About the Contributors

Wim Van Grembergen, PhD, is professor at the Economics and Management Faculty of the University of Antwerp (UA) and at the University of Antwerp Management School (UAMS). He teaches information systems at bachelor, master and executive level, and researches in IT governance, IT strategy, IT performance management and the IT balanced scorecard. Within his IT Alignment and Governance (ITAG) Research Institute (www.uams.be/itag) he also conducts applied research in these domains. Dr. Van Grembergen is a frequent speaker at academic and professional meetings and conferences and serves in a consulting capacity to a number of firms. He has several publications in leading journals and published books on IT governance and the IT balanced scorecard. His most recent book with Steven De Haes “Enterprise Governance of IT: Achieving Strategic Alignment and Value” is published in 2009 (Springer).

Steven De Haes, PhD, is professor information systems management at the University of Antwerp Management School (UAMS) and the Economics and Management Faculty of the University of Antwerp (UA). He has teaching assignments in many executive and master programs in the domain of IT governance, IT assurance, strategic alignment, value creation, IT performance measurement, etc. He is actively engaged in applied research within the IT Alignment and Governance (ITAG) Research Institute (www.uams.be/itag) and acts as an advisor to firms in these domains. He has several publications in leading academic and professional journals and has presented research results at many international conferences. In 2009, he co-authored with Wim van Grembergen the book Enterprise Governance of IT: Achieving Strategic Alignment and Value (Springer).

Bjorn Cumps obtained a PhD in applied economics from Katholieke Universiteit (K.U.) Leuven, Belgium. He is an affiliate researcher at K.U. Leuven and Vlerick Leuven Gent Management School. His research focuses on business-ICT alignment and realizing value from information system investments.

Guido Dedene is a full professor in the Decision Sciences and Information Management Department of Katholieke Universiteit (K.U.) Leuven, Belgium. He is also a full faculty member of University of Amsterdam, The Netherlands, where he holds a chair on the Development of Information and Communication Systems. His research interests include ICT management, formal business systems development, as well as quantitative management aspects of information systems.
Wolfgang Johannsen is managing partner of its-okay Ltd. & Co. KG, a Germany-based company offering educational services and consultancy in the broader context of IT Governance and IT Compliance. He also is a scientist at Technische Universität Darmstadt, Germany, and lecturer at Frankfurt School of Finance & Management. He co-authored a well-recognized book on IT-Governance (in German). Before running his own enterprise, Wolfgang Johannsen was associate partner at Accenture GmbH, Germany. In his work as a consultant he ran strategic IT projects for financial services clients. Wolfgang started his career with IBM as research staff member for computer science. He then joined Deutsche Bank where his last management position was Chief of Staff (IT/operations).

André Miede is a researcher with the E-Finance lab and multimedia communications lab partnership at Technische Universität Darmstadt. His research focuses on security for service-oriented architectures and the Internet of Services, especially on attack and countermeasure aspects. In addition to his research activities, he is a consultant in the financial services sector for BearingPoint in Germany.

Michael Niemann is a researcher within the multimedia communications lab at the Technische Universität Darmstadt, Germany. He is a work package lead for “Service Governance” in the research project THESEUS/TEXO initiated by the Federal Ministry of Economy and Technology. His research focuses on the management of distributed workflows in service-oriented architectures, IT governance for large heterogeneous systems, and usage of semantic web technologies in operational IT governance.

Nicolas Repp has been a researcher at multimedia communications lab at the Technische Universität Darmstadt. His research focuses on service management, the monitoring of service quality in cross-organizational business processes, as well as software architecture management and IT Governance.

Ralf Steinmetz worked for over nine years in industrial research. Since 1996, he is head of the Multimedia Communications lab at the Technische Universität Darmstadt, Germany. From 1997-2001 he directed a Fraunhofer Institute. In 1999, he founded the Hessian Telemedia Technology Competence Center. His thematic focus is multimedia communications. With over 400 refereed publications he became ICCC Governor (1999); was awarded as the ranking of Fellow of both, the IEEE (1999) and the ACM (2002). In 2005, as member of the Hessian technology advisory board he is appointed as the advisor for information and communications technology by the Hessian government.

Stijn Viaene is an associate professor in the Decision Sciences and Information Management Department of Katholieke Universiteit (K.U.) Leuven, Belgium, and a partner of Vlerick Leuven Gent Management School, where he chairs the Competence Center Operations and Technology Management. His research zooms in on the many managerial issues in business-ICT alignment and information systems management, with a particular interest in realizing the benefits from business intelligence systems.
