About the Contributors

**John Wang** is a full professor at Montclair State University. Having received a scholarship award, he came to the USA and completed his PhD in operations research from Temple University. He has published more than 100 refereed papers and six books. He has also developed several computer software programs based on his research findings. He is the Editor of the *Encyclopedia of Data Warehousing and Mining. 1st and 2nd Edition*. Also, he is the Editor-in-Chief of *International Journal of Applied Management Science, International Journal of Information Systems and Supply Chain Management, International Journal of Data Analysis Techniques and Strategies*. He has served as a guest editor and referee for many other highly prestigious journals. His long-term research goal is on the synergy of operations research, data mining and cybernetics.

***

**A.S.N. Murthy** is an Electronics and Communication engineer from Andhra University. He studied Management (PGDBM) from XLRI, Jamshedpur and also from Indian Institute of Management (IIM), Bangalore, and Law from Kuvempu University. He has done a two-year dissertation titled Predictive models for Cyber Crime: Law enforcement perspective. He worked in MMTC (The Minerals and Metals Trading Corporation of India), an international trading company for about seven years (1985-1992) in several managerial positions. He joined the prestigious Indian Police Service, a Civil Service under the Government of India, in 1993, and was allotted to work in Karnataka state. For his meritorious work, he was awarded Police medal by the President of India on the occasion of Independence Day 2008. He held posts of Superintendent of Police of Chitradurga, Dharwad and Koppal districts. He is presently holding the charge of Deputy Inspector General of Police responsible for financial management of the 90,000 strong police department of Karnataka.

**Abdullahil Azeem** is an Associate Professor in the Department of Industrial and Production Engineering in Bangladesh University of Technology, Bangladesh. He obtained his PhD degree from the University of Western Ontario, Canada. His publications have appeared in many peer reviewed journals such as *International Journal of Production Economics, International Journal of Advanced Manufacturing Technology, International Journal of Machine Tools and Manufacture, International Journal of Quality and Innovation*. His research interests include supply chain management, health care management, production management, and manufacturing system.
Abey Kuruvilla is an assistant professor in operations management at the University of Wisconsin-Parkside. He has a BTech degree in mechanical engineering from University of Kerala, India, and MS and PhD degrees in industrial engineering from the University of Louisville, KY. Dr. Kuruvilla’s research interests are ambulance diversion in emergency medical systems, healthcare management and operations management in the service sectors. He has also developed a research interest in the online language learning industry.

Ahmad Al-Khasawneh (*) is a Director eLearning Centre and vice president assistant of Hashemite University in Jordan. Dr. Khasawneh holds the Ph.D. and M.S. of Information Systems Technology, and Computer Engineering both from Newcastle University, Australia and B.S in Computer and Automatic Control Engineering, Jordan. Dr. Khasawneh has a 13-years experience in ICT field and in ICT applications. He has been managing Galileo and Royal Jordanian Airlines R&D project since 1994, ranging from instrumentation development, to network deployment to IT applications. Dr. Khasawneh acts as technical advisor to the Royal Jordanian Galileo (NDC Jordan) director on issues related to the development of travel industry and ICT strategy, and the establishment of strategic partnerships with other airlines and international ICT vendors.

Anand Parkash Bansal, an Electrical Engineer is working as Joint Director (Planning and Services) with Military Engineer Services at Pune, India. After graduation, he obtained specialization in Electrical and Mechanical Engineering from College of Military Engineering, Pune, India. He has also specialized in “Public Policy and Management” from Indian Institute of Management Bangalore and from Maxwell School of Citizenship and Public Affairs, Syracuse University, USA. Presently a professional in the service sector, he has held various prestigious appointments in his department and has many awards to his credit including Prestigious “VB Tawadey Memorial Medal”. He has special interest in the field of CRM, project management, Public Private Partnership and Automation. His case studies and research papers have been presented and published in various international and national level conferences and seminars.

Anastasios A. Economides received the Dipl.Eng. degree in electrical engineering from the Aristotle University of Thessaloniki, in 1984. Holding a Fulbright and a Greek State Fellowship, he received the MSc and the PhD degrees in computer engineering from the University of Southern California, Los Angeles, in 1987 and 1990, respectively. At graduation, he received the Outstanding Academic Achievement Award from the University of Southern California. Currently, he is an associate professor and chairman of the Information Systems Department at the University of Macedonia, Thessaloniki, Greece. He is the director of CONTA (COMputer Networks and Telematics Applications) Laboratory. His research interests include techno-economics of networks and e-services. He has published over one hundred fifty peer-reviewed papers. He has been the plenary speaker in two international conferences. He has served on the editorial board of several international journals, on the program committee of many international conferences, and as a reviewer for many international journals and conferences.

Angel A. Juan is an Associate Professor of Simulation and Data Analysis in the Computer Science Department at the Open University of Catalonia (Barcelona, Spain). He also collaborates, as a Lecturer of Applied Statistics, with the Department of Applied Mathematics I at the Technical University of Catalonia. He holds a Ph.D. in Applied Computational Mathematics (UNED), an M.S. in Information Technol-
About the Contributors

Ángel García-Crespo is the Head of the SofLab Group at the Computer Science Department in the Universidad Carlos III de Madrid and the Head of the Institute for promotion of Innovation Pedro Juan de Lastanosa. He holds a PhD in Industrial Engineering from the Universidad Politécnica de Madrid (Award from the Instituto J.A. Artigas to the best thesis) and received an Executive MBA from the Instituto de Empresa. Professor García-Crespo has led and actively contributed to large European Projects of the FP V and VI, and also in many business cooperations. He is the author of more than a hundred publications in conferences, journals and books, both Spanish and international.

Arjen van Oostrum obtained his master’s degree in Business Information Technology (BIT) from the School of Management and Governance of the University of Twente, Enschede, the Netherlands, in 2008. His master’s final project has been performed in the scope of an internship at Ordina System Development and Integration B.V., the Netherlands. His main interest is the application of technological solutions to business challenges. He currently works as a trainee for a semi-governmental organization responsible for the storage and processing of information of all Dutch health-care organizations. He also runs a private company that develops advanced web applications.

Brian D. Neureuther is an associate professor of operations/supply chain management at the State University of New York at Plattsburgh. He received his PhD in production and operations management from Texas Tech University in 1999. His research interests include simulation, quality control, supply chain management, service operations management, and mathematical modeling. He is a member of the Production and Operations Management Society, the Institute for Operations Research and Management Science, and APICS. His work has appeared in journals such as the International Journal of Production Economics, IEEE Transactions on Semiconductor Manufacturing, Production Planning and Control, the Journal of Marketing Channels, the International Journal of Information Systems and Supply Chain Management, and the Quality Management Journal.

Efstratios C. Emmanouilidis graduated from the Hellenic Officers Military Academy, in 1996. In 2002, he graduated from the School of Computer Programmers of the Hellenic Army. Holding a Hellenic Army Fellowship, he received the MSc degree in information systems from the University of Macedonia, Thessaloniki, Greece, in 2005. In 2006, he graduated from The School of Research and Informatics Officers of the Hellenic Army. Currently, he is a military Officer at the rank of Captain and serves in Research and Informatics Corps of Hellenic Army. His research interests include statistics analysis and programming.

Fernando Paniagua Martín has been a Faculty Member of the Computer Science Department at the Carlos III Technical University of Madrid since 2005. Currently, he is completing his PhD in Computer Science in the Universidad Carlos III de Madrid. He also holds a Master in Computer Science and Technology. He has been working as software engineer and project manager in several companies. His research interests include Software Engineering, Audio-visual accessibility on the Web, Web 2.0 and Computer Supported Cooperative Work.
Fons Wijnhoven is Associate Professor of Knowledge Management & Information Systems at the University of Twente since 2002, and received a PhD in MIS in 1995. He researches the development and exploitation of information services in companies, between companies, and in networks of expertise. Last decade over 50 of his articles appeared in academic journals, and he (co-)authored several books. He teaches in the programs of Business Information Technology, Industrial Engineering & Management, Business Administration, and Public Administration of the University of Twente. He is an associate of the national research school on operations management, BETA, and member of the Center of Telematics and Information Technology of the University of Twente. He has been affiliated to the Helsinki School of Economics (1994), Nijenrode Business School (1998), the Finnish InfWest program (2003-2005), and has been a guest professor in information management at the Wilhelms-University of Muenster (Germany) in 2009.

Helmut Krcmar is a full professor of information systems and holds the chair for information systems at the Department of Informatics, Technische Universitaet Muenchen (TUM), Germany since 2002. He worked as post doctoral fellow at the IBM Los Angeles Scientific Center, as assistant professor of information systems at the Leonard Stern School of Business, NYU, and at Baruch College, CUNY. From 1987 to 2002 he was chair for information systems, Hohenheim University, Stuttgart. His research interests include information and knowledge management, IT-enabled value Webs, service management, computer supported cooperative work, and information systems in health care and eGovernment.

Ibrahim Obeidat is the Chair of Computer Information System Department of Hashemite University in Jordan. He has received his Bsc in electrical engineering from Jordan, his master from the New York Institute of Technology, and his PhD from George Washington University, United States of America. His research interests lays in Computer Science and Networking. He has experience in networking reliability. Prior to joining the Hashemite University of Jordan, Dr. Obeidat held several key positions with major international ICT and IS consultancy and solutions firms.

Isabella Bonacci is Research Professor of Corporate Organization at the Federico II University, Naples, and at the Second University of Naples (SUN), Italy. She obtained her Ph.D in Business Economics and the degree in Economics both from Federico II University of Naples. She was visiting scholar at the CMER, INSEAD Institute, Fontainebleau, France. Her research interests include economics of information systems, corporate relationships and new organizational forms, strategic use of ICTs to improve public corporate performances, with particular concern for the healthcare sector. She presented her research at several national and international conferences, including the Italian Chapter of AIS (ItAIS), the Mediterranean Conference of Information Systems (MCIS), and the International Conference of Society for Global Business & Economic Development (SGBED). Her articles and works appeared in Politiche Sanitarie and for the Italian Society of Health Technology Assessment (SIHTA). She also published several book chapters.

Iyad Al Azzam is a lecturer and a faculty member at faculty of Information Technology. He has received his Bsc in Computer Science from Jordan University of Science and Technology, Jordan, his Master from Metropolitan University, UK. He has presented numerous articles in national and international conferences. His research interests lays in management information systems and electronic business.
About the Contributors

Jan Marco Leimeister is a full professor of information systems and holds the Chair for Information Systems at Kassel University since 2008. He is furthermore a research group manager at the Computer Science Department at Technische Universität München, Munich, Germany. He runs research groups on virtual communities, eHealth, ubiquitous/mobile computing and manages several publicly funded research projects. His teaching and research areas include eHealth, online communities, IT innovation management, service science, ubiquitous and mobile computing, computer supported cooperative work, and information management.

Johan De Jager holds a PhD degree and is Research and Innovation Professor of the Department Marketing, Logistics and Sport management at the Tshwane University of Technology in Pretoria, South Africa. His major areas of interest are marketing of non profit organisations and services like health care and higher education. His major responsibilities are the supervising of post graduate students and conducting other marketing related research projects. He represents the Faculty of Management Sciences in a number of committees. Johan regularly acts as external examiner, locally and in various African countries. He also serves on the executive board of three international academic conferences and acts as referee for various scientific academic outputs.

José M. Castán is a Professor of Business Organization at the University of Barcelona (Spain). He had been also an Associate Professor for more than a decade in the Business Organization Department at the Technical University of Catalonia (Spain). He holds a Ph.D. in Economics and Business Administration (University of Barcelona). His research interests include logistics, quality, business organization and strategic management. He has published several books, papers and proceedings regarding these fields.

Juan Miguel Gómez-Berbís is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid. He holds a PhD in Computer Science from the Digital Enterprise Research Institute (DERI) at the National University of Ireland, Galway and received his MSc in Telecommunications Engineering from the Universidad Politécnica de Madrid (UPM). He was involved in several EU FP V and VI research projects and was a member of the Semantic Web Services Initiative (SWSI). His research interests include semantic web, semantic web services, business process modelling, b2b integration and, recently, bioinformatics.

Kamrul Ahsan is a senior lecturer of management in the Faculty of Business, Auckland University of Technology, New Zealand. He holds a Ph.D. degree in industrial engineering and management from Tokyo Institute of Technology, Japan. His current research interests include health care management, sustainable supply chain, project performance analysis, and project contract modeling. His publications have appeared in peer-reviewed journals such as International Journal of Project Management, International Transactions in Operational Research, Asia Pacific Journal of Operational Research (APJOR), Journal of Health Management, and International Journal of Industrial Engineering. He has taken part in a number of international conferences and worked as reviewer for many international journals.

Luís Ferreira Pires is an Associate Professor at the Faculty of Electrical Engineering, Mathematics and Computer Science of the University of Twente, Enschede, the Netherlands since 1994. He obtained his PhD degree in 1994 from the University of Twente and his Master’s degree in 1989 from the ‘Escola Politécnica da Universidade de São Paulo’, São Paulo, Brazil. His research interests include design
methodologies for distributed systems, architecture of distributed systems, modeling and specification techniques, middleware platforms and distributed applications. Lately he has been working on the application of model-driven architecture and semantic web technologies to the design of context-aware applications and services. He published around 100 papers in international workshops, conferences and journals. He is currently responsible for the courses ‘Programming 1 / 2’, ‘Java Middleware Technologies’ and ‘Service-oriented architecture with Web services’ at the University of Twente.

**María J. Martínez-Argüelles** is an Associate Professor of Economics and Business Administration at the Open University of Catalonia (Barcelona, Spain). She holds a Ph.D. in Economics and Business Administration (University of Barcelona), and a M.S. in Economics (Pompeu Fabra University). Her research interests include organization management, quality and e-learning. She has published several papers, book chapters and proceedings regarding these fields.

**Marianna Sigala** is Assistant Professor at the Democritus University, Greece. Before joining Democritus University, she had been lecturing at the Universities of the Aegean (Greece) and the universities of Strathclyde and Westminster in the UK. Her interests include productivity and service quality management, Information and Communication Technologies (ICT) applications in tourism and hospitality, and e-learning. She has professional experience from the Greek hospitality industry and contributed to several international research projects. Her work has been published in several academic journals and international conferences. She is the co-chair of the Euro-CHRIE Special Interest Group (SIG) in ICT in Hospitality and she currently serves at the Board of Directors of I-CHRIE, IFITT and HeAIS.

**Michael R. Godfrey** joined the Supply Chain & Operations Management faculty at the University of Wisconsin Oshkosh in 2001. He teaches manufacturing planning & control, analytical methods, and supply chain management at the undergraduate level and operations & process management in the MBA program. He has published in the *Journal of Business Logistics*, the *International Journal of Production Economics*, *Six Sigma Forum Magazine*, and the *Journal of Network and Systems Management*.

**Mohammad Bsoul** (PhD) is a assistant professor at Prince Al-Hussein bin Abdullah II Faculty of Information Technology. He has received his Bsc in Computer Science from Jordan University of Science and Technology, Jordan, his Master from University of Western Sydney, Australia and his PhD from Loughborough University, United Kingdom. He has presented numerous articles in national and international conferences. His research interests lays in Networking and Performance Management.

**Nuri Basoglu** is an associate professor in Department of Management Information Systems, Bogazici University, Istanbul, Turkey. His research interests are socio-technical aspects of IS, customer-focused product development, information technology adaptation and wireless service design, intelligent adaptive human computer interfaces, information systems strategies. He has published articles in journals such as *Technology Forecasting and Social Change*, *Journal of High Technology Management* and *Technology in Society*, *International Journal of Services Sciences*. Dr. Basoglu received his BS in industrial engineering, Bogazici University in Turkey, MS and PhD in business administration, Istanbul University.
Oscar Tamburis (*) is a Researcher at CNR (Italian Research National Council), Institute of High Performances Networks, Naples, and Dept. of Technology Innovation, Rome, Italy. He obtained his Ph.D degree in Management of Healthcare Organizations and the degree in Management and Industrial Engineering both from Federico II University of Naples. His research interests include the role of ICTs in the organisational change of public services, with particular concern for the healthcare sector. He presented his research at several national and international conferences, including the Italian Association for Healthcare Economics (AIES), the Italian Chapter of AIS (ItAIS), the Mediterranean Conference of Information Systems (MCIS), and the International Conference of Society for Global Business & Economic Development (SGBED). His articles appeared in the International Journal of Electronic Healthcare and International Journal of Healthcare Technology and Management and Hospital IT Europe.

Paul F. Schikora is associate professor of operations management in the College of Business at Indiana State University. He earned his PhD in operations management from Indiana University’s Kelley School of Business in 1999. He earned his MS degree in logistics management from the U. S. Air Force Institute of Technology, and his BS degree in management from the Illinois Institute of Technology. He has 11 years experience as a United States Air Force officer in logistics and transportation management, and currently holds a commission in the U.S. Air Force reserve. His work has been published in the Quality Management Journal, International Journal of Production Economics, Journal of Network and Systems Management and IEEE Transactions on Semiconductor Manufacturing. His research interests include process simulation, quality management and improvement, manufacturing scheduling, and information systems management. Dr. Schikora is a member of the Decision Sciences Institute, American Society for Quality, Production and Operations Management Society, and APICS.

Qiyang Chen is a Professor of MIS in School of Business, Montclair State University. He earned his Ph.D. in information systems from the University of Maryland, Baltimore. His research interests are in the areas of human-computer interaction, database development, soft computing and information resource management. His recent publications are in the International Journal of Human-Computer Interactions, Human System Management, Journal of Neural Network Computing and Applications, etc. Dr. Chen has consulted with industry on various issues in information systems and regularly serves in program committees for national and international conferences.

Rahul De’ is the Hewlett-Packard Chair Professor in ICT for Sustainable Economic Development at IIM Bangalore. He has a B.Tech. from the Indian Institute of Technology, Delhi, an MBA University of Delhi, and a Ph.D. from the Katz Graduate School of Business, University of Pittsburgh, U.S.A. Since 1990, he has taught Information Systems and Management Science courses in various universities in the United States, India, France, Spain and Sweden. His research interests are in E-Governance and applications of ICT for development; and impacts of Free and Open Source software and its role in government. He has interests in data mining, analytics and applied Artificial Intelligence. He has published over 40 articles in international journals, refereed conference proceedings and as chapters in books. In 2009, Dr De’ was awarded the Outstanding Paper Award for Most Interdisciplinary and Innovative Research at the 8th International Conference on Electronic Government held in Linz, Austria.
Ricardo Colomo-Palacios is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid. His research interests include applied research in People in IT, Software Process Improvement, Software Project Management and Business Information Systems. He received his PhD in Computer Science from the Universidad Politécnica of Madrid (2005). He also holds a MBA from the Instituto de Empresa (2002). He has been working as software engineer, project manager and software engineering consultant in several companies including Spanish IT leader INDRA.

Roslin V. Hauck is an Assistant Professor of Business Information Systems at Illinois State University. She received her Ph.D. from the Management Information Systems Department at the University of Arizona. Her research interests include organizational change, technology adoption, and the use of technology for communication and knowledge management. She has published in a number of journals including Journal of Information Systems Education, Decision Support Systems, Journal of International Management Studies, and Journal of the American Society for Information Science and Technology. She teaches courses in business systems analysis and information systems in organizations and has received numerous teaching awards at the college and university levels.

Ruben Xing received his PhD, Master of Science (M.S), and Master of Arts (M.A) in from Columbia University, New York. Having worked for more than 15 years, Dr. Xing has held senior IT management positions at several large financial conglomerates like Merrill Lynch, Citigroup, First-Boston/Credit Suisse in metropolitan New York. His current research interests include Broadband and Wireless Communications, the Internet transformations and security, Disaster Recover/Business Continuity Planning, and Supply Chain Management.

Ruiliang Yan is an assistant professor of marketing at Indiana University Northwest. He received his PhD in marketing from the University of Wisconsin, Milwaukee. He has published one book and a number of articles in the different refereed journals. He also is serving as referee for many highly prestigious journals. He specializes in marketing modeling, retailing and supply chain management.

Sherry M.B. Thatcher is an Associate Professor of Management at the University of Louisville. She received her Ph.D. from the Management Department at the Wharton School of the University of Pennsylvania. Her research revolves around teams and includes creativity, diversity faultlines, identity recognition, the social effects of computer communication technologies, and team conflict. She has published in a number of journals including The Academy of Management Journal, The Academy of Management Review, Organizational Science, Journal of Management, and The International Journal of Networking and Virtual Organizations.

Suraj Alexander is a professor in the Department of Industrial Engineering at the University of Louisville. He has a BS degree in mechanical engineering from I.I.T, Madras, and MS and PhD degrees in industrial engineering and operations research, from the Virginia Polytechnic Institute and State University. Before entering academia, he worked as an equipment design engineer for Corning, Inc. His current research interests are in the areas of quality assurance, process monitoring, diagnosis and control, decision support systems, and logistics. Dr. Alexander is a fellow of the Institute of Industrial Engineers and the American Society for Quality. He is a registered professional engineer in Kentucky, and a certified quality engineer.
About the Contributors

Suzanne Weisband is an Associate Professor in Management Information Systems at the University of Arizona. She received her Ph.D. in Social and Decision Sciences and Policy Analysis from Carnegie Mellon University. Her research examines the socio-technical aspects of large scale distributed collaboration, leadership, telemedicine services over time, work practices of system administrators, and how interruptions affect work performance. She has published her work in leading management and information systems journals. Her most recent book, Leadership at a Distance, was published by Psychology Press in 2008. Her research has been funded by NSF and the Army Research Institute for the Social and Behavioral Sciences.

Theon L. Danet resides in Newport News, Virginia. She received her BS from the University of Maryland, her MBA from the Florida Institute of Technology, and her Ph.D. from Nova Southeastern University. She has been employed with NASA Langley Research Center for the past eight years as an Information Technology Specialist in charge of various projects. Before that, she was an Information Technology instructor and Webmaster at the Military Traffic Management Command on Fort Eustis in Newport News, Virginia. Dr. Danet served in the Army for six years as a Cryptographic Communication Specialist. She lived in Germany for two years and then had an opportunity to work for General Colin Powell’s communication team in the Pentagon for three years.

Tugrul Daim is an associate professor of engineering and technology management at Portland State University. He is published in many journals including Technology in Society, Technology Forecasting and Social Change, Int’l J of Innovation and Technology Management, Technology Analysis and Strategic Management, and Technovation. Dr. Daim received his BS in mechanical engineering from Bogazici University in Turkey, MS in mechanical engineering from Lehigh University in Pennsylvania, another MS in engineering management from Portland State University and a PhD in systems science-engineering management from Portland State University.

Umit Topacan is a MA student in the Department of Management Information Systems at Bogazici University, Istanbul, Turkey. He received his BS in computer education and educational technologies from the same university. His research interests include technology management, information technology adoption, health information services and service development. He has work experiences both of academia as a teaching and research assistantship; and private sector as IT consultant.

Uta Knebel is a full-time researcher at the chair for information systems, Technische Universitaet Muenchen, Germany, since 2005. She works on projects related to IT-supported product-service bundles for the sports industry and RFID. Her research interests include IT-supported health interventions, ubiquitous computing, mobile commerce, IT innovation management, and adaption/diffusion of innovations.

Vishnuprasad Nagadevara is a Professor in the Quantitative Methods and Information Systems Area at the Indian Institute of Management Bangalore. His current interests are Data Mining techniques and applications, Application of Operations Research Techniques, Project Management, Project Evaluation and Information Technology Applications. A graduate from Agriculture College, Bapatla, he did his Post Graduation at GB Pant University of Agriculture and Technology and obtained his Doctorate from Iowa State University, USA in Economics and Operations Research. He also worked at Iowa State University. Dr. Nagadevara has published a number of articles in India and abroad on Data Mining, Application of
Statistical Methods and Operations Research Techniques. He also participated and presented papers in national and international conferences. He was the Volume Editor for the book “Operations Research Methods for Agricultural Decisions”, published by Iowa State University Press. He was also the Dean of IIM Bangalore from 1997 to 2000.

Werner Soontiens is currently employed as Professor and Dean International of the Curtin Business School overseeing the strategic intent and operational implementation of courses in commerce in various international locations. Before this he was Head: School of Management, Curtin Business School and Program Director: International Business. On the lecturing front he acts as unit controller for International Management and Global Business Environment which is offered in 8 different locations throughout Southeast Asia. In addition, he teaches International Business related content in graduate and postgraduate courses both in Australia, Asia and China. He represents the faculty of business on a number of university committees and was appointed as member and chair of various sub-committees. Furthermore, Werner plays an active role in the recruitment of on-campus international students.

Yair Levy is an Associate Professor of Information Systems (IS) at the Graduate School of Computer and Information Sciences at Nova Southeastern University. He is the director of the Center for e-Learning Security Research (http://CeLSR.nova.edu/). During the mid to late 1990s, Dr. Levy helped NASA develop e-learning platforms and manage Web infrastructures. He earned his Bachelor’s degree in Aerospace Engineering from the Technion, Israel Institute of Technology. He received his MBA with MIS concentration and Ph.D. in Management Information Systems from Florida International University. His current research interests include e-learning security and users perceptions of IS. He has authored a book and numerous research publications that appear in IS journals, conference proceedings, invited book chapters, and encyclopedias. Dr. Levy is the editor-in-chief for the International Journal of Doctoral Studies (IJDS) and serves on editorial board of other recognized scholarly journals. To find out more about Dr. Levy, please visit his site: http://scis.nova.edu/~levyy/.
