About the Contributors

Manuel Mora is a Full Professor of Information Systems in the Autonomous University of Aguascalientes (UAA), Mexico, since 1994. Dr. Mora holds a B.S. in Computer Systems Engineering (1984) and a M.Sc. in Artificial Intelligence (1989) from Monterrey Tech (ITESM), and an Eng.D. in Systems Engineering (2003) from the National Autonomous University of Mexico (UNAM). He has published around 50 research papers in international top conferences, books, and/or journals. Dr. Mora has co-edited two books on DMSS and i-DMSS, and serves in editorial review boards for several international journals. His current main research interests are: foundations of service systems, design and evaluation methodologies for DMSS, and foundations of research methods for systems engineering, software engineering, and IT underpinned in the systems approach.

Ovsei Gelman is a Senior Researcher at the Center of Applied Sciences and Technology Development (CCADET) of the National Autonomous University of Mexico (UNAM). He holds a BS, MS, and PhD in Physics and Mathematics from the University of Tbilisi, Georgia. In the last 35 years he has contributed to the advance of the systems science discipline and interdisciplinary research through the publication of approximately 250 research papers in books, national and international journals, and conference proceedings, as well as by the participation as an advisor in the Engineering Graduate Program at UNAM and by the consulting for governmental and private organizations.

Annette Steenkamp is Professor of Information Technology Management at the Lawrence Technological University, Southfield, Michigan, USA. She has a PhD in Computer Science, University of South Africa with specialization in Software Engineering, with Dr. Daniel Teichroew, University of Michigan as supervisor. Her academic career spans several generations of computing systems, during which she taught a range of subjects at the graduate and doctoral level in the fields of Software Engineering, Enterprise Architecture, System Process Improvement, Project Management, Quality Assurance, and Research Methodology. Her current research agenda include the fields of knowledge management, enterprise architecture, and systems life cycle management, and she is engaged in supervising a number of doctoral research projects. She has contributed a large body of journal articles and conference papers at national and international conferences, and is a sought after keynote speaker. She serves on several editorial review boards, including IJITSA (International Journal of Information Technologies and the Systems Approach).

Mahesh S. Raisinghani is an Associate Professor in the Executive MBA program at the TWU School of Management. Dr. Raisinghani was awarded the 2008 Excellence in Research & Scholarship award and the 2007 G. Ann Uhlir Endowed Fellowship in Higher Education Administration. He was also the
recipient of TWU School of Management’s 2005 Best Professor Award for the Most Innovative Teaching Methods; 2002 research award; 2001 King/Haggar Award for excellence in teaching, research, and service; and a 1999 UD-GSM Presidential Award. His research has been published in several academic journals and international/national conferences. Dr. Raisinghani serves on the board of the Global IT Management Association and on the education task force of the World Affairs Council-D/FW. He is included in the millennium edition of Who’s Who in the World, Who’s Who among Professionals, Who’s Who among America’s Teachers and Who’s Who in Information Technology.

***

Steven Alter is a Professor in Information Systems at the University of San Francisco, USA. He is author of 6 books and many articles in journals and conference proceedings including HBR, SMR, MISQ, EJIS, DSS, IBM Systems Journal, CAIS, IRMJ, JISE, ICIS, ECIS, AMCIS, and HICSS. Most of his research concerns systems analysis and design methods for business professionals.

Theo Andrew is a Professor and Dean of the Faculty of Engineering and the Built Environment at the Durban University of Technology, South Africa. Theo is a Fellow of the South African Institute of Electrical Engineers (SAIEE), and served as its Vice-President. His papers have appeared in Telecommunications Policy, Int. Journal on Technology Management, Decision Support Systems, IEE Eng. Scienceand Ed. J., and elsewhere.

Peter M. Bentler received his Ph.D. in Psychology from Stanford University. A former Chair of the Department of Psychology at UCLA, he is now Distinguished Professor of Psychology and Statistics. He has been an elected President of the Society of Multivariate Experimental Psychology (SMEP), the Psychometric Society, the Western Psychological Association, and the Division of Evaluation, Measurement and Statistics of the American Psychological Association. He received SMEP’s 2005 Sells Award for Outstanding Career Contributions to Multivariate Experimental Psychology and, in 2007, was the recipient (with Karl Jöreskog) of the American Psychological Association’s Distinguished Scientific Contribution Award for the Applications of Psychology.

Lucio Biggiero is a Professor of Organisation Science at the University of L’Aquila (L’Aquila, Italy); he has published papers in several journals, among which include: Entrepreneurship & Regional Development; Human Systems Management; International Review of Sociology; Journal of Financial Decision Making; Journal of Management and Governance; Journal of Management Studies; Journal of Technology Transfer; Science and Public Policy; Systemica. He is the director of the Knownetlab Research Group (www.knownetlab.it) and of the MEFOR section of CIRPS (http://www.cirps.it/). He applies the following advanced research methodologies to social and natural systems: agent-based simulation models; network analysis; NK-FL simulation modelling; outranking methods for multicriteria decision making; social network analysis.

Mirjana Kljajić Borštnar holds a Ph.D. in Organizational Science from the University of Maribor. Her research work covers expert systems, multi-criteria decision-making, and Information Systems development methods. She holds a position of Assistant Professor and is a member of Laboratory for Decision Processes and Knowledge-Based Systems. During her postgraduate studies, she participated
in several EU and national funded projects covering decision support in global e-business environment and fostering innovation in SMEs. Her recent research work is focused on experiments with decision groups applying system dynamics simulators in experimental, real, and interactive learning environments.

**Ruth de Villiers** is a Research Professor in the School of Computing at the University of South Africa, a large open-distance learning institution. Ruth has PhD and Master’s degrees in Information Systems and Computer-Integrated Education. She has taught Computer Science and Informatics for more than 25 years. Her main research interests are human-computer interaction and e-learning, which she has combined by undertaking research, development, and usability evaluation of various e-learning applications and environments, including systems crossing the Digital Divide. She has also published in the domain of meta-research, working on research designs and methodologies. Ruth supervises Master’s and Doctoral students in the above fields.

**Phil Dobson** worked at a senior level for a number of large Australian mining companies before returning to academia in the mid 1980’s. He has a particular interest in the underlying philosophies of Information Systems research and has completed a PhD in 2002, which examined the application of a critical realist approach to aspects of IS research. He is currently Senior Lecturer in the School of MIS at Edith Cowan University in Perth, Western Australia and has a particular interest in the philosophical basis of IS research and qualitative approaches. Current research projects involve using critical realism as a basis for understanding organizational workflows and in examining broadband adoption and usage.

**Theresa M. Edgington** received her PhD in Information Systems and MBA (concentration in Computer Science) from Arizona State University after a successful twenty-plus year IT career. She has utilized SEM as her primary research method since 2003. Her research interests include knowledge creation/innovation/identification/structure, organizational cognition/coordination, failure analysis, strategic management, systems analysis, and healthcare and IS coordination. Her research has appeared in academic journals including *MIS Quarterly, Communications of the ACM, Decision Support Systems, Journal of Information Systems Education, Journal of Information Systems Education, Decision Support Systems, Journal of Information Technology Education, ACM e-Learning*, and academic conferences including ICIS, HICSS, INFORMS, and AMCIS, Academy of Management and SIG workshops, and at numerous industry conferences.

**Mariki Eloff** has a PhD in Computer Science and has 20 years lecturing experience. In her capacity as full Professor at Unisa she is a member of: College of Science, Engineering and Technology Executive and Research Committees, Disability Committee, and National Council for Persons with Physical Disabilities in South Africa. Furthermore, she received the Women in Research award for Research Leadership. She participated in a number of information security research projects and international conferences. She served as the South African representative on ISO (International Standards Organisation) and contributed to the development of computer and information security standards on an international level.

**Lee B. Erickson** is a PhD Candidate in the College of Information Sciences and Technology at The Pennsylvania State University focusing on the uses and impacts of social media in business contexts. Currently she is examining the uses of and impacts on companies leveraging social media to connect with diverse audiences as potential sources of innovative knowledge (often referred to as “crowdsourcing”). Erickson brings 25+ years of industry experience working with leading high-technology companies,
venture capital firms, associations, and foundations nationwide to her academic research. She holds an MA in Educational Communications & Technology, from New York University and a BA in Education from Virginia Tech.

Moti Frank earned his B.Sc. in Electrical Engineering in 1981 and M.Sc in 1996 both from the Technion – Israel Institute of Technology - and worked for more than 20 years as an Electronics and Systems Engineer. He earned his Ph.D. degree in Industrial Engineering and Management and Education in Technology and Science in 1999 from the Technion. He is Professor of Systems Engineering in HIT, Holon Institute of Technology. His research interests are systems engineering, systems thinking, project management, and research methods. Currently he is a visiting faculty at the department of Systems Engineering and Operations Research in George Mason University, Fairfax, Virginia.

Timothy L.J. Ferris is the Associate Director: Teaching and Learning in the Defence and Systems Institute at the University of South Australia. He holds degrees in Engineering, Theology, and Higher Education, received from various Australian universities, including a PhD in Engineering from the University of South Australia. His major teaching and research work is in the area of research methods for engineering. His research interests also include the impact of ethnic culture on engineering practice and the underlying fundamentals of engineering.

Martha García-Murillo is Full Professor and Director of the Telecommunications and Network Management Master’s program at the School of Information Studies at Syracuse University. She has an M.S. in Economics and a Ph.D. in Political Economy and Public Policy. She has been involved in research projects for the UN, US State Department, and other regional and international organizations. Her areas of research include institutional economics in the ICT sector, the impact of technology on regulation, factors that affect infrastructure deployment, institutional factors that can affect innovation, and ICT in Latin America and theory construction.

Gonzalo Génova has an MS degree in Telecommunication Engineering from the Polytechnic University of Madrid (1992), an MS degree in Philosophy from the University of Navarre (1996), and a PhD in Computer Engineering from the Carlos III University of Madrid. He is currently an Associate Professor of Software Engineering in the Department of Computer Science and Engineering at the Carlos III University of Madrid. His main research subjects, within the Knowledge Reuse Group and in close cooperation with The Reuse Company, are models and modeling languages in software engineering, requirements engineering, and philosophy of Information Systems.

Rafael A. González is a Systems Engineer from Javeriana University (Bogotá) with an MSc in Computer Science and a PhD in Systems Engineering (cum laude) from Delft University of Technology (The Netherlands). He has been Lecturer in the areas of Information Systems, Systems Thinking, and Software Engineering, as well as acting as IT consultant for the public and private sectors. His research interests are focused on development of Information Systems with a design science approach, centered on the issues of coordination, complexity and the interplay between ICT and society. His is currently Associate Professor of Information Systems at Javeriana University.
**About the Contributors**

**Ezgi Nur Gozen** is a Ph.D. student in Information Science and Technology program at Syracuse University. She has an M.S. in Telecommunications and Network Management also from Syracuse University. She received a B.S. in Information Systems from Binghamton University, and a B.E. in Information Systems Engineering from Istanbul Technical University. She worked as a Graduate Research Assistant at Syracuse University on a project related to Internet congestion and business continuity. She also worked as a Faculty Assistant on several academic projects. Her research interests include digital divide and the impact of ICTs in society.

**Miroljub Kljajić** obtained his Ph.D. from the Faculty of Electrical Engineering, University of Ljubljana in 1974. Since 1976 he has been employed by the Faculty of Organizational Sciences in Kranj in the field of System Theory, Cybernetics, Computer Simulation, and Decision Theory. His main research field is methods of modeling and simulation of complex systems. He is author of the book Theory of Systems. He published over 200 scientific articles, from which, 29 are in JCR. For achievements in research and pedagogical work he obtained many national and international awards and recognitions. He obtained the rank of Emeritus Professor in 2010.

**Theresa Kraft** teaches Computer Science and Information Technology courses at the University of Michigan Flint. She received her Doctor of Management in Information Technology from Lawrence Technological University, Southfield, Michigan, USA. Her graduate studies include an MBA from the University of Detroit Mercy and a Master’s of System Engineering from Rensselaer Polytechnic Institute. Her recent articles on project management have been published in the *Information Systems Education Journal* and the *Journal of Information Systems Applied Research*. She has comprehensive industry experience in manufacturing engineering, project management, and Information Technology.

**Davorin Kofjač** obtained his Ph.D. from the University of Maribor in the field of Information Systems Management with a thesis “Fuzzy Adaptive Algorithm for Inventory Control in Uncertain Environment.” He was a young and a senior researcher at the University of Maribor, Faculty of Organizational Sciences at the Cybernetics and Decision Support Systems Laboratory. He was/is participating in many research projects in the field of operational research, decision support systems, modeling and simulation, and artificial intelligence. Currently, he is an Assistant Professor at the University of Maribor, Faculty of Organizational Sciences.

**Damodar Konda** is an accomplished IT Executive with over 25 years of professional experience with several multinational companies including GM and Indian Railways. He is currently working as Vice President, Global Business Applications at RGIS, LLC., Auburn Hills, MI, USA and leading the implementation of several mission-critical enterprise IT solutions globally for RGIS. His expertise includes leading enterprise change management, IT strategy and blueprint, establishment of system delivery processes and PMO, program management initiatives for global rollout of ERP, COTS, and Custom-built IT solutions. He has a Master’s degree in Engineering from IIT Madras, India, MBA from SIU, Carbondale, IL, and a DMIT from LTU, Michigan, USA.

**Jan H. Kroeze** has PhDs in Semitic Languages and Information and Communication Technology. He is the Chair of Department in the School of Computing at Unisa. His research area is Humanities-enriched Information Systems, and he currently focuses on the philosophical and theoretical aspects of IS.
research. He is a collaborator on the editorial committee of *The Journal for Transdisciplinary Research in Southern Africa* and a member of various academic societies, and he serves on the SAICSIT council. He is also the editor of a new IBIMA journal, *Journal of Humanities and Information Systems*.

**Loet Leydesdorff** (Ph.D. Sociology, M.A. Philosophy, and M.Sc. Biochemistry) is Professor at the Amsterdam School of Communications Research (ASCoR) of the University of Amsterdam. He is Visiting Professor of the Institute of Scientific and Technical Information of China (ISTIC) in Beijing, Honorary Fellow of the Science and Technology Policy Research Unit (SPRU) of the University of Sussex, and at the Virtual Knowledge Studio of the Netherlands Royal Academy of Arts and Sciences. He has published extensively in systems theory, social network analysis, scientometrics, and the sociology of innovation (see for a list of publications at http://www.leydesdorff.net/list.htm ). In 2006, he published *The Knowledge-Based Economy: Modeled, Measured, Simulated* (Boca Rotan, FL: Universal Publishers). Previous monographs are: *A Sociological Theory of Communication: The Self-Organization of the Knowledge-Based Society* (2001) and *The Challenge of Scientometrics: The development, measurement, and self-organization of scientific communications* (1995). With Henry Etzkowitz, he initiated a series of workshops, conferences, and special issues about the Triple Helix of University-Industry-Government Relations. He received the Derek de Solla Price Award for Scientometrics and Informetrics in 2003 and held “The City of Lausanne” Honor Chair at the School of Economics, Université de Lausanne, in 2005. In 2007, he was Vice-President of the 8th International Conference on Computing Anticipatory Systems (CASYS’07, Liège).

**Juan Llorens** received his MS degree in Industrial Engineering from the ICAI Polytechnic School at the UPC University in Madrid in 1986, Spain, and his PhD in Industrial Engineering and Robotics at the Carlos III University of Madrid, Spain in 1996. He joined the Carlos III University in 1992 where he is currently a Full Professor of the Department of Computer Science and Engineering. Dr. Llorens is the leader of the Knowledge Reuse Group within the University. His main research subject is information representation and processing for software reuse. Since 1998 he has split his educational activities between Carlos III University and the Högskolan på Åland (Mariehamn, Åland, Finland).

**Jorge Morato** is currently an Associate Professor of Information Science in the Department of Computer Science and Engineering at the Carlos III University of Madrid (Spain). He obtained a PhD in Library Science from the Carlos III University in 1999 on the subject of Knowledge Information Systems and its relationships with linguistics. From 1991-1999, he had grants or contracts from the Spanish National Research Council. His current research activity is centered on text mining, information extraction and pattern recognition, NLP, information retrieval, Web positioning, and knowledge organization systems. He has published mainly on semi-automatic construction of thesauri and ontologies, topic maps, and conceptual and contextualized retrieval of semantic documents.

**Rory V. O’Connor** is a Senior Lecturer in Software Engineering at Dublin City University and a Senior Researcher with Lero, The Irish Software Engineering Research Centre. He has previously held research positions at both the National Centre for Software Engineering and the Centre for Teaching Computing, and has also worked as a Software Engineer and Consultant for several European technology organizations. He is also Ireland’s Head of delegation to ISO/IEC JCT1/SC7. His research interests are centered on the processes whereby software intensive systems are designed, implemented, and managed.
**About the Contributors**

**Doncho Petkov** is a Professor of IS at Eastern Connecticut State University, USA. He is on the editorial boards of *Systems Research and Behavioral Science, Intl. Journal on IT and the Systems Approach*, and other journals. His publications have appeared in *The Journal of Systems and Software, Decision Support Systems, Telecommunications Policy, IRMJ, IJITSA, JITTA, Kybernetes*, and elsewhere.

**Olga Petkova** is a Professor in MIS at Central Connecticut State University, USA. Her publications are in software development productivity, systems thinking and IT education. They have appeared in *Decision Support Systems, JITTA, Journal of Informatics Education Research, JITCAR, South African Computing Journal*, and elsewhere.

**José L. Roldán** is Associate Professor of Management at the Faculty of Economics and Business Administration, University of Seville. His recent contributions have been published in *International Small Business Journal, Computers in Human Behavior, Handbook of Partial Least Squares, Industrial Marketing Management, International Journal of Technology Management*, and *Internet Research*. Currently he is on the editorial board of *The Database for Advances in Information Systems*, and was guest editor of *European Journal of Information Systems’ Special Issue on Quantitative Research Methodology*. His research interests include social network sites and PLS methodology.

**Kosheek Sewchurran** is an Associate Professor in Information Systems at the University of Cape Town. He is a rated researcher by the National Research Foundation and serves the editorial boards of *International Journal of Managing Projects in Business (IJMPiB) and International Journal of Information Systems and the Systems Approach (IJITSA)*.

**Taryn Schwartzel** works in the field of Technology Consulting at Accenture specializing in IT Strategy and Transformation. Taryn works across telecommunications, public services, financial services, energy, mining, and retail industries. She completed a MTech in 2009 at University of Johannesburg in Information Technology. Taryn is in the process of completing her PhD part time at the University of South Africa (Unisa) in the field of Information Systems. In 2002 she received an Orbicom Mandela Bursary sponsored by companies such as MTN, Orbicom, Pan Am Sat, Worldspace, Telemedia, and former President Nelson Mandela. Taryn has a keen interest for innovative technologies.

**Alveen Singh** is a PhD candidate in the Department of Information Technology at Durban University of Technology, South Africa. He received his Master’s in Technology from Durban University of Technology. He is currently a Lecturer in the Department of Information Technology. His areas of teaching and research include software engineering, IT project management, and programming.
Andrej Škraba obtained his Ph.D. in the field of Organizational Sciences from the University of Maribor. He works as a Researcher and Assistant Professor at the Faculty of Organizational Sciences in the Cybernetics and DSS Laboratory. His research interests cover modeling and simulation, system dynamics, decision processes, and multiple criteria decision-making. His work has been published in the following journals: *Simulation, System Dynamics Review,* and *Group Decision and Negotiation.* In the course of post-doctoral studies he successfully completed three distance-learning courses on System Dynamics from MIT, Center for Advanced Educational Services and Worchester Polytechnic Institute.

Henk G. Sol is a Dutch Organizational Theorist and Professor of Business Engineering and ICT at the University of Groningen (UoG). His research focuses on the development of services enabled by ICT, management Information Systems, decision enhancement, and telematics. Prof. Sol received an M.A. and a PhD from the UoG. He was Founding Dean of the School for Engineering, Policy Analysis and Management at the TU Delft as well as of the Faculty of Economics and Business at UoG. He serves in several editorial boards and acts as a management consultant. Under his responsibility, over 70 PhD dissertations have been finished.

Eileen M. Trauth is Professor of Information Sciences and Technology at The Pennsylvania State University. Her research on human capital in the information economy includes investigations of skills and knowledge of IT professionals, economic development, gender diversity, globalization, and research methods. She has lectured and conducted research in several European countries, including Australia, New Zealand and South Africa. Trauth has published numerous scholarly articles and 9 books with grants from the National Science Foundation, Science Foundation Ireland and the Australian Research Council. She is recipient of a Fulbright Scholar Award (Ireland 1989) and the Fulbright Distinguished Chair in Gender Studies (Austria 2008).

Esther Vlieger follows a Research Master’s in Communication Science at the University of Amsterdam. Her research interests are in the fields of Media, Journalism, and Political Communication. Since 2009, she has been research assistant of Professor Loet Leydesdorff. In her thesis – “The measurement of news frames by use of manual and automated content analysis; exploring the use of manually coded frame elements and computer-assisted semantic maps to study newsframes” – she explores new ways of measuring newsframes. She is currently working as a media analyst at a media research organization, where she conducts quantitative and qualitative media analyses for clients from public and financial institutions.

Jeanette Wing is a PhD candidate in the Department of Information Technology, at the Durban University of Technology, South Africa. She is currently a Senior Lecturer in the Department of Information Technology in the areas of Programming and Software Engineering. Her major research interests include software engineering, requirements analysis, the influence of social systems on Information Systems, and its implications.
