About the Contributors

David Parsons is Associate Professor of Information Technology at Massey University, New Zealand, and is the founding editor in chief of the International Journal of Mobile and Blended Learning. His work has been published many international journals and conferences, including Computers & Education, the International Journal of Mobile Learning and Organisation and IEEE Transactions on Learning Technologies. He chaired the Conference on Mobile Learning Technologies and Applications in 2007 and was co-editor of ‘Innovative Mobile Learning: Techniques and Technologies’ (Information Science Reference, 2009). He is a member of the International Association for Mobile Learning.

* * *

Elisabetta Adami has a PhD in English Studies at the University of Verona, where she works as adjunct professor at the Faculty of Medicine and Surgery. Her research focuses on digital communication and semiotic and linguistic practices online. As part of the London Mobile Learning Group she has analyzed the social semiotic implications of the affordances of mobile devices. Related publications include ‘The social semiotics of convergent mobile devices: new forms of composition and the transformation of habitus’ (2010), co-authored with G. Kress in G. Kress Multimodality: A Social Semiotic Approach to Contemporary Communication, London, Routledge and ‘A social semiotic analysis of mobile devices: Interrelations of technology and social habitus’, (2010), co-authored with G. Kress, in N. Pachler, B. Bachmair and J. Cook Mobile learning: structure, agency, practices, New York, Springer.

Graham Attwell is a researcher working for the Wales-based organization Pontydysgu and an Associate Fellow of the Institute of Employment Research, Warwick University. His areas of research include work-based learning, informal learning, the use of social software and Web 2.0 for learning and knowledge development and mobile learning. He is particularly interested in the development of Personal Learning Environments. Graham speaks regularly at international conferences and workshops and has published extensively in books and journals. However his preferred means of publication is through his blog, the Wales Wide Web - http://www.pontydysgu.org/blogs/waleswideweb.

Ben Bachmair was, until his retirement in 2008, professor of pedagogy, media education and instructional technology at the University of Kassel, Germany. He is a member of the London Mobile Learning Group and anssociate of the WLE Centre for Excellence at the Institute of Education, London. Her teaches as visiting professor at the State University of St. Petersburg, Russia, and is a member of the German public regulation board for television and the internet. His specialisms include: mass
communication and education, media and learning, media socialization and media reception, media within the cultural development. He led the German association of media education for some years and has published widely. He is currently scientific adviser of the MyMobile project (medien+bildung, Rhineland-Palatinate, Germany).

**Brenda Bannan**, Ph.D. is an Associate Professor of Instructional Technology in the College of Education and Human Development at George Mason University in Fairfax, VA, U.S.A. Her research interests include investigating and articulating the intersection of design and research processes while employing emerging technologies.

**Margit Böck** is Senior Research Fellow and Lecturer at the Department of Communication Studies, University of Salzburg. Her research interests are in modes and media of communication in relation to social inequality, learning, literacy (including academic literacy) and in everyday media uses. At present she is writing her Habilitation (‘higher doctorate’) on communicational practices of everyday life in a fragmenting society.

**John Cook** is professor of technology enhanced learning at the Learning Technology Research Institute, London Metropolitan University and a member of the London Mobile Learning Group. John has published widely, having a specific interest in four related research areas: informal learning, mobile learning, appropriation and work-based learning. He has extensive project management experience, which includes AHRB, BECTA, HEFCE (CETL Manager 2005-2008) and EC work. John was chair/president of the Association for Learning Technology (2004-06) and he is currently the chair of ALT’s Research Committee. John sits on various journal editorial boards and conducts Assessor and review work for the ESRC, EPSRC, EU, DfES and Science Foundation of Ireland.

**Carolin Fuchs**, PhD, is Lecturer in the TESOL/Applied Linguistics Department at Teachers College, Columbia University, New York. Her research interests include technology-based language teaching and learning, electronic literacy skills, language play, and efolios. She has conducted numerous Internet-mediated projects with institutions in countries such as England, Germany, Poland, and Taiwan.

**Aleksej Heinze** is a senior lecturer in the Salford Business School, University of Salford, UK. His research interests are in blended learning, management education and Enterprise 2.0.

**Bin Hou** is a master course student at the Graduate School of Advanced Technology and Science, Tokushima University, Japan. He received the BE from Dalian University of Technology in 2008. His research includes computer-supported ubiquitous learning, mobile learning and language learning.

**Theo Hug** is professor of educational sciences at the University of Innsbruck (Austria) and coordinator of the Innsbruck Media Studies research forum. His areas of interest include media education and media literacy, e-education, m-learning and microlearning, theory of knowledge and philosophy of science. He is the author and/or editor of several books on various aspects of media, communication, and education.
About the Contributors

**Basit Khan** is a PhD student at Department of Information and Computer Science, Norwegian University of Science and Technology (NTNU), Trondheim, Norway. His main research interests are application of multi-agent systems to mobile learning, knowledge representation, Semantic-Web, artificial intelligence and service oriented computing. He can be contacted at basit[at]idi.ntnu.no

**Mengmeng Li** is a master course student at the Graduate School of Advanced Technology and Science, Tokushima University, Japan. He received the BE from Dalian University of Technology in 2008. His research includes computer-supported ubiquitous learning, mobile learning and language learning.

**Yuqin Liu** is an associate professor in the School of Software of Dalian University of Technology, China. She received her PhD degree from the University of Tokushima, Japan, in 2000. Her current interests are in technology enhanced language learning and e-Learning.

**Patricia Martinez**, Ph.D. is a Teacher Coach in Arlington Public Schools, Arlington, VA, U.S.A, and an Adjunct Professor in the College of Education and Human Development at George Mason University in Fairfax, VA, U.S.A. She is currently consulting with the Center for Applied Linguistics in the project ‘Enhancing Vocabulary Through Cognate Awareness’. Her research interests include the bilingualism and special education.

**Mihhail Matskin** is currently professor of software engineering (since 2002) at the School of Information and Communication Technology of the Royal Institute of Technology (KTH), Stockholm and adjunct professor (since 2004) at the Norwegian University of Science and Technology (NTNU), Trondheim. He received his PhD in computer science from the Institute of Cybernetics of the Estonian Academy of Sciences in 1984. His current research activity includes work on semantic web services and services composition, agent technology, multi-agent systems, component based software development, formal methods of software design and knowledge-based programming.

**Maurizio Megliola** is a Senior Software Engineer and Project Manager at TXT e-solutions in Italy. With competences and experience in human computer interaction, smart agent systems, mobile applications, location-based services and Web 2.0, Megliola has worked in the areas of real time systems and embedded applications, enterprise interoperability and knowledge management solutions, in both commercial and R&D projects. Recently, he has acted as a project leader for the ISAAC (www.isaac-project.eu) and iTacitus (www.itacitus.org) Framework Sixth European research projects and National projects in the infomobility networks (ASINFO). Megliola has published in international journals and conferences proceedings.

**Masanao Miyata** is a master course student at the Graduate School of Advanced Technology and Science, Tokushima University, Japan. He received the BE from Tokushima University in 2008. His research includes computer-supported ubiquitous learning, mobile learning and language learning.

**Ambjörn Naeve** is the head of the Knowledge Management Research (KMR) group at the Royal Institute of Technology (KTH) in Stockholm, Sweden. He is also the scientific director and coordinator of research on interactive learning environments at the Uppsala Learning Lab at Uppsala University.
Moreover, he is co-chair of the World Summit of the Knowledge Society and is co-chairing the 1st International Conference on Technology Enhanced Learning, Quality of Teaching, and Reforming of Education.

Hiroaki Ogata is an associate professor in the Faculty of Engineering, Tokushima University, Japan. He received the BE, ME and PhD from Tokushima University in 1992, 1994, and 1998, respectively. He was a Visiting Researcher at L3D, the University of Colorado at Boulder, USA, from 2001 to 2003. His current interests are in computer-supported ubiquitous learning, mobile learning, and CSCL.

Krassimira A. Paskaleva, PhD is a Senior Research Fellow at Manchester Business School, University of Manchester and the Institute for Technology Assessment and Systems Analysis of the Karlsruhe Institute of Technology in Germany. Dr. Paskaleva conducts cross-disciplinary research on information society, technology, management and policy innovation, sustainability and urban development. Her work is funded primarily by the European Union’s Research Programs, where she directs the ISAAC (integrated e-services for advanced access to heritage in cultural tourism destinations) and the SUT-Governance (partnerships for sustainable urban tourism) international projects and has participated in the recent PICTURE (urban cultural tourism management), INTELCITY (intelligent cities roadmaps) and INTELCITIES (electronic governance of sustainable cities) collaborative projects.

Erin E. Peters, Ph.D. is an Assistant Professor of Science Education and Educational Psychology in the College of Education and Human Development at George Mason University in Fairfax, VA, U.S.A. Her research interests include explicating social and individual learning outcomes in situations involving self-regulation and metacognition of scientific epistemology. She works with K-12 teachers and students in learning how to recognize and apply a scientific way of knowing.

Christoph Pimmer is a research fellow at the learning.lab/Competence Center E-Learning at the University of Applied Sciences Northwestern Switzerland. He graduated with a degree in social and economic sciences with a focus on learning and information systems. He has coordinated and worked on several projects in the field of technology enhanced learning and information management. For example, he acted as a project manager in the study mLeap: mobile learning and performance conducted in cooperation with several Swiss universities and enterprises. He has published in the fields of technology
enhanced learning, mobile learning and information systems. Christoph’s current research interests include work-based and mobile learning with a focus on the clinical sector and organizational transformation.

**Chris Procter** is a senior lecturer in the Salford Business School, University of Salford, UK. His research is primarily into teaching and learning and especially blended learning.

**John Traxler** is Professor of Mobile Learning and Director of the Learning Lab at the University of Wolverhampton. He is a Director of the International Association for Mobile Learning, Associate Editor of the International Journal of Mobile and Blended Learning and also of Interactive Learning Environments. He was Conference Chair of mLearn2008, the world’s biggest and oldest mobile learning research conference. John has co-written a guide to mobile learning in developing countries and is co-editor of the definitive book on mobile learning “Mobile Learning: A Handbook for Educators and Trainers”, with Professor Agnes Kukulska-Hulme. They are working on a second book together. He has written 14 book chapters on mobile learning, and talks and writes frequently on the consequences of universal connectedness and mobility on societies. He has guest edited special editions of three peer-reviewed journals devoted to mobile learning.

**Yoneo Yano** is currently a full professor at the Faculty of Engineering, the University of Tokushima, Japan. He received his PhD degree in communication engineering from Osaka University, Japan, in 1974. He was a visiting research associate at the Computer-Based Education Research Lab, University of Illinois, USA. He is the president of APSCE (Asia-Pacific Society for Computers in Education) from 2008. His current interests are in technology enhanced learning and e/u-Learning. He is a member of the IEICE, JSET, JSiSE, AACE and a senior member of IEEE.
