About the Contributors

Kelvin Joseph Bwalya is a final year PhD candidate at the Department of Information and Knowledge Management (University of Johannesburg). He has a Master’s in Electrical and Computer Science from Korea Advanced Institute of Science and Technology, and Bachelors Degree in Electrical Engineering from Moscow. Kelvin has over 30 peer reviewed publications and has presented at over 20 conferences worldwide. His research interests lie in information systems (e-Government, databases, business process modeling, semantic information retrieval and analysis, etc.).

Saul F. C. Zulu is a Lecturer in the Department of Library and Information Studies, at the University of Botswana. He holds a Bachelor of Arts degree in Library Studies with Sociology and Political Science from the University of Zambia, Master’s degree in Librarianship (IT Applications) obtained from the University of Wales at Aberystwyth, a Master’s degree in Archives and Records Management from the University of Denver, Colorado, U.S.A and Master’s degree in Librarianship and Information Management from the University of Denver, Colorado, U.S.A. Mr. Zulu has previously worked at the University of Zambia, where he served in various capacities, including as Head of Department of Library and Information Studies at the University of Zambia. His main research interests are in indigenous knowledge systems, legal issues of information, and emerging technologies.

***

Hisham Abdelsalam holds a Master of Science and a Ph.D. in Mechanical Engineering (Old Dominion University, Norfolk, Virginia, USA). He obtained his Bachelor degree with honors in Mechanical Engineering from Cairo University (Cairo, Egypt). Dr. Abdelsalam is an associate Professor in the Operations Research and Decision Support Department, Faculty of Computers and Information, Cairo University. In 2009, Dr. Abdelsalam was appointed as the director of the Decision Support and Future Studies Center in Cairo University. During the past four years, D. Abdelsalam has led several consultancy and research projects and published eight scholarly articles on e-government.

Suha AlAwadhi is an assistant Professor in the Department of Library and Information Science, College of Social Sciences, Kuwait University. She obtained her PhD from Loughborough University in 2007. She is a member of DGSNA; a program committee member of the IFIP E-Government Conference (EGOV); and a co-chair for the Social Networking and Government Minitrack in HICSS. Dr. AlAwadhi has a number of publications including conference papers and journal articles and delivered many presentations and lectures. Her research areas of interest include e-Government, social networking, knowledge sharing, and information literacy.
**André Andrade** is a PhD student in Management at Brazilian School of Public and Business Administration at Getulio Vargas Foundation; M.S., (Major: Public Ethics), Gama Filho University; (PUC-Rio); B.S., Law, Universidade do Estado do Rio de Janeiro; B.S, Economics, Universidade Federal do Rio de Janeiro. He is Researcher of e:lab (Laboratory for Research into Government and E-Business). He has over 15 years experience in consulting for government agencies in various levels, including the Brazilian Judiciary System. He is guest member of the Technical Committee of WG 8.5 (Information Systems in Public Administration) of IFIP (International Federation for Information Processing).

**Edgar Napoleon Asiimwe** is an Information Technologist. He is currently a PhD student (Informatics) at Swedish Business School. He holds MSc Degree (Informatics) from Örebro University and Bachelors degree in Information Technology from Makerere University. His research interests are in e-governance (m-governance), human computer interaction (HCI) & usability, assistive technologies for education (AT4D), and information and communications technologies for development (ICT4D) infrastructure. He has experience in various ICT areas including web administration, ICT education and research, systems analysis, and m-health implementation.

**Kamal Atieh** graduated as an Electronic System Engineer from the Higher Institute for Science and Technology in Syria (1995). In 2006, he earned the Master Degree in Computer Information System from the Arab Academy for Banking and Financial Sciences, and he has the PhD in Computer Information System from the Arab Academy for Banking and Financial Sciences (2010).

**C. K. Ayo** holds a B.Sc. M.Sc. and Ph.D in Computer Science. He is currently an Associate Professor of Computer Science and the Director, Academic Planning Unit of Covenant University. He was the pioneer Head of Computer and Information Sciences Department of the University. His research interests include: Mobile computing, Internet programming, eBusiness, eGovernment and Software Engineering. He is a member of the Nigerian Computer Society (NCS), and Computer Professionals (Registration Council) of Nigeria (CPN). Similarly, he is professionally certified in CISCO and Microsoft products. Dr. Ayo is a member of a number of international research bodies such as the Centre for Business Information, Organization and Process Management (BIOPoM), University of Westminster, London; the Review Committee of the European Conference on E-Government ECEG); the programme committee, IADIS Information Systems; the Editorial Board, Journal of Information and communication Technology for Human Development (IJICTHD), the Editorial Board, International Journal of Scientific Research in Education (IJSRE), and the Editorial Board, African Journal of Business Management, amongst others. Furthermore, Dr. Ayo is an External Examiner to a number of Nigerian universities at both Undergraduate and Postgraduate levels in Ladoke Akintola University of Technology, Ogbomoso; the Redeemers University, Ogun State; Lagos State University, Ojo, Lagos; University of Ibadan, Ibadan Oyo State; and Bells University of Technology, Ota, Ogun State. He has supervised about 200 postgraduate projects at Postgraduate Diploma, Master’s and Ph.D levels, and he has several publications in scholarly journals and conferences.

**A. A. Azeta** is a Ph.D student in the Department of Computer and Information Sciences, Covenant University, Ota, Nigeria. He holds B.Sc. and M.Sc. in Computer Science from University of Benin and Lagos respectively. His current research interests are in the following areas: software engineering, algo
Algorithm design, and mobile computing. He currently lectures at Covenant University. He is a member of the Nigerian Computer Society (NCS) and Computer Professional Registration Council of Nigeria (CPN).

Eng. Fadi Baghdadlian graduated as an Electronic System Engineer from the Higher Institute for Science and Technology in Syria (1995). In 2006, he had the Master Degree in Computer Information System from the Arab Academy for Banking and Financial Sciences. Beside his preparation for his PhD, he worked as general manager of private company in information technology domain. In addition, he worked as a consultant for many IT and financial companies. He worked at Damascus Computer Science Faculty as Instructor for many courses.

Laban Bagui is a Research Fellow at Cape Peninsula University of Technology (CPUT). His research interests are in ICT4D, S&CI, and eParticipation. He is originated from Cameroon where he founded “GIC Osmose IT du Cameroun” in 2004, a very small cooperative around personal and small business computing. He obtained a Bachelor of Technology (BTech) in Internet and Networking from Douala University Institute of Technology (IUT-Cameroon) and BTech (Honours) in IT Management from CPUT (Cape Town – South Africa). He has worked for various industries, Internet Service Providers (Systems and networks technician), broadcasting (Coordinator), and mobile software (Project manager). He is member of the GAID, Cape IT Initiative (CITI), Silicon Cape, and CIO Forum and CIR in SA.

Egle Bileviciute was born in 1976, in Klaipeda, Lithuania. She is currently Professor at the Department of Administrative Law and Procedure of Mykolas Romeris University. She is teaching students of Mykolas Romeris University in such subjects: law of research and studies, environmental law, administrative procedure, social changes and administrative law, and crime investigation. She defended her doctoral thesis “Lithuania criminalistic information system: modern state and new model” and received her PhD in Social Science (Law) in 2003. She was granted the Associate Professor position in 2007. She has enough experience in implementation and preparation of national and international projects. She is experienced in processing of data and she knows statistical methods for social scientific researches. Her current research interest includes law of research and studies, management of research, administrative law, forensic science, legal informatics, implementation of IT in law, and environmental law.

Tatjana Bilevičienė was born in 1951, in Ukraine. In 1974 she graduated of Faculty of Electronic Technique of Leningrad Electro Technique Institute and acquired the profession of engineer of electronic technique. Tatjana Bilevičienė from 1974 till 1988 worked as an Engineer. From1988 she worked in Vilnius Pedagogical University and Mykolas Romeris University. Teaching subjects of hers include: informatics, search of information, statistics, and data management. In 2009 she defended her doctoral thesis in social sciences “Modern Opportunities of Disabled Persons’ Professional Rehabilitation and Integration: Model of Telework Organization,” and she received her PhD in social sciences (management and administration). She is currently Assoc. Professor at Mykolas Romeris University, Faculty of Economics and Finance Management, Department of Business Economics. Her current research interest includes mathematics (statistics), informatics, ICT, and management. From 2006 the e-inclusion problems of disabled persons became her main scientific research field. In 2008, Tatjana Bilevičienė readied the equivalency Doctoral dissertation that firstly in Lithuania presents the organizational model of telework of disabled persons and evaluation methodizes of disabled persons’ employment’s quality.
Manuel Pedro Rodríguez Bolívar is Associated Professor in Accounting at the University of Granada. He has authored numerous articles in international journals, among them include: *Public Money & Management, Government Information Quarterly, Public Administration and Development, Online Information Review, International Review of Administrative Sciences, American Review of Public Administration, International Journal of Accounting, and International Journal of Commerce and Management*. He has been also the author of several book chapters published in prestigious international publishers such as Kluwer Academic Publishers, Springer, and IGI Global, and is author of full-length books published by the Ministry of Economy and Finance in Spain.

Horst von Brand is Chemical Engineer (Universidad Técnica Federico Santa María, Chile), and PhD in Computer Science (Lousiana State University, USA). He is associate Professor of the Informat- ics Department at UTFSM, Chile. His research areas include open source software applications and applications of software engineering.

Andy Bytheway, following a 20 year career in the IT industry, took up an academic post at the Cranfield School of Management in the UK, where he pioneered the development of commercially-sponsored Information Systems research - a study of electronic commerce that was supported by 20 European organisations and linked with similar work in Japan. Other projects followed. He emigrated to South Africa in 1998, where he took up the Old Mutual Chair in Information Systems at the University of the Western Cape. He is now Adjunct Professor of Information Management at the Cape Peninsula University of Technology, where he supervises Master and Doctoral projects. Most recently he was awarded a three-year NRF grant to research the management of ICTs in South African Education. He has written three books and published more than 100 academic and practitioner papers.

Aaron Ciaghi is a PhD student at the ICT Doctoral School of the University of Trento, Italy. He is working in the ICT4G group at Fondazione Bruno Kessler (Trento, Italy), and his current interests include ICT for Development, Living Labs, Legal Informatics, HCI and Participatory Design. Aaron obtained his BS degree in Computer Science at the University of Trento in 2007 with a thesis on law modelling. He participated to the ATLAS dual Master Degree in Computer Science at the University of Trento and at Georgia Institute of Technology (Atlanta, GA) and received a MS degree in Computer Science from Georgia Tech in May 2010, graduating also cum laude from the University of Trento in July 2010. Aaron is currently involved in the organization of the Maputo Living Lab and of RHoK Trento.

Ana Corojan is a PhD candidate in Law and Political Science at Universidad Autonoma de Madrid. She graduated in Law and in Political Science, and obtained a Master’s in Democracy and Government at the same university. He has been visiting fellow at El Colegio de México (México DF) where she also studied part of the master degree. Currently, she is a junior research fellow at the IDEAS Foundation.

J. Ignacio Criado is Assistant Professor in the Department of Political Science and International Relations, Universidad Autónoma de Madrid. He has been posdoctoral visiting fellow at Center for Technology in Government, State University of New York, (SUNY at Albany), and doctoral visiting fellow at Oxford Internet Institute, University of Oxford, among other international institutions. His books *Building the Local e-Administration* (published in Spanish, *Construyendo la e-Administración Local*).
About the Contributors

Hepu Deng is a Professor of Information Systems in the School of Business Information Technology and Logistics, RMIT University, Melbourne, Australia. His research interests are in the areas of e-government, digital business, decision analysis, intelligent systems, knowledge management, and their applications in business. The multi-disciplinary nature of his research and the emphasis on both theoretical and applied research are exemplified by numerous refereed publications in top refereed international journals listed in the Science Citation Index and at major refereed international conferences. He has completed his PhD in Computing, Post Graduate Diploma in Management Engineering, Master’s Degree in Business Systems, and Bachelor’s degree in Mathematics.

Ignatius Aris Dwiatmoko was born on 23rd June 1965 and was graduated from Statistics Department Bogor Agricultural University, Indonesia. He received his Master’s degree from University of The Philippines majoring in theoretical statistics. He became a faculty member of Sanata Dharma University, Yogyakarta, Indonesia and taught some statistics subject. He has written several articles on applied statistics that were published in Indonesia Journal. Together with the first author (Wijaya) conduct some e-government researches.

Tanya du Plessis is a Lecturer at the Department of Information and Knowledge Management, University of Johannesburg, and specializes in Legal Research Competitive Intelligence tools and techniques and VLE content integration. She is also involved in CI projects of the Centre for Information and Knowledge Management. She holds a D Litt et Phil (Rand Afrikaans University, South Africa), with the focus on information and knowledge management in support of legal research in a digital information environment.

Hatem ElKadi was born in Egypt in 1960. He graduated from the Faculty of Engineering, Cairo University in 1983. He got his Ph.D. at the University of Lille, France, in 1993. He is currently an Assistant Professor at Cairo University. He is Advisor for Strategic Projects at MSAD (Ministry of State for Administrative Development), and supervises a number of national e-government projects. He was the Director of the Egyptian eGovernment Services Delivery Program which was ranked 23th worldwide in 2010, and in 2008, he won the first prize for the All Africa Public Service Innovation Award. He is member of the “National Dispute Settlement Committee for ICT issues,” as well as the steering committee for the “National ID Card project.” During his career, he managed several successful ICT projects with the government of Egypt, private sector and NGOs, as well as consulted for National Projects in Yemen and Kuwait.

Susana de Juana-Espinosa is an Assistant Lecturer in Business Management at the University of Alicante, Spain. Her PhD consisted in the analysis of the e-government strategies carried out by Spanish councils. Her current research includes e-business strategy and management in the public and private sectors.
About the Contributors

Elias Farzali is PhD in (CIS) Computer Information Systems, received PhD from Arab Academy for Banking and Financial Science, Damascus, Syria. More than 13 years of experience in Banking Sector, IT Department, system analysis, and design for many solutions. He was Daily Operational manager and project manager.

Shauneen Furlong is an independent consultant and part-time Professor who lectures on e-government and project management with the University of Toronto, University of Ottawa, and around the world. Over the last couple of years, she has presented and worked in the United Kingdom, Middle East, Europe, East Africa, Egypt, China, Canada, Washington and Turkey. She has senior executive level and management experience in a number of Government of Canada central agencies and departments over a period of 20 years, most recently Executive Director, Government On-Line, Government of Canada. Ms. Furlong was nominated by IT World Canada as being one of Canada’s key e-government drivers, and was profiled by Computer World Canada as a charter member of Canada’s first MBA in Project Management. She has published articles and peer reviews papers for a number of international journals and conferences. She was awarded a 2007 IBM Fellowship; is a Project Manager Professional (PMP) and PhD Candidate in Computer Science (Liverpool, UK); and has a BA in Philosophy; an MA in Business Administration Economics, and an MBA in Project Management.

Erlane K Ghani is an Associate Professor in the Faculty of Accountancy, Universiti Teknologi MARA, Shah Alam, Malaysia. She is also currently the Head of Teaching and Learning Technologies in the Institute of Leadership and Quality Management (iLQAM), Universiti Teknologi MARA. She holds a PhD in accounting from Massey University, New Zealand. Erlane has published articles in national and international journals and has presented papers in a number of national and international accounting and business conferences. Her research interests are in the areas of governance of local government, accounting education and financial reporting. Currently she is involved in studying the effects of supervisory relationship on PhD programme.

Balulwami Grand holds a Master’s degree from the University of Sheffield (United Kingdom) and a PhD from the University of Pittsburgh (USA). His research interests are in the areas of e-government, public sector information management, health informatics, and information society.

Åke Grönlund is (full) Professor and head of research in Informatics at Örebro University. Åke’s research concerns the use of information and communication technologies (ICT) in various human activities. Key words include, but are not limited to, information systems, informatics, electronic government, ICT for Development (ICT4D), e-learning, education, mobile technologies. The common denominator involved in all projects is to understand how people arrange their work, their organizations, and other activities pertaining to private life, such as socializing on the web, and how ICT can be used to make improvements. One strong focus since 15 years is ICT use in government reform, electronic government (governance), worldwide.

Kerstin Grundén is an Associate Professor in Informatics at the West University of Sweden. She has also a background as a Sociologist. Grundén has made several evaluation studies of implementation of information systems in public organizations in Sweden. She has made research studies within the fields of computer-supported co-operative work (CSCW), e-learning and e-government using the
evaluation model MOA (developed in her thesis). The MOA model is especially focussing the employers, the employees, and the customer/clients perspectives. Grundén is now participating in an on-going interdisciplinary research project Innoveta (2009 – 2011), funded by Vinnova, for the study of customer centres implementation and e-services within municipalities in Sweden.

**Andrei Ilas** received a degree in Civil Law, a MA in International Law, and a Doctorate in Political Sciences in Romania. He taught for eight years European law and Comparative politics at Alexandru Ioan Cuza University of Iasi where he is holding a full-time position. During the past five years he published peer-reviewed articles and participated to same-level conferences on various e-government related subjects. His research interest focuses on the social cultural values’ influence over the development of e-government within the European Union area and particularly in its Eastern side. Andrei is currently studying common law in French at Ottawa University, Canada.

**Luiz Antonio Joia** Ph.D., Production Engineering (Major: Technological Innovation and Industrial Organization), COPPE/UFRJ (Rio de Janeiro Federal University); M.S., Civil Engineering, COPPE/UFRJ; M.S., Management Studies, Oxford University, UK; B.S., Fortification and Construction Engineering, Instituto Militar de Engenharia (IME). Over 20 years experience in major technology-based companies, holding executive positions in the areas of Information Technology and Business Development. He has been Adjunct Professor of the School of Engineering of Rio de Janeiro State University since 1982; Academic Coordinator of the MBA in Strategic Management of Information Technology and the MBA in Project Management - FGV Management; Consultant and Advisor to the World Bank; Coordinator of e:lab (Laboratory for Research into Government and E-Business); Guest member of the Technical Committee of WG 8.5 (Information Systems in Public Administration) of IFIP (International Federation for Information Processing); and Guest Brazilian representative at the Interamerican E-Government Training Network (Red Interamericana de Formación en Gobierno Eletrónico), IDB/OAS.

**Kyu-Nahm Jun** is an Assistant Professor in the Department of Political Science at Wayne State University in Detroit, Michigan. Her research focuses on the role of information technology between citizen and government agencies in urban governance. She is also interested in understanding the role of government website usage and citizen satisfaction with their local government. Other research interests include community-based citizen participation, the impact of contextual factors on civic behavior, and local government responsiveness. She has published her works in the *Journal of Civil Society, Journal of Public Administration Research and Theory, Urban Affairs Review, Social Forces*, and *Nonprofit and Voluntary Sector Quarterly.*
**Mike Just** is a Lecturer (Assistant Professor) at Glasgow Caledonian University in Glasgow, Scotland, where he teaches and researches on computer security and its impact on people. Prior to his work in Glasgow, he was a Visiting Research Fellow at the University of Edinburgh and worked for 10 years in the private and public sector in areas of both policy and technology. Mike has published widely in areas of applied cryptography, network security, and usability, with more than 20 publications and frequently presents at international forums. He earned his PhD in 1999 from Carleton University in Ottawa, Canada.

**Daniel Kamlot** is a PhD candidate in Business Administration at Brazilian School of Public and Business Administration at Getulio Vargas Foundation. M.S.; Business Administration (Major: Marketing), Catholic University of Rio de Janeiro (PUC-Rio); B.S., Computer Engineering; PUC-Rio.

**Ghassan Kanaan** is a Professor in Computer Information Systems Department/IT College at Petra University. He received his PhD in Computer Science from the Illinois Institute of Technology (USA) and MS in Computer Science from Western Michigan University Kalamazoo-Michigan (USA). Since gaining his PhD, he has been active in research, teaching and publications within several aspects of the computer science field including the natural language processing, information retrieval, data compression, encryption, letter recognition, information extraction, data mining, digital libraries, and concept mapping.

**Raed Kanaan** is an Assistant Professor in Management Information System at the Arab Academy for Banking and Financial Sciences. He received his PhD in Information Systems from the De Montfort University, and MSc in Management Information Systems from the Arab Academy for Banking and Financial Sciences. His research interests include e-Government in developing countries, e-commerce, impact of culture on IT adoption and implementations in the Middle East, and intellectual capital in the Arab universities.

**Anuradha Karunasena** is a Ph.D student in the School of Business Information Technology and Logistics at RMIT University, Australia. Her research interests are in the areas of e-learning, e-government, knowledge management, social media, and database management systems.

**Kanishka Karunasena** is a Full-time PhD student in the School of Business Information Technology and Logistics of RMIT University, Melbourne, Australia. He has completed a Master’s degree in Information Technology and Bachelor’s degree in Computing and Information Systems. His research focuses on the development of a general framework for evaluating the public value of e-government in developing countries. Kanishka is the corresponding author.

**Ronan de Kervenoael** is a Lecturer of Marketing at Sabanci University and network Lecturer at Aston University. He received his Ph.D. from Sheffield University, U.K. Ronan has a particular interest in choice and anti-choice investigating both consumers and supply chain actors. His wider research interests lie under the umbrella of consumer behavior and retailing; the principal theme being the socio-spatial context of consumption. He is currently researching change in the Information Communication Technology within emerging markets. His work has been published in *Environment & Planning A*, *World Development*, *Journal of Industrial Relation*, *The Service Industries Journal*, *International Journal of Retail & Distribution Management*, and *International Review of Retail Distribution and Consumer Research*. 
Gohar Feroz Khan is currently working as an International Research Professor and Lecturer at Yeungnam University, South Korea. He is also senior consultant at the Society for the Knowledge-based Innovation and Education (SKIE) Seoul National University and a member of Asia triple helix society. Dr. Khan has working experience in public sector at senior management level. He has a Ph. D in Information & Telecommunication Technology Management from Korea Advanced Institute of Science and Technology (KAIST) in South Korea and master in computer science. His research interests include Knowledge-based innovation, social networks, Triple Helix, e-government, m-government, the user acceptance of information technologies, ICT policy, e-business, network economic, and e-learning. His work has been accepted and published in Online Information Review (OIR) Journal, Scientometrics, Journal of the American Society for Information Science and Technology (JASIS), and Pacific Journal of Information System (APJIS). He has presented his studies at international conferences, such as, ICCIT09 (Korea), and ICDGS 2010 (Paris), Triple Helix 9 International Conference (Stanford University, USA 2011), and COLLNET 2011 (Turkey, Istanbul).

Tarek Khalil has a Bachelor’s in Mathematics from the Tichreen University- Sciences Faculty in Syria (1998). In 2006, he earned the Master’s Degree in Computer Information System from the Arab Academy for Banking and Financial Sciences, and he has the PhD in Management Information System from the Arab Academy for Banking and Financial Sciences (2010). Beside his preparation for his PhD, he worked as IS Consultant for several companies in Syria. In addition, He worked at Tichreen University- Sciences Faculty as instructor.

Rembrandt Klopper is an interdisciplinary scholar publishing the results of research focusing on aspects of research methodology, informatics, communication science and cognitive science. In cognitive science he has written a number of papers on the central role of metaphor in human thinking. He supervises Master’s and Doctoral students at the University of KwaZulu-Natal and is a special issues editor of the South African interdisciplinary scholarly journal, Alternation.

Ipek Kocoglu has earned her B.S. degree in Manufacturing Systems Engineering at Sabanci University, Turkey, her M.S. degree in Science and Technology Strategies at Gebze Institute of Technology, Turkey, and she is currently studying as a Ph.D. student in Managent Science at the Gebze Institute of Technology, Turkey. Ipek works as a Research Assistant in the Tubitak (Scientific and Technological Research Council of Turkey) funded project of Sabanci University.

Sam Lubbe is a senior academic at the North West University in Mafikeng, South Africa. He has been in Academia for more than 30 years and have presented many papers at international conferences, have written several papers for international journals and some books as well. He has supervised many Master and Doctoral dissertations and had a good pass rate for these students.

Abdulghafoor Mohammad graduated as an Electronic System Engineer from the Damascus University-Electrical and Mechanical Faculty in Syria (1998). In 2006, he had the Master Degree in Computer Information System from the Arab Academy for Banking and Financial Sciences, and he has the PhD in Computer Information System from the Arab Academy for Banking and Financial Sciences (2010). Beside his preparation for his PhD, he worked as IT Manager in Damascus University. In addition, he worked at Damascus University-Electrical and Mechanical Faculty as Instructor.
Junghoon Moon is an Assistant Professor in the Regional Information Programme at Seoul National University in Korea. He received his PhD from the State University of New York at Buffalo in 2006 and received his Master’s and Bachelor degrees from Seoul National University. He worked for several years as a Systems Analyst and Consultant. In addition, he is a member of Auto-ID labs, sponsored by EPCglobal. Junghoon Moon’s research interests include human factors in MIS/e-business, technology management, e-government, information policies for the food industry, and business applications using a ubiquitous sensor network. He has presented his studies at many conferences including the Korean Conference on Management Information Systems and the International Conference of the Information Resources Management Association. At the Americas Conference on Information Systems in 2006, one of his papers was judged the Best Paper of the Year. At the Hawaiian International Conference on System Sciences in 2007, one of his papers was nominated as the Best Paper of the Year. He has published articles in many journals, including Online Information Review, Information Systems Frontiers, e-Business Studies, and the Journal of Information Technology Management.

Anne Morris is a Professor in the Department of Information Science at Loughborough University. In addition, she is the Senior Adviser for the Information and Computing Science Subject Centre (Higher Education Academy) and is on the editorial board of several journals. Her main interests lie in the usability and evaluation of information systems; information user behaviour; and the economic value and impact of information services. She has taught research methods, statistics, and human-computer-interface design for over 20 years; has written several books; published numerous journal articles on a variety of professional topics; and delivered many international conference presentations and workshops.

Fredrick Mtenzi is an experienced Information Systems Security and Forensics researcher. Fred’s research interests include the design and Implementation of Energy aware routing algorithms for Mobile Ad Hoc Networks (MANET), Security issues in MANET and e-healthcare, cyber security, digital forensics, application of mobile computing to healthcare, and development of culturally sensitive educational curriculum for Ireland, China, and Tanzania. He has authored and co-authored over 100 scientific publications. He is a team leader of the Ubiquitous Computing Research Group (UCRG) at the School of Computing, Dublin Institute of Technology. He has organized and chaired peer-reviewed international conferences and workshops in Computer Games, and e-Healthcare Information Security. He is a professional member of Association for Computing Machinery, IEEE, and Information Systems Security Association. He is the Editor in Chief of the International Journal of e-Healthcare Information Systems (IJe-HIS) and member of several journals’ editorial boards.

Stephen M. Mutula is a Professor in the Department of Library and Information Studies, University of Botswana where he serves as the Head of Department. He holds a PhD in Information Science (University of Johannesburg, South Africa), Master’s Degree in Information Science (University of Wales, UK), Postgraduate diploma in computer science (University of Nairobi, Kenya) and Bachelors degree in Education-Mathematics and Chemistry (Kenyatta University, Kenya). He has published extensively in international refereed journals and books. He is a first co-author of a book titled: Web Information Management: A cross disciplinary textbook published by Chandos Publishing, London, 2007. He is also the author of “Digital Economics: SMEs and E-readiness,” published in 2009 by IGI. He is an honorary research fellow of the University of Zululand, South Africa. He has won several international excel-
Laura Alcaide Muñoz is Lecturer in Accounting of the University of Granada. Nowadays, she is developing her doctoral thesis on the level of disclosure of financial information published in Internet by the member governments of the European Union, and the factors and incentives influencing the level of transparency, and she has been also author of an article published in *International Journal of Digital Accounting Research*.

Sergio Murúa is M.Sc. in Industrial Engineering (PUC Rio de Janeiro, Brazil), Engineer and B.Sc. in Information and Computer Science (UTFSM). He has worked in Oracle Corp. and as an instructor and researcher at Universidad Técnica Federico Santa María. His research areas include project management, ROI in IT projects, ERP, and supply chain implementation methodology and evaluation.

Noraini Mohd Nasir has more than twenty years teaching experience with Universiti Teknologi MARA. Her teaching portfolio includes courses such as Costing, Management Accounting, and Financial Accounting and Reporting. Currently she is teaching Financial Accounting to the Bachelor of Accountancy (Honours) students. She is an associate member of MIA and a member of the Malaysian Association of Consumer and Family Economic Affairs, a non-governmental organisation. Apart from academic qualifications, Noraini also holds a Certificate in Qualitative Research from University of Georgia, USA. She has written several books on management accounting and financial accounting and reporting. She has also published several articles in national and international journals. Her research interests are in financial accounting and reporting, local government authorities, and accounting by non-governmental organizations.

Bongani Ngwenya is Dean, Faculty of Business, MBA Thesis Defence Panel Chair, Lecturer, and Master’s thesis supervisor, Solusi University, Zimbabwe. He has twenty-seven years of work experience in public and private sector. He is currently studying PhD in Business Management and Administration, specialising in Strategic Management (Grounded Theory Research), with North West University, Mafeking Campus, South Africa. He researches in organisational decision-making research and business in general.

A.A. Oni holds B.Sc. and M.Sc. in Management Information System from Covenant University. She is currently a Ph.D student in the Department of Computer and Information Sciences, Covenant University, Ota, Nigeria. Her current research interest are in the following area: e-commerce, e-business, e-government, theoretical investigation of users acceptance of information system, design theories for information system, and software engineering. She also lectures in the Department of Computer and Information Sciences, Covenant University.

Gbolahan Olasina joined the Dept of Library and Information Science (LIS), Faculty of Communication and Information Science, University of Ilorin, Nigeria in 2008 after four years of being an academic staff at the Ladoke Akintola University of Technology, Nigeria. He currently teaches IT-based courses in the library school. He is an active member of the Rotary Club, likes to swim, play tennis, and design websites.
Cynthia Opheim is a Professor of Political Science at Texas State University. Dr. Opheim’s specialization is American State Politics. She has published articles in journals such as *Public Administration Review, State and Local Government Review, Western Political Quarterly, and Regional and Federal Studies*. Her work includes topics such as legislative professionalism, legislative recruitment, education policy, and state political parties. She is co-author of the text “State and Local Politics: The Individual and the Governments.” Dr. Opheim has been active in the profession. In 2003, she served as President of the Southwestern Political Science Association; she also served on the executive board of this organization. From 1996-2003 she served as Chair of her department at Texas State University.

George S. Oreku is a Principal Researcher and a Director of ICT and Technology Transfer with TIRDO. His research interest includes Information Security, Sensor Networks Security, E-commerce Security, Risk Assessment (RA) and IT Policy survey. Research in ICT application, diffusion, and its integrations with R&D. He is also a Post Doctoral researcher with North West University in South Africa. He has worked as a Lecturer in many universities worldwide. He has organized and chaired number of international workshops and conferences. He is also a reviewer in international journals and conferences. He is a member of IEEE, ACM, SANORD, and WASET.

R. L. Orelli has a BA Business Economics, University of Bologna, Italy, Ph.D. Management of the Public Sector, University of Salerno, Italy, visiting scholar at London School of Economics, Accounting Department, UK. Orelli is a Lecturer in Business Economics, Department of Management, University of Bologna, Italy; affiliated with EBEN; current research interests are new public management and public services changes in local governments, management accounting, and management control in public sector.

E. Padovani BA Business Economics, University of Bologna, Italy, Ph.D. Business Administration, University of Ferrara, Italy; Associate Professor of Management Control and Auditing in Public Sector Organizations in the Faculty of Economics and Department of Management at the University of Bologna, Forli Campus, Italy; invited as guest lecturer at the undergraduate, graduate, and executive levels in different Italian universities and abroad (University of Valencia, Spain; Methodist University of Sao Paulo, Brazil; Aarhus Business School, Denmark; Michigan State University, East Lansing MI; University of Washington, Seattle WA). Research interests: public management with specific reference to management control systems, performance measurement for management and auditing, benchmarking, and management of outsourcing.

Tanya du Plessis is Associate Professor at the Department of Information and Knowledge Management, University of Johannesburg, and specializes in Legal Research, Competitive Intelligence tools and techniques, and virtual learning and research environment content integration. She is involved in CI projects of the Centre for Information and Knowledge Management. She holds a PhD (D Litt et Phil, Rand Afrikaans University, South Africa), with the focus on information and knowledge management in support of legal research in a digital information environment.

Taruna Shalini Ramessur is Senior Lecturer at the University of Mauritius in the department of Economics and Statistics. She maintains an interest in public and development economics as well as international trade and e-Government. She has been and is currently engaged in many consulting projects with COMESA, UNDP, AERC, LOGIN Africa pan –African network and SARUA, among others. Be it
About the Contributors

at the national or international level, she has participated in various workshops, seminars and presented papers at conferences. Shalini has also been involved in a research project on Mauritius, for LOG-IN Africa, which is an emergent pan-African network of researchers and research institutions from nine countries. She has also published articles in a number of international refereed journals.

Christopher G. Reddick is an Associate Professor and Chair of the Department of Public Administration at the University of Texas at San Antonio, USA. Dr. Reddick’s research and teaching interests are in information technology and public sector organizations. Some of his publications can be found in Government Information Quarterly, Electronic Government, and the International Journal of Electronic Government Research. Dr. Reddick recently edited the two volume book entitled “Handbook of Research on Strategies for Local E-Government Adoption and Implementation: Comparative Studies.” He is also author of the book “Homeland Security Preparedness and Information Systems,” which deals with the impact of information technology on homeland security preparedness.

Karen Renaud is an academic at the University of Glasgow. She has been working in the area of Usable Security for the last decade. Her main focus in the last few years has been to understand the chasm between security professionals and ordinary employees and to find ways of closing the gap.

Chris Rensleigh is a Professor and Head of Department, Department of Information and Knowledge Management at the University of Johannesburg, is mandated to manage the IKM Department on an operational as well as tactical level. Broadly, this includes the development of staff as well as curriculum. He lectures undergraduate and post graduate students and supervises research for Master’s and Doctoral students. He has been the external examiner on theses and dissertations for various national and international universities including University of Pretoria, Cape Peninsula University of Technology, University of Kwa-Zulu Natal, Stellenbosch University, University of Botswana, Andhra University (India) and Mangalore University (India). Prof Chris Rensleigh is a senior Professor at the Department of Information and Knowledge Management, University of Johannesburg, and specializes in Internet information infrastructures and related technologies. He has a PhD in the Commerce field specializing in Informatics.

Jamaliah Said obtained a degree in Accountancy and Finance from John Moore University, Liverpool, United Kingdom, Master’s in Accountancy from Curtin University of Technology, Australia; Certificate in Qualitative Research from University of Georgia, USA and PhD in Accountancy from UiTM. She has been working in UiTM Shah Alam in the Faculty of Accountancy since 1991. She was formerly the Research Coordinator for the Institute of Education Development, UiTM. Jamaliah has published articles in national and international journals and won best paper award from several conferences. The recent best paper award was from Clute Institute during the International Applied Business Research Conference, Florida, USA. Her research interest and publications are in the field of accounting education, management accounting, and public sector. At present, she is involved in research on zakat management, public sector performance, and the effects of supervisory relationship on PhD programme.

Chaudhary Imran Sarwar is a Professor and serving as CEO of Creative Researcher and Deputy Director-CESTL (Cell for Structural Transformational Leadership, at Institute of Business Administration, University of the Punjab, Lahore, Pakistan). His research on leadership and government has been accepted globally in more than 60 countries. He has contributed to more than 40 international books.
He is reviewer for several conferences and journals including *Academy of Management* and *Personality and Individual Differences*. He enjoys the honor of being special session and mini-track chair.

**Husni S. Sastramihardja** was born on 24th October 1947. Since 1978 he became a faculty member of Institute Technology Bandung, Indonesia. He received his doctor degree from Institute Technology Bandung, Indonesia majoring in Information System. His researches interests are in information system, human computer interaction, knowledge management system engineering, and governance system. His current research is in growing system for community empowerment. Some of his articles on information system and interaction based system development were published in journals or conference proceedings.

**Peter Sebina** is a Senior Lecturer at the Department of Library and Information Studies, University of Botswana. He attained his PhD from the University College London and his research interests are in records and information management in governance especially in the areas of access to information, information seeking behavior and use of information by society. Peter has researched and consulted widely in records and information management in Botswana and Sub-Saharan Africa.

**Aziz Şisman**, who was born in 1973 in Samsun, Turkey, is associated with Ondokuz Mayis University Faculty of Engineering, Department of Geomatics in Samsun, Turkey. Dr. Sisman studied for his undergraduate degree at Karadeniz Technical University where he also received his MSc in the Department of Geodesy and Photogrametry Engineering (Msc). Sisman then went on to receive his Doctorate degree from Yildiz Technical University, Natural Sciences Institutes, Department of Geodesy and Photogrametry Engineering. Previously, Sisman served as a Research Assistant at Karadeniz Technical University for the Natural Sciences Institutes. Also, he was a Surveying Engineer for the General Directorate of Land Registry and Cadastre as well as a Part Time Lecturer at Hacettepe University. He is currently an Assistant Professor at Ondokuz Mayis University and is part of the Faculty of engineering in the Department of Geomatics. He is married, and he has two sons.

**Mauricio Solar** studied electronic engineering at Universidad Técnica Federico Santa María (UTFSM, Chile), Master and PhD in Computer Science at Universidade Federal de Rio de Janeiro (UFRJ, Brazil) and Postdoctorate in Operational Research and Informatic at Universite de Montreal (Canada). He is a full-time Professor of the Informatics Department and the head of the e-Government Center (www.egov.usm.cl) at UTFSM, Chile. He is former President of the Chilean Computer Science Society (www.sccc.cl), and former Executive Secretary of the Latin American Center for Studies in Informatics (www.clei.cl). He was the chairman of the organizing committee of the 19th IFIP World Computer Congress 2006. His research areas include e-Government and applications of software engineering.

**C. del Sordo** has a BA in Business Economics from University of Bologna, Italy, Ph.D. Management of the Public Sector, University of Salerno, Italy, and is a visiting scholar at Boston University, US, Accounting Department. Sordo is Lecturer in Business Economics, Department of Management, University of Bologna, Italy; current research interests are management accounting theory and management control in public sector.
Virgil Stoica received the BA degree in Mechanical Engineering from Gheorghe Asachi Technical University of Iași (Romania, 1989), the BA degree in Social and Political Sciences from Alexandru Ioan Cuza University of Iași (Romania, 1997), the MD in Political Philosophy (1998), and the PhD degree in Political Sciences from the same university (2002). The title of thesis was “The Building of the Local Political Class – Between Institutions and Behaviors.” In 2005 he graduated the East Central European Scholarship Program, Public Policy and Public Administration, Georgetown University, Washington DC, U.S.A. He is currently a post PhD student in the strategic EU grant (POSDRU), the research theme being the Digital Divide in Romania. He is also an Associate Professor at the Political Science Department at the Alexandru Ioan Cuza University of Iași, and head of this department. His research interests include e-governance, public policy, local government, and political elites.

Kridanto Surendro was born on 12th August 1964. He received his Doctor degree from Keio University, Japan majoring in Computer Science. He later became a faculty member of Institute of Technology Bandung, Indonesia. His researches interests are in the area of information systems, IT governance, and IT planning. He has written several articles on information system and IT governance that were published in journals.

Juan José Tari is a Senior Lecturer in Business Management at the University of Alicante, Spain. His PhD dissertation was an analysis of quality management. His current research includes total quality management and the relationship between quality management and environmental management.

Adeyinka Tella is a Senior Lecturer in the Department of Library and Information Science, Faculty of Communication and Information Sciences, University of Ilorin, Nigeria. Tella is a commonwealth scholar who finished his PhD in September 2009 from the Department of Library and Information Studies; University of Botswana where he was awarded small grant for thesis writing for the PhD category in 2007 by Council of Development in Social Science Research in Africa (CODESRIA). He has written and published articles mostly in international reputable refereed journals together with chapters in books. He is one of the contributors to an information science reference “Cases on Successful E-learning Practices in the Developed and Developing World: Methods for the Global Information Economy.” Currently, he is the Associate Editor of the International Journal of Library and Information Science, and Editor-in-Chief of the International Journal of Information Processing and Communication. He is also editorial board member, for Library Philosophy and Practice. Tella is an external examiner for Library and Information Science PhD candidates at Annamalai University, India. His re-search areas include e-learning, information literacy, information communication technology and management, information system evaluation, and psychology of information.

Mehdi Sagheb-Tehrani is an Associate Professor of Business Information Technology at the College of Business, Bemidji State University (BSU), USA. He taught at the graduate level and Computer Business Application, Advanced Structured Application Development, Corporate Information Management, E-Commerce and Web page development, MIS and Systems Analysis at the undergraduate level. Before joining BSU, he taught MIS, Expert Systems, Business Network Systems Management, Virtual Business and Advanced Topics in Information Technology at the graduate level and Project Management, Internet Applications, Introduction to Computers, C++, Visual Basic and COBOL programming at the undergraduate level. He received his PhD in Informatics (old name, Information and Computer

**John Ubena**, LL.M (Law & IT), LL.D Candidate, Swedish Law & Informatics Research Institute, Faculty of Law, Stockholm University. Moreover, he is a Lecturer in IT Law at Stockholm University, Sweden and Mzumbe University, Tanzania. He has been working with the Faculty of Law Mzumbe University for six years. Mr. John is also an advocate of the High Court of Tanzania and courts subordinate thereto, save for primary courts.

**Gonzalo Valdés** is M.Sc., Eng., and B.Sc. in Information and Computer Science. He has worked as an instructor and researcher at Universidad Técnica Federico Santa María and University of Valparaíso in Chile. Currently he is pursuing a PhD in the Department of Management, Science and Engineering at Stanford University. His research areas include e-Government, software process improvement, empirical software engineering, and ICT and development.

**Adolfo Villafiorita** leads the ICT4G unit of Fondazione Bruno Kessler. He received his laurea degree cum laude in Electronic Engineering from the University of Genoa, Italy, in 1993 and his PhD degree in Artificial Intelligent System from the University of Ancona in 1997. He was Visiting scholar at the AI Department of the University of Edinburgh and of the Formal Reasoning Group at Stanford, and since 1997, he has been a Researcher at IRST in the system engineering, safety-critical, eGovernment, and ICT4D areas. He was part of the consulting team for the eGIF (eGovernment Interoperability Framework) initiative for the government of Mozambique. Adolfo Villafiorita is the author of various publications in international journals and conferences. He is promoting the AFRICOMM Conference. Adolfo Villafiorita is a member of IEEE and ACM and a contract Professor at the University of Trento, where he teaches Software Project Management.

**David Wachira** is a Doctoral candidate and teaching fellow in public administration, with a specialization in public finance and public management, at the University of North Texas at Denton, USA. His research and teaching interests include fiscal sustainability, economic development, e-government, accountability, and transparency in foreign aid. Mr. Wachira received his BA in Political Science and History from the University of Mary Hardin-Baylor; he earned an MA in History from Tarleton State University. Some of his publications can be found in *Comparative E-Government: An Examination of E-Government across Countries* and in *Citizens and E-Government: Evaluating Policy and Management*.

**Christopher Weare** is a Research Associate Professor in the School of Policy, Planning, and Development at the University of Southern California. His research has primarily focused on applying social network theories and data to questions of the structure and functioning of civil society. His other major research interest is the study of the development and impacts of e-government on public service delivery.
and civic engagement. Before joining SPPD, he was a research fellow at the Public Policy Institute of California. Dr. Weare holds a Ph.D. in Public Policy from the University of California, Berkeley.

**Stevanus Wisnu Wijaya** was born on 26th December 1976. He has graduated from Bachelor of Electrical Engineering, Gadjah Mada University and Master of Informatics, Institute of Technology Bandung, Indonesia. He became a faculty member of Sanata Dharma University, Yogyakarta, Indonesia and taught some information system subjects. His researches interest are in the area of e-government in developing countries, and empowerment in online communities and social media for underserved people in developing countries particularly Indonesia. He was awarded many research grants from the Government of Indonesia and international organization. He has been published several research articles in many national and international conferences and national journals.

**Hyun Jung Yun** is an Assistant Professor in the Department of Political Science at Texas State University. She earned two Doctoral degrees in two different disciplines, one in Political Science and the other in Journalism and Communication, both from the University of Florida. Her research has dedicated to interdisciplinary approaches across mass communication, public opinion, media effects, geopolitics and applied methodology, focusing on e-government, political communication and policy attitudes. Her publications in several leading journals, such as *American Behavioral Scientist, Journalism Studies*, and *The American Review of Politics*, and several coauthored book chapters demonstrate how individuals’ political perceptions and attitudes are influenced by political predispositions within a group and by political resources within a given political and media system at the aggregate level.
