Index

3rd Generation Partnership Project (3GPP) 276

A
access control lists (ACLs) 115
additive metrics 244
affordance theory 308-309
Agent Communication Perceptor/Effector 46-47
Analytic Hierarchy Process (AHP) 241, 246
API (Application Programming Interface) 221
application programming interfaces (APIs) 277
Applied Hermeneutic Methodology (AHM) 315
Apriori 61, 66, 68, 72

B
backchaining approach 140
BDI (Belief-Desire-Intention) model 47
BRITE network generator 243
brute force checking 139, 154

C
Call Session Control Functions (CSCFs) 280
chain production model 4
Change Propagation 97-99, 102, 104, 106-107, 110
Chinese Tourism 219, 222
Chinese Word Segmentation System 219-220, 222, 225-226, 238
Clinical Decision Support System (CDSS) 183, 186, 188
Cloud computing 2
Cognitive Geography 222, 236
Collaborative Service Cloud (CSC) 3, 7
  functionality 9
  infrastructure 8
  integration 12
  management 7, 10
  proof-of-concept implementation 15
COMA schema matching system 80
commercial off-the-shelf (COTS) components 263-265
communication module 46-47, 54
concave metrics 244
conjoint retention hypothesis 22-24, 26, 36
contextual query language (CQL) 87
control flow patterns 196, 199, 216
Coordination Middleware (CM) 8, 12
Crossing loop 198-200, 204
Cupid method 80

database state 138
Data Extraction Algorithm 85
Data Warehouse Based Method 86
DCM framework 81
Decision Support System (DSS) 186-187
deep web 75
deep web crawling 76, 87
deep web information retrieval framework
  information retrieval processes 76
taxonomical steps 76
DesCOTS 266
device multifunctionality 318
Distributed Database 138, 140-142, 145, 152, 154-157
domain ontologies 43-44, 53-57
Domain Ontology Identification 82
dual coding theory 20, 22-25

E
Earliest Completion Time (ECT) 201, 203-204
EBQRMPM 243
eCOTS 265
electronic commerce 56, 159, 161, 181, 218
electronic wallet 159
Evolved Packet Core (EPC) 276
Evolved Packet System (EPS) 276
Execution Trace 203, 205-206, 215-216

F
free rider problem 159-160
fuzzy comprehensive evaluation 83, 93

G
garbage collection (GC) 112-113, 118
Generality Order 64-65
geocoding 221, 223, 228, 231, 236-237
Geographical Information Retrieval (GIR) 220
Geographic Information System (GIS) 220
GeoVSM (Geographic Vector Space Model) 221
GIPSY (Georeferenced Information Processing System) 221
GNoSIS algorithm 44
GNoSIS architecture 53
GNoSIS system 44
Goddard agent architecture 43, 46, 52, 55
graphical user interfaces (GUIs) 307
GUI-based afforances 317

H
Hard Deadline (HD) 201, 203-204
harmonizing ontologies 44
Hawthorne Effect 37
homestays 220, 223, 232-234, 236
Home Subscriber Server (HSS) 279
Host-List Protocol (HLP) model 88
Human-Computer Interaction (HCI) 3-4, 18, 40, 169, 306, 320, 322-324

I
imagery system 22, 24
improved random forest algorithm (IRFA) 78
information retrieval (IR) 220
Instantiation relationship 62-63
integrity checking 139
integrity constraints 142
Integrity Constraints Checking 138, 147, 156
integrity tests 142
Integrity Tests Ranking and Classification 145
Interpretation relationship 64
intra-class change propagation 106-107
IP connectivity access network (IP-CAN) 276
Iterative Deepening Search 85, 95

K
Kepner-Tregoe (KT) 245, 247

L
Lightweight Data Access Protocol (LDAP) 280
LINDACAP 112, 115
LINDA coordination model 113
linguistic processing system 24
location-aware systems
  communication systems 21-22, 25, 38
  delivery system 21
  environment 25, 38
  landmarks 25, 38
  virtual environment 29
Location-Based Service (LBS) 228, 236
Logical Stability 97-98, 103, 110
Long Term Evolution (LTE) 276
LSD method 80

M
Mapping Base sub-module 47
mashup environments 4
mental mapping 22
MGS framework 81
micro-payment systems 159-162, 165, 178
minimum bounding rectangle (MBR) 223
M/M/1 queuing system 215
mobile/digital communication services 314
Monte Carlo (MC) simulation 268
Multi-agent systems 53, 93
Multi-Attribute Utility Theory (MAUT) 241, 245-246
multicast routing problem 243
Multi Criterias Decision Making (MCDM) method 243
multifunctional device 308, 310, 312, 316-320
multiple-regression cost model (MrCoM) 84
multiplicative metrics 244

N
namespaces 44-45
Negotiation Planning sub-module 47-48
negotiation protocol 45, 53
Nested Loop 198-199, 204

O
Object Management Group (OMG) 165
object oriented (OO) 98
V
Values Mapping 83
Vector Space Model (VSM) 223
virtual private network (VPN) 285
virtual provisioned pipe (VPrP) 285
Virtual Shared Desktop 1, 3
Virtual telemedicine 186
Voice over Internet Protocol (VoIP) 242

W
WANT objectives 247
Web-based user collaboration 4
Web Code Complexity Metric (WCCM) 99
web crawlers 76
Web usage mining (WUM) 59
Workflow Management Systems (WfMS) 196-197

X
XPAY 161
xPminer 60, 68-72
