About the Contributors

**Keng Siau** is the E. J. Faulkner Chair Professor of Management Information Systems (MIS) and Full Professor of Management at the University of Nebraska-Lincoln (UNL). He is the Director of the UNL-IBM Global Innovation Hub, editor-in-chief of the *Journal of Database Management*, North America Regional editor of the *Requirements Engineering Journal*, and co-editor-in-chief of the Advances in Database Research series. He received his PhD degree from the University of British Columbia (UBC). His master’s and bachelor’s degrees are in computer and information sciences from the National University of Singapore. Professor Siau has over 250 academic publications. He has published more than 100 refereed journal articles, and these articles have appeared in journals such as *Management Information Systems Quarterly*, *Journal of the Association for Information Systems*, *Communications of the ACM, IEEE Computer, Information Systems Journal*, *Journal of Strategic Information Systems*, *Information Systems, ACM SIGMIS’s Database, IEEE Transactions on Systems, Man, and Cybernetics, IEEE Transactions on Professional Communication, IEEE Transactions on Information Technology in Biomedicine, IEICE Transactions on Information and Systems, Data and Knowledge Engineering, Journal of Information Technology, International Journal of Human-Computer Studies*, and others. He served as the organizing and program chairs of the International Conference on Evaluation of Modeling Methods in Systems Analysis and Design (EMMSAD) (1996 – 2005). He also served on the organizing committees of AMCIS 2005, ER 2006, AMCIS 2007, EuroSIGSAND 2007, EuroSIGSAND 2008, and ICMB 2009. He received the International Federation for Information Processing (IFIP) Outstanding Service Award in 2006, and the IBM Faculty Award in 2006 and 2008.

**Dr. Yuan** An received a PhD degree from the University of Toronto in 2007 in Computer Science. He has been an assistant professor in the College of Information Science and Technology at Drexel University since that year. He has research interests in semantic technologies for information integration, information modeling including ontology design, schema/ontology mapping, and the Semantic Web. Dr. An designed and developed the MAPONTO tool for creating semantic mappings between ontologies and database schemas. Dr. An also has 10 years working experience in the Information Technology industry. As a principal developer and team leader, he designed and led the development of various management information systems. Dr. An has a Master’s degree in Computer Science from Dalhousie University, Canada. He also earned a Master’s degree in Electrical Engineering from Tsinghua University, China, in 1989 and a Bachelor’s degree in Electrical Engineering from the same Chinese university in 1987.
Haldun Aytug is an Associate Professor of Information Systems and Operations Management at the Warrington College of Business, University of Florida. He has a B.S. degree in industrial and engineering and a Ph.D. in business. His research interests include machine learning, theory of genetic algorithms, capacity modeling for data networks and scheduling. He is a member of INFORMS and ACM.

Jengchung V. Chen (Ph.D. in CIS, University of Hawaii) is Associate Professor of International Management at National Cheng Kung University, Taiwan. His research interests are information ethics (e.g. trust and privacy), project management, electronic commerce (e.g. online auction and user behavior), and service quality. He has published articles in refereed journals such as: Information & Management, Decision Support Systems, CyberPsychology & Behavior, Journal of Computer Information Systems, Information & Software Technology, Industrial Management & Data System, and others. He is currently the President-Elect of the International Chinese Information Systems Association (ICISA) and VP-Publication in the Association for Chinese Management Educators (ACME).

Kuanchin Chen is an Associate Professor of Computer Information Systems at Department of Business Information Systems, Western Michigan University. Dr. Chen’s research interests include electronic business, privacy & security, online behavioral issues (e.g., interactivity, dependency, and tracking/protection), Internet frauds, usability, data mining, and human computer interactions. He has published articles in journals and other academic publication outlets, including Decision Support Systems, IEEE Transactions on Systems, Man, and Cybernetics, Information & Management, Communications of the Association for Information Systems (CAIS), IEEE Transactions on Education, Journal of Computer Information Systems and many others. He currently serves on the editorial or advisory boards of Information Resources Management Journal, International Journal of Information Systems and Change Management, Journal of Website Promotion, Communications of the ICISA, IGI Global (formerly Idea Group), eWeek, and CMP.

Liqiang Chen is an MIS Lecturer in the Department of Management at the University of Nebraska-Lincoln. He received his BSc in Meteorology from Nanjing University of Information Science & Technology in China, and both his MSc in Computer Science and PhD in Management Information Systems from the University of Nebraska-Lincoln. His research interest includes online consumer behaviour and human-computer interaction.

Yon Dohn Chung received his BS degrees in computer science from Korea University, Seoul, Korea, in 1994, and MS and PhD degrees in computer science from KAIST, Daejeon, Korea, in 1996 and 2000, respectively. In 2006, he joined the faculty of the Department of Computer Science and Engineering, Korea University, Seoul, Korea. His research interests include broadcast databases, sensor networks, MANET/VANET, XML databases, mobile computing and database systems. He is a member of the ACM and IEEE computer Society.

David DeWester is a Ph.D. student at University of Nebraska–Lincoln. He received his B.S. in Mathematics from Colorado State University and his M.A. in Mathematics from Central Michigan University, where his thesis was nominated for Best Thesis of the Year. After moving to Nebraska, he received an M.S. in Computer Science, an M.B.A. with specialization in International Business, and
an M.A. in Business with a specialization in Management Information Systems. His research interests
include human-computer interaction, computer applications in cognitive psychology, statistics, and 3-D
virtual worlds. He has several years of work experience in information technology related areas from
help desk support to e-commerce consulting.

Dov Dori is information and systems engineering Professor at the Faculty of Industrial Engineering
and Management, Technion, Israel Institute of Technology, and Research Affiliate with the Engineering
Systems Division at Massachusetts Institute of Technology, where he was Visiting Professor during
1999-2001 and 2008-2009. His research interests include conceptual modeling of complex systems,
systems architecture and design, and software and information engineering. Prof. Dori has invented
and developed Object-Process Methodology (OPM), presented in his 2002 book. He won the Technion
Klein Research Award for OPM, the Hershel Rich Innovation Award for OPCAT, the OPM supporting
software, and the Dudi Ben Aharon Research Award for Document Image Understanding. Prof. Dori has
authored over 100 journal publications and book chapters. He is Fellow of the International Association
for Pattern Recognition and Senior Member of IEEE and ACM.

Brenda Eschenbrenner is completing her Ph.D. in Management Information Systems, with concentra-
tions in accounting, information technology, and human cognition, at the University of Nebraska–Lincoln.
She is joining the faculty of University of Nebraska–Kearney in 2010. Her research interests include
virtual worlds, human acceptance and use of current and emerging technologies, factors contributing
to information system proficiency, and technology applications in education and training. She has over
10 years of work experience including management positions with a former Fortune 500 company and
involvement with system implementation efforts.

Ling He is an Assistant Professor of Information Systems at the Cameron School of Business, Univer-
sity of North Carolina Wilmington. Her degrees include B. Economics from University of International
Business and Economics, M.S. and Ph.D. (Decision Information Systems) from the University of Florida.
Dr He has research interests in database management systems, information security, E-commerce, PAC
learning theory, online auction and online review. Her publications have appeared in Decision Support
Systems and Journal on Computing.

Weiyin Hong is an Associate Professor in the Department of Management Information Systems at
the University of Nevada, Las Vegas. She received her BSc in Management Information Systems from
Fudan University, China, and her PhD in Information and Systems Management from the Hong Kong
University of Science and Technology. Her research interest includes user acceptance of emerging tech-
nologies and human-computer interaction. Her work has appeared in Information Systems Research,
Human-Computer Studies, and Journal of the American Society for Information Science and Technology.
She is a Past Chair of Association for Information Systems Special Interest Group on Human-Computer
Interaction (SIGHCI).

Xiaohua (Tony) Hu is currently an associate professor and the founding director of the data mining
and bioinformatics lab at the College of Information Science and Technology at Drexel University. His
current research interests are in biomedical literature data mining, bioinformatics, text mining, semantic Web mining and reasoning, rough set theory and application, information extraction, and information retrieval. He has published more than 160 peer-reviewed research papers in various journals, conferences and books such as various IEEE/ACM Transactions. He has received a few prestigious awards including the 2005 National Science Foundation (NSF) Career award, the best paper award at the 2007 International Conference on Artificial Intelligence, the best paper award at the 2004 IEEE Symposium on Computational Intelligence in Bioinformatics and Computational Biology. He serves as the IEEE Computer Society Bioinformatics and Biomedicine Steering Committee Chair, and the IEEE Computational Intelligence Society Granular Computing Technical Committee Chair (2007-2008).

Gary J. Koehler is the John B. Higdon Eminent Scholar of Management Information Systems at the University of Florida. He received his Ph. D. from Purdue University in 1974. He has held academic positions at Northwestern University and Purdue University and between 1979-1987 was a cofounder and CEO of a high-tech company which grew to over 260 employees during that period. His research interests are in areas formed by the intersection of the Operations Research, Artificial Intelligence and Information Systems areas and include such areas as genetic algorithm theory, machine learning, e-commerce, quantum computing and decision support systems.

Santhosh Kumaran works in IBM Software Group as the Senior Manager of Banking Solutions and the CTO of Banking Industry Framework. In this role, he leads a worldwide technical team of architects for the Banking industry with focus on the solution frameworks, serves as a member of Industry Framework Architecture Board, and works with clients worldwide on model driven business transformation. In 2009, he was appointed as a Senior Technical Staff Member (STSM) and a Master Inventor of IBM Corporation. He has published over 50 technical papers, filed over 30 patents, and won numerous awards including the Daniel H. Wagner Prize, and several Outstanding Technical Achievement Awards from IBM. He holds a PhD in Computer Science from Oregon State University.

Denis M. S. Lee is Professor of Information Systems and Operations Management in the Sawyer Business School at Suffolk University, USA. He received his Ph.D. from the Sloan School of Management at MIT. His research interests are related to the management of technology, information systems, and technical professionals. His publications have appeared in *MIS Quarterly, Academy of Management Journal, Management Science, IEEE Transactions on Engineering Management, Engineering Management Journal*, and the *Journal of Engineering and Technology Management*. He has been the recipient of a number of competitive research grants from the National Science Foundation and industry for over two decades.

Hong-Hee Lee is a Full-time Lecturer at Dankook University in Korea. He received his BA from Kyung Hee University in Korea, and his MA and PhD from the Department of Management at the University of Nebraska-Lincoln. He has worked as Deputy General Manager at Daegu Digital Industry Promotion Agency in Korea. His research areas are ERP, HCI, and SCM.

Yang W. Lee is Associate Professor of Information Operations and Analysis Group, College of Business School at Northeastern University. Her research focuses on information quality, IT-mediated

**Min Ling** received her PhD in management information systems from the University of Nebraska-Lincoln. Her research areas include website personalization, virtual collaboration, and knowledge management. Dr. Ling has published papers in *Journal of Computer Information System* and *International Journal of Electronic Business*.

**Rong Liu** is a Research Scientist at IBM T. J. Watson Research Center. She received her Ph. D. in Business Administration from The Pennsylvania State University. Her research interest includes business process management, workflow systems, supply chain management, and model-driven business transformation.

**Yuan (Yoanna) Long** is an assistant professor at Hasan School of Business of Colorado State University-Pueblo. Her current research focuses on virtual collaboration, social network, knowledge management, and open source software development. Dr. Long has published papers in *Journal of Computer Information Systems, Journal of Global Information Management, Industrial Management & Data Systems*, and *Annals of Cases on Information Technology*.

**Daniel Moody** is a consultant in data management. He has held several academic positions at universities throughout Australia and Europe. His research interests include conceptual modeling, software quality, data warehousing and medical informatics.

**Fiona Fui-Hoon Nah** is an Associate Professor of Management Information Systems (MIS) at the University of Nebraska–Lincoln. Her research interests include human-computer interaction, 3-D virtual worlds, computer-supported collaborative work, knowledge-based and decision support systems, and mobile and ubiquitous commerce. She has published her research in journals such as *Journal of the Association for Information Systems, Communications of the Association for Information Systems, Communications of the ACM, IEEE Transactions on Education, International Journal of Human-Computer Studies, Journal of Strategic Information Systems, Journal of Information Technology*, among others. Dr. Nah received the University of Nebraska–Lincoln College of Business Administration Distinguished Teaching Award in 2001, the Best Paper Award at the 2003 Pre-ICIS HCI Research in MIS Workshop, the Outstanding Service Award from the Association for Information Systems (AIS) Special Interest Group on Human-Computer Interaction (SIGHCI) in 2005, and the University of Nebraska–Lincoln College of Business Administration Research Award in 2006. She is an Associate Editor of *AIS Transactions on Human-Computer Interaction, International Journal of Human-Computer Studies, and Journal of Electronic Commerce Research*. She also serves on the Editorial Board of more than ten other MIS journals. She has served as a guest editor for various special issues including *Journal of Management Information Systems, International Journal of Human-Computer Studies, International Journal of*
About the Contributors

Human-Computer Interaction, and IEEE Transactions on Education. Dr. Nah is a co-Founder and Past Chair of AIS SIGHCI, and is a featured volunteer for Association for Information Systems (June 2008). She received her Ph.D. in MIS from the University of British Columbia, and her M.S. and B.S. (Honors) in Computer and Information Sciences from the National University of Singapore. She was previously on the faculty of School of Computing, National University of Singapore, and the Krannert School of Management, Purdue University.

Jasmina Nuredini is a consultant in data management. She was previously a research assistant at the University of Melbourne.

Chang-Sup Park received his BS, MS, and PhD degrees in computer science from KAIST, Daejeon, Korea, in 1995, 1997, and 2002, respectively. From 2002 to 2005, he worked for the R&D Center of KT Corporation in Seoul, Korea. In 2005, he joined the faculty of the University of Suwon, Korea. He joined the Department of Computer Science at Dongduk Women’s University in 2009, where currently he is an assistant professor. His research interests include wireless information systems, XML data management, semantic Web, and information retrieval. He is a member of the KIISE.

Jun Pyo Park received his BS degree in computer science from Dongguk University, Seoul, Korea, in 2005, and MS degree in computer science from Korea University, Seoul, Korea, in 2009. In 2009, he entered the PhD course of computer science at Korea University, where currently he is PhD candidate. His research interests include XML data management, wireless broadcast system and mobile computing.

So Ra Park is a Ph.D. student at the University of Nebraska–Lincoln. Her research interests are in 3-D virtual worlds, organizational blogging, and Web 2.0.

Evaggelia Pitoura received her B.Sc. from the University of Patras, Greece in 1990 and her M.Sc. and Ph.D. in computer science from Purdue University in 1993 and 1995, respectively. Since June 2005, she is an associate professor at the Department of Computer Science of the University of Ioannina, Greece where she leads the distributed data management group. Her publications include more than 70 articles in international journals and conferences and a book on mobile computing. She has also co-authored two tutorials on mobile computing for IEEE ICDE 2000 and 2003. She is recipient of the best paper award of IEEE ICDE 1999 and two “Recognition of Service Awards” from ACM.

Iris Reinhartz-Berger is a faculty member at the Department of Management Information Systems, Haifa University, Israel. She received her BSc degree in applied mathematics and computer science from the Technion, Israel Institute of Technology in 1994. She obtained a MSc degree in 1999 and a PhD in 2003 in information management engineering from the Technion, Israel Institute of Technology. Her research interests include domain engineering, conceptual modeling, software analysis and design, development processes, and methodologies.

William Ross (PhD, Industrial/Organizational Psychology, University of Illinois) is Professor of Management at the University of Wisconsin – La Crosse. He publishes articles on psychological factors related to the use of – and reactions to – business technology. He writes about specific topics such

Graeme Shanks is Professor in the Department of Information Systems at the University of Melbourne. His research interests include conceptual modeling, data quality and the impact of business analytics systems on firm performance. He was recently awarded an Australian Professorial Fellowship from the Australian Research Council.

Galia Shlezinger received her BSc degree in 2003 from the Faculty of computer science, Technion, Israel Institute of Technology and her MSc degree in 2008 from the Faculty of Industrial Engineering and Management, Technion, Israel Institute of Technology. The work reported in this paper is part of her master degree. Her research interests include system architecture, system design, and development methodologies.

Il-Yeol Song is a professor of the College of Information Science and Technology at Drexel University. He received the M.S. and Ph.D. degrees from the Department of Computer Science, Louisiana State University, in 1984 and 1988, respectively. His research interests include conceptual modeling, object-oriented analysis & design, data warehousing, and bioinformatics. He has published over 160 peer-reviewed papers. He has won three teaching awards from Drexel University. He is a Co-Editor-in-Chief of Journal of Computing Science and Engineering (JCSE). He is also associate editors for many prestigious journals including International Journal of E-Business Research as well as on the Editorial Board of Data & Knowledge Engineering (DKE). Dr. Song is a steering committee member of several conferences including International Conference on Conceptual Modeling. He served as a program/general chair of 18 international conferences/workshops. He is also currently serving as the General co-Chair for International Conference on Information and Knowledge Management 2009.

Konstantinos Stamkopoulos received his Bachelor’s degree from the Department of Computer Science of the University of Ioannina, Greece in 2004 and his MSc in Computer Science from the same department in 2006. His research interests include web services, especially in their interaction with databases.

Daniel Tobin is a marketing manager at the University of Melbourne. He was previously a data management consultant and a research assistant at the University of Melbourne.

Panos Vassiliadis received his PhD from the National Technical University of Athens in 2000. He joined the Department of Computer Science of the University of Ioannina in 2002. Currently, Dr. Vassiliadis is also a member of the Distributed Management of Data (DMOD) Laboratory (http://www.dmod.cs.uoi.gr/). His research interests include data warehousing, web services and database design and modeling. Dr. Vassiliadis has published more than 25 papers in refereed journals and international conferences in the above areas.
Weiquan Wang is an assistant professor in the Department of Information Systems at the College of Business, City University of Hong Kong. He obtained his PhD in Management Information Systems from the Sauder School of Business, the University of British Columbia. His research interests include online consumer decision support, human-computer interaction, and e-commerce.

Ron Weber is Dean of the Faculty of Information Technology, Monash University. His primary research interests lie in the ontological foundations of information systems. He is a past president of the Association for Information Systems and a past editor-in-chief of the MIS Quarterly. In 2000, he won the Australian Prime Minister’s Award for University Teacher of the Year.

Frederick Y. Wu is Manager, Model-Driven Enterprise Solutions at the IBM T.J. Watson Research Center. He has worked in the area of electronic commerce and business integration for the past fourteen years. Recently he has focused on business operations modeling and transformation using the business entity concept. Dr. Wu holds the S.B., S.M., and Ph.D. degrees from the Massachusetts Institute of Technology.

Yurong Yao is Assistant Professor of Information Systems and Operations Management in the Sawyer business School at Suffolk University. Her research interests are the adoption of information systems, IS outsourcing and electronic government. Her publications have appeared in European Journal of Information Systems, Communications of the ACM, Database for Advances in Information Systems, Journal of Computer Information System and IEEE IT professionals. She received her Ph.D. from Louisiana State University.

Apostolos Zarras received his B.Sc. in Computer Science in 1994 from the Computer Science Department, University of Crete. From the same department he received his M.Sc. in Distributed Systems and Computer Architecture. In 1999 he received his Ph.D. in Distributed Systems and Software Architecture from the University of Rennes I. From 2004 until now he holds a position at the Department of Computer Science of the University of Ioannina. Apostolos Zarras has published over 20 papers in international conferences, journals and magazines. He is currently a member of the IEEE computer society. His research interests include middleware, model-driven architecture development, quality analysis of software systems and pervasive computing.

Huimin Zhao is an Associate Professor of MIS at the Sheldon B. Lubar School of Business, University of Wisconsin–Milwaukee. He received his BE and ME in automation from Tsinghua University, China (1990 and 1993, respectively), and Ph.D. in MIS from The University of Arizona (2002). His current research interests are in the areas of data mining, data integration, and medical informatics. His research has been published in several journals, including Journal of Management Information Systems, Communications of the ACM, IEEE Transactions on Knowledge and Data Engineering, IEEE Transactions on Systems, Man, and Cybernetics, Information Systems, Data and Knowledge Engineering, Decision Support Systems, and Journal of Database Management. He was a co-chair of the Nineteenth Workshop on Information Technologies and Systems (WITS’09).
Yi Zhao is an M.Phil student in the Department of Information Systems at the College of Business, City University of Hong Kong. He obtained his bachelor’s degree in Information Management & Information System from Sun Yat-sen University, China. His research interests include e-commerce, virtual community, and virtual team.

Yan Zhu is currently an Associate Professor in the Department of Management Science and Engineering at the School of Economics and Management, Tsinghua University. He received his PhD in engineering from Tsinghua University. His research interests include management information systems, e-business, virtual enterprises, project management, and intelligent systems and decision-making support systems.
