About the Authors

EDITORS

Steve Clarke received a BSc in Economics from The University of Kingston Upon Hull, an MBA from the Putteridge Bury Management Centre, The University of Luton, and a PhD in human centred approaches to information systems development from Brunel University – all in the United Kingdom. He is Reader in Systems and Information Management at the University of Luton. His research interests include: social theory and information systems practice; strategic planning for information systems, and the impact of user involvement in information systems development. Major current research is focused on approaches to information systems strategy informed by critical social theory.

Brian Lehaney received his MSc in Operational Research from the London School of Economics. He has subsequently specialised in simulation and soft systems methodology, which are his current research interests. He is Principal Research Fellow in Systems and Operations Management at the University of Luton.

CONTRIBUTORS

Simon Bell is a Lecturer in Information Systems in the Systems Discipline, Centre for Complexity and Change at the Open University in the UK. Simon has spent the last fifteen years working as an academic researcher and consultant on scoping, developing, planning, implementing and evaluating IS projects in many different parts of the world. His books include Learning with Information Systems, Routledge, 1996; Rapid Information Systems Development: systems analysis and design in an imperfect world with Trevor Wood-Harper, McGraw-Hill, 1998 (second edi-

Elayne Coakes is a Senior Lecturer in Business Information Management at the Westminster Business School, University of Westminster. Her research interests lie in the sociotechnical aspects of information systems and in particular the contribution of stakeholders to the process of computer information systems development. As Vice Chair of the BCS Sociotechnical Group she is active in promoting this view of information systems development and is currently principal editor of a book of international contributions to this field, *The New SocioTech: Graffiti on the Long Wall*, due to be published early in 2000. She is also involved in a research group at her university, looking at Learning Organisations and Knowledge Management. She has published a number of conference papers and articles in journals such as *Information and Management, Management Decision*, as well as several chapters in books.

Jose Córdoba has a BSc in Computer Science from the University of Los Andes in Bogota, Colombia, and an MA in Management Systems from the University of Hull, UK. He is currently doing his PhD in the Hull University Business School. Jose worked for 6 years as a project manager, facilitating strategic information technology planning processes. He is now conducting research into the development and application of systems thinking to improve the use of information technology in the Colombian education system.

Elizabeth Davidson is an assistant professor in the Department of Decisions Sciences at the University of Hawaii, Manoa. Her research and teaching interests include social cognitive aspects of information systems development in organizations, the implementation of clinical information systems, and organizational implications of technology implementation.

M. Gordon Hunter is currently an Associate Professor in the Department of Information Systems at St. Francis Xavier University, Antigonish, Nova Scotia, Canada. He has previously held academic positions at universities in Canada, USA, Hong Kong, and Singapore. He has a Bachelor of Commerce degree from the University of Saskatchewan in Saskatoon, Saskatchewan, Canada. He received his doctorate from Strathclyde Business School, University of Strathclyde in Glasgow, Scotland. Dr. Hunter has also obtained a Certified Management Accountant (CMA) designation from the Society of Management Accountants of Canada. He is a member of the British Computer Society and the Canadian Information Processing Society (CIPS), where he has obtained an Information Systems Professional (ISP) designation. He has extensive experience as a systems analyst and manager in industry and government organizations in Canada. Dr. Hunter has conducted seminar presentations in Canada, USA, Asia, New Zealand, Australia and Europe. His current research interests relate to the productivity of systems analysts with emphasis upon the personnel component, including cross-cultural aspects and the effective development of information systems.
Bill Hutchinson is the Associate Head of the School of Management Information Systems at Edith Cowan University in Perth, Western Australia. He has over 20 years information systems experience in education, government, the oil industry, and the finance sector. His academic interests are information operations, project management, system failures, and methodologies.

Jonathan K. Lazar is an Assistant Professor in the Department of Computer and Information Sciences in the College of Science and Mathematics at Towson University. Dr. Lazar earned his Ph.D. in Information Systems at the University of Maryland. His research focuses on human factors in the Internet environment. Specifically, Dr. Lazar is interested in user error, interface design, user satisfaction, end-user training, and requirements determination for distributed populations. Dr. Lazar has taught courses on System Analysis, System Design, Human-Computer Interaction, Web Development, Online Communities, Database Management, and Decision Support Systems. Dr. Lazar is also interested in integrating community service with courses and research in Information Systems.

Gill Mallalieu is senior Research Fellow at the University of Sunderland, working on the RAMESES project funded by the UK Engineering and Physical Sciences Research Council under the Systems Engineering for Business Process Change. Research interests are in requirements engineering, process modelling and socio-technical systems analysis.

Gerald Midgley has a BA(hons) in Psychology from the University of London, and an M.Phil. and Ph.D. in Systems Science from City University. For several years he ran his own business conducting evaluations of services for people with disabilities. After this, he worked in the Rehabilitation Resource Centre at City University for a couple of years before moving to the University of Hull. He is now the Director of the Centre for Systems Studies in the Hull University Business School. Gerald has published widely on systems methodology and community operational research, and is the author of the forthcoming book “Systemic Intervention: Philosophy, Methodology and Practice” (to be published by Plenum/Kluwer in the year 2000).

Joline Morrison is an assistant professor in the Management Information Systems department at the University of Wisconsin-Eau Claire. She received her Ph.D. in MIS from the University of Arizona in 1992. Her current research interests include group and organizational collaboration and knowledge management. She has published widely in these areas, and has also written multiple textbooks on database and client server programming.

Dr. Anthony F. Norcio is a Professor of Information Systems at the University of Maryland Baltimore County (UMBC). Dr. Norcio is also the Co-Director (with Dr. Marion J. Ball) of the World Health Organization (WHO)/Pan American Health Organization (PAHO) Collaborating Center for Health Informatics. Dr. Norcio serves as an external advisor to the PAHO and to the Inter-American Development
Bank (IDB) on computing and health informatics. He is an invited member of the PAHO/IDB Health Task Force of the Informatics 2000 Initiative for Latin America and the Caribbean. He also currently serves as a Computer Scientist at the Artificial Intelligence Center of the Naval Research Laboratory; and he has also served as the Scientific Advisor to the Mathematical, Computer, and Information Sciences Division of the Office of Naval Research.

**Ruth V. Small, Ph.D.** is Associate Professor in the School of Information Studies at Syracuse University. Her research focuses on the application of motivation theories to a variety of information-based learning, work, and virtual environments. Ruth has published widely in this area, including over 50 articles and three books (two on Web site evaluation). She has won several honours for her research and teaching including Syracuse University’s Faculty Technology Associate and Information Studies “Professor of the Year.” Ruth’s PhD is in Instructional Design, Development and Evaluation. She is a national and international consultant and speaker on motivation and evaluation.

**Lorraine Warren** is currently a Senior Lecturer in the Department of Business Strategy at the Lincoln School of Management. She has acted as consultant to a number of public sector and commercial organisations and in doing so has assisted in the management and resolution of complex problems. Her research specialism centres around systemic approaches to organisational interventions, with a bias towards those involving success factors for Information Systems. She has taught extensively in the fields of Organisational Behaviour, History of Management Thought, Operations Management, Systems Thinking, Information Systems and Philosophy of Research. She has lectured in the UK, Spain, Australia, Israel, Hong Kong, Singapore, Japan and Dubai. She has presented papers at many national and international conferences, and has published extensively in the areas associated with her teaching and consultancy activities. She has been a Visiting Scholar at Edith Cowan University in Perth and the Tokyo Institute of Technology in Japan. She is professionally active, and is a member of the Operational Research Society and the UK Academy for Information Systems (Treasurer for the Northern Regional Area).

**Andrew Wenn** is a lecturer in the Department of Information Systems at Victoria University of Technology, Melbourne and is currently undertaking his PhD in the History and Philosophy of Science Department at the University of Melbourne. His main field of research is nexus between the social and the technical particularly in the area of global information systems. This chapter is the result of an as yet incomplete study into the way the users, designers and technology are co-constituting one particular information service. Andrew has also published in the area of internet based education.

**Dianne Willis** is a Senior Lecturer in Information and Communications Technology at Doncaster College. Her research interests include sociotechnical issues surrounding the implementation of new technology in business and social
environments and gender issues in the field of ICT, particularly factors influencing participation levels in both academic and practical fields. As a member of the BCS Sociotechnical group, she has co-edited a book on international aspects of information systems development and is currently researching in the field of Computer Mediated Communication.

**Vance Wilson** is an Assistant Professor of Management Information Systems at the University of Wisconsin–Eau Claire. He researches organizational aspects of human-computer interaction, with special interests in computer-mediated communication, decisional guidance, and computer support for software development teams.
