About the Authors

Gurpreet Dhillon  BSc (Hons), MBA, MSc (Econ), PhD (MIS) is an MIS professor at the University of Nevada Las Vegas. He is a graduate of the London School of Economics (University of London). His research interests lie at the interface of strategic management and IS/IT use. The application domain of his research has covered information security, computer crime and fraud. In recent years he has also been studying the causes of IT failures within organizations. His research has been widely published in numerous journals including Communications of the ACM, Computers & Security, European Journal of Information Systems, International Journal of Information Management, Journal of End User Computing, International Journal of Public Sector Management, Topics in Health Information Management, Health Management Research among others. He is the author of the book Managing Information System Security (Macmillan, 1997). He also serves as vice president, publications for the Information Resources Management Association.

***

Robert J. Aalberts is the Ernst Lied Professor of Legal Studies in the College of Business at the University of Nevada, Las Vegas. He earned a J.D. from Loyola University and an M.A. from the University of Missouri-Columbia. Professor Aalberts’ teaching and research pursuits are in the areas of employment law and real estate law. He has published over 65 articles in law reviews and business journals, and is currently the editor-in-chief of the Real Estate Law Journal. He is also co-author of the textbook Law and Business and the Regulatory Environment, 4th (1994) published by McGraw-Hill, Inc.

Frédéric Adam is a lecturer in the Department of Accounting, Finance and Information Systems at University College Cork in Ireland. He is also a senior researcher with the Executive Systems Research Centre (ESRC). He holds a PhD from the National University of Ireland and Université Paris VI jointly. His research has been published in a number of international journals including the Journal of Strategic Information Systems, Decision Support Systems and Systèmes d’Information et Management. He is the co-author of the Manager’s Guide to Current Issues in Information Systems and the Practical Guide to Postgraduate Research in the Business Area (both published by Blackhall Publishing, Dublin, Ireland).

Albert Bokma is a Senior Research Fellow in the Centre for electronic Commerce at the University of Sunderland.
Joseph Gilbert is an Associate Professor of Management at the University of Nevada, Las Vegas. He teaches in the areas of Business Strategy, Organizational Theory, and Business Ethics. He holds Bachelor’s and Master’s degrees in philosophy, and a doctorate in Business Administration. He has published several articles in the area of Business Ethics. Dr. Gilbert currently team-teaches (with an attorney) an MBA-level course in Law, Regulation and Ethics.

Peter Goldschmidt received a BS from California State University, MEc, and PhD from The University of Western Australia. He has over 20 years experience in IS/IT, economic and quantitative analysis, capital market and financial information systems. He is active in academia, industry, business, government, and international organisations as a researcher, adviser and consultant; presented to numerous international conferences, published extensively, reviewed for international journals and conferences, and was the 1997 recipient of The American Accounting Association Information Systems Section’s International Outstanding Dissertation Award.

Dr Goldschmidt is the founding director of The Australian Centre for Electronic Commerce and Senior Lecturer in Information Management at UWA, working in the areas of Decision Support, Agent Technology, Electronic Commerce, Marketing Information Systems, Applied Artificial Intelligence, and Compliance Decision Support Infrastructure.

Joe Haslam is an associated researcher of the Executive Systems Research Centre (ESRC) at University College Cork in Ireland. After successfully completing his Master of Science in Information Systems in the Department of Accounting, Finance and Information Systems, he took up employment as Technical Support for Franklin Resources in California before becoming a Systems Analyst for Falconbridge in Norway. In addition, he lectured part time for the Department of Public Administration at UCC and at the University of Limerick. More recently, he has been active in the Web development area, with Perot Systems in London where he worked on their award-winning intranet TRAIN and in Dallas, Texas as a content webmaster. In 1997, he joined the Electronic Commerce group of VISION Consulting and took part in the development of vision.com. Finally, he joined Marrakech Ltd, a new Irish company developing Electronic Commerce solutions for business in May 1999.

Bill Hutchinson is the Associate Head of Management Information Systems at Edith Cowan University in Western Australia. He has had over 20 years experience in information systems in the government sector, and the oil and finance industries. He has published numerous papers on system design and information warfare.

Stefan Kirn heads a chair in information systems at the Technical University Ilmenau, Germany. He holds a Ph.d. in artificial intelligence from University of Hagen (Germany), an M. Sc. in computer science and an M.Sc. in management. Stefan Kirn has published more than 50 papers in peer-reviewed international journals, and at internationally recognized conferences. He is editor-in-chief of the bookseries "Agent Technology" of Addison Wesley Longan (Germany) and the coordinator of a 6-years priority research program on Intelligent Agents in Business Applications in Germany, running from 1999-2006.

Brian Lees is presently Reader in Applied Artificial Intelligence at the University of Paisley, Scotland, where, as well as being joint leader of the University’s Applied Computational Intelligence Research Unit, he lectures in artificial intelligence and agent-based systems. His qualifications include a BSc in Electrical Engineering, an MSc in Computer Science, a PhD in Artificial Intelligence
and an Advanced Diploma in Educational Studies. He is also a Chartered Engineer and Chartered Mathematician. His current research interests include the application of AI methodologies to practical problems, particularly in education and engineering.

Mathias Petsch is research assistant at the Technical University of Ilmenau, Germany. He holds the first degree in information systems from the Technical University of Ilmenau. The degree dissertation was on a Group Scheduling System, based on Java. He aspires to be awarded doctor’s degree and is studying for his doctorate under Professor Stefan Kirn. The main field of his dissertation is security aspects of multi agent systems.

Athanasia (Nancy) Pouloudi is a lecturer in the Department of Information Systems and Computing at Brunel University, UK. Dr Pouloudi has a PhD in “Stakeholder analysis for interorganisational systems in healthcare” from the London School of Economics and Political Science, an MSc in “Analysis, Design and Management of Information Systems” from the same university and a First Degree in Informatics from the Athens University of Economics and Business. Her current research interests encompass organizational and social issues in information systems implementation, stakeholder analysis, electronic commerce and knowledge management. She has more than 25 papers in academic journals and international conferences in these areas. She is a member of the ACM, the Association for Information Systems (AIS), the UK AIS, and the UK OR Society.

Keng Siau is an Associate Professor of Management Information Systems (MIS) at the University of Nebraska, Lincoln (UNL). He received his Ph.D. degree in Business Administration from the University of British Columbia (UBC) where he majored in Management Information Systems and minored in Cognitive Psychology. He has published more than 25 journal articles and these articles have appeared in journals such as MISQ, IEEE Computer, Information Systems, ACM’s Data Base, Journal of Database Management, Journal of Information Technology, International Journal of Human-Computer Studies, Transactions on Information and Systems, and others. In addition, he has published over 45 refereed conference papers in proceedings such as ICIS, ECIS, HICSS, CAiSE, IRMA, AIS, DSI, and HCI. His primary research interests are Enterprise E-Business, Enterprise Resource Planning (ERP), Object Oriented Systems Development Using Unified Modeling Language (UML), and Web-based Systems Development. Dr. Siau served as the Organizing Chair and Program Chair for the International Workshop on Evaluation of Modeling Methods in Systems Analysis and Design (EMMSAD) (1996 – 2000).

Mikko T. Siponen is a research scientist in the Department of Information Processing Science at the University of Oulu, Finland. His research interests include information systems security and ethical aspects of computing. He has published several workshop, conference and journal articles in these fields. He is former Finnish champion in Tae Kwon Do.

Andrew Storey is a Researcher and Lecturer in the School of Computing, Engineering and Technology in the University of Sunderland where he is and associate of the University’s Centre for Electronic Commerce. He is currently carrying out full time research into Computer Ethics and Professionalism and Electronic Commerce. Andrew has an honours degree in Applied Consumer Sciences and has extensive management experience in the Service Sector. He is now developing expertise in the field of Electronic Commerce concentrating on Trust issues relating to Electronic Business policies and Business to Consumer and Business to Business issues. With particular regard
to Computer Ethics, Social Responsibility and Professionalism for Computer Professionals and the
development of Software Engineering status as a profession.

**J. Barrie Thompson** is Professor in Applied Software Engineering at the University of Sunderland. He is also the leader of the University’s Software Engineering for Organisations research group and the Vice-Chair for IFIP Working Group 3.4 which is concerned with professional education and training.

**Anthony M. Townsend** is an assistant professor in the College of Business at the University of Delaware. His research interests center on the organizational implementation of information technologies, and he has published in journals such as the *Communications of the ACM*, *Information Systems Research*, *Industrial Relations*, *Journal of International Business Studies*, and the *Journal of Labor Research*, among others.

**Matthew Warren** is an information systems senior lecturer at Deakin University (Department of Computing & Mathematics) (1998 +) and before that a lecturer at the Plymouth Business School, UK (1996 - 1998). He obtained his PhD in Computer Security Risk Analysis at Plymouth University, UK (1996).

He has published 50 refereed journal and conference papers. He is a member of Australian Standards Committee IT/12/4 Security Techniques and is the Australian Representative on IFIP 11 WG 11 - Security Management. He has also worked on several European Union Research projects including projects under the ADAPT, HTCA, INFOSEC and AIM schemes.

**Kent Whitacre** received his B.S. in Accounting from the University of Nebraska-Lincoln in 1980 and an MBA, with an emphasis in Management Information Systems from the University of Nebraska-Lincoln in 1997. Kent has performed numerous computer conversions, system upgrades and enhancements. Currently, Kent is a Programmer Analyst with Mutual of Omaha. He works on the Individual Product Development team. In addition, he is an Adjunct Professor at Metropolitan Community College in Omaha, Nebraska, where he teaches computer programming technology courses.

**Michael E. Whitman** is an Associate Professor of Computer Science and Information Systems in the College of Sciences and Mathematics at Kennesaw State University in Georgia. He earned his MBA and his Ph.D. in Information Systems from Auburn University. Dr. Whitman’s teaching and research interests include information systems security, data and telecommunications management and policy, and computer-use ethics. His articles have appeared in numerous scholarly and applied journals, including *Information Systems Research*, *the Communications of the ACM*, *Information and Management*, *ACM Computers & Society*, *Journal of International Business Strategy*, *Journal of Computer Information Systems*, *Information Resources Management Journal*, and *Information Systems Management* among others.
