor Degree in Information Systems from FIP (Faculdades Integradas de Patos) at 2004, Master Degree from the CESAR.EDU (Centro de Estudos e Sistemas Avançados do Recife) at 2010 and currently participates as a special student of Ph.D. course in Electrical Engineering at UnB. He worked as Software Engineer, Systems Architect, and Systems Analyst in the company Politec Global IT Services, Pitang Agile IT, and Stefanini IT Solutions. He also worked as a teacher in several courses including Java Technology, Adobe Flex and Linux.
**About the Contributors**

**Sheau Ching (Joyce) Ong** is a Business Development Manager of IT Company, a distributions, systems integration & Information Technology solutions provider. Ong completed her MBA in Universiti Sains Malaysia and was honored with the “Dean List Awards” in 2008. She has served in a reputable FMCG company as a Sales Executive for five years and it was during this period that she mulled over ways to improve salesforce performance and productivity via automation technology.

**Yuliana Perez-Gallardo** obtained her Master degree in Computer Systems with Software Engineering specialty from the Instituto Tecnologico de Orizaba. Her research interests are Semantic Web, Web 2.0, collective intelligence, and CBIR algorithms.

**Daniel Pérez González** received his PhD in Business Administration from the University of Cantabria and he is currently an Associate Professor of Information Systems in the Faculty of Business and Economics (UC) since 2001 and member of the Information Management RD&I Group. He is also a member of The European Academy of Management and Business Economics and invited Lecturer in the Institute for Market Research of Kiel (Germany). He has participated in public projects of the Spanish Inter-Ministerial Commission of Science and Technology (CICYT) and reviewer in various international conferences and has published several articles in technology and business journals.

**Laura Plaza** is a PhD student at the NIL (Natural Interaction based on Language) group of the Universidad Complutense de Madrid. Her research includes different fields of NLP, with special interest in semantic approaches in the biomedical domain. She has applied different graph-based and knowledge-intensive techniques to NLP problems, including summarization, word sense disambiguation, information retrieval, opinion mining, and sentiment analysis. She holds a grant from the Spanish Ministry of Education to fund her PhD, and has published over twelve papers in journals and international conferences. She has participated in 3 funded projects and worked in several international companies.

**Goran D. Putnik** received his Dipl.Eng., MSci., and DrSci. from the Belgrade University, both MSci. and DrSci. in the area of Intelligent Manufacturing Systems. His current position is (Full) Professor, Department of Production and Systems Engineering, University of Minho, Portugal. He teaches the subjects of CAD/CAPP, CAM, FMS, and Virtual Enterprises in undergraduate studies, and CAD/CAPP/CAM Systems, Concurrent Engineering, Enterprise Organization, IMS, and Design Theory in postgraduate studies. He served as Director of the Centre for Production Systems Engineering (CESP) for 4 years and its Deputy Director for 5 years. He is Director of the Master and Postgraduate Course on CIM, and is responsible of the Laboratory for Virtual Enterprises (LABVE), the Department of Production and Systems Engineering, University of Minho. His scientific and engineering interests are production systems and enterprises design and management theory and implementations: CIM, CAD/CAPP/CAM systems, intelligent production systems and enterprises, machine learning as a design theory model, concurrent and collaborative engineering, Information Systems management, formal theory of production systems and enterprises, distributed, agile, and virtual enterprises, and complexity management in organizations. He is supervising a number of PhD projects as well. He regularly publishes and participates on international scientific conferences. His publishing record comprises more than 200 publications in international and national journals and conferences, including 6 books, of which the “Encyclopedia of Networked and Virtual Organizations” is distinguished. He serves as a member of Editorial Board for several International Journals and has served in more than sixty Scientific Committees of International Conferences. He was also invited lecturer on a number of universities.
**T. Ramayah** has an MBA from Universiti Sains Malaysia (USM). Currently he is an Associate Professor at the School of Management in USM. He teaches mainly courses in Research Methodology and Business Statistics. His publications have appeared in a variety of journals which include International Journal of Information Technology & Decision Making, International Journal of Information Management, Computers in Human Behavior, Resources, Conservation and Recycling. His full profile can be accessed from http://www.ramayah.com

**Marcos Ruano-Mayoral** is a Consultant at EgeoIT, Spain. Formerly he was a Research Assistant of the Computer Science Department at Universidad Carlos III de Madrid. He holds a BSc in Computer Systems from Universidad de Valladolid and a MSc in Computer Science from Universidad Carlos III de Madrid. He has been involved in several research projects as Information Management Engineer and Software Consultant.

**Belen Ruiz-Mezcua** is a Lecturer at the Computer Science Department of the Universidad Carlos III de Madrid. She holds a PhD in Sciences Physics from the Telecommunications School of Polytechnic University of Madrid. She is Vice-Chancellor of Research adjunct to the scientific park. Her research interests are focused on biometrics and speech processing, artificial intelligence, and assistive technologies for disabled people, and she works in and manages several international projects. She is author and co-author of several publications in refereed international journals and conferences.

**Francesca Sgobbi** graduated from the Polytechnical University of Milan in 1993 and completed her PhD in Industrial Engineering in 1997. Since 2002 she is Associate Professor at the Faculty of Engineering of the University of Brescia (I). She is Research Fellow at DINAMIA (Research Centre on Socioeconomic Change, ISCTE, Lisbon University Institute) and is a member of DOGE.I-University of Genova (Research centre on economics and management for engineering). Her research activities focus on techno-organisational change, competence assessment, and economics of education.

**Taciano de Morais Silva** is an Assistant Professor at the Department of Exact and Applied Science of the Federal University of Rio Grande do Norte. His research interests include applied research in Information Systems, software engineering, database systems, software projects in social media, and Semantic Web. He received his Master and Bachelor degrees in Computer Science from the Federal University of Campina Grande (Master-2005, Bachelor-2004). He also holds a Mathematics Degree from the State University of Paraíba (2003). He worked as software engineer, project manager, and systems analyst in the company Politec Global IT Services. He also worked as Professor at the Federal Institute of Rio Grande do Norte and at several private faculties, including FACISA and FAVIP.

**Marcirio Silveira** Chaves holds a Bacharel degree in Informatics - System Analisys by Universidade do Vale do Rio dos Sinos, Brazil and a Master degree in Computer Science by PUCRS, Brazil. During the Master Course, he was a visiting student at Laboratorio de Bases de Datos - Facultad de Informática - Universidade da Coruña, Spain. He held a PhD in Informatics by Faculty of Science of University of Lisbon in 2009. Actually, he is an Assistant Professor at Universidade Atlântica, Portugal. He was the man responsible for the development of Geo-Net-PT01, the first geographic ontology of Portugal. He also developed SEI-Geo system (Sistema de Extração e Integração de Conhecimento Geográfico), which
was a runner in the evaluation of named entity recognition in Portuguese – HAREM. His research areas are Semantic Web, ontologies, Information Systems, and natural language processing, with emphasis in text mining and named entity recognition.

**Pedro Solana González** is a Computer Engineer in Polytechnic University of Catalonia with a Postgraduate in Computer Science and PhD in Industrial Engineering from the University of Cantabria (UC). He is an Associate Professor of Information Systems in the Faculty of Business and Economics (UC) since 1995 and member of the Information Management RD&I Group. He is also a Director of different research projects about innovation and processes improvement, security management and document management (2000–2008). He has published different articles in technology and information system journals, has been reviewer in various international conferences and has participated in public projects of the Spanish Inter-ministerial Commission of Science and Technology (CICYT).

**Stephan Steglich** received his M.Sc. in Computer Science (1998) and PhD (2003) in Computer Science from the Technical University Berlin in 2003. His fields of interest include, e.g., context-awareness, user-interaction, and adaptive systems. In 1998 and 1999 he has worked intensively in the research area of intelligent mobile agents. Since 1999 he has started research activities in the area of user-centric communication participating in the development of the vision of “I-centric Communications.” He has been involved in a number of projects, which were related to Human-Machine-Interaction, UMTS/VHE, personalization and user profiling. Recent research activities cover adaptive services in the area of autonomic communications. Stephan is Director of competence center FAME at Fraunhofer Institute FOKUS and Assistant Professor at Technische Universität Berlin. He gives lectures in Mobile Telecommunication Systems, Advanced Communication Systems at the Technische Universität Berlin.

**Cássia Trojahn** is post-doctoral Fellow at INRIA (Institut National de Recherche en Informatique et Automatique) Grenoble Rhône-Alpes, France, since 2009. She received a PhD from Universidade de Évora, Portugal, in 2009. She developed a thesis about argumentation and negotiation approaches to combine different ontology matching techniques. She has a Master in Applied Computing by Universidade do Vale do Rio dos Sinos, Brazil. She is currently working on evaluation of ontology matching systems in the context of the European SEALS project. She is one of the responsible parties for the benchmark track of the Ontology Alignment Evaluation Campaign since 2009. Her research interests are agents argumentation, ontology matching, Semantic Web and social Web.

**Amanda Xu** is an Assistant Professor at the Collection Management Department of James E. Walker Library, Middle Tennessee State University in Murfreesboro, Tennessee. Her research interests include content modeling, integration, analysis, design, enhancement, and management at enterprise scale using Web as an infrastructure. As a practitioner, she has applied her research into the delivery of eight successful Information Systems for academic library communities over the past 15 years. She received her MS in Library of Information Science from University of Illinois at Urbana-Champaign (1992). She is currently a Master’s degree candidate (near completion) for Management and Systems at New York University. She has been trained and worked as LC serials cataloger, product designer, information architect, systems analyst, metadata indexer, content analyst, electronic resources cataloger, and most
recently, Information Technology Librarian for collection management for highly esteemed academic institutions, library consortium, and library online information service companies in Greater Boston, Washington DC, New York, and Nashville areas. She served as a committee member for LITA (Library Information Technology Association) and NASIG (North American Serials Interest Group), and has also been a member of ALA, LITA, and lately Association of College and Research Libraries (ACRL) since early ‘90s.

**Sharon Q. Yang** is an Associate Professor and Systems Librarian in Rider University, New Jersey, USA. Her responsibilities include teaching information literacy and EOP programs (Education Opportunity Program), administering the Library Integrated System, serving on committees, and participating in scholarly activities. Her research interests include citation analysis, informetrics, and library automation and systems. Sharon Q. Yang received her MS in 1988, CAL in 1990, and Ph.D in 1997, all in library and information science from Columbia University in New York. She has been working in the library automation field for 20 years. She has been an actively speaker in many national and international conferences and published many papers in peer-reviewed journals and conference proceedings. Currently she holds membership in American Library Association, Library Information Technology Association, Association of College & Research Libraries, Chinese Librarians Association, and New Jersey Library Association.
