About the Contributors

**Madjid Tavana** is a Professor of Business Systems and Analytics and the Lindback Distinguished Chair of Information Systems and Decision Sciences at La Salle University where he served as Chairman of the Management Department and Director of the Center for Technology and Management. He has been a Distinguished NASA Research Fellow at Kennedy Space Center, Johnson Space Center, Naval Research Laboratory - Stennis Space Center, and Air Force Research Laboratory. He was recently honored with the prestigious Space Act Award by NASA. He holds an MBA, a PMIS, and a PhD in Management Information Systems and received his post-doctoral diploma in strategic information systems from the Wharton School of the University of Pennsylvania. He is the Editor-in-Chief for *Decision Analytics*, the *International Journal of Strategic Decision Sciences*, the *International Journal of Enterprise Information Systems*, and the *International Journal of Applied Decision Sciences*. He has published over one hundred research papers in academic journals such as *Decision Sciences, Information Systems, Interfaces, Annals of Operations Research, Omega, Information and Management, Expert Systems with Applications, European Journal of Operational Research, Journal of the Operational Research Society, Computers and Operations Research, Knowledge Management Research and Practice, Computers and Industrial Engineering, Applied Soft Computing, Journal of Advanced Manufacturing Technology, and Advances in Engineering Software*, among others.

**William Acar** is a professor in the Graduate School of Management at Kent State University. He has published in such journals as *Strategic Management Journal, European Journal of Operational Research, JAIS, Journal of Management Studies, INFOR, Decision Sciences, OMEGA, Journal of Management, Information Systems, International Journal of Operational Research, Systems Research, Behavioral Science and FUTURES*. Dr. Acar is the coauthor of the 1995 book *Scenario-Driven Planning*, and initial author of the CSM causal mapping used in an interactive GSS for strategic and organizational learning problems. He has also developed measures of diversity better calibrated than the Herfindahl and Entropy measures.

**Mian M. Ajmal** is currently working as Assistant Professor of Management at Abu Dhabi University, Abu Dhabi, UAE. He holds D.Sc. (Economics & Business Administration) and MBA degrees. He has been involved in several research projects in last few years. His research interests pertain to knowledge, and project management, entrepreneurship, internationalization of firms along with organizational behavior and culture. He has been publishing his research articles in several International Journals and Conferences.
Sergey Anokhin is an assistant professor of entrepreneurship at Kent State University. His work has been published or is scheduled to appear in Journal of Business Venturing, Small Business Economics, Organizational Research Methods, Journal of Business Research, R&D Management and other journals and edited volumes. His research agenda includes innovation management at micro-level (entrepreneurship, corporate entrepreneurship), meso-level (strategic SME networks), and macro-level (within-country and cross-country comparisons).

Satyanarayana Beela is a Professor in Department of Mechanical Engineering at Andhra University. He has more than 30 years of teaching experience. He received his PhD from Indian Institute of Technology, Delhi, India. He did an extensive research work in various fields of mechanical engineering apart from developing a number of Software Packages in CAD/CAM. He had to his credit 94 papers published in various national and international conferences and journals and guided 12 Ph.D. theses. Also he had successfully undertaken several research projects funded by MHRD, DST and AICTE. At present he is acting as a Vice-Chancellor, Andhra University.

Haiyang Chen is a Professor of Finance and the Managing Director of the Global Financial Services Institute in the Cotsakos College of Business at William Paterson University. His research interest is in financing and investment, financial planning, and experiential learning in global settings.

France Cheong received his Bachelor of Business Computing from RMIT University, Australia, his Master of Computer Science and his PhD in Computer Systems Engineering from La Trobe University, Melbourne, Australia. He also received a Master in Education from RMIT University. He is currently a Senior Lecturer with the School of Business Information Technology, RMIT University. His background is multidisciplinary due to his varied education and work experience, initially an industrial chemist, then a Management Information Systems Consultant, and currently an academic. His research interests are quite diversified, the underlying unifying theme being the modelling and simulation of complex systems for improved decision making at operational and strategic levels.

Brian Corbitt PhD FACS is currently Professor of Information Systems and Head of the School of Business Information Technology at RMIT University, Australia. He specializes in IT policy development, in Health Information Systems, analysis and implementation in Business Modelling and Electronic Commerce trade relationships, and knowledge management. He has published 10 books, over 150 refereed scholarly papers, numerous reports to the governments of Thailand and New Zealand, and some 20 invited papers as a keynote speaker on IT policy in Malaysia, Singapore, Thailand, New Zealand, Japan, Hong Kong, and Australia.

Tom Coyle teaches management at The University of Texas at Brownsville. He received his Ph.D. from The University of Texas Pan American. He has thirty years industrial experience in international operations, manufacturing and engineering. His research interests include business ethics, supply chain management and business sustainability. Dr. Coyle can be reached at tom.coyle@utb.edu.

Metin Çakanyıldırım is an associate professor at the School of Management at the University of Texas at Dallas. He received his B.S. in Industrial Engineering from Bilkent University, Turkey, his M.S.
in Management Science from University of Waterloo, Canada, and his Ph.D. in Operations Research from Cornell University. He is a member of INFORMS, POMS, and IIE. His research interests include inventory and capacity management, risk management, and information security.

Nagihan Çömez is an assistant professor of Operations Management at the Faculty of Business Administration at Bilkent University. She holds a B.S. degree in Industrial Engineering from Bogazici University, Turkey and an M.S. degree in Supply Chain Management and a Ph.D. degree in Operations Management from the University of Texas at Dallas. She is an INFORMS member. Her research interests focus on inventory management and coordination in retailer systems, particularly on inventory sharing, inventory-pricing models, and supply chain scheduling.

John Davies is Professor of Management Studies and former Head of Victoria Management School, Victoria University of Wellington, New Zealand. He graduated from the Universities of Wales and of Lancaster with a background in operational research, and has developed his research interests primarily within the fields of the decision sciences, systems methodologies and sports management. He has published in leading academic journals spanning the decision sciences, systems, technology and sports management He has been a council member of the Australian & NZ Academy of Management, Vice-President of the Operational Research Society of NZ, President of the Wellington Rugby Football Union and is currently Vice-President with Western Decision Science Institute.

Michael Hu has a Ph.D. from the University of Minnesota in management science/marketing. Currently he holds the Bridgestone Chair in International Business and is a professor of marketing at Kent State University. He has published over a hundred and thirty academic articles in the areas of applications of marketing, international business and artificial neural networks. His research has appeared in the Journal of Marketing Research, Marketing Letters, International Journal of Research in Marketing, Decision Sciences, European Journal of Operational Research and among many others. He won the University’s Distinguished Teaching Award in 1994 and the University Distinguished Scholar Award in 2006.

Sarojini Jajimoggala graduated from Andhra University in Mechanical Engineering in 1999 and received a Master’s in Industrial Engineering from Andhra University, Visakhapatnam, India in 2001. She started her teaching at GMRIT immediately after completion of post graduation. She has more than nine years experience in teaching at both under graduate and post graduate level. Presently, doing her research work at Andhra University in the area of Maintenance Resource Optimization by using multi-criteria decision making techniques. Presently she associated with GITAM Institute of Technology, GITAM University, Visakhapatnam, India as assistant professor. Her areas of interest are operations research, optimization techniques, multi criterion decision making techniques etc.

Jennie Johnson earned a Ph.D. from Virginia Polytechnic Institute and State University. Currently she teaches management at The University of Texas at Brownsville. She has twenty-five years of experience in human resource management, organizational development, and performance improvement prior to entering academia. Her research interests are ethical decision making, organizational justice, and conflict in the workplace. Dr. Johnson can be reached at jennie.johnson@utb.edu.
**About the Contributors**

**Nathan Joseph** is a professor of finance at Aston University, United Kingdom. His research interests include market efficiency, risk management, asset pricing and forecasting. His research work has appeared in a number of academic journals. Dr Joseph is also an associate of the Chartered Institute of Management Accountants.

**Julie E. Kendall**, PhD is a professor of management in the School of Business-Camden, Rutgers University. Dr. Kendall is a fellow of the Decision Sciences Institute and a past chair of IFIP Working Group 8.2. She was awarded the Silver Core from IFIP. Professor Kendall has published in *MIS Quarterly, Decision Sciences, Information & Management, CAIS, Organization Studies* and many other journals. Additionally, Kendall has co-authored *Systems Analysis and Design, 7th* edition. She co-edited the volume *Human, Organizational, and Social Dimensions of Information Systems Development* and is on the Senior Advisory Board for *JITTA* and is on the editorial boards of the *Decision Sciences Journal of Innovative Education, Journal of Database Management*, and *IRMJ*.

**Kenneth E. Kendall**, PhD is a distinguished professor of management in the School of Business-Camden, Rutgers University. He is one of the founders of the International Conference on Information Systems (ICIS) and a fellow of the Decision Sciences Institute (DSI). He served as the president of DSI and as a Program Chair for both DSI and AMCIS. Dr. Kendall was named as one of the top 60 most productive MIS researchers in the world, and he was awarded the Silver Core from IFIP. He co-authored, *Systems Analysis and Design, 7th* edition. He edited *Emerging Information Technologies: Improving Decisions, Cooperation, and Infrastructure* and co-edited *The Impact of Computer Supported Technologies on Information Systems Development*.

**Sue Kong**, PhD is an assistant professor in the Department of Accounting and Finance at Kutztown University, Pennsylvania. Sue recently earned her PhD from Rutgers University. Dr. Kong’s research interests focus on alternative systems development methodologies, specifically, agile software development methodologies and quality, and their adoption in organizations. She has researched software development practices in the US and New Zealand. In 2006 Sue was a finalist for the Juran Fellowship, Joseph M. Juran Center for Leadership in Quality, University of Minnesota. Kong serves as one of the advisors for SIFE (Students in Free Enterprise) at her university. professor Kong is a member of the Decision Sciences Institute (DSI).

**Yohanes Kristianto** is now a researcher in Industrial Management at University of Vaasa, Finland. His research interests are in the area of supply-chain strategy/management and production/operations management. He has 11 years of working experiences in the area of quality management, logistics and process engineering.

**Chu-hua Kuei** is Professor of Management and Management Science at the Lubin School of Business, Pace University, New York, NY. He is the co-author of *Strategic Total Quality Management, and ERP and Supply Chain Management*. His current research interests include Sustainable Operations and Supply Chain Management, Six Sigma Quality Management, design science and methodology, system theory, complexity theory, and supply chain management.
**Gilbert Laporte** obtained his Ph.D. in Operations Research at the London School of Economics in 1975. He is Professor of Operations Research at HEC Montreal, and Canada Research Chair in Distribution Management. He has received many scientific awards including the Pergamon Prize, the Merit Award of the Canadian Operational Research Society, and the CORS Practice Prize on two occasions. He is a member of the Royal Society of Canada, and Fellow of INFORMS. In 2009 he became the 42nd Honorary Member of the INFORMS International Omega Rho Society, and he received the Robert Herman Lifetime Achievement Award in Transportation Science.

**Chinho Lin** is Professor of Industrial and Information Management & Institute of Information Management, College of Management Science, National Cheng Kung University, Taiwan. He has contributed articles to Omega, Decision Sciences, International Journal of Production Economics, Expert System and Applications, and others. His research interests are industry policy, management science, supply chain management, and quality management.

**Christian N. Madu** is Research Professor of Management Science at Pace University and co-editor of the International Journal of Quality and Reliability Management. He has published more than 100 research papers and more than a dozen scholarly books including the Handbook of Total Quality Management, Handbook of Environmentally Conscious Manufacturing, Environmental Planning and Management, and House of Quality (QFD) in a Minute.

**Khelifa Mazouz** is a senior lecturer in finance at Bradford University School of Management, United Kingdom. His research interests include market efficiency, asset pricing and initial public offerings. His research work has appeared in a number of academic journals.

**Tobias Mettler** received his PhD in business information systems of the University of St. Gallen. He is senior researcher at SAP Research, Campus-based Engineering Center (CEC) St. Gallen, Switzerland. His research interests include issues related to design science research, systems analysis, electronic commerce, and electronic healthcare.

**Zijad Pita** received his Ph.D. and Master’s degree from RMIT University in Australia. He was awarded the most outstanding academic performance in the Master of Business in Information Technology, RMIT 2000. He has held numerous positions in various industries and is currently a lecturer in the School of Business IT at RMIT University. He has presented papers at national and international conferences in Europe and Australia. His research in the SISP area is due to be published in a book Strategic Informa-

V. V. S. Kesava Rao is a Professor in Department of Mechanical Engineering at Andhra University. He was graduated from Osmania University in Mechanical Engineering and later obtained his post graduation in Industrial Engineering from Andhra University. He has more than 16 years of teaching experience. He received his Ph.D from Andhra University, Visakhapatnam. Other than teaching at both under graduate and post graduate level he served as as Maintenance Engineer in Steel Authority of India and Rastriya Ispat Nigam Limited (RINL) for 7Years. Prof. Kesava Rao so far guided 40 M.Tech students. He has 8 publications in various journals and one of his paper was awarded as best paper in journal of Industrial engineering.

Thomas Saaty, chair of university professor, Katz Graduate School of Business, University of Pittsburgh, PhD mathematics Yale, member National Academy of Engineering. October 2008, awarded the Impact Prize by INFORMS for his work on the analytic hierarchy process. Previously professor, the Wharton School, University of Pennsylvania, before which he worked at the Arms Control and Dis- armament Agency, the State Department, in Washington, on nuclear arms reduction negotiations with the Soviets in Geneva. Published 40 books and more than 300 papers; with latest books: The Brain: Unraveling the Mystery of How It Works, Creative Thinking, Problem Solving & Decision Making and in 2008 Group Decision Making: Drawing out and Reconciling Differences, with professor Kirti Penwati, of Jakarta, Indonesia . He developed the Analytic Hierarchy Process (AHP) for decision-making and its generalization to feedback, the Analytic Network Process (ANP). Awarded the gold medal from the International Society for Multicriteria Decision Making. He was awarded the L.R. Ford prize in mathematics for an extensive paper on a long standing unsolved problem in mathematics for over one hundred years. Thirteen Colorful Variations on Guthrie's Four Color Conjecture which later became the basis of a book called The Four Color Problem published by McGraw Hill, and now by Dover Publications. The problem was solved soon after by three people who collaborated to work our more than a thousand possible cases on the computer.

L. Douglas Smith, Professor of Management Science and Director of the Center for Business and Industrial Studies at the University of Missouri-St. Louis, received his Ph.D. in Management Sciences from the University of Minnesota (1972). His research emphasizes the development of analytical models for solving managerial problems. Smith’s articles have appeared in numerous journals including Decision Sciences, Journal of the Operational Research Society, Naval Research Logistics, Transportation Research, European Journal of Operational Research, Computers and Operations Research, Interfaces, OMEGA, and INFOR. He has also published in leading academic journals for banking, finance and information systems.

Kathryn E. Stecke is the Ashbel Smith Professor of Operations Management at the University of Texas at Dallas. She received an M.S. in Applied Mathematics and an M.S. and Ph.D. in Industrial Engineering from Purdue University. She was the founding Editor-in-Chief of the International Journal of Flexible Manufacturing Systems and is Editor-in-Chief of Operations Management Education Review. She has served on both the INFORMS and POMS Board of Directors. She is an INFORMS Fellow.

Minghe Sun is a professor at the Department of Management Science and Statistics at the University of Texas at San Antonio. He received his PhD in Business Administration from the University of Georgia in 1992. His work has appeared in most of the major journals in management science/operations research. He received the Elwood S. Buffa Doctoral Dissertation Competition Award in 1993 and the Best Theoretical/Empirical Research Paper Award twice, once in 2003 and once in 2006, from the Decision Sciences Institute. He also received the University of Texas System Chancellor’s Council Outstanding Teaching Award in 1999.

Liem Tran is a faculty at the Department of Geography, University of Tennessee at Knoxville, Tennessee, USA. His research interests include physical and environmental geography, decision-making science, artificial intelligence techniques, and spatial analysis and modeling. He conducts work on regional vulnerability assessment, human-environment interactions, environmental decision-making, fuzzy set and its application to GIS and environmental studies, and uncertainty analysis.

Marvin D. Troutt is a professor in the graduate school of management at Kent State University. He is a fellow of the Decision Sciences Institute. His publications have appeared in Management Science, Operations Research, Decision Sciences, Naval Research Logistics, and similar journals. He received the 2005 Distinguished Scholar Award at Kent State University. He has served as Rehn Research Professor in Management at Southern Illinois University, Carbondale, Illinois. He served as Visiting Scholar in the Department of Applied Mathematics at the Hong Kong Polytechnic University 1994-95. His current interests include entrepreneurship, supply chain management, applied probability and applied optimization.

Mark Wareing has worked in the field of nuclear decommissioning for the past 20 years specialising in strategy development, options assessment, and systems development. For the past 5 years he has worked for the UK Nuclear Decommissioning Authority in the areas project prioritisation, business case development, value measurement, and engineering evaluation.

Janice Winch is an Associate Professor of Management Science at Pace University. She received her Ph.D. in operations research from Rutgers University in 1993. Her articles have appeared in Manufacturing and Service Operations Management, Probability in the Engineering and Informational Sciences, International Journal of Production Research, and others.

Milan Zeleny, professor, management systems, Fordham University. Received MS, PhD, University of Rochester. Visiting professor Xidian University, Xi’an, Tomas Bata University, Zlin; also Fu Jen University, Taipei, Indian Institute of Technology (Kanpur), IBMEC (Rio de Janeiro). Published about 450 papers. Editor-in-chief of Human Systems Management, editorial boards of Information Technology and Decision Making, Innovation and Learning, Operations and Quantitative Management, Applied Deci-
