Wim van Grembergen is a professor at the Business Faculty of UFSIA (University of Antwerp) and is a guest professor at the University of Leuven (KUL). He teaches information systems at undergraduate and executive levels, and researches in business transformations through information technology, audit of information systems, and IT evaluation. Dr. van Grembergen presented at the European Conference on Information Systems (ECIS) in 1997 and 1998 and at the Information Resources Management Association (IRMA) Conferences in 1998, 1999 and 2000. He is a Track Chair “IT Evaluation Methods and Management” for 2000 and 2001 IRMA conferences. He published articles in journals such as *Journal of Strategic Information Systems, Journal of Corporate Transformation, Journal of Information on Technology Cases and Applications, IS Audit & Control Journal* and *EDP Auditing (Auerbach)*. He also has several publications in leading Belgium and Dutch journals and published, in 1997, a book on business process reengineering in Belgian organizations and, in 1998, a book on the IT Balanced Scorecard. He is engaged in the development of CobiT 3rd Edition. Until recently, he was Academic Director of the MBA Program of UFSIA and presently he is coordinator of a master program on IT-audit. Professor van Grembergen has consulted with a number of organizations and is a member of the Board of Directors of an IT company servicing a Belgian financial group.
