Index

6x6 297

A
abduction 158
abstract generalisation 82
actuation 253
actuator drives for mechatronics 120
adduction 158
agile obstacle crossing 307
agricultural field 359
anthropomorphic musical robots 132
architectural survey 213
artist robot 259
As defined by the IFToMM Permanent 154, 160-161, 163-164, 171, 174-175
asymmetrical dry friction 192
augmented object 340
automatic positioning 188
average load capacity 94

B
backstepping observer 316
ball and socket joints 156
bio-inspired robotics 153
BUGGY 9, 94

C
cable-based robot 165
cable-driven robotic arm (CDRA) 275
cable-driven robotic arms 275
cable-driven universal joint (CDUJ) 275
cable-driven universal joint module 291-292
camera model 233
camera system 181
cartesian coordinates 231
cartesian configuration space 341
cartesian coordinates 231
chromosome syntax 64
client-server architecture 340
climbing angle 179
closed-form solution 235, 240
closed loop manipulator 87
collaborative object handling 345
collision free motion 66
collision-free paths 62
common workspace 343
contextualization 106
control algorithm 255
control box 181, 183
control stability 146
control system hardware 99
control theory 117
coordination 41
costs 95
cultural heritage 214
CyberGrasp 161

D
Degree of Freedom (DOF) 180
Degrees of Freedom (DOF) 133, 159
demining 178
design 94
design constraints 285
design criteria 176
design variables 285
displacement analysis 276-277, 279
disposal 178
distributed vision system (DVS) 229
drying system 253
dynamic modeling 113

E
education robots 140
ellipsoidal joints 156
end-effector 180
engineering education 106
equation of motion 79, 83, 86, 90
equivolumetric partition 282
evaluation mechanism 70
Explosive Ordnance Disposal (EOD) 179
exponential 17
extension 158

F
feed-forward error learning 140
field robots 2
fitness function 65
flexion 158
folding 40
force-closure analysis 280
force-closure condition 280
force-closure pose 280
forward displacement analysis 277
forward kinematics 15, 18, 27, 287
Free-Body Diagrams (FBDs) 79
fresco reintegration 221

G
garment 31
garment alignment devices 36
generalised momentum 81
Genetic Algorithms (GAs) 64
genetic operators 65
gerometrical model 255
geometric relationships 240
gliding joints 156
Global Moment Magnitude Index (GMMI) 284
gripping 32
Ground-Penetrating Radar (GPR) 178

H
hand-eye calibration 231
handicapped aids 154
handling 31
hardware flexibility 95
harvesting 365
harvesting device 365, 372
high speed 315
high speed obstacle crossing 323
hinged joints 156
Human Activity Monitoring System (HAMS) 347
human-friendly robots 130
Human-Machine Interface (HMI) 108
human movement 155
humanoid robots 130
hybrid locomotion 296
Manipulator (PUMA 560) 58
mass matrix 83
mathematical model 192
mathematical modeling 163
mechanical arm 96
mechanical structure 250-251
mechanism 109
mechanisms 36
mechanisms for automation 110
mechanization 359
mechatronical system 192
mechatronics 107
medial rotation of the arm 156
medical robots 3, 154
microprocessors 114, 116
microtube 193-194
mission-planning 55
mobile platform 58, 95, 179
mobility 94
modelling of the system 79
Moment Magnitude Index (MMI) 283
Montecassino Abbey 224
Motion Planning Problems (MPP) 52
motivation 93
multi-fingered hands 44
musical 140

N
nonlinear optimization 237, 242
non-planar workspace 240
non-symmetrical skid-steering model 301

O
objective function 285
objectives 93
obstacle-crossing 330
off-road mobile robots 315
OpenWHEEL 308
opposition 158
optimal mission planning 58
optimization model 284
optimization results 286
orientation 42

P
part handling services 339
path generation 30
patient rehabilitation 154
personal service robots 2
physiotherapy 160
piezoelectric robot 194
pipe-crawling robot 194
pitch stability 327
pivot joints 156
planar workspace 241
pneumatics 365
potential energy 80
power supply system 98
predictive control 297
preliminaries 231
Product of Exponential (PoE) 28
product-of-exponentials formula 292
programming 120
prototypes 126

Q
quadruped robot 15
Quadrupole Resonance Sensors (QRS) 178
qualitative measure 283
quantitative measure 281
quick change joint 184

R
real data 230-231, 238
region segregation 42
rehabilitation 154, 159
rehabilitation robotics 159
reliable 95
remote control 95
representation mechanism 70
restoration 221
restoration activities 215
rigid body motion 16
rigid motion 16
robot design 227
robotic ironing 31
robot kinematics 18, 78, 173
robustness 94
rotations 341

S
saddle joints 156
Saffron 372
scapular elevation 156
scapular protraction 156
scapular retraction 156
self-calibration 231
separator 376
serial manipulator 84
service robot 357
service robots 213
service robots (SR) 1, 52
service tasks 217
shared workspace 346
skid-steering 297
software 99, 254
software architecture 262
software flexibility 95
speed control 62
spine 159
Stability 94
static path planning 61, 325-326
steering 330
suspension 303

T

task space 182
tension analysis 279, 283, 291
translations 341
transverse adduction 157
transverse extension 157
transverse flexion 157
travel time 63
two-mass WLR 195

U

unfolding 40
United Nations Educational, Scientific and Cultural Organization (UNESCO) 214
University of Sao Paulo (USP) 107
upper limb 156
user expectations 190
user interface 101

V

vibration driven-robots 194
vibration-driven system 192
virtual linkage 340-341
vision system 97

W

walking robot 224
Waseda Saxophonist Robot No. 2 Refined (WAS-2R) 134
wide surfaces printing robot 248
workspace analysis 42, 281-283, 289, 292
workspace-based design optimization 274-275
workspace model 59, 61
worm-like principle of locomotion 191
Worm-Like Robot (WLR) 191
