Index

A

Adequancy, 238
Agile Development Projects, 159
Agile development, 166
Agile Modeling (AM), 160, 168

B

between goals, 23
business collaboration, 77
Business goals, 43
business modelling, 337, 343
business processes, 194, 199
business transactions, 77

C

Channel, 318
Classification dependency, 108
cognitive behavior of users, 283
collaborative project, 336, 338, 339, 345
commitments, 87, 89
Communication technology, 352
communicative process, 76
Competing Values Model, 207, 211
Components, 311
computation dependent models (CDM), 101
Computation Independent Models (CIM), 99
Computer systems, 352
Concepts Model (CM), 163
conceptual model, 229, 234
conceptual modelling, 17, 334, 335, 345
conflict between goals, 23
Construction Adequacy, 238
contract, 88, 89
cross competence, 353
Cross-competence, 353, 354, 357
Crystal Clear, 167
Customer value, 319

D

data modeling languages, 2, 7
data quality, 298, 302
database, 334, 337, 338, 339, 342
Decision Support Systems (DSS), 208
domain experts, 145
domain ontologies, 193
Dynamic Systems Development Method, 167

E

e-Business Model Components, 315
electronic business (e-business) models, 308
Electronics, 352
enterprise architecture, 67
enterprise model, 67, 255, 259, 260, 283, 286, 287, 290, 291
Enterprise Modelling, 129
ER schema, 5, 7
Executive Information Systems (EIS), 208
external data, 293, 294, 295, 296, 300
eXtreme Programming, 160
**F**
flat world, 286

**G**
goal models, 20
Goal-oriented modeling, 44
goal, 20
Goals Model (GM), 163
Group Support Systems (GSS), 208

**H**
human relations model, 212

**I**
information and communication
technologies (ICT), 309
information capacity, 10
Information systems technology, 352
inter-model link, 235
Interaction dependency, 111
internal process model, 212

**K**
Knowledge, 132

**L**
Language Adequacy, 238
Linguistic interpretivism, 240
Loyalty, 320
Lyee builder, 253, 274

**M**
Management Support Systems (MSS), 207
mapping a schema, 7
Mathematics, 352
metadata, 295, 300, 301
Model-generated Work-places (MGWP), 44
modelling language, 4

**N**
natural keys, 6
Norway, 48

**O**
object-oriented analysis and design (OOAD), 101
office information systems, 334, 336
Olympic Games, 189
online syndicate data, 299, 300, 301, 302
open systems model, 212
Operational Semantics, 265, 267
organizational metaphors, 69

**P**
Participatory Enterprise Modelling, 129
Partner Network, 319
Pragmatics, 104
Pricing, 319
program conversion, 262
purposeful systems, 17

**R**
rational goal model, 212
Requirements Engineering, 187, 201
requirements, 25
resources, 78, 81
Revenue, 319
role, 93

**S**
scenarios, 24, 197
Scrum, 167
SDSs, 303
semantic relations, 108
Service-orientation, 98
service-oriented architecture (SOA), 98
service-oriented information system analysis, 97
software security, 253
speech acts, 74
stakeholder goals, 193
strategy map, 26, 27
Syndicate batch data, 297, 298, 300, 301, 303
syndicate data supplier, 293
syndicate data, 300, 302, 304
syntactical representation, 254
systems development, 332, 334, 336, 338, 339, 342
Systems thinking, 193

T
Target Market, 316
Technical Components and Requirements Model (TCRM), 164
technology transfer, 332, 333, 346
TEMPORA, 43
Trust, 320

U
UML schema, 6, 7

Unified Modeling Language (UML), 99, 236
unique object identifiers, 6

V
Validation, 256, 260, 261
value block, 321
value chain, 317
value proposition, 316

X
XML, 294, 298, 304
