About the Authors

Paul Darbyshire is a lecturer in the School of Information Systems at Victoria University, Melbourne, Australia. He lectures in object oriented systems, C and Java programming, and has research interests in a number of areas. These include the application of Java and Web technologies to support teaching, and particularly different paradigms utilized in fully online teaching. Paul also has a strong research interest in the application of artificial intelligence (AI) techniques to multi-agent systems, and the use of agents in the simulation of complex systems. Paul’s current research is into the use of the Web for university subject management and the use of AI techniques for the development of second generation Web based teaching support software.

Susan A. Baim is an assistant professor of business technology (BTE) at Miami University Middletown, USA. She joined the faculty in August 1999, teaching marketing, Internet marketing, economics, online economics, finance and management courses. She is also coordinator for the Miami University Business Technology Marketing and E-Business programs. Susan earned her MBA in Marketing Management from the University of St. Thomas in Minneapolis/St. Paul, Minnesota (1998) and is currently studying for her PhD in E-Business through Capella University. She was named a Service Learning Ambassador at Miami University in 2000.
Franck Barbier (PhD, Computer Science, 1991, University of Chambéry, French habilitation for supervising research activities, a.k.a. HDR, in 1998, University of Nantes) is a professor in software engineering at the University of Pau (France) since September 2000. He is currently the Director of the Computer Science Research Institute of the University of Pau (Laboratoire d’Informatique de l’Université de Pau et des Pays de l’Adour or LIUPPA). His main research focuses are object modeling, component modeling, UML and seamless object/component development. He was the scientific consultant of Reich Technologies, a French company among the 17 companies that built UML 1.1 at the OMG in 1997.

Matthias R. Brust earned a BA in Computer Science from the University of Trier, Germany (1999). He continued his postgraduate studies at the University Trier and at the Technological Institute of Aeronautics, Brazil, and in 2002 obtained his Master of Science at the University of Trier.

Sean B. Eom is a professor of management information systems and had been appointed as a Copper dome Faculty Fellow in Research at the Harrison College of Business of Southeast Missouri State University (USA) during the academic years 1994-1996 and 1998-2000. He received his PhD in Management Science from the University of Nebraska-Lincoln (1985). He is the author/editor of five books and has published about 50 refereed journal articles and more than 60 articles in encyclopedia, book chapters, and proceedings of such conferences as the International Conference on Information Systems, International Conference on Enterprise Information Systems, DSI Age 2002 (an IFIP TC8/WG 8.3 Open Conference, Decision Science Institutes, International Conference on Information Systems Development and the Association for Information Systems.

Wayne Haga is a professor of Computer Information Systems at Metropolitan State College of Denver, USA. He holds a doctorate from the University of Northern Colorado. His current teaching areas include database management and Web page development. His primary research focuses are on Web versus classroom learning and project management issues.

Michael A. Ketcherside holds an MBA “accounting track” degree from Southeast Missouri State University. He not only graduated with a 4.0, but also
served as the Management Club president, an umbrella organization encompassing three other groups: The Society for Resource Management, The Society for Human Resource Management, and The Association of Information Technology Professionals. Recently he passed the Certified Public Accountant exam. He is currently employed as a staff accountant with J. Baer & Associates in Jackson, Missouri (USA).

**Larry Korba** is the group leader of the Network Computing Group of the National Research Council of Canada in the Institute for Information Technology. He is currently involved in several projects related to security and privacy. His research interests include privacy protection, network security, and computer supported collaborative work.

**Vincent F. Kwisnek** is an e-learning developer and co-administrator of a Learning Management System for a Fortune 500 Company. He graduated from the Indiana University of Pennsylvania (IUP) in Indiana, Pennsylvania, with a bachelor’s degree in education. Shortly after graduating, he began combining his love of education and technology to provide effective instruction to learners. In 2003, Vince graduated from Duquesne University in Pittsburgh, Pennsylvania, with a master’s degree in instructional technology. Vince is dedicated to utilizing technology to enable learners to more easily access necessary training and helping others better understand the field of e-learning and how to better assess the effectiveness of e-learning.

**Pierre Laforcade** got his MSc in Artificial Intelligence (2001) at the University Paul Sabatier, Toulouse, France. Currently, he is a PhD student (since October 2001) at the University of Pau in the LIUPPA. His research topics are at the crossroads of the educational engineering and the software engineering domains. They include modeling methods and techniques for the design of learning situations: UML modeling and meta-modeling, educational component concept, and educational modeling languages.

**Hu-Hyuk Lee** (MBA, Southeast Missouri State University) is a reporter of financial news for the *Dae-Gu Ilbo*, a newspaper in South Korea. He received a BA in Physical Education from Yonsei University, South Korea. After his BA, he completed an MBA from Southeast Missouri State University (USA).
Pedro Faria Lopes (MSc, 1988, PhD, 1996, Electrical Engineering and Computer Science) is associate professor at the Dept. of Information Sciences and Technologies (DCTI), Higher Institute of Labour and Business Studies (ISCTE) (Portugal), in Computer Graphics and Multimedia. He is responsible for the MSc on Information Studies and digital libraries. He has several studies in cinema and animation teacher; from 1983-1996 he was researcher at INESC and from 1991-1995 he was an executive director of the Multimedia Centre at INESC. Since 1999, he is an invited professor at the Higher Institute for Theater and Cinema, lecturing on multimedia technology. Since 1995, for the European Commission, he is expert evaluator to European funded research projects on multimedia, computer graphics, mixed realities and virtual reality technologies in management, art, cultural heritage and preservation.

Kathryn A. Marold is a professor of computer information systems at Metropolitan State College of Denver, USA. She holds a doctorate from the University of Denver, and has published extensively on the areas of electronic communication and learning. Her current teaching areas include GUI programming and the development of Internet online courses. Her primary research centers upon the cognitive changes that take place when communicating and learning within an electronic environment.

Alcina Prata is a professor of information technologies at the Higher School of Management Sciences (http://www.esce.ips.pt) where she teaches multimedia technology and digital video. She is also a researcher at the Higher Institute of Labour and Business Studies (http://www.iscte.pt), Lisbon, Portugal. With a Master in Educational Multimedia (2000), she is now doing a PhD in e-learning systems at the Lisbon University, Faculty of Sciences (http://www.fc.ul.pt). She has several studies in offline multimedia (1998-2000), online multimedia (since 2002), and video (since 2001). She has extensive personal experience in the development of educational multimedia applications. Along with researching, teaching and learning online, she is particularly interested in the planning, development and evaluation of real interactive online multimedia educational applications.

Michael L. Rodgers is a faculty member in the Chemistry Dept. at Southeast Missouri State University (USA). Mike has worked to integrate computer hardware and software into the Department’s instructional program since
1985. In 1995, Dr. Rodgers was named a technology associate of the University’s Center for Scholarship in Teaching & Learning. In that capacity, he has contributed significantly to the planning and teaching of the Center’s “Technology Serving Learning” Institutes each year since they began in 1997.

David Starrett is the director of the Center for Scholarship in Teaching and Learning and Office of Instructional Technology at Southeast Missouri State University. David has presented more than 65 seminars, workshops and papers, including 20 invited presentations over the past four years on the integration of technology into teaching and learning at such venues as AACE, AAHE, MERLOT, NLII, POD, The Forum, and Syllabus. David is a standard presenter with Syllabus, a senior associate and invited presenter for the TLTGroup and was recently commissioned to author the National Teaching and Learning Forum TECHPED column for the TLTGroup.

George Yee is a senior researcher in the Network Computing Group, Institute for Information Technology, National Research Council Canada (NRC). Prior to joining the NRC in late 2001, he spent more than 20 years at Bell-Northern Research and Nortel Networks. George received his PhD (Electrical Engineering), MSc (Systems and Information Science), and BSc (Mathematics) from Carleton University, where he is now an adjunct professor. He is a senior member of IEEE, and member of ACM and Professional Engineers Ontario. He has also been the chair of the Ottawa IEEE Computer Society for many years and is an active volunteer for conferences. His research interests include security and privacy for e-services, system performance and reliability, and the design of secure software. For more information, visit www.georgeyee.ca.
