About the Contributors

***

Bjørnar Aas is Assistant Professor of Logistics at Molde University College, The Norwegian School of Logistics, Molde, Norway. He obtained his MSc (in 2003) and PhD (in 2008) in Logistics from Molde University College. His research focuses on upstream logistics in the oil and gas industry and much of the research has been done in collaboration with the Norwegian oil company Statoil ASA. The results have been published in several refereed journals. His current research interests include supply chain management, logistics planning under uncertainty, information systems, and routing of supply vessels.

N. Anbazhagan is currently Reader in Alagappa University, Karaikudi, India. He received his M. Phil and Ph.D in Mathematics from Madurai Kamaraj University, Madurai, India and M.Sc in Mathematics from Cardamom Planters Association College, Bodinayakanur, India. He has received Young Scientist Award (2004) from DST, New Delhi, India, Young Scientist Fellowship (2005) from TNSCST, Chennai, India and Career Award for Young Teachers(2005) from AICTE, India. He has successfully completed one research project, funded by DST, India. His research interests include Stochastic modeling, Optimization Techniques, Inventory and Queueing Systems. He has published the research articles in several journals, including Stochastic analysis and applications, APJOR and ORiON.

**Kritchanchai Duangpun** was engaged as the industrial consultant for several large-scale projects, such as the supply chain management project for Thailand Textile Institute in 2001 and the Logistics for FTA China ASEAN, Thailand Research Fund in 2005. Her research interests are in supply chain management, logistics policy for FTA issues and performance measurement in supply chains. She is currently serving in Mahidol University, in the capacity of Associate Professor in the Centre of Logistics Management, as well as holding the position of Coordinating Chair of Logistics Research Group, Thailand Research Fund.

**Dimitris Folinas**, possess a Ph.D in e-Logistics from University of Macedonia, Thessaloniki, Greece, and a Master of Information Systems from the same Institution. He has held various teaching posts with the University of Macedonia (Department of Marketing and Operations Management), and ATEI Thessaloniki (Department of Logistics). His research interests include Logistics and Supply Chain Management, Supply chain information systems, Logistics Information Systems and Technologies, Enterprise Information Systems and e-Logistics / e-Business.

**Mark Gershon** is the Chairman of the Management Science and Operations Management department at Fox Business School, Temple University, Philadelphia, USA. An industrial engineer by training, he began his career as a quality engineer with the Project Management office at the Army Armaments Development Command. He then worked as a project manager for Control Data Corporation, responsible for software development applications and consulting projects for the minerals industry before coming to Temple in 1983. Since then, Dr. Gershon has focused on developing new ideas for project management and quality management. Besides earning a Professional Engineer’s license, he holds a certification as a Project management Professional and a Six Sigma Master Black Belt. He consults and gives seminars on these topics around the world. Dr. Gershon has published widely, including two text books and over thirty refereed journal articles. He has been honored with the Lindback Award by Temple for excellence in teaching.

**Jonas Hedman** is an associate professor at Center for Applied Information Communication Technology (CAICT) at Copenhagen Business School, Denmark. He earned his Ph. D. from Lund University,
About the Contributors

Sweden. His research interest spans over several areas including, business models, ERP systems, integration of information systems, information systems development, neuro-informatics, and mobile services and technologies. He is currently working on two projects. The DREAMS project aims at understanding new emergent mobile business models and designing new mobile services. The second project is related towards building knowledge in the area of information systems integration and in particular how to measure integration in business and industries. He is co-author of the book “IT and Business Models: Concepts and Theories”, editor of two books, and has written 50 plus refereed journal and conference papers.

Stefan Henningsson is currently employed as senior researcher at Copenhagen Business School, Center for Applied Information Communication Technology (CAICT). His current research addresses IS integration in various contexts, including mergers & acquisitions, industry-wide supply chains, and international trade processes. He received his Ph.D. and masters degree in Information Systems at Lund University, Sweden. Henningsson’s Ph. D. thesis addressed IS integration in the context of M&A and developed managerial tools for meeting the IS integration challenge. Previous publications include more than 20 refereed papers on IS in contexts such as organizational integration, mergers & acquisitions, and organizational learning.

Mickey Howard is a Senior Lecturer in Operations & Supply Management at the School of Management, University of Bath. He worked as an industrial designer for the retail and auto industry for 10 years. His research explores managing innovation across the auto, defence, and ICT sectors. He is currently investigating product-service innovation and servitization strategy in terms of the impact on procurement policy and practice. He regularly publishes in the International Journal of Operations & Production Management, the Journal of Purchasing & Supply Management, and Supply Chain Management: an International Journal. In 2008 he was awarded the Dean’s prize for research excellence and a Chartered Institute of Purchasing & Supply research fellow scholarship.

Peter Hosie BEd WAIT, BA (Hons) Murd, MBus (Dist) Curtin, PhD UWA is Associate Professor in Management with the Faculty of Business and Management at the University of Wollongong in Dubai and an Adjunct Senior Fellow with Curtin Business School, Curtin University of Technology. Before joining UOWD in 2007, he held positions at Curtin University, Edith Cowan University and the University of Western Australia. Peter has taught most aspects of Human Resource Management in Asia Pacific and Dubai. He has published over 100 widely cited internationally refereed articles, and conference papers, practitioner articles and reports. Peter’s research interests include the predictors of manager’s performance (especially job related psychological wellbeing and intrinsic job satisfaction), crisis and security management, Technologically Mediated Learning, and logistics and information technology.

Seong-Hyun Nam is an associate professor in the College of Business and Public Administration at the University of North Dakota. He earned his Ph.D. at the University of Wisconsin-Milwaukee in POM. He also holds two master’s degrees in Mathematics and Statistics from the University of Wisconsin-Madison. His interests are in Supply Chain Management, Stochastic Optimal Control and Model, Operations Research, and Operations Management. He has published in journals such as Management Science, IIE-Transactions, International Journal of Production Economics, and Decision Sciences Journal of Innovative Education.
**Firat Kart** received the Ph.D. degree in Electrical and Computer Engineering at the University of California, Santa Barbara. He received the B.S. degree in Computer Science from Bilkent University in Ankara, Turkey. Currently, he is a principal engineer/architect at Tibco in Palo Alto, California. His research interests include distributed systems, computer networks, Service Oriented Architectures, Web Services, database transactions, and supply chain and healthcare applications.

**Ibrahim Al Kattan** is an Associate Professor of Industrial Engineering in Graduate Program in Engineering Systems Management at American University of Sharjah, United Arab Emirates. He obtained his Ph.D. in Industrial and Manufacturing Engineering from Tennessee Technological University, an MS in Industrial Engineering & Management from Oklahoma State University, and another MS in Engineering Production and Management from the Birmingham University, England. He is the founder and Ex-Director of one of the most successful Graduate program in the UAE. He has over twenty five years of experience as a teacher, researcher, consultant in engineering management, simulation and modeling, quality management, and supply chain management in USA, UK, UAE and Iraq.

**George Kenyon** is an Associate Professor of Supply Chain and Operations Management at Lamar University. He received his Ph.D. in Business Administration from Texas Tech University in 1997, his M.S. in Management Science from Florida Institute of Technology in 1993, and his B.S. in Technology from the University of Houston in 1982. His research interests are in the fields of supply chain management, quality management, and operations management. He has published in *Journal of Marketing Channels, Quality Management Journal, International Journal of Production Economics, International Journal of Information Systems and Supply Chain Management*, and *Journal of Case Studies in Accreditation and Assessment*. His professional experience includes fifteen years of industry experience, were knowledge of in various aspects of engineering including systems testing, systems design, and manufacturing, as well as, business planning and supply chain management was acquired. The base of this experience was gained from companies such as Texas Instruments, Rockwell International, The Boeing Company, Aspen Technologies, and Hewlett Packard. As a consultant, his assignments have included scheduling and planning projects with Gulf States Steel, the Westlake Corporation, Miller Brewing, and Phillips Chemical.

**Taha Al-Khudairi** is Lab Instructor in the Department of Computer Engineering at American University of Sharjah, UAE. He obtained his BS and MS in Electrical Engineering in 1992 and 1996 respectively. In May 2007 he received his second Master of Science in Engineering Systems Management degree from American University of Sharjah, United Arab Emirates. In 2002 and 2003, Mr. Al-Khudairi has received an Engineering Student Council Award for the best lab instructor in the Department of Computer Engineering at American University of Sharjah, UAE.

**Yohanes Kristianto** obtained an undergraduate degree in Chemical Engineering and a master degree in Industrial Engineering from Sepuluh Nopember Institute of Technology, Surabaya, Indonesia. Prior to his academic career, he worked for a Quality function of a multinational company. He is now a PhD student in Industrial Management at University of Vaasa, Finland. His research interests are in the area of supply-chain strategy/management and production/operations management.
About the Contributors

Hisashi Kurata is an assistant professor of Operations Management at the Graduate School of International Management, International University of Japan. He has a Ph.D. from the University of Wisconsin-Milwaukee, and M.S. from the Pennsylvania State University, and a B.A. from the University of Tokyo. His research interest includes supply chain management, interface studies between marketing and operations, and inventory management. His recent teaching interest includes operations management, supply chain management, and service management. He has published in journals such as European Journal of Operational Research, International Journal of Production Economics, Journal of Revenue Management, and International Journal of Operations and Quantitative Management.

Debendra Kumar Mahalik is presently working as a Lecturer at PG Department of Business Administration, Sambalpur University. He has around seven years of teaching and six years of Industry experience. He is also pursuing his Ph.D in the area of management. He has published around twelve papers in international and national journals and conference proceedings. His areas of interest include application of Information technology in business, efficiency analysis and multi-criteria decision making.

Ioannis Manikas holds a Bachelor in Agriculture and a Master of Science in the field of logistics, at Cranfield University, United Kingdom. He is a PhD fellow at the Department of Agricultural Economics in AUTH and his primary interest includes Supply Chain Management, Logistics and Agribusiness Management. He holds a teaching post as an external lecturer at ATEI Thessaloniki (Department of Logistics) and has a wide experience as a self employed project manager and consultant in the Agrifood sector.

John Mawhinney is Executive Assistant Professor of Supply Chain Management in the Palumbo/Donahue Schools of Business, Duquesne University. He posses 35 years of supply chain industry, consulting, and academic experience. Mr. Mawhinney earned a B.S. in Logistics and Marketing at Ohio State University and an MBA from the University of Pittsburgh. He is currently pursuing a Doctorate in Education with a focus on Supply Chain Management outcomes assessment. Mr. Mawhinney is also working on the U.S. Air Force Research Labs.

P. M. Melliar-Smith is a professor in the Department of Electrical and Computer Engineering at the University of California, Santa Barbara. Previously, he worked as a research scientist at SRI International in Menlo Park. His research interests encompass the fields of distributed systems and applications, and network architectures and protocols. He has published more than 250 conference and journal papers in computer science and engineering. Dr. Melliar-Smith is a pioneer in the field of fault-tolerant distributed computing. He received the Ph.D. in Computer Science from the University of Cambridge, England.

Louise E. Moser is a professor in the Department of Electrical and Computer Engineering at the University of California, Santa Barbara. Her research interests span the fields of computer networks, distributed systems and software engineering. Dr. Moser has authored or coauthored more than 250 conference and journal publications. She has served as an associate editor for the IEEE Transactions on Services Computing and the IEEE Transactions on Computers and as an area editor for IEEE Computer in the area of networks. She received the Ph.D. in Mathematics from the University of Wisconsin, Madison.
Brian D. Neureuther is an Associate Professor of Supply Chain and Operations Management at the State University of New York, College at Plattsburgh. He received his Ph.D. in Production and Operations Management from Texas Tech University, his M.B.A. degree from Wright State University in Dayton, Ohio, with a concentration in management science and his B.A. in mathematics from the State University of New York, College at Geneseo. His research interests include supply chain management, supply chain disruption, information technology in supply chains, simulation for production planning and control, and quality control. He has published over 30 peer reviewed journal articles and his work has appeared in journals such as the Journal of Integrated Design and Process Science, the International Journal of Production Economics, IEEE Transactions on Semiconductor Manufacturing, Production Planning and Control, the International Journal of Information Systems in the Service Sector, the Quality Management Journal, the International Journal of Information Systems and Supply Chain Management, and the Journal of Marketing Channels. He has been guest editor of the Journal of Marketing Channels and is on the editorial advisory board of the International Journal of Information Systems and Supply Management and the Journal of Marketing Channels. He has presented at over 32 international and national conferences on topic ranging from teaching pedagogy to managing supply chain risk and has consulted with companies such as Rider University, Neoteric Hovercraft, EDI Telecommunications, Southwestern Wire Cloth, and the Cleveland County Chamber of Commerce (North Carolina). He is a member of the Production and Operations Management Society and APICS, the Society of Operations Management.

Jaesun Park is a Professor in the College of Business and Public Administration at the University of North Dakota. He earned his Ph.D. at Northwestern University. His research and teaching interest includes Operations Research and Supply Chain Management. He has published in journals like Management Science, IEEE and Decision Sciences Journal of Innovative Education.

Gokulananda Patel is currently Senior Professor at Birla Institute of Management Technology, Greater Noida, in the areas of Operations and Quantitative methods. Prior to joining BIMTECH he was with Post Graduate Department of Business Administration, Sambalpur University. Professor Patel is known for quantitative applications in management decision making. He has published around thirty papers in international and national journals and conference proceedings. He has around thirty years of teaching experience and his field of Specializations is Quantitative Techniques, Operational Research, E-Governance and Efficiency Measurement. He has guided number of scholars for their Ph.D.

Malte L. Peters is senior lecturer and research assistant at the Institute for Production and Industrial Information Management, University of Duisburg-Essen (Campus Essen). He was involved in several research and practice projects. His current research interests include operations research especially efficiency analysis, multicriteria decision making, knowledge management and process management.

Lee Pickler teaches International Marketing and Management in the Systems MBA and International MBA programs, and has a research interest in globalization. Other research work includes on-going studies of the delivery of healthcare in the United States and Japan through his work with Socio-Medical Research of Tokyo. Dr. Pickler has been engaged in a wide range of management consulting assignments, to include projects relating to outsourcing to China, the planning for a distribution center for serving the
automobile manufacturing in Brazil, as well as global marketing research studying the aircraft turbine engine aftermarket maintenance services.

**Philip Powell** is Professor of Information Management at the University of Bath. Formerly, Professor of Information Systems, University of London, and Director of the Information Systems Research Unit at Warwick Business School, he has worked and taught in Australia, Africa, US and Europe. Prior to becoming an academic he worked in insurance, accounting and systems analysis. He is the author of eight books on information systems and financial modeling. He has published numerous book chapters and his work has appeared in over ninety international journals and at over 100 conferences. He is Managing Editor of the Information Systems Journal and associate editor and editorial board member of a number of other journals. He is a past President of the UK Academy for Information Systems. His research concerns the role and use of IS in organisations especially issues of strategy and evaluation in the context of small firms, e-business and knowledge management.

**Jagadeesh Rajashekhar** is a Professor at SDM Institute for Management Development, Mysore, India, in the area of Operations Management and Quantitative Techniques, with over 25 years of experience in academics. His qualifications include B.E. (Mysore University), M.E. (Madras University), Diploma in Production Management (Annamalai University), Diploma in Software Capability Maturity Model, and Ph.D. (I I T, Bombay, India), and also certifications in Six Sigma Green Belt and Project Management. Since 2006, he is an Adjunct Faculty at Richard J Fox School of Business and Management at Temple University, Philadelphia, USA, where, he teaches a course on Operations Management. He has authored the Indian adaptation of the book “Operations Management” by Heizer and Render, and published more than 70 papers in reputed national and international journals and conferences. He is also a referee for several international journals. He has successfully conducted training programs for people from industries, educational institutions, and various Government departments.

**Kenneth A. Saban** is Associate Professor of Marketing in the Palumbo/Donahue Schools of Business, Duquesne University. He posses 36 years of manufacturing, consulting, and academic experience. Dr. Saban earned a B.S.B.A. from Youngstown State University, a M.S.J. from Northwestern University, and a Ph.D. from the University of Pittsburgh. He has developed a particular expertise in the areas of business collaboration and technology management through a wide-range of research projects, grants and industry partnerships. He has published over 20 articles and given numerous academic and industry presentations. He is also working with the U.S. Air Force Research Labs to explore the impact of “human collaboration” on supply chain performance.

**Susan A. Sherer** is the Kenan Professor of IT Management and Chair of the Department of Management at Lehigh University. Her research interests include IT investment and risk management, supply chain management information systems, and cross cultural issues in information systems. She is the author of Software Failure Risk: Measurement and Management. Her research has been published in Information and Management, Information Systems Frontiers, Journal of Global Information Management, Journal of Information Systems, International Journal of Electronic Commerce, Supply Chain Management, International Journal of Electronic Business, and Communications of AIS. Sherer received
her Ph.D. in Decision Sciences from the Wharton School of the University of Pennsylvania, M.S. Industrial Engineering from SUNY Buffalo, and B.S. Mathematics from SUNY Albany.

Sreekumar is Ph.D in Management and is presently working as an Associate Professor at Rourkela Institute of Management Studies, Rourkela 769015, INDIA. His areas of interest include application of Data Envelopment Analysis for efficiency analysis, Multi-criteria Decision-Making. He has around sixteen years of teaching experience in the areas of Quantitative Techniques for management decision making. He has published around twenty five research papers in various international and national conferences and journals. He has also authored two text books.

Albert Tan Wee Kwan is an associate director at The Logistics Institute, National University of Singapore. His research interests are in reverse logistics, process modelling and reengineering, and information technology to coordinate supply chain. He holds an MBS from the National University of Ireland and a PhD in Supply Chain Management from the Nanyang Technological University. His research works have been published in the International Journal of Physical Distribution & Logistics Management, the International Journal of Logistics Systems and Management, the International Journal of Logistics Management and the Asia Pacific Journal of Marketing and Logistics.

Richard Vidgen is Professor of Information Systems in the School of Management, University of Bath. He worked in information systems development in industry for 15 years. He holds a first degree in Computer Science and Accounting, an MSc in Accounting. He left industry to join the University of Salford, where he completed a PhD in systems thinking and information system quality. His current research interests include complex adaptive systems theory, agile project management, and e-commerce quality. He has published the books Data Modelling for Information Systems (1996) and Developing Web Information Systems (2002) as well as more than 100 chapters and journal papers.

B. Vigneshwaran is a Lecturer in Mathematics in the Department of Mathematics, Thiagarajar College of Engineering, Madurai, India. He has M.Sc(Applied Mathematics), MPhil(Mathematics) degrees with five years of teaching experience. He is currently pursuing his PhD in Mathematics at the Alagappa University, Karaikudi, India. His current research interests include Applied Probability, Inventory and Queueing Systems.

John J. Vitton is an Associate Professor in the College of Business and Public Administration at the University of North Dakota. He served as Management Department Chairman from 2001 through 2006. He earned his Ph.D. at the University of Nebraska-Lincoln in Business Administration, his MBA at Ohio State University, and his B.S. in Metallurgical Engineering at Michigan Technological University. His interests are in Supply Chain Management, Strategic Management, and Human Resource Management. He is a member of the Academy of management, the Society For Case Research, the North American Case Research Association, and Beta Gamma Sigma Honor Society.

Stein W. Wallace is Professor of Operational Research at Lancaster University Management School, UK. He has earlier held professorships in Norway (Trondheim and Molde) and Hong Kong. He obtained his PhD in informatics at The University of Bergen in 1984. His main interest is decision-making under
uncertainty. He is on the editorial board of several journals, including INFORMS Journal on Computing (since 1991) and the new Energy Systems. He co-authored (with Peter Kall) Stochastic Programming in 1994 and co-edited (with William T. Ziemba) Applications of Stochastic Programming in 2005, and has published more than 60 articles in refereed journals. He chaired COSP – the International community for stochastic programming - from 1992 to 1995.

**Frank Wolf** is on the faculty of Nova Southeastern University’s H. Wayne Huizenga School of Business and Entrepreneurship where he teaches MBA courses in Operations Management and General Management best practices. He has a research interest in international supply chains, arbitration and mediation. Dr. Wolf entered academic life after an industry career with major US corporations working in engineering, operations research, and general management as general manager of a wholly owned IT subsidiary. He also held an appointment to the White House Fellowship (PIE) and served at the United Nations as a non-governmental representative (NGO), prior to starting two entrepreneurial firms in information technology services. He is currently an active arbitrator and also serves on the mediator roster with FINRA, the Financial Industry Regulatory Authority, formerly NASD and NYSE.

**Ruiliang Yan** is an assistant professor of marketing at Indiana University Northwest. He received his PhD in marketing from the University of Wisconsin, Milwaukee. He has published one book and a number of articles in the different refereed journals. He also is serving as referee for many highly prestigious journals. He specializes in marketing modeling, retailing and supply chain management.

**Stephan Zelewski** teaches business management with focus on production Management at the University of Duisburg-Essen. He holds the chair for Production and Industrial Information Management at the faculty of economics at the campus of Essen. He also is member of the Institute of Business and Economic Studies (IBES), the Institute for Computer Science and Business Information Systems (ICB) as well as the Centre for Logistics & Traffic (ZLV). His work scope contains production management, especially logistics and supply chain management, the use of modern computer technologies in the area of production management, operations research and game theory, knowledge management and artificial intelligence and their operational applications (especially knowledge based systems and multi-agent systems), production theory as well as philosophy of science (especially constructions of economic theories from the perspective of the non statement view). For further information please visit: [http://www.pim.wiwi.uni-due.de/team/stephan-zelewski](http://www.pim.wiwi.uni-due.de/team/stephan-zelewski).
