About the Contributors

**Tarek M. Sobh** received the B.Sc. in Engineering degree with honors in Computer Science and Automatic Control from the Faculty of Engineering, Alexandria University, Egypt in 1988, and M.S. and Ph.D. degrees in Computer and Information Science from the School of Engineering, University of Pennsylvania in 1989 and 1991, respectively. He is currently the Vice President for Graduate Studies and Research, Dean of the School of Engineering and Distinguished Professor of Engineering and Computer Science at the University of Bridgeport (UB), Connecticut; the Founding Director of the Interdisciplinary Robotics, Intelligent Sensing, and Control (RISC) laboratory; the Founder of the High-Tech Business Incubator at UB (CTech IncUBator), and a Professor of Computer Engineering, Computer Science, Electrical Engineering, and Mechanical Engineering.

**Xingguo Xiong** is an Associate Professor in Department of Electrical and Computer Engineering, University of Bridgeport, Connecticut, USA. He obtained his B.S. degree in Physics in Wuhan University, Wuhan, China in 1994. He obtained his first PhD degree in Electrical Engineering from Shanghai Institute of Microsystem and Information Technology, Chinese Academy of Sciences, China in 1999. He obtained his second PhD degree in Computer Engineering in University of Cincinnati, OH, USA in 2005. He joined University of Bridgeport as faculty since Fall 2005. Prof. Xiong’s research areas include Microelectromechanical Systems (MEMS), nanotechnology, as well as VLSI design and testing. He is also interested in robotic system design and prototyping, microrobots, and nanorobots. He has two patents, and published one book chapter and numerous conference/journal papers. He is the recipient of 2009 Northeast ASEE (American Society of Engineering Education) Outstanding Teacher Award.

**Ahmad Azar** has received the M.Sc. degree (2006) in System Dynamics and Ph.D degree (2009) in Adaptive Neuro-Fuzzy Systems from Faculty of Engineering, Cairo University (Egypt). Dr. Ahmad Azar has worked in the areas of system dynamics, intelligent control, and modelling in biomedicine and is the author of more than 35 papers in these subjects. He is an editor of two books in the field of fuzzy logic systems and biomedical engineering. Dr. Ahmad Azar is closely associated with several international journals as a reviewer. He serves as international programme committee member in many international and peer-reviewed conferences. He is the Editor in Chief of *International Journal of System Dynamics Applications* (IJSDA), and he currently serves as the editor of a lot of international journals. His biography was selected to appear in the 27th Edition of Who’s Who in the World, Marquis Who’s Who, USA, 2010.
YangQuan Chen received the B.S. degree in Industrial Automation from the University of Science and Technology of Beijing, Beijing, China, in 1985, the M.S. degree in Automatic Control from the Beijing Institute of Technology, Beijing, in 1989, and the Ph.D. degree in Advanced Control and Instrumentation from the Nanyang Technological University, Singapore, Singapore, in 1998. He is currently an Associate Professor of Electrical Engineering at Utah State University, Logan, and the Director of the Center for Self-Organizing and Intelligent Systems (CSOIS). His current areas of research interests include: applied fractional calculus in controls, signal processing and energy informatics; distributed measurement and distributed control of parameter systems using mobile actuator and sensor networks; mechatronics; multi-UAV based cooperative multi-spectral “personal remote sensing,” and real-time water management and irrigation control.

Sedat Dogru received from Middle East Technical University Turkey his B.Sc. degree in Electrical and Electronics Engineering and his B.Sc. degree in Physics (double major) in 2000 and 2001, respectively. He has served in the industry as software developer and project leader for almost 4 years. He is currently a Ph.D. student at the Department of Electrical and Electronics Engineering of Middle East Technical University Turkey. His research interests are mainly Wireless Sensor Networks, SLAM, path and motion planning, and connectivity maintenance.

Akif Durdu received his B.Sc. degree in Electrical and Electronics Engineering from the Selcuk University, (SU), Turkey, in 2001. He had worked as a researcher at Selcuk University for one year. He has been a PhD candidate and a research assistant at the Department of Electrical and Electronics Engineering from the Middle East Technical University in Ankara since 2002. His research interests are controlling systems, making robots, intention estimation and machine learning algorithms in human-robot interaction. He has been a visiting scholar in order to make research at the Ohio State University since January, 2011. He is a member of IEEE.

Sam Eljamel, Consultant Neurosurgeon, graduated with honours MBBCh-1982, fellow of Royal College of Surgeons-Ireland and Royal College of Surgeons of Edinburgh. His qualifications include intercollegiate fellowship in Neurosurgery and M.D with distinction in neurosciences Liverpool University. The higher surgical training committee in Neurosurgery-UK awarded him a certificate of completion of specialist training in Neurosurgery-1993 and had completed clinical fellowship in Neurosurgery-University of Connecticut & Hartford Hospital, Connecticut-1995. He has been a National Panelist in Neurosurgery for 8 years and Head of the Service at Ninewells Hospital & Medical School. His practice concentrates on skull base surgery, keyhole neurosurgery, and functional neurosurgery. 1996, he was appointed Head of Department, Surgical Neurology, University of Dundee, 2006 he took the Chairmanship of Clinical Governance Committee. He was elected secretary of British Stereotactic & Functional Neurosurgery 2006, joined Executive Committee of AANS/CNS-Tumor Section in 2007, elected board member of International Photodynamic Association 2008, and Vice President of BIDA 2008. His main research interests are surgical robotics, stereotaxy, photodynamic therapy and neuro-oncology. He had published more than 80 papers, edited two books, and coauthored more than 6 chapters.
Ahmed ElSayed received his B.Sc. in Electrical Engineering in 2003 from the Department of Electrical Engineering, Alexandria University, Egypt, and M.Sc. in Engineering Mathematics in 2006 from the Department of Engineering Mathematics and Physics, Alexandria University, Egypt. Currently, he is a Ph.D. candidate and holds a Teaching and Research Assistant position in the Department of Computer Science and Engineering, University of Bridgeport, Bridgeport, CT. He was awarded a Teaching Assistantship by the Department of Engineering Mathematics and Physics, Alexandria University, Egypt. He published and presented papers in the fields of Fuzzy Control systems and Soft Computing methods and its applications. His research interests include AI, fuzzy systems, soft computing, hybrid system, computer vision, and signal and image processing.

Vikas Reddy Enti, currently at Kiva Systems Inc., was a Research Engineer at the A*STAR Data Storage Institute. He started the DAvinCi project to integrate Cloud Computing and Robotics and is interested in systems engineering of robots and large systems. He specializes in the mechanical design of mobile robots. Vikas has a B.S in Mechanical Engineering (2008) from Cornell University.

Aydan M Erkmen received her B.Sc. from Bogazici Univ. Turkey in Electrical Eng double majoring in Math, her M.Sc. in ECE from Drexel University, USA, Ph.D. in Info Tech & Eng from George Mason Univ, USA in 1989. She is full Professor in Electrical Eng. Dept Middle East Tech Univ Turkey. Her research interests include mechatronic design, search & rescue robotics, robot hands, sensor fusion, biologically inspired control, multi-robots networks, and sensor networks. She served 2 terms in IEEE Robotics and Automation Society (RAS) Admin Committee; was IEEE RAS vice president 2000 to 2003; was till 2010 associate Editor Int. Journal of Robotics & Automation. She is since 2009 Editor in Springer Verlag-Paladyn Journal of Behavioral Robotics. She served 3 years on the editorial board of IEEE Robotics and Automation Magazine. She was 4 years at Turkish Scientific and Technological Research Council (TUBITAK) as Vice President for industrial funds (TIDEB), the FP6 national coordinator till 2002, IST NCP till 2003. Between November 2007-Dec 2009, she was the Vice Dean of the Faculty of Engineering in Middle East Technical University. Since 2009 she serves in EURON as an Award Jury member for George Giralt PhD Theses Awards.

Ismet Erkmen received his B.Sc. and M.Sc. degrees in EE from the Middle East Technical University, (METU), Turkey, in 1970 and 1972 respectively, and Ph.D. degree from Drexel University, Philadelphia, in 1984. His employment experience included the Turkish Electricity Authority; Brown Boveri, Switzerland; Drexel University; Carlsen and Fink Associates, Fairfax; and Turkish Scientific and Technological Research Council. He is currently a full Professor and chairman of the Electrical and Electronics Engineering Dept. of METU. He is the founder of the Mechatronics Lab. in the dept. He also serves as the executive board member of METU-BILTER CAD/CAM, Robotics and Automation Research Center. He has been awarded as the excellency in education in 93-94 at METU. He is a member of IEEE.

Nicolae Gari received his Bachelor of Science degree in Electronics and Digital Telecommunications from Polytechnic University of Bucharest, Romania in 2002. He obtained his Master of Science degree in Electrical Engineering from University of Bridgeport, Connecticut, USA in 2010. His research interests include robotic system design and prototyping, automations, controls, telecommunications, renewable and sustainable energy, smart grid technology, et cetera.
Andrew Goldenberg, Ph.D., is the founder and President of Engineering Services Inc. (ESI) (www.esit.com), established in 1982. ESI is a high-technology company involved in the development of technology for robotics-based automation. In addition, Dr. Goldenberg is President of Anviv Mechatronics Inc. (AMI), which he founded in 2006. Anviv is involved in the development of mechatronics products. From 2000-2001 Dr. Goldenberg was also the President of Virtek Engineering Science Inc. (VESI) a company formed after the acquisition of part of ESI by Virtek Vision International Ltd. Since 1982 Dr. Goldenberg has been a Professor of Mechanical and Industrial Engineering at the University of Toronto (www.mie.utoronto.ca/labs/ral). He is cross-appointed in the Department of Electrical and Computer Engineering, and the Institute of Biomaterials and Biomedical Engineering, both of University of Toronto. Dr. Goldenberg is also an Adjunct Professor at Ryerson University in Toronto, Ontario, and a Guest Professor at Nanjing University of Science and Technology in P.R. China. From 1975 – 1981, Dr. Goldenberg was an employee of SPAR Aerospace Ltd. in Toronto. There he worked on the first Space Shuttle Remote Manipulator System - the Canadarm. Dr. Goldenberg is a former Editor of the archival international journal IEEE Transactions on Robotics and Automation. He also serves on the editorial boards of Journal of Robotics, Robotica, and Robotics in Japan. He is a Fellow of IEEE, a Fellow of ASME, a Member of Professional Engineers of Ontario, a Designated Consulting Engineer in Ontario, a Fellow of Engineering Institute of Canada, and a Fellow of Canadian Academy of Engineering. Dr. Goldenberg has authored and co-authored over 33 patents, more than 135 peer-reviewed journal papers, over 360 conference proceedings papers, 12 chapters in books, and has made numerous presentations at scientific and engineering conferences. He has supervised over 100 graduate students to date (38 PhD).

Surendra M. Gupta, P.E., is a Professor of Mechanical and Industrial Engineering and the director of the Laboratory for Responsible Manufacturing, Northeastern University. He has authored or coauthored well over 400 technical papers published in books, journals, and international conference proceedings. Dr. Gupta has taught over 100 courses in such areas as operations research, inventory theory, queuing theory, engineering economy, supply chain management, and production planning and control. Among the many recognitions received, he is the recipient of outstanding research award and outstanding Industrial Engineering Professor award (in recognition of teaching excellence) from Northeastern University as well as a national outstanding doctoral dissertation advisor award.

Tamás Haidegger received his M.Sc. degrees from the Budapest University of Technology and Economics (BME) in Electrical Engineering and Biomedical Engineering in 2006 and 2008, respectively, then Ph.D. in Electrical Engineering in 2011. His main field of research is control/teleoperation of surgical robots, image-guided therapy and supportive medical technologies. Tamás spent the 2007/08 academic year with the CISST ERC at the Johns Hopkins University, working on a skull base surgery setup. Currently, he is a research fellow at BME, and in the mean time, he is in post-doc position at the recently founded Austrian Center of Medical Innovation and Technology (ACMIT), working on minimally invasive surgical simulation and training, medical education, and the technological improvement of gynecological brachytherapy. Tamás is the CEO of a university start-up, focusing on objective hand hygiene control. He has been an active member of various professional organizations since 2002. Currently, he is the student chair of the IEEE Robotics and Automation Society and the secretary of the
Hungarian MATE Control Engineering Chapter. He is the author of more than 50 papers published in various scientific meeting and conference proceedings, refereed journals and books in the field of biomedical, control engineering, and computer-integrated surgery. He has been maintaining a professional blog on CIS for over 4 years: http://surgrob.blogspot.com/.

Lee Jun Hong, currently at Dyson Operations, was a Research Engineer at Data Storage Institute. He is interested and specializes in embedded systems design of mobile robots. Jun Hong has an MSc in Embedded Systems (2008) from Nanyang Technological University and a BEng (Hons) in Electronics Engineering (2003) from University of Surrey.

Haibo Huang received the Ph.D. degree in Manufacturing Engineering and Engineering Management from the City University of Hong Kong, Kowloon, Hong Kong. He was a Postdoctoral Research Fellow at the Department of Mechanical and Industrial Engineering, University of Toronto, ON, Canada. He is now an Associate Professor with the Soochow University, Suzhou, China. His current research interests include microrobotic cell manipulation, microforce sensing/controlling, bio-device and instrumentation, and micro/nano manipulation.

Atsuo Kawamura was born in Yamaguchi, Japan, in 1953. He received the B.E., M.E., and Ph.D. degrees in Electrical Engineering from the University of Tokyo, Tokyo, Japan, in 1976, 1978, and 1981, respectively. Upon receiving the PhD degree, he joined Department of Electrical and Computer Engineering at the University of Missouri-Columbia as a post-doctoral fellow, and was an Assistant Professor there from 1983 to 1986. In 1986, he joined Department of Electrical and Computer Engineering at Yokohama National University, Yokohama, Japan as an Associate Professor, and became a Professor in 1996. His research interests are power electronics, electric vehicles, Shinkansen traction control, bipedal robotics, and mechatronic system control. He is a recipient of IEEE IAS Transactions Prize Paper Award in 1988, IEE of Japan Transactions Prize Paper Award in 1996, and IEEE IES Transactions Best paper Awards in 20001 and 2002, and also IEEE Fellow in 2002. Prof. Kawamura is a member of the IEE of Japan, IEEE (Fellow), Robotics Society of Japan, the Institute of Electronics, Information and Communication Engineers, the Society of Instrument and Control Engineering.

Elif Kongar is an Assistant Professor at Bridgeport University and a Visiting Researcher in the Center for Industrial Ecology at Yale University. Her research interests are in sustainability, energy and environment, environmentally conscious manufacturing, product recovery, disassembly systems, and multiple criteria decision making. Dr. Kongar is the author of numerous journal and conference papers, and has presented her work at various national and international conferences. She is a member of the ASEE, SWE, Scientific Research Society, Sigma Xi, the Industrial Engineering Honor Society, Alpha Pi Mu, the Phi Beta Delta Honor Society, and the Phi Kappa Phi Honor Society. Dr. Kongar received her BS and MS degrees in industrial engineering from Yildiz Technical University, and PhD degree in Industrial Engineering from Northeastern University. Before joining Bridgeport University, Dr. Kongar was an Assistant Professor of Industrial Engineering at Yildiz Technical University where she was also the Coordinator and Lecturer of the Logistics certificate program.
Pierre Letier received his Ph.D. in Mechanical Engineering from the Université Libre de Bruxelles in 2010. His Ph.D. was dedicated to the development and control of force-feedback haptic interfaces. He joined the Company Space Application Services in 2010, as robotics and systems engineer. He is involved in several ESA and European Research projects related to human-machine interfaces, haptic, rehabilitation, and virtual reality applications.

Zheng (Jeremy) Li is an Associate Professor in University of Bridgeport. He has many years of research, engineering, and industrial experiences before working as a full time faculty in university. He has two book chapters published in the past and two more book chapters pending for publication. He also has 18 journal papers and 40 conference papers published. His research projects include robotic system design and development in surgical and industrial applications, biomedical instrument design and development, automated and high speed machinery design and development, sustainable energy system design and development including solar panel and wind power, automated manufacturing and process control, computer-aided modeling and simulation in industrial applications, and structure/stress (FEA) analysis.

Bingbing Liu is a Research Scientist with Institute of Infocomm, A*STAR, Singapore. He was a Senior Research Fellow with Data Storage Institute, A*STAR, Singapore. He received the B.E. degree in control engineering from Harbin Institute of Technology, China in 2000 and the Ph.D. Degree from Nanyang Technological University, Singapore in 2007. His current research interests include inertial navigation system, simultaneous localization and mapping for mobile robots, multi-sensor data fusion, estimation theory and computer vision for robotic navigation. He has published more than 20 international journal/conference papers and book chapters in these areas. Bingbing Liu has served as a program committee member or associate editor for multiple international conferences, such as WiSARN 2010 & 2011, ICIRA 2011, and CIS-RAM 2011. He is an IEEE member.

Mac McKee is Professor of Civil and Environmental Engineering and the Director of the Utah Water Research Laboratory (UWRL), a world renowned water research institution. Dr. McKee’s famous water management slogan: “If you do not measure it, you cannot manage it” motivated the UAV research program at Utah State University in 2005. Dr. McKee started a unique UAV service center at the UWRL called the AggieAir Flying Circus, (http://aggieair.usu.edu) which now offers commercial flights under official FAA CoAs in support of water and environmental research projects. His recent interests are in using UAV based “personal remote sensing” platforms for various real world missions such as the invasive species monitoring and control in wetlands, multiscale information fusion techniques using various learning vector machines, and water resource management.

Sarosh Patel received the B.E. degree in Electrical and Electronics Engineering with Distinction from the Faculty of Engineering Osmania University, India and M.S. degrees in Electrical Engineering and Technology Management from the School of Engineering, University of Bridgeport (UB). He is currently pursuing Ph.D. in Computer Engineering at U.B. He currently works as a Research Assistant at the Interdisciplinary RISC (Robotics and Intelligent Systems Control) Lab. He had been nominated for inclusion in 2005 & 2006 edition of Who’s Who Among Students in American Universities and has been elected to the Phi Kappa Phi honor society.
About the Contributors

André Preumont has been a Professor of Mechanical Engineering and Robotics at ULB since 1987. Before that, he was a consultant for Belgonucléaire and Visiting Professor at Virginia Tech. (USA). He also held visiting appointments at UTC Compiègne and INSA de Lyon (France). He is a member of the Belgian Royal Academy and was the recipient of the Five-year prize in Applied Exact Sciences of FNRS in 2000 and the Alexander von Humboldt Research Award in 2011. He is the author of several books, including: Random Vibrations and Spectral Analysis, Kluwer 1994; Vibration Control of Active Structures, An Introduction, Kluwer, 2nd Edition in 2002; Mechatronics, Dynamics of Electromechanical and Piezoelectric Systems, Springer 2006; Active Control of Structures (with Prof. K.Seto), Wiley, 2008.

Changhai Ru received the Ph.D. degree in Mechatronics Engineering from Harbin Institute of Technology, Harbin, China, in 2005. He is currently a Professor at Robotics and Microsystems Center, Soochow University, China. He was a Postdoctoral Fellow at the Advanced Micro and Nanosystems Laboratory, Department of Mechanical and Industrial Engineering, University of Toronto, ON, Canada. His research interests include micro–nanomanipulation, nano–positioning technology, and solid-state actuators’ driving and control methods.

Brandon Stark is a Ph.D. student at the Center for Self Organizing and Intelligent Systems (CSOIS) in the Department of Electrical & Computer Engineering at Utah State University. He received the B.S. degree in Computer Engineering at University of California, Irvine in 2007 and the M.S. degrees in Computer Engineering and Electrical Engineering at the University of Bridgeport in 2010. His research interests include the control of Unmanned Aerial Vehicles (UAVs), inertial navigation, and image processing.

Hao Su received the Bachelor’s degree in Control Science and Engineering from the Harbin Institute of Technology and Master’s degree from the Mechanical and Aerospace Engineering from State University of New York University at Buffalo, and he is currently a Ph.D. candidate in the department of mechanical engineering of Worcester Polytechnic Institute. His current research interests include surgical robotics, image-guided therapy, and cell manipulation.

Sebahattin Topal received his B.Sc. degree in Electronics and Communication Engineering from Süleyman Demirel University, (SDU), Turkey, in 2002. He is currently a Ph.D. student at the Department of Electrical and Electronics Engineering from the Middle East Technical University. His research interests are in the coordination of multi-robots, simultaneously localization, and mapping algorithms and particle filter.

Barkan Ugurlu was born in Cankiri, Turkey in 1981. He received his B.E. in Electrical Engineering with high honor from Yildiz Technical University, Istanbul, Turkey, and his M.E. in Mechatronics Engineering from Istanbul Technical University, Istanbul, Turkey, in 2004 and 2006, respectively. Subsequently, he obtained his Ph.D. degree from the Department of Electrical and Computer Engineering, Yokohama National University, Yokohama, Japan. He is a recipient of Japan, Ministry of Education, Culture, Sports and Technology (MEXT) Monbukagakusho governmental scholarship, from 2006 to 2010. He was also a research assistant fellow of Global Center of Excellence (GCOE) between 2008 and 2010. Upon receiving the PhD degree, he served as a post-doctoral researcher in the Department of
About the Contributors

Advanced Robotics, Italian Institute of Technology, Genoa, Italy. In April 2011, he joined Department of Advanced Science and Technology, Toyota Technological Institute, Nagoya, Japan as a post-doctoral associate. His research interests are bipedal robot dynamics and control, humanoid motion planning, rigid body dynamics, space robotics, and power assist systems. Dr. Ugurlu is a member of IEEE.

Xiaojun Wu, currently is a Research Scientist at Data Storage Institute, A*STAR, Singapore. He was the co-Project leader of the A*STAR Social Robotics Program during year 2008 - 2011, focused on the development of indoor mobile robots. He specializes in robot motion planning, navigation, and sensor integration. His other research interests include human-robot interaction and cloud-computing for group of robots etc. Xiaojun has a Ph.D. degree in the field of robot motion planning from Nanyang Technological University, a M.Sc. in Vehicle Engineering from Huazhong University of Science and Technology and a B.E. in Mechanical Engineering from Wuhan University of Technology, respectively.

Gen’ichi Yasuda was a Professor in Department of Human and Computer Intelligence, Faculty of Informatics, Nagasaki Institute of Applied Science, Japan, from 1996 to 2010. He was also a Professor in Division of Instrumentation and Control, Department of Electronics and Information Technology, Graduate School of Engineering, Nagasaki Institute of Applied Science, from 1996 to 2010. He is now a guest Professor of Nagasaki Institute of Applied Science. His teaching and research interests include industrial intelligent robotics, advanced intelligent mechatronics, and distributed autonomous robotic systems.

Alper Yilmaz is an Assistant Professor with The Civil, Environmental and Geodetic Engineering Department at The Ohio State University since 2006. He earned Ph.D. degree in Computer Science from the University of Central Florida in 2004. He was awarded the Turkish Informatics Foundation Academic Award (1999), two merit fellowships from UCF (2000, 2001), the Hillman Award for research excellence from UCF (2003), and the Duane Brown Photogrammetry award from OSU (2008). Dr. Yilmaz’s area of expertise is computer vision and image understanding. He has served as an associate editor for the Machine Vision and Applications journal from 2006 to 2011. Dr. Yilmaz is a program committee member of leading Computer Vision Conferences. He has served as an area chair for the IEEE Conf. on Computer Vision and Pattern Recognition (2008) and the International Conference on Pattern Recognition (2010). He acted as treasurer for 2010 ACM International Conference on Health Informatics.

Xi Zheng was educated at University of Washington and Nanyang Technological University (NTU). He graduated in 2010 and received his B.E. degree in Electrical & Electronic Engineering from NTU. He then founded the software consultancy firm, Thinking Dots, in the following year. He has worked on varying fields such as design of microwave circuits to fiber optics communication. He also has keen interest in autonomous robots and has worked on various platforms. His area of research focuses on localization and probabilistic robotics, in particular, the effect of different models on the convergence of particles.
