George A. Barnett (PhD, Michigan State University, 1976) has taught at Rensselaer Polytechnic Institute, the Universities of Maryland, Texas and Buffalo (SUNY). Currently, he is Professor and Chair of Communication at the University of California - Davis. Dr. Barnett has written numerous articles and book chapters on organizational, mass, international/intercultural, and political communication, as well as the diffusion of innovations. His current research focuses on international information flows and their relations to international relations. Professor Barnett is the current President of the International Network of Social Network Analysts (INSNA).

Naveed Baqir is an assistant professor in the Alfred Lerner College of Business and Economic (Department of Hotel, Restaurant and Institutional Management) at the University of Delaware. He earned his PhD in information systems from University of North Carolina at Greensboro. During 2006-2007 and 2008-2009, he received funding from the Government of Pakistan to conduct research on information communication technologies (ICT) based socio-economic development in Pakistan. His areas of interest include ICT for development, hospitality information technology, privacy and security, knowledge management and electronic government. His work has appeared in the Communications of the Association for Information Systems, Journal of Knowledge Management and Economic Insight.

Yana Breindl is a doctoral student at the Department of Information and Communication Sciences at Université Libre de Bruxelles in Belgium. Her research deals with online activism aiming to influence European decision-making. She is particularly interested in the articulation between traditional politics and so-called “life-politics” and the link between online and offline realms.
About the Contributors

Andrea Calderaro is researcher at the Center for Media Pluralism and Freedom Information at the European University Institute, from where he also holds his PhD and M.Phil in Social and Political Sciences. In addition, he expanded his education at the California Institute of Technology (CalTech), Oxford Internet Institute (University of Oxford - SDP) and at the École des hautes études en sciences sociales (EHESS). He has been lecturer at the University La Sapienza of Rome in “New Media and International Relations”. He has also been coordinator of the “New Media in Transition Democracy” Project at the University of Oslo, and has served as chair of the section on “Internet and Politics” at the ECPR General Conference (2011). His research focuses on New Media and International Politics from a comparative and transnational perspective of analysis. In particular, his research centers on the opportunities offered by new media to strengthen democracies by improving transparency and energizing civic engagement. His publications in the field include the forthcoming guest-editing ‘Policy and Internet’ special issue on “Online Collective Action and Policy Chance” (2013), and the inaugural issue of the International Journal of E-Politics - IJEP - “E-Politics in a Global Context” (2010).

Philippa Collin is the Director of Programs and Research at the Inspire Foundation (www.inspire.org.au) and Honourary Research Fellow, Centre for Everyday Life, Faculty of Creative Technologies and Media, Murdoch University, Australia. She has a PhD in Economics from the University of Sydney. Her current projects include assessing the role of ICT for promoting social connectedness and wellbeing amongst young men and the establishment of a research facility on ICT, young people and mental health and wellbeing, both funded by the Australian Research Council. Her research interests and publications are in the areas of political participation and citizenship, e-democracy and the role of civic participation for health and wellbeing. Email: pippa@inspire.org.au

Deborah F. Cook is a Professor in the Business Information Technology Department at Virginia Tech. She obtained her Ph.D. from Texas A&M University in Industrial Engineering and M.S. and B.S. degrees from Virginia Tech. Her research interests focus on business process modeling and control. Dr. Cook’s research has been published in various journals including IIE Transactions, Decision Sciences, European Journal of Operational Research, and the International Journal of Production Research. She has obtained research funding from the National Science Foundation, Texas Higher Education Coordinating Board Advanced Technology Program, and the USDA Forest Service. Dr. Cook was previously a Research Scientist in the Industrial Engineering Department at Texas A&M University and the Director of the Forest Products Manufacturing Research Program. Her industry experience includes time working for Sperry Corporation and Hercules Chemical Company.

Anastasia Deligiaouri is currently a senior Lecturer in the State Higher Technological Educational Institute (TEI) of Western Macedonia in Kastoria, Greece. She is a lawyer with a private office. During the summer of 2010 she was invited as a Visiting Research Fellow at the Centre for the Study of Democracy at Westminster University in London, UK where she has conducted research on the models of democracy. She was awarded her PhD in Political Science with specialization in Political Communication with Distinction, in 2007. During her PhD studies she was awarded a scholarship for her research from the State Scholarships Foundation of Greece (IKY). For several years she was also a part time lecturer in classes of media, political science and law in UK affiliated Colleges in Greece and private institutions, both in undergraduate and postgraduate level. She has participated in many international conferences and workshops and she has published on political communication issues, E-Politics and
political discourse. Her research interests concern the interaction between media and politics, media effects, European public sphere and discourse studies.

**Christian Fuchs** is associate professor at the University of Salzburg. He holds a venia docendi in ICTs and society and is a member of the Unified Theory of Information Research Group. His fields of research and interest are: social theory, critical theory, media and society, information society studies. He is author of more than 110 academic publications, among them the monographs “Internet and Society: Social Theory in the Information Age” (New York: Routledge 2008) and “Foundations of Critical Media and Information Studies” (New York: Routledge 2010). Email: christian.fuchs@sbg.ac.at Website: http://fuchs.uti.at

**Jens Hoff** is a professor at the Department of Political Science at the University of Copenhagen, Denmark. His research focuses on the importance of IT for political institutions and processes as well as for political culture and identity. During the last 20 years he has chaired numerous international and Danish research projects, among these the European research network Government and Democracy in the Information Age (COST Action A14). He is chief editor of the Danish political science journal Politik, and on the editorial board of the journal Information Polity. He has recently finished a project on “Citizen’s Use of the Internet During the Danish Election Campaign 2007”. Also, he has published numerous books and articles among these *Democratic Governance and New Technology*. Routledge, 2000 (edited with Ivan Horrocks and Pieter Tops), *Digital Governance: Networked Societies. Creating Authority, Community and Identity in a Globalized World*. Samfundslitteratur/ Nordicom, 2006 (edited with Hans Krause Hansen) and “Virtual capital? Internet Competence and Political Participation in Denmark”, Politik, Vol. 9, no.2, 2006.

**Tabitha James** is an Associate Professor in the Department of Business Information Technology, Pamplin College of Business, at Virginia Tech. Her current research interests are in the areas of security and privacy in information technology, combinatorial optimization, heuristics, parallel computing, and social networks. She has published in journals such as *IEEE Intelligent Systems, IEEE Transactions on Evolutionary Computation, European Journal of Operational Research, Computers and Operations Research*, and *Engineering Applications of Artificial Intelligence*. She received a BBA in Management Information Systems and a Ph.D. in Business Administration with a major in Management Information Systems and a minor in Production and Operations Management from the University of Mississippi.

**Kristin Johnson** is an Assistant Professor in the Political Science Department at the University of Rhode Island. Her current research focuses on political capacity, political performance, and the subnational study of political and economic transitions with a particular emphasis on the developing world.

**Andrew Kakabadse** is Professor of International Management Development, Cranfield School of Management, UK. Andrew was the H. Smith Richardson Fellow at CCL, North Carolina, USA and is Visiting Professor at the University of Ulster; Macquarie Graduate School of Management; University Pantheon Assas, France, Thunderbird, USA and at Swinburne University, Australia. His research covers boards, top teams and the governance of governments. He has published 34 books, over 200 articles and 18 monographs.
About the Contributors

Nada K. Kakabadse is Professor in Management and Business Research and is visiting Professor at the University Pantheon Assas, France. Nada is co-editor of the Journal of Management and Corporate Governance: The International Journal of Business in Society. Nada has published widely in areas of leadership; application of IS/IT in corporations; corporate governance; government, boardroom effectiveness; diversity management; and ethics, including 14 books, 52 chapters in international volumes, 3 monographs and over 150 scholarly and reviewed articles.

Anastasia Kavada is a post-doctoral research fellow at the Communication and Media Research Institute (CAMRI) of the University of Westminster. Her research interests concern the role of the internet and social technologies in the establishment of international campaigns and political coalitions and in practices of citizenship and democracy. Her research has focused on the Global Justice Movement, exploring the connection between the internet and participatory decision-making, decentralized organizing, and the development of a common identity among movement participants. She has taught in a variety of courses in media and communication at the University of Westminster, Middlesex University and Kingston University.

M. A. Muqtedar Khan is an Associate Professor in the Department of Political Science and International Relations at the University of Delaware. His areas of interest are Politics of the Middle East and South Asia, Political Islam, Islamic Political Thought and American Foreign Policy in the Muslim World. Professor Khan teaches courses on Arab and Middle Eastern Politics, Politics of Development, Globalization, and Islam in World Affairs. Dr. Khan is an important voice on US foreign policy in the Muslim World. He has testified at hearings hosted by the US Senate Foreign Relations Committee and the US House Armed Forces Committee.

Lara Khansa is an Assistant Professor in the Department of Business Information Technology, Pamplin College of Business, at Virginia Tech. She received the Ph.D. in Management Information Systems, M.S in Computer Engineering, and MBA in Finance and Investment Banking from the University of Wisconsin, Madison. Her primary research interests include the economics of information systems and regulatory economics, and their implications for the future of the information technology industry landscape. Dr. Khansa has published in European Journal of Operational Research, Communications of the ACM, and Computers & Security, among others. She is a member of the Association for Information Systems (AIS), the IEEE, and the Beta Gamma Sigma National Honor Society.

Jang Hyun Kim (PhD, State University of New York at Buffalo, 2007) is an assistant professor in the Department of Communicology at the University of Hawaii at Manoa. His research interests include hyperlink, social, semantic networks in politics, public policy, and organizations and computer-mediated communication. His writings have been published in Asian Journal of Communication, Harvard International Journal of Press/Politics, Journal of International Communication, and International Interactions.

Alexander Kouzmin is Professor of Management in the School of Commerce and Management at Southern Cross University and Adjunct Professor of Management in the School of Management at the University of South Australia. He has published eight books, with 2 volumes forthcoming on Public Administration and Governance and Corporate Governance; has contributed some 70 chapters
to national and international edited monographs; has presented research papers and keynote addresses at more than 220 international conferences and has published, to date, some 200 refereed papers and review articles. He is the founding co-editor of the *Journal of Contingencies and Crisis Management*, published quarterly since 1993.

**Brian S. Krueger** is an associate professor of political science at the University of Rhode Island. His recent work involves the study of domestic counter-terrorism policies, technology, and exit polls.

**Kyounghee “Hazel” Kwon** is an assistant professor at School of Social and Behavioral Science of Arizona State University. She received her PhD from the State University of New York at Buffalo in 2011. Her research interest is about cultural, social, and political impacts of new communication technologies and online social networking. Her dissertation was about the use of social media for social participation, which won the third place of Herbert S. Dordick Dissertation Award from the Communication and Technology division of International Communication Association. She currently studies the use of emergent communication technologies under the extreme events such as political contentions and natural disasters.

**Amna Latif** has recently completed her doctorate in educational leadership and cultural foundations from the University of North Carolina. Her areas of research include critical literacy pedagogy, cultural and religious diversity in education, qualitative research, feminist epistemology, social and cultural context of education, feminism in South-East Asia and technologies in education. She has published in *Educational Studies and International Journal of Qualitative Studies in Education*. She was the first recipient of University Council for Educational Administration (UCEA) Graduate Fellowship.

**Lorenzo Mosca** was awarded the degree of PhD by the University of Florence in 2004. He then got a post-doctoral fellowship first at the European University Institute and then at the University of Trento. He is assistant professor in sociology of communication at the University of Roma Tre. His research interests focus on political participation, political communication, ICTs and e-democracy, and social policies. He has personal experience of a wide range of methodologies and has been involved in several local, national and European collaborative research projects. These include, among others, YOUHES (FP7), DEMOS (FP6) and EUROPUB (FP5). He has published extensively in international peer-reviewed scientific journals and articles in books translated into English, Spanish, French, German and Italian. His publications include some 50 articles and chapters, 4 edited books, 4 collective books with highly reputable academics and over 20 papers presented at national and international conferences.

**Hamid Nemati** is the director of MSITM and Associate Professor of Information Systems at the Information Systems and Operations Management Department of The University of North Carolina at Greensboro. He holds a doctorate from the University of Georgia and a Master of Business Administration from The University of Massachusetts. He is the Editor-in-Chief of International Journal of Information Security and Privacy and Advances in Information Security and Privacy (AISP) Book Series. His research specialization is in the areas of decision support systems, data warehousing and mining, and information security and privacy. His research articles have appeared in a number of premier journals. He has presented numerous research and scholarly papers nationally and internationally.
About the Contributors

Katherine Ognyanova is currently a doctoral student at the Annenberg School for Communication, University of Southern California. Her areas of research include new media and social aspects of technology. She is also interested in digital policy and information privacy. Katherine received her B.Sc. in Computer Science from the University of Sofia. Her M.A. degree from the same university is in Virtual Culture. Before joining Annenberg, she worked for the Economedia publishing group. Her responsibilities as a writer and analyst included observing trends in emerging technologies, online business and society.

Mahesh S. Raisinghani is an associate professor in the Executive MBA program at the TWU School of Management. He is a Certified E-Commerce Consultant (CEC), a Certified Information Security Manager (CISM), a Project Management Professional (PMP), and a Certified Quality Matters Master Reviewer. Dr. Raisinghani was awarded the 2008 Excellence in Research & Scholarship award and the 2007 G. Ann Uhlir Endowed Fellowship in Higher Education Administration. He was also the recipient of TWU School of Management’s 2005 Best Professor Award for the Most Innovative Teaching Methods; 2002 research award; 2001 King/Haggar Award for excellence in teaching, research and service; and a 1999 UD-GSM Presidential Award. He has taught graduate courses at the European University in Switzerland, Turku School of Economics in Finland and Purdue University’s German International School of Management and Administration in Germany. He has served as an External Examiner of theses and dissertations in Australia and South Africa. His research has been published in several academic journals such as IEEE Transactions on Engineering Management, Information & Management, International Journal of Web-based Learning and Teaching Technologies, Information Resources Management Journal, International Journal of Innovation and Learning, Journal of E-Commerce Research, International Journal of Distance Education Technologies, Journal of IT Review, Journal of Global IT Management, and Journal of IT Cases and Applications Research among others and international/national conferences. Dr. Raisinghani serves on the board of Global IT Management Association and on the education task force of the World Affairs Council. He is included in the millennium edition of Who’s Who in the World, Who’s Who among Professionals, Who’s Who among America’s Teachers and Who’s Who in Information Technology.

Pierluigi Rippa completed his Ph.D in Managerial Engineering at the University of Naples Federico II. He currently works as researcher at the Department of Business and Managerial Engineering, University of Naples Federico II (Italy). His research interests include information technology adoption and organizational interaction, ERP systems development and adoption, Knowledge Management Systems, Software Systems. He is author of several papers in the above fields, published in international journals and presented at international conferences.

Reid T. Smith is a Doctoral Student in the Department of Political Science and International Relations at the University of Delaware.

Onur Tanay is a Fulbright Scholar Doctoral Student in the Department of Political Science and International Relations at the University of Delaware.

Panagiotis Symeonidis received a Bachelor (BA) in Applied Informatics from Macedonia University of Greece in 1996. He received his Master diploma (M.Sc.) in Information Systems from the same
University in 2004. He received his PhD in Web Mining and Information Retrieval for Personalization in Web from the Department of Informatics in Aristotle University of Thessaloniki, Greece in 2008. Currently, he is working as a post-doc researcher at the Department of Informatics, Aristotle University of Thessaloniki, Greece where he teaches two courses at master level. He is also the Director of the 1st Vocational Laboratory Center in Stavroupoli of Thessaloniki. He has published more than 30 research papers in refereed scientific journals and conference/workshop proceedings. His work has received over 130 citations. His research interests include web mining (usage mining, content mining and graph mining), information retrieval and filtering, recommender systems, social media in Web 2.0, online social networks, and location-based social networks.

Dominic Thomas is an adjunct professor of information systems at the Goizueta Business School, Emory University. His research focuses on how to use technology to enable group interaction. He has published in journals in the information systems field, including Management Information Systems Quarterly, the European Journal of Information Systems, Communications of the Association for Computing Machinery, and the Journal of Management Information Systems. He is currently developing the civic engagement project at Fort Valley State University, a project studying the effective usage of technology for civic engagement and applying the lessons learned.

Randy Weiss has a Master’s Degree in Technology Management and over 15 years of experience at Verizon Communications as a manager in the Logistics Services organization with the majority of the time spent on working with information technology and logistics field personnel on logistics systems development projects.
