About the Contributors

**Felix B Tan** is Professor of Information Systems and Chair of Business Information Systems discipline at Auckland University of Technology (New Zealand). He serves as the Editor-in-Chief of the *Journal of Global Information Management*. He is on the Executive Council and is Fellow of the Information Resources Management Association. He was also on the Council of the Association for Information System between 2003-2005. Dr. Tan’s current research interests are in electronic commerce, global information management, business-IT alignment and the management of IT. Dr. Tan has published in *MIS Quarterly, Information & Management, IEEE Transactions on Engineering Management, IEEE Transactions on Personal Communications, Information Systems Journal, Journal of Information Technology, International Journal of Human-Computer Interaction, International Journal of Electronic Commerce*, as well as other journals and refereed conference proceedings. Dr. Tan has over 25 years experience in information systems management and consulting with large multinationals, as well as university teaching and research in Singapore, Canada and New Zealand.

***

**Said S. Al-Gahtani** is currently Professor of Computer Information Systems (CIS)/Management Information Systems (MIS) in the Department of Administrative Sciences at King Khalid University, Saudi Arabia. His research interests include IT Innovation and Diffusion, Information Technology Acceptance Modeling, End-User Computing, and Organizational Cross-Cultural Research, and his current research focuses on IT Acceptance Modeling, electronic commerce, and Internet issues. His work appears in *Information Resources Management Journal, IT for Development, Journal of Global Information Technology Management, Information & Management, Information Technology and People, and Journal of Global Information Management*.

**Norm Althouse** is a Senior Instructor of Business and Environment at the University of Calgary. His research interests include: team building, gender issues in the workplace, and managerial decision-making. He is active in the Academy of Management (Management Education Division) and has presented professional workshops at their conferences. He is the lead author on one of Canada’s premier introduction to business textbook, “The Future of Business”, currently in its 2nd edition that has been adopted by 19 Universities and Colleges in Canada.
**Dolores Añón Higón** is a Lecturer at the University of Valencia and research fellow at ERI-CES, Valencia, Spain. She received her M.Sc. and Ph.D. degrees from the University of Warwick, U.K. Her research interests include the internationalization of R&D, and the relationship between innovation, trade, information technology and productivity. She has published in *Industrial and Corporate Change, IEEE Transactions in Engineering Management, Information & Management, Journal of Global Information Management, Research Policy*, *World Economy*, and other journals.

**Nicholas Athanassiou** is an Associate Professor and Coordinator of International Business and Strategy at Northeastern University. He received his Ph.D. in International Business and Strategy from the University of South Carolina. His research interests focus on the international business capabilities of top management teams, on global innovation processes, and on knowledge acquisition and transfer issues. He has published numerous articles in publications such as the *Journal of International Business Studies, Strategic Management Review, and Management International Review*.

**Bijan Azad** is assistant professor at the Olayan School of Business, American University of Beirut. His research interests are on the organizational implementation of IT in the public sector, hospitals and private sector. He earned his Ph.D. and masters degrees from MIT, Cambridge, Massachusetts, U.S.A. Bijan Azad has over 20 years of experience in the systems integration industry before re-joining academe. His research has been published in *European Journal of Information Systems, Government Information Quarterly, Information Systems Journal, Journal of Strategic Information Systems, Academy of Management Best Paper Proceedings, America’s Conference on Information Systems Proceedings* as well as several practitioner publications. He was the Organizational Communication and Information Systems Division’s recipient of the Best Conference Paper Award at the Academy of Management 2008 Conference in Anaheim, California, USA.

**She-I Chang** is currently an associate professor at the Department of Accounting and Information Technology, CCU. Focusing on ERP systems, with a particular emphasis on the issues, challenges and benefits realization associated with ERP life cycle-wide implementation, management and support are his research interests. He also has interest in the application of qualitative research methodology. Currently at CCU, Taiwan, his extended research interest around the arena of information technology governance, information security management and computer auditing. He has presented and published his researches papers and articles at several IS conferences and journals.

**Hun Choi** is an assistant professor at the School of Business Administration, Catholic University of Busan, Korea. His research interests include end-user behaviors with ubiquitous computing services and design and evaluation of information technology systems.

**Gudrun Curri** joined the Faculty of Management at Dalhousie University as associate professor in 2000, and teaches organizational theory and design, organizational change, and international and intercultural management. In 2006 she introduced the Central East European Business Program for MBA students which includes a two-week study tour to CEE countries. Dr. Curri has published in national and international journals on issues relating to restructuring postsecondary systems and organizational change in universities in Australia, Germany and Canada. She has been an invited speaker at interna-
About the Contributors

tional and national conferences addressing the politics and challenges of organizational change. Prior to joining the Faculty of Management, Dr. Curri was a member of the senior university administration at two major Canadian Universities. Dr. Curri has joined the Strategic Networks Group, Inc., an international ICT consulting company in 2009 but will continue her relationship with Dalhousie University as an adjunct professor.

Samer Faraj is associate professor and holds the Canada Research Chair in Technology, Management & Healthcare at the Desautels Faculty of Management at McGill University. Previously, he was associate professor at the University of Maryland. His current research focuses on how IT transforms work and the provision of health care as well as the participation dynamics of online knowledge communities. His papers have been published in outlets such as: Management Science, Organization Science, MIS Quarterly, Information Systems Research and Journal of Applied Psychology. He is currently senior editor at Organization Science and serves on the editorial board of the Journal of AIS and Information and Organization.

Tony Feghali lectures in the Business Information and Decision Systems Track at the Olayan School of Business of the American University of Beirut. His research interests include the impact of electronic factors on social development and ethics. He is currently the director of the Entrepreneurship Initiative at the Olayan School of Business. Tony Feghali earned his PhD in 1991 from Purdue University.

Shirley Gregor is the foundation Professor of Information Systems at the Australian National University, Canberra, where she is a Director of the National Centre for Information Systems Research. Professor Gregor’s current research interests include the adoption and strategic use of information and communications technologies, intelligent systems and human-computer interface issues, and the theoretical foundations of information systems. Dr Gregor has led several large applied research projects funded by the Meat Research Corporation, the Department of Communications, Information Technology and the Arts, the Australian Research Council and AusAID. Professor Gregor spent a number of years in the computing industry in Australia and the United Kingdom before beginning an academic career. Dr Gregor’s publications include 4 edited books, 15 book chapters and over 100 papers in conferences and journals. Professor Gregor was made an Officer of the Order of Australia in the Queen’s Birthday Honour’s list in June 2005 for services as an educator and researcher in the field of information systems and in the development of applications for electronic commerce in the agribusiness sector.
**Jibao Gu** is an associate professor of School of Management and vice dean of Graduate School at the University of Science and Technology of China. He received his Ph.D. in management science from the University of Science and Technology of China in 2004. He has published 50 papers about strategic management and science & technology management in Chinese journals. He is currently engaged in the research about leadership management.

**Xunhua Guo** received his Ph.D. from Tsinghua University and is now an assistant professor of information systems at the School of Economics and Management, Tsinghua University. He has published in journals including *Communications of the ACM, Information Sciences, Information Systems Frontiers* and *Journal of Enterprise Information Management*. His research interests include information systems adoption, organizational change, and data management.

**Geoffrey S. Hubona** currently holds a faculty appointment as an Associate Professor of computer information systems in the J. Mack Robinson College of Business at Georgia State University in Atlanta, Georgia. His research interests include the user acceptance of information technologies and methodological issues relating to quantitative research in MIS. In addition to the Journal of Global Information Management, he has published journal articles in *MIS Quarterly, ACM Transactions on Computer-Human Interaction, IEEE Transactions on Systems, Man and Cybernetics, Part A: Systems and Humans, DATA BASE for Advances in Information Systems, Information & Management, Information Technology & People*, among others.

**Ahmed Imran** is an Information System (IS) researcher whose research interest largely emerged from his personal experience that includes ICT adoption in public sector, e-government and ICT in developing countries. Along with his special skill and interest in Information Technology he had a range of challenging experiences in IT field. His extensive experience as an instructor and IT manager is invaluable for research in understanding and providing rich insight of the context in least developed countries. His PhD research gained an in-depth understanding of impediments to e-government in an LDC environment. Part of Ahmed’s research has been successfully applied in Bangladesh through AusAID’s Public Sector Linkage Program (PSLP) as ‘eGovernment capacity building through knowledge transfer and best practice development in Bangladesh’, which also received Vice Chancellor’s award for Community outreach in 2010. Ahmed is actively involved in number of research projects at ANU and has published and presented his research in distinguished forums around the world.
About the Contributors

A. Kankanhalli is Associate Professor in the Department of Information Systems at the National University of Singapore (NUS). She obtained her B. Tech. from the Indian Institute of Technology Delhi, M.S. from the Rensselaer Polytechnic Institute and Ph.D. from NUS. She had visiting stints at the University of California Berkeley and Indian Institute of Science. Dr. Kankanhalli has considerable work experience in industrial R&D and has consulted for organizations including World Bank and Bosch SEA. She conducts research in the areas of knowledge management, IT enabled organizational forms, and IT in service sectors, supported by government and industry grants. Her work has appeared in the MIS Quarterly, Journal of Management Information Systems, IEEE Transactions on Engineering Management, Journal of AIS, International Journal of Human Computer Studies, Communications of the ACM, Decision Support Systems, and the International Conference on Information Systems among others. She serves on several IS conference committees and on the editorial boards of MIS Quarterly, IEEE Transactions on Engineering Management, and Information and Management, among others. Dr. Kankanhalli received the ACM SIGMIS 2003 Best Doctoral Dissertation award. She has been listed among the leading IS researchers globally and in the Asia Pacific region.

Jinwoo Kim is Professor of HCI at the School of Business, Yonsei University. He is also working as the director of Human Computer Interaction Lab and Human Centered Innovation Center at Yonsei University. His research has been focused on innovative design and evaluation of user experiences of digital products, services and contents. His current research topics include designing a tangible social media service for tween generation users, building intergeneration mobile communication system for silver generation users, and designing a microblog service for emerging generation users.

Hak-Jin Kim is Professor of Management Science at the School of Business, Yonsei University. He graduated from Tepper school of business, Carnegie Mellon University. His research interest is application of quantitative models and methods to various business areas. He was originally trained in Operations Research, and conducted research about logic-based methods in optimization, constraint programming, and combinatorial optimization. His current interest has been propagated to constructing a constraint language in the Semantic Web, risk management in grid computing using MAD method, analyzing social networks using the Semantic Web technology, and designing telecommunication networks.

Robert Konopaske is an Associate Professor of Management at Texas State University. He received his Ph.D. from the University of Houston. His research interests include emerging global assignments and other IHRM-related topics, global relocation and mobility, and travel stress. He has published numerous articles in such journals as Journal of Applied Psychology, Journal of Management Education, Management International Review, and Human Resource Management. Dr. Konopaske has co-authored several popular management textbooks and has held national leadership positions with the Academy of Management’s Human Resources Division.

Fujun Lai is an Associate Professor of Management at the University of Southern Mississippi. He received a Ph.D. from the City University of Hong Kong. His research interests include e-business, enterprise information systems, supply chain and logistics management, and quality management. He has published articles in International Journal of Production Research, Communications of the ACM, Journal of Business Research, and among others.
Albert L. Lederer is a Professor in management information systems at the Gatton College of the University of Kentucky. He holds BA in Psychology from the University of Cincinnati, an MS in Computer and Information Sciences from the Ohio State University, and a PhD in Industrial and Systems Engineering from Ohio State. He has over 10 years of industry experience in information systems. His research focuses on the management of information systems. His articles have appeared in *MIS Quarterly, Information Resources Management Journal, Journal of End User Computing, Journal of MIS, Information Systems Research, Decision Sciences*, and a variety of other academic and practitioner journals.

Pei-Ju Lee received her Master degree from the Department of Information Management at National Chung Cheng University, Taiwan.

Tomasz Lenartowicz is an Associate Professor of International Business at Florida Atlantic University. His research focuses on cross-cultural management, values, and practices. Since receiving his Ph.D. from the University of South Carolina, he has published numerous articles in journals such as the *Journal of International Business Studies, Management International Review*, and the *Journal of Marketing*.

Dong Li is a professor and the Chair of Management Science and Information Systems Department, Guanghua School of Management, Peking University. His current research focuses on IT leadership, IT strategy planning, and IT business performance. His work has appeared in academic journals and International Conferences, include *Communications of Association Information Systems, Computers in Human Behavior, Frontiers of Business Research in China* etc. Professor Dong Li is serving as vice Chair of China Association of Information Systems, and member of Editorial Board of China Journal of Information Systems.

Dahui Li is an Associate Professor of MIS at the University of Minnesota Duluth. He received his Ph.D in MIS from Texas Tech University. His current research focuses on business-to-consumer relationships, online community, and diffusion of technology innovation. He has had papers published in *Journal of the Association for Information Systems, Communications of the ACM, Decision Sciences, Decision Support Systems, International Journal of Electronic Commerce*, and among others.

Manlu Liu is an Assistant Professor in the E. Philip Saunders College of Business of Rochester Institute of Technology (RIT). She holds Ph.D. degree from Eller College of Management, University of Arizona. She holds MBA degree from the Hong Kong University of Science & Technology. She served as an Associate Professor in the School of Management at Zhejiang University in China. Her research interests include IT investment analysis, accounting information systems, service-oriented architecture and web services, open source/community source and virtual team. She has published research articles in SSCI-listed journals and major international conferences such as the *Journal of Global Information Management (JGIM), theInformation Conference on Information Systems (ICIS), the Americas Conference on Information Systems (AMCIS)*, and several others. She is on the editorial review boards of *Electronic Government: An International Journal (EG)*. She also served as a mini track co-chair for AMCIS in 2009, 2010 and 2011.
Jerry Luftman is the Executive Director of Graduate Information Systems Programs, and Distinguished Professor at Stevens Institute of Technology, Hoboken New Jersey. His career includes strategic positions in management (Information Technology, including being a CIO, and consultant), management consulting, Information Systems, and executive education. After a notable twenty-two year career with IBM, and over fifteen years at Stevens, Dr. Luftman’s experience combines the strengths of practitioner, consultant, and academic. His framework for assessing IT-business alignment maturity is considered key in helping companies around the world understand, define, and scope an appropriate strategic planning direction that leverages Information Technology. Dr. Luftman is the founder and leader of Stevens graduate IS Programs; one of the largest in the world. He created and teaches a popular end-of Masters course on managing the IT resource, which explores how to be a successful IT executive. Dr. Luftman’s newest book (one of thirteen) “Managing Information Technology Resources”, has surpassed his initial best seller “Competing in the Information Age” which is still selling strong around the globe. His active membership in SIM includes being the VP of Academic Affairs for the SIM Executive Board. His advice is frequently requested as an executive mentor.

Jian Ma is a Professor in the Department of Information Systems, City University of Hong Kong. Prior to that, he was a Lecturer in the School of Computer Science and Engineering, the University of New South Wales (UNSW). He is an author/co-author of three books, 50 conference papers and over 50 refereed articles in international journals including *IEEE Trans. on Systems, Men and Cybernetics, IEEE Trans. on Engineering Management, Journal of Management Information Systems, Information and Management, and Decision Support Systems*, etc.

Mark Meckler is an Associate Professor of Management at the University of Portland. He conducts research in three main areas of management. His strategy and innovation work is focused upon organizational knowledge and the cognitive issues impacting organizational knowledge flows, strategy implementation and innovation; his organization theory research is on the relationships between events, socially constructed theories, truth and knowledge and the impact these relationships have upon the scientific status of organization theory. Finally, his work on behavioral aspects of strategy implementation focuses on the physiological contract and motivation at work. Since receiving his Ph.D. from Florida Atlantic University in 2001, he has published in journals such as *Organization Studies*, the *Journal of Business Ethics* and the *Journal of Management Inquiry*.

Jie Mein Goh is a Ph.D. candidate at the Robert H. Smith School of Business, University of Maryland, College Park. Her current research interests center on health IT and strategic value of IT. She has published in Journal of Strategic Information Systems, and has presented at a variety of national and international conferences such as Academy of Management and INFORMS. Prior to her Ph.D. program, she earned her Masters and Bachelor’s degree with First Class Honors in Computer and Information Sciences from the National University of Singapore.
Mark E. Mendenhall is the J. Burton Friesen Chair of Excellence in Business Leadership at the University of Tennessee-Chattanooga. His research interests include selecting and developing global leaders and expatriates in multinational corporations, managing human resources and sociocultural processes in mergers and acquisitions, and the implications of nonlinear systems theory for organizational change effectiveness. He has published a number of influential book chapters, books, and articles in journals such as the *Academy of Management Review*, the *Journal of International Business Studies*, and *Human Resource Management*.

Dinesh A. Mirchandani is an Associate Professor of Information Systems in the College of Business Administration at the University of Missouri St. Louis. He received a Ph.D. in Business Administration (MIS) from the University of Kentucky, an M.S in Electrical Engineering from Purdue University, and a Bachelor's Degree in Electronics Engineering (with honors) from the University of Bombay. His research interests include information systems planning and electronic business. His papers have been published in such academic journals as *Communications of the ACM, Omega, Information & Management, Journal of Organizational Computing and Electronic Commerce, International Journal of Electronic Commerce*, and *Information Systems Frontiers* among others.

Andrew A. Mogaji is a professor in the Department of Psychology at Benue State University, Nigeria. Topics in his publications include comparative management, education, and other areas of applied psychology.

Trevor T. Moores is an Associate Professor of Management Information Systems at the University of Nevada, Las Vegas. He received a B.A. in Combined Studies (Arts), majoring in Philosophy and Psychology, from Sunderland Polytechnic (UK), an M.Sc. in Intelligent Knowledge Based Systems from the University of Essex (UK), and a Ph.D. from the University of Aston (UK). His research interests include software measurement, software piracy, IS/IT ethics, self-efficacy, and issues of online trust. His work has appeared in *MIS Quarterly, Communications of the ACM, DATA BASE, European Journal of Information Systems, IEEE Transactions on Knowledge and Data Engineering*, and *Information & Management*.

L. G. Pee is an Assistant Professor in the Graduate School of Decision Science and Technology at the Tokyo Institute of Technology. She received her Bachelor in Computing and Ph.D. in Information Systems (IS) from the National University of Singapore. Her research interests are in knowledge management, adoption of emerging technology, and perceived security and risks. Her work has been published in journals such as *Information & Management, Journal of the Association for Information Systems*, and *IEEE Transactions on Engineering Management* and in proceedings of conferences such as the International Conference on Information Systems (ICIS) and Pacific Asia Conference on Information Systems (PACIS). Dr. Pee received the Best Paper Award of PACIS 2010.

Mark F. Peterson is the Internet Coast Adams Professor of Management and International Business at Florida Atlantic University. His principal interests are in questions of how culture and international relations affect the way organizations should be managed. He has published over 80 articles and chapters, a similar number of conference papers, and several books. Specific topics in his writings include
the role different parties play in decision making in organizations throughout the world, the effects that culture has on the role stresses that managers experience, the way immigrant entrepreneur communities operate, and the way that intercultural relationships in multicultural teams and across hierarchical levels should function. Since receiving his Ph.D. from the University of Michigan in 1979, Prof. Peterson has held faculty positions at Wayne State University, the University of Miami, Texas Tech University and Florida Atlantic University.

**Julie I. A. Rowney** is a Professor in the Human Resources and Organizational Dynamics area at the University of Calgary, where she received her Ph.D. in psychology. She has received many awards and grants including a Killam Research Fellowship (1999), the Macleod Dixon International Achievement Award, the President’s Faculty International Achievement Award (2004), the Alberta Centennial Award for Human Rights and Multiculturalism (2005), and she was named one of the top 40 scholars by the University of Calgary (2006). She has published research in numerous journals including the *Journal of International Management* and the *Women in Management Review*.

**Wei Sha** is an assistant professor for Department of Computer Science-Information Systems at Pittsburg State University. He received his doctorate degree from the University of Arkansas majoring in Information Systems. His dissertation is about the examination of the influence of web site design features on people’s behavioral intentions in business-to-consumer ecommerce. Dr. Sha has published articles at Electronic Markets, Journal of Business and Leadership, Issues in Information Systems and conference proceedings. Dr. Sha is a member of the Association for Information Systems, the Decision Science Institute and International Association for Computer Information Systems.

**Farid Shirazi** is a Senior Researcher at Institute for Innovation and Technology Management (IITM) and Assistant Professor at Ted Rogers School of Information Technology Management, Ryerson University, Toronto, Canada. His research focuses mainly on the impact of ICTs on social and economic development within the context of developing countries. His research interests include also the impact of ICTs on environmental sustainability as well as the ethical and security perspectives associated with the introduction and use of ICTs in particular the e-government strategies. He has published in several journals and conference proceedings including LNCS book chapters; Associations for Information Systems; Electronic Journal of Information Systems in Developing Countries; Journal of Telematics & Informatics; Journal of Information, Communication & Ethics in Society; Journal of Global Information Management (JGIM) and Journal of Information & Management (I&M).

**Stephanie J. Thomason** is Associate Dean and Assistant Professor of Management at the University of Tampa. Since receiving her doctoral degree in 2007, Stephanie Thomason has published articles in journals such as the *International Journal of Selection and Assessment*, the *Journal of Cross-Cultural Psychology*, and the *International Journal of Innovation Management*. Her research interests include human resource selection and appraisal, cross-cultural differences in social structures, values and practices, and factors that relate to successful competition in small businesses.
Wen Tian is currently a Ph.D. candidate in Business and Management Team, USTC-CityU Joint Advanced Research Center. She received her Bachelor’s degree in Department of Management Science, School of Management, University of Science and Technology of China in 2006. Her research interests include Knowledge Management, Social Network, Virtual Community and Business Intelligent applications.

Douglas R. Vogel is Chair Professor of Information Systems at the City University of Hong Kong and an Association for Information Systems (AIS) Fellow. He received his Ph.D. in Information Systems from the University of Minnesota in 1986. Professor Vogel has published widely and directed extensive research on group support systems, knowledge management and technology support for education. He has recently been recognized as the most cited IS author in Asia-Pacific. He is currently engaged in introducing mobile device and virtual world support for collaborative applications in educational systems. Additional detail can be found at http://www.is.cityu.edu.hk/staff/isdoug/cv/.

Jian Wang is a Professor of International Business at the University of International Business and Economics, China. His research interests include e-business, international business, and international trade law and practice. He is the Director of the International Business Bridge (IBB). He has extensively published in the areas of international business, electronic business, and others.

Wayne Wei Huang is Professor of Information Systems at College of Business, Ohio University, and Fellow of Harvard University, USA. He has worked full-time in research universities worldwide, including in Australia (University of New South Wales), Hong Kong, Singapore, and USA (Harvard University). Huang has had more than 20 years of full-time teaching experience in universities as well as a few years of IT industrial working experience. His research combines both quantitative and qualitative research methodologies. He has published more than 120 refereed research papers in international journals, books, and conference proceedings, including top-tier international MIS/IS journals such as IEEE Transactions on Systems, Man, and Cybernetics; Journal of Management Information Systems (JMIS); MIS Quarterly (MISQ); Communications of ACM (CACM); IEEE Transactions on Professional Communication; Information & Management (I&M); Decision Support Systems (DSS); ACM Transaction on Information Technology (ACM TOIT); and European Journal of Information Systems (EJIS).

Elizabeth White Baker is currently an Assistant Professor in the Department of Economics and Business, Virginia Military Institute, Lexington, VA. Her current research interests include examining the influence of individual beliefs and characteristics on the use of information technology. She also studies strategic decision systems and the technology impact on mergers and acquisitions. Her work appears in Information Technology and People, Information Systems Journal, the Journal of Decision Systems, and IEEE-Transactions on Engineering Management.

Xiaobo Wu is professor of innovation management and strategy in School of Management at Zhejiang University. He is also the executive dean of School of Management and the director of National Institute for Innovation Management. Dr. Wu received his PhD in management science from Zhejiang University in 1992. He has been a visiting scholar at University of Cambridge, UK and the Fulbright Scholar in Sloan School of Management of MIT, USA. His research interests include technological in-
About the Contributors

novation & management, global manufacturing & strategy and ICT & management change. Dr. Wu’s research has appeared in journals such as IEEE TEM, International Journal of Technology Management, Strategic Outsourcing: an International Journal and International Journal of Innovation and Technology Management. Dr. Wu’s research projects are mainly funded by National Natural Science Foundation of China, National Planning Office of Philosophy and Social Science of China, the Royal Society of UK, International Development Research Centre (IDRC-CRDI) of Canada and the EU Commission.

David C. Yen is currently a Raymond E. Glos Professor in Business and a Professor of MIS of the Department of Decision Sciences and Management Information Systems at Miami University. Professor Yen is active in research and has published books and articles which have appeared in Communications of the ACM, Decision Support Systems, Information & Management, Information Sciences, Computer Standards and Interfaces, Government Information Quarterly, Information Society, Omega, International Journal of Organizational Computing and Electronic Commerce, and Communications of AIS among others. Professor Yen’s research interests include data communications, electronic/mobile commerce, database, and systems analysis and design.

Nan Zhang received his PhD from Tsinghua University and is currently a postdoctoral researcher in the School of Public Policy & Management, Tsinghua University. His research interests include e-government and mobile government, ICT adoption and diffusion, Cultural issues of Information management. His work has been published in journals like Journal of Global Information Management, Information Systems Frontiers, and Tsinghua Science & Technology.

J. Leon Zhao is Head and Chair Professor in Information Systems, City University of Hong Kong. He was Eller Professor in the Department of Management Information Systems, University of Arizona before January 2009. He holds Ph.D. and M.S. degrees from the Haas School of Business, UC Berkeley. His research is on information technology and management, with a particular focus on workflow technology and applications in knowledge distribution, e-learning, supply chain management, organizational performance management, and services computing. Leon’s research has been supported by NSF, SAP, and other sponsors. Leon has served or has been serving as associate editor of Information Systems Research, ACM Transactions on MIS, IEEE Transactions on Services Computing, Decision Support Systems, Electronic Commerce Research and Applications, among other journals. He has co-edited several special issues in various IS journals including Decision Support Systems and Information Systems Frontiers. He received an IBM Faculty Award in 2005 for his work in business process management and services computing and was awarded a 2009 Chang Jiang Scholar Chair Professorship at Tsinghua University by the Ministry of Education of China.
