Index

A
Access Networks 7, 89
Active Multimedia Server (AMS) 220
active networks 202
Active Server (AS) 205, 217, 220
active services 203
adaptive streaming 190
Additive Increase and Multiplicative Decrease (AIMD) algorithm 175, 178
advanced network architectures 122
Agent Oriented (AO) 130
Aggregator 154
Akamai Resource Locator (ARL) 5
ant colony optimization (ACO) 128
Application CDN (ACDN) 3
application layer multicast systems 56
application service providers (ASP) 200
application sessions 62
Asynchronous Layered Coding (ALC) 119, 239, 249
authoritative DNS (ADNS) 39
cloud-based CDNs 48
cloud computing 30
Cluster Replica Registry (CRR) 155
Commercial-off-the-Shelf (COTS) 83
content delivery cloud 30
Content Delivery Networks (CDNs) 1-3, 22, 29, 52, 122, 147
common problems 4
content discovery 5
Content Distribution Internetworking (CDI) 33, 150
content locator 8
content management 5
content manager 8, 89
content peering 148
content placement 4
CoolFish 71
CoolStreaming 63-64
CoralCDN 150
core IP network 89

data delivery 64
data extraction 243
data grids 123
data transfer sessions 61
Differentiated Service Code Point (DSCP) 124
Differentiated Services (DiffServ) protocol 124
Digital Terrestrial Television (DTT) 230
Distributed Hash Table (DHT) 56, 251-252
Distributed Multimedia Systems (DMSs) 202
Distribution Format Exchange Profile (DFXP) 233, 250
distribution network supplies 7
DNS-based techniques 36
download-based streaming 70
DVB-H 81
Dynamic Overlay Routing (DOR) 265
doctoral paraloiding 188

E
ELDA agent model 204, 229
ELDA framework 201
electronic long base interferometry (e-VLBI) 123
End System Multicast (ESM) 58
energy-awareness 48
estimation refinement 260
event broadcasting 236

F
failure recovery 68
fiber-to-the-node (FTTN) 89
File Delivery over Unidirectional Transport (FLUTE) 239
First In First Out (FIFO) 107
Fixed Number Routing (FNR) 265
flash crowd 22-23
forwarder 214
Forward Error Correction (FEC) 106, 119-120, 190

G
geolocation-based redirection 40
Global Lambda Integrated Facility (GLIF) 124, 146
graceful departure 64
GridFTP 180
GridFTP with Automatic Parallelism Tuning (GridFTP-APT) 180
group management 60

H
Hierarchical Token Bucket (HTB) 108
Hulu 55
hybrid fiber cable (HFC) 89
Hybrid Overlay Network (HON) 69

I
information, MultiMedia Mobile Agents 201
Internet Engineering Task force (IETF) 179
IP multicast 56
IPTV 80

J
JADE (Java Agent DEvelopment) Framework 130
Java-enabled Web Server (JWS) 220

L
lightpaths services 123
Local DNS (LDNS) 36, 39
Low Extra Delay Background Transport (LEDBAT) 173, 197

M
MAMS (Mobile Agent Multimedia Space) 206
MediaFLO 81
media gateway 214
media searcher 214, 218
Media Service Description Language (MSDL) 209
media streaming controller 214-215
media/transcoding server 86
membership management 64
mesh-based systems 62, 69
MetaCDN 30-31
c characteristics 32
MetaCDN allocator 31
MetaCDN load redirector 31
MetaCDN QoS monitor 31
MetaCDN utility 46
metadata 231
minimal routing graphs 268
mobile agents 204
mobile IPTV 79-80, 83
mobile IP video streaming 83
mobile TV 83
MultiMedia coordination space 207
Multiple Description Codes (MDC) 190
multipoint parallel data retrieval 185
multipoint-to-point parallel transport mechanism 185
multi-source transfer 149
Multi-Task Downloading (MTD) 74

N
Nack Oriented Reliable Multicast (NORM) 239
Network Description Language (NDL) 127, 132
network provisioning 138
new client admission 68
Nirvanix Storage Delivery Network (SDN) 30
node departure algorithm 64
Index

node failure 64
node joining mechanism 64

O
Open Mobile Alliance (OMA) 82
Open Provenance Model (OPM) 129
origin servers 6

P
P2P live streaming applications 57
P2P streaming 56
P2VoD 68
parallel data transmission 181
parallel download 149
Parallel TCP Transfer Helper (PATHEL) 173
parent selection 60
partnership management 64
patch server selection 68
patch serving 67
Peercast 61
Peer-to-Peer (P2P) 33, 54-56, 149, 173, 215
performance-aware adaptation 60
per-hop behavior (PHB) 124
P-Grid overlay 254
player 214
playout 247
point-to-point transport mechanism 174
with connection management 175
with parallel paths 177
PPLive 69
preferences.xml 111
preproduction 246
Priority Queuing (PQ) 108
Provenance Service Agent (PSA) 131

Q
QoS aware workflow planner (QoSWP) 131
QoS Controller 214
QoS Monitor Agent (QMA) 131
QoS requirement parsing 136

R
Random Early Detection (RED) 107
random redirection 40
range queries 255
RAPTOR encoding 107
Real Time Protocol (RTP) 174
Real-Time Transport Protocol (RTP) 82
Receiver-driven Layered Multicast (RLM) 200
recorder 214
redirector 8, 90
Reed-Solomon (R-S) 106
Reliable Multicast Transport Protocol (RMTP) 183
request-redirection 39
request-redirection techniques 34
Resource Discovery Agent (RDA) 131
Resource Provisioning Planner (RPP) 131
resources.xml 111
roundtrip-time (RTT) 9

S
Scalable Gossip Membership protocol (SCAM) 64
scheduling algorithm 64
semi-dynamic paraloading 187
Service Level Agreements (SLAs) 29, 148
session initiator 214
signal production 236
Single-Task Downloading (STD) 73
Smart Caching in Access Points (SCAP) 192
Stochastic Fairness Queuing (SFQ) 107
Stream Control Transport protocol (SCTP) 175, 179
Streamer (STR) 210
Streaming Content Distribution Networks (SCDN) 203
streaming server/surrogates 88
surrogate server 5
surrogate servers 7

titling 243
titling production 237
Token Bucket Filter (TBF) 107
Transmission Control Protocol (TCP) 85, 124
tree-based systems 57, 66
tree construction 68

U
UniStore 263
user datagram protocol (UDP) 85, 174
User Generated Content (UGC) 78
utility-redirection 41

V
Vehicle-to-Infrastructure (V2I) 105, 120
Vehicle-to-Vehicle (V2V) 105, 120
