About the Contributors

**Hamid Nemati** is an associate professor of information systems in the Department of Information Systems and Operations Management at the University of North Carolina at Greensboro. He holds a doctorate from the University of Georgia and a Master of Business Administration from the University of Massachusetts. Before coming to UNCG, he was on the faculty of J. Mack Robinson College of Business Administration at Georgia State University. He has extensive professional experience in various consulting, business intelligence and analyst positions and has consulted for a number of major organizations. His research specialization is in the areas of decision support systems, data warehousing, data mining, knowledge management and information privacy and security. He has presented numerous research and scholarly papers nationally and internationally. His articles have appeared in a number of premier professional and scholarly journals.

* * *

**Bandar Alhaqbani** is an Assistant Professor in the College of Public Health and Health Informatics, King Saud bin Abdulaziz University for Health Sciences, Saudi Arabia. His research interests span different topics in the area of information security, including, but not limited to, privacy, access control models, identity management, reputation systems, network security, and security of workflow management systems (WfMS). Also, he has over 8 years of experience in the Information Technology field within the healthcare domain.

**Sandra Carpenter** is Professor of Psychology at The University of Alabama in Huntsville. She received her Ph.D. in Social Psychology from the University of California in Santa Barbara. She leverages her training in social psychology to study applied issues. One line of research involves attempting to reduce the frequency with which people inappropriately disclose private information. A second line explores the development of workgroups and teams, primarily with respect to emergent cognitive processes related to taskwork and teamwork. Finally, she also studies culture change in the Caribbean. She is a member of the Society for Personality and Social Psychology and the International Network of Group Researchers.

**Sung-Hyuk Cha** is an Associate Professor of Computer Science with over 100 publications in pattern recognition and related fields. During his PhD years, he was affiliated with the Center of Excellence for Document Analysis and Recognition (CEDAR) at SUNY Buffalo where he made major contributions that include a dichotomy model to establish the individuality of handwriting, distance measures on his-
Zippy Erlich is on the faculty of the Computer Science department at the Open University of Israel and served as the head of the department for four years. She has developed curricula for undergraduate and graduate programs of study in Computer Science and headed development teams for a variety of B.Sc. and M.Sc. courses. She received her B.Sc. degree in mathematics and statistics, M.Sc. in applied mathematics – both from Tel-Aviv University, and Ph.D. in computer science from University of California, Los-Angeles. Before joining the Open University, she headed the Data Processing department of the Israeli Navy Computer Center. Her research interests include: Queuing theory and applications; Measurement of information systems success and user satisfaction; Open source code; Computer systems security; Data mining; Computer literacy and applications; Social networks and learning networks analysis; and e-Learning.

Sergei Evdokimov is a postdoctoral scholar at Humboldt University Berlin (Germany). In 2002 he graduated from the Belarusian State University in 2002, specializing in Applied Mathematics and Computer Science. In 2008 he obtained his doctorate degree at Humboldt University’s Institute of Information Systems in Berlin. His research interests include database security, and privacy and security issues of ubiquitous computing.

Colin Fidge is Professor of Computer Science in the Faculty of Science and Technology, Queensland University of Technology, where he teaches software development and computing fundamentals. He received his PhD in 1990 from the Australian National University. His research interests are in the field of critical systems, including security-critical software engineering and networking, risk-aware business process modelling, and large-scale industrial asset management.

Matthias Fischmann obtained his master’s degree in computer science and philosophy from Saarland University in Germany. Between 2000 and 2002, he held a position as a research and software engineer at SSH Communication Security Oy in Helsinki, Finland. Between 2002 and 2007, he worked at Humboldt University’s Institute of Information Systems in Berlin. His work was focused on the security of distributed information systems, touching topics such as privacy- and integrity-preservation in the presence of untrusted services, anonymity, and reputation-based incentives. He obtained his doctorate degree in 2008. He is currently working as a consultant for Business & Decision.

Oliver Günther is Dean of the School of Business and Economics at Humboldt-Universität zu Berlin. There he also directs the Institute of Information Systems and Humboldt’s Interdisciplinary Center on Ubiquitous Information. He also serves as Vice President of the German Informatics Society (GI) and as a member of the Advisory Board of SAP Research. Previously, he has held positions with the International Computer Science Institute in Berkeley and the University of California at Santa Barbara. He holds a Master degree from Karlsruhe Institute of Technology and M.S. and Ph.D. degrees from UC Berkeley.
**About the Contributors**

**Vinay Kumar** is a postgraduate in Mathematics and did his MCA from School of Computer and System Science, Jawaharlal Nehru University, New Delhi. He is working as a Scientist in National Informatics Center, MoCIT, Government of India. He has authored a book on discrete mathematics. His area of interest is graph algorithm, steganography, discrete mathematics, data security and privacy.

**Munir Majdalawieh** is an academic researcher and a practicing Information Systems (IS) professional. He is an Assistant Professor of MIS at the American University of Sharjah (AUS). He obtained his Ph.D. in IS from George Mason University in Fairfax, Virginia, USA. He has written about internal auditing and control, IT security and privacy, risk management, corporate and IT governance, and strategic changes in IT/IS technologies and management in academic and practitioners’ refereed journals and conference proceedings. He previously worked for Digital Equipment Corporation, Compaq Computer Corporation, Hewlett Packard, and Booz Allen Hamilton for more than 22 years. He is an active member of the IIA, ISACA, and RIMS.

**Matt W. Mutka** received the B.S. degree in electrical engineering from the University of Missouri-Rolla, the M.S. degree in electrical engineering from Stanford University, and the Ph.D. degree in Computer Science from the University of Wisconsin-Madison. He is on the faculty of the Department of Computer Science and Engineering, Michigan State University, East Lansing, Michigan, where he is currently professor and department chairperson. He has been a visiting scholar at the University of Helsinki, Helsinki Finland and a member of technical staff at Bell Laboratories in Denver, Colorado. His current research interests include mobile computing, wireless networking, and multimedia networking.

**Sunil Kumar Muttoo** is Associate Professor in Department of Computer Science, University of Delhi, India. He completed his M. Tech from IIT Kharagpur and Ph.D. from University of Delhi, India. His specialization is coding theory, information hiding.

**Norman Pendegraft** (Ph.D. UCLA) is Professor of Information Systems in the College of Business and Economics at the University of Idaho. He teaches database design and telecommunications management. His major research interest is information systems security.

**Mark Rounds** is an instructor in College of Business and Economics at the University of Idaho. He holds a BS in Computer Science for Montana State University, an MBA from the University of North Dakota, a MS in Computer Science from Washington State University and is currently a PhD candidate in Computer Science at the University of Idaho. His research focus is on Computer Security. Prior to beginning at the University of Idaho, Mark was the Director of Engineering for Tri Geo Network Security, providing security products for small to medium size businesses. Previous to that, he was a market analyst and later a sales manager for Advanced Hardware Architectures, a fabless semi-conductor firm.

**Robert W. Stone** (Ph.D. Purdue University) is currently a Professor of Accounting & Information Systems in the College of Business and Economics at the University of Idaho. His teaching interests are in Systems Analysis and Design and Accounting Information Systems. His research interests include organizational impacts from information system use and user acceptance of information systems. Professor Stone has published numerous research works, some of which have appeared in the Review of
About the Contributors

Charles C. Tappert has a Ph.D. in Electrical Engineering from Cornell University. He worked on speech and handwriting recognition at IBM for over two decades, secured government contracts in speech recognition, and holds nine patents. After IBM, he taught at the U.S. Military Academy at West Point for seven years and has been a Professor of Computer Science at Pace University since 2000. He has over 100 publications and his research interests include pattern recognition, biometrics, pen computing and voice applications, human-computer interaction, and artificial intelligence.

Mary Villani is an Associate Professor in the Computer Systems Department at State University of New York (SUNY) Farmingdale. She holds a Doctor of Professional Studies degree from Pace University, and her dissertation topic was Keystroke Biometric Identification Studies on Long-Text Input. Publications in this area include several peer-reviewed external and internal conference papers. Prior to joining SUNY Farmingdale, she had a fifteen year computer consulting career in the Risk Management and Insurance industry. She has also written articles in the area of Risk Management and given invited presentations at conferences as a recognized expert.

Surya B. Yadav is the James & Elizabeth Sowell Professor of Telecom Technology in Rawls College of Business, Texas Tech University, Lubbock, Texas. He received his Bachelors of Science degree in electrical engineering from Banaras University in 1972, the M.Tech. degree from IIT Kanpur, India in 1974 and the Ph.D. degree in business information systems from Georgia State University, Atlanta in 1981. He has published in several journals including Communications of the ACM, IEEE Transactions on Software Engineering, IEEE Transactions on Systems, Man, and Cybernetics, Journal of Management Information Systems, and Decision Support Systems. His research areas include information quality, intelligent information retrieval systems, and system security.

Robert S. Zack is a computer professional with 27 years of experience with project management, systems analysis, and systems integration for financial services and pharmaceutical industries. He is currently a student in the Doctor of Professional Studies in Computing program at Pace University.

Feng Zhu received the B.S. degree in computer science from East China Normal University, the M.S. degree in computer science and engineering from Michigan State University, the M.S. degree in statistics from Michigan State University, and the Ph.D. degree from Michigan State University. He is an assistant professor at The University of Alabama in Huntsville. He was a program manager at Microsoft and a software engineer at Intel. His current research interests include pervasive computing, security for pervasive computing, computer networks, and distributed systems.

Wei Zhu received the Ph.D. degree in computer science and engineering from Michigan State University in 2006, the M.S. degree in statistics from Michigan State University in 2004, the M.S. degree in computer science and engineering from Michigan State University in 2001, and the B.S. degree in computer science from East China Normal University in 1994. Her research interests include human-
computer interaction, computer graphics, augmented reality, and multimedia systems. She was a software
design engineer at Microsoft Corporation. She is currently a software consultant at Intergraph Corporation.

**Moshe Zviran** is Associate Professor of Information Systems in the Faculty of Management, The
Leon Racanati Graduate School of Business Administration, Tel Aviv University. He received his B.Sc.
degree in mathematics and computer science and the M.Sc and Ph.D degrees in information systems
from Tel Aviv University, Israel, in 1979, 1982 and 1988, respectively. He held academic positions at
the Claremont Graduate University, California, the Naval Postgraduate School, California, and Ben-
Gurion University, Israel. His research interests include information systems planning, measurement
of IS success and user satisfaction, information systems security e-Business. He is also a consultant in
these areas for a number of leading organizations. Prof. Zviran’s research has been published in: MIS
Quarterly, Communications of the ACM, Journal of Management Information Systems, IEEE Trans-
actions on Engineering Management, Information and Management, Omega, The Computer Journal,
Journal of Medical Systems and other journals. He is also co-author (with N. Ahituv and S. Neumann)
of Information Systems for Management (Tel-Aviv, Dyonon, 1996) and Information Systems – from
Theory to Practice (Tel-Aviv, Dyonon, 2001).
