About the Contributors

**John Wang** is a Professor in the Department of Management and Information Systems at Montclair State University (USA). Having received a scholarship award, he came to the USA and completed his PhD in operations research from Temple University. Due to his extraordinary contributions beyond a tenured full Professor, Dr. Wang has been honored with a special range adjustment in 2006. He has published over 100 refereed papers and six books. He has also developed several computer software programs based on his research findings. He is the Editor-in-Chief of *International Journal of Applied Management Science, International Journal of Information Systems and Supply Chain Management,* and the *International Journal of Information and Decision Sciences.* He is also the EIC for the *Advances in Information Systems and Supply Chain Management* Book Series. He has served as a guest editor and referee for many other highly prestigious journals. He has served as track chair and/or session chairman numerous times on the most prestigious international and national conferences. Also, he is an editorial advisory board member of the following publications: *Intelligent Information Technologies: Concepts, Methodologies, Tools, and Applications, End-User Computing: Concepts, Methodologies, Tools, and Applications, Global Information Technologies: Concepts, Methodologies, Tools, and Applications, Information Communication Technologies: Concepts, Methodologies, Tools, and Applications, Multimedia Technologies: Concepts, Methodologies, Tools, and Applications, Information Security and Ethics: Concepts, Methodologies, Tools, and Applications, Electronic Commerce: Concepts, Methodologies, Tools, and Applications, Electronic Government: Concepts, Methodologies, Tools, and Applications,* and other IGI Global titles. Furthermore, he is the editor of *Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications* and the *Encyclopedia of Data Warehousing and Mining* 1st and 2nd editions. His long-term research goal is on the synergy of operations research, data mining, and cybernetics.

***

**Jeffrey W. Alstete** is an Associate Professor of Management and Business Administration at the Hagan School of Business, Iona College, New Rochelle, New York, USA. He obtained his Ed.D. degree from Seton Hall University and both an MBA and MS from Iona College. He teaches courses in Business Policy and Strategy, Entrepreneurship, Managerial Decision Making, International Management, Benchmarking, Competitive Intelligence, and Knowledge Management. He is the author of four books and several journal articles on administration and business. His consulting and areas of research interest include benchmarking, business strategy, decision making, entrepreneurship, knowledge management, accreditation, organizational development and improvement.
Luca Anselma is Assistant Professor in the Dipartimento di Informatica of Università di Torino, Italy. He received a Laurea degree in computer science in 2002 and a PhD degree in computer science in 2006 from University of Torino. Research interests of Luca Anselma cover several areas of computer science: Artificial Intelligence (in particular, constraint-based temporal reasoning, model-based diagnosis, and automatic configuration), Medical Informatics (especially, computerized clinical guidelines) and Databases (specifically, temporal relational databases). On these topics, he is author of over 30 papers published in refereed conference proceedings, books and international journals. Further information can be found at http://www.di.unito.it/~anselma/.

Dimitris Apostolou is a adjunct Lecturer in the Informatics Department of the University of Piraeus and senior researcher in the Institute of Information and Computer and Communication Systems at the National and Technical University of Athens (NTUA). He holds a PhD on knowledge management and decision support from the School of Electrical and Computer Engineering, NTUA, an MSc in IT with distinction from Univeristy College London, UK, an MSc in Chemical Engineering from New Jersey Institute of Technology, USA, and a Diploma Degree in Chemical Engineering from NTUA. He has an extensive experience as a management consultant. Dimitris is currently working in a number of research projects developing technological infrastructures that aim to leverage knowledge sharing, both at an enterprise and at an-inter-enterprise level. In the past he has participated in research and consulting projects in the areas of Geographical Information Systems, Data Warehousing and OLAP applications, Business Process Modeling as well as projects dealing with the technical analysis of energy and environmental systems.

Nekane Aramburu is PhD in Economics and Business Administration and member of the Strategic Management Department of the Faculty of Economics and Business Administration of the University of Deusto (San Sebastián, Spain). She is specialized in the fields of Organizational Learning, Change Management, and Business Organization. Her research focus is currently on Organizational Learning, Knowledge Management, and Innovation. She is also member of Sol (Society for Organizational Learning). Her research work has been published in several international journals, such as The Learning Organization, Journal of Knowledge Management, Journal of Intellectual Capital, Management Research News. She has also published book chapters in books edited by international publishers.

Rajiv Arora is a Lecturer in Information Technology Department at Guru Premsukh Memorial College of Engineering, Delhi, India where he has taught since 2005. He received his M.Tech in Information Technology from Guru Gobind Singh Indraprastha University, Delhi, India in 2008. He obtained his B.Tech in Information Technology from Kurukshetra University, Kurukshetra, India in 2004. He has published 4 papers in National /International Conferences. His current research areas include Data mining and Data cleansing.

Rashmi Assudani is currently a faculty at Xavier University’s Williams College of Business. Her research interests include knowledge management in geographically distributed work arrangements and the implications this has for organizations and managers. Her research interests also span other areas such as managing innovation for new service and product development, minority entrepreneurship, and the role of physical environments on innovation and creativity. Her research has been published in various
About the Contributors

journals, books and conference proceedings. Further, her research has been a recipient of a number of awards. Rashmi holds a PhD in Strategy and Organizations from Desautels Faculty of Management at McGill University in Montreal, Canada.

**Sikha S. Bagui** is an Associate Professor in the Department of Computer Science at the University of West Florida, Pensacola, Florida. She has authored several books on database and SQL, and her areas of research are database and database design, data mining, pattern recognition, and statistical computing.

**Subhash C. Bagui** is a Professor in the Department of Mathematics and Statistics at the University of West Florida, Pensacola, Florida. His areas of research are statistical classification and pattern recognition, bio-statistics, construction of designs, tolerance regions, statistical computing and reliability. Email: sbagui@uwf.edu

**Jukka-Pekka Bergman** is a professor and director of the research centre Nordi at the Lappeenranta University of Technology. His educational background is Dr.Sc (Tech), MSc (Knowledge Management), BSc (Engineering) and MA (Translation and Linguistics in Russian language). Before the present position, he worked as research fellow at the Technology Business Research Center of the Lappeenranta University of Technology. He has also worked as a managing director of the Lappeenranta Innovation Ltd and performed as an entrepreneur in construction business. His main research interests are in strategic management, innovation management and also in Russian related business research.

**Alessio Bottrighi** took his “Laurea” degree with “summa cum laude” in Computer Science in December 2002 at University of Piemonte Orientale, Italy. He obtained his Ph.D. in Computer Science in February 2007 from University of Turin, Italy, defending the thesis “Extending computer guideline system with advanced AI and DB facilities”. He is a short term researcher at the Computer Science Department of the University of Piemonte Orientale. His research interests include Temporal Databases, Case-Based Reasoning, Temporal Reasoning, Decision Support Systems and Medical Informatics. Alessio Bottrighi published more than 40 papers about these topics all in refereed international journals, conference proceedings, and books.

**Timothy E. Busch** is the acting Chief Engineer for the Information Directorate of the Air Force Research Laboratory. In that role, he provides advice and counsel to the Director and the entire directorate on systems engineering and programmatic matters. He received his PhD in Electrical Engineering from Binghamton University in the area of control theory applied to laser communication systems. Dr. Busch’s current research interest is in the application of model predictive control techniques to dynamic decision problems typical in high tempo operations. Dr. Busch is a research advisor to the National Research Council and an Assistant Professor in the Electrical Engineering department of the State University of New York Institute of Technology. A senior member of the IEEE, he is also an associate editor for the *IEEE Transactions on Systems, Man, and Cybernetics Part C*.

**Konstantinos Christidis** holds a Diploma (2007) from the School of Electrical and Computer Engineering of the National Technical University of Athens (Greece). His Diploma Thesis was in the area of Web Services and Mobile Communications. He has also worked as an Administrator in the Computer
Center of the School of Electrical and Computer Engineering. He is currently a research engineer at the Information Management Unit. His current research interests include ontology-based modeling, web services and incorporating semantics to the personal desktop and to collaborative workspaces.

**Ricardo Colomo-Palacios** is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid. His research interests include applied research in Information Systems, Software Project Management, People in Software Projects and Social and Semantic Web. He received his PhD in Computer Science from the Universidad Politécnica of Madrid (2005). He also holds a MBA from the Instituto de Empresa (2002). He has been working as software engineer, project manager and software engineering consultant in several companies including Spanish IT leader INDRA. He is also an Editorial Board Member and Associate Editor for several international journals and conferences and Editor in Chief of International Journal of Human Capital and Information Technology Professionals.

**Eleanor L. Davis** is a doctoral student in the Institute for Computational Engineering and Science at the University of Texas, Austin. She received a BSc with University Honors in Applied Mathematics and Statistics and History from Clarkson University. She was a Goldwater Scholar and an NSF Graduate Research Fellowship Program Honorable Mention. Her research interests include the synchronization of networks and the history of medicine.

**Ingi Runar Edvardsson** is a Professor in management at the Faculty of Business Administration at the University of Akureyri. He received his Ph. D. in Sociology from the University of Lund, Sweden. His research and publication include: knowledge and human resource management, outsourcing, regional universities, and Nordic labour markets. He has presented his research at several international conferences, including Decowe: Development of Competencies in the world of work and education, International Labour process conference, and European Regional Science Association. His articles appeared in Employee Relations, Knowledge Management Research & Practice, International Journal of Technology Marketing, and Scandinavian Journal of Education Research. He also published several book chapters.

**Angel García-Crespo** is the Head of the SofLab Group at the Computer Science Department in the Universidad Carlos III de Madrid and the Head of the Institute for promotion of Innovation Pedro Juan de Lastanosa. He holds a PhD in Industrial Engineering from the Universidad Politécnica de Madrid (Award from the Instituto J.A. Artigas to the best thesis) and received an Executive MBA from the Instituto de Empresa. Professor García-Crespo has led and actively contributed to large European Projects of the FP V and VI, and also in many business cooperations. He is the author of more than a hundred publications in conferences, journals and books, both Spanish and international.

**Juan Miguel Gómez-Berbís** is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid. He holds a PhD in Computer Science from the Digital Enterprise Research Institute (DERI) at the National University of Ireland, Galway and received his MSc in Telecommunications Engineering from the Universidad Politécnica de Madrid (UPM). He was involved in several EU FP V and VI research projects and was a member of the Semantic Web Services Initiative (SWSI). His research interests include semantic web, semantic web services, business process modelling, b2b integration and, recently, bioinformatics.
About the Contributors

Anastasios Gounaris is a lecturer at the Dept. of Informatics of the Aristotle University of Thessaloniki, Greece. Prior to that, he was a visiting lecturer with the University of Cyprus, a research associate with the School of Computer Science of the University of Manchester and he has also collaborated with the Centre of Research and Technology Hellas CERTH. A. Gounaris received his PhD from the University of Manchester (UK) in 2005. He was also awarded an MPhil in Computation in 2002 by UMIST (UK) and a BSc in Electrical and Computer Engineering in 1999 by the Aristotle University of Thessaloniki. His research interests are in the area of Grid and distributed data management, resource scheduling in Grids, autonomic computing, adaptive query processing and semantic technologies. He has served as a program committee member in several international conferences and workshops. He is a member of ACM and IEEE.

Charles Greenidge has served in various capacities during the period 1998-2010 as part-time lecturer/tutor/demonstrator in the department of Computer Science, Mathematics and Physics at the University of the West Indies (UWI). He has also taught computer studies at the Barbados Community College. He holds B.Sc and M.Phil degrees in computer science, and recently earned the Ph.D in 2009 for studies related to the Semantic Web. His developer skill set includes the C, C++, Java and Perl programming languages. His current research interests span topics related to the convergence of Artificial Intelligence, Natural Language Processing, Web databases and the Semantic Web.

Mohammad Islam has a Masters in Computer Science from the University of West Florida, and presently a doctoral student at the University of West Florida.

Enrique Jiménez-Domingo is a Research Assistant and a Ph.D. candidate of the Computer Science Department at Universidad Carlos III de Madrid. He holds a MSc in Computer Science from Universidad Carlos III de Madrid. He has been involved in several research projects as Semantic Web and Artificial Intelligent consultant.

Yannis Manolopoulos received his B.Eng (1981) in Electrical Eng. and his Ph.D. (1986) in Computer Eng., both from the Aristotle Univ. of Thessaloniki. Currently, he is Professor at the Department of Informatics of the latter university. He has been with the Department of Computer Science of the Univ. of Toronto, the Department of Computer Science of the Univ. of Maryland at College Park and the Department of Computer Science of the University of Cyprus. He has published more than 200 papers in refereed scientific journals and conference proceedings, whereas he is co-author of four research monographs. His work has received over 2000 citations from over 450 institutional groups. His research interests include Databases, Data mining, Web and Geographical Information Systems, Bibliometrics/ Webometrics, Performance evaluation of storage subsystems.

Gregoris Mentzas is Professor of Management Information Systems at the School of Electrical and Computer Engineering of the National Technical University of Athens (NTUA) and Director of the Information Management Unit (IMU), a multidisciplinary research unit at the University. His area of expertise is information technology management and his research concerns the integration of knowledge management, semantic web and e-service technologies. He has spoken at conferences and guest seminars
About the Contributors

world wide, and is internationally known for his scholarly work in the area of knowledge management and e-government. Prof. Mentzas holds a Diploma Degree in Engineering (1984) and a Ph.D. in Operations Research and Information Systems (1988), both from NTUA.

John P. Meyer is an Assistant Professor of Management and Business Administration at the Hagan School of Business, Iona College, New Rochelle, New York, USA. He obtained his Ph.D. degree in Management from Boston College and an MBA from Iona College. He teaches courses in Organizational Behavior, Innovation and Change, Human Resource Management, and Organizational Theory and Design. His primary research interests include innovation and knowledge management as well as experiential learning. He has published articles in journals such as Academy of Management Learning and Education and The International Journal of Organizational Analysis and has presented papers at numerous national and international conferences.

Stefania Montani (PhD in Bioengineering and Medical Informatics 2001, University of Pavia) is currently an Assistant Professor in Computer Science at the University of Piemonte Orientale in Alessandria, Italy. Her research interests include Temporal Databases, Case-Based Reasoning, Temporal Reasoning, Decision Support Systems and Dependability Analysis. She is author of more than 100 publications, all in international journals, books, or international refereed conferences. She is member of more than 10 program committees of international conferences in 2009/2010, and belongs to the reviewing boards of 3 international journals. In 2010 she will be the program chair of the International Conference on Case-based Reasoning.

Gudmundur Kristjan Oskarsson is a lecturer at the Faculty of Business Administration at the University of Akureyri. He received his cand. scient. oecon degree in mathematics-economics from Aarhus University, Denmark. His research and publication include: economics, operation research and distance education. He has presented his research at several conferences. His articles appeared in Björn Journal of Social Sciences, and International Journal of Research in Open and Distance Learning. He also published several book chapters.

Payal Pahwa is a Professor and head of CSE/IT department in Bhagwan Parshuram Institute of Technology, Delhi, India. She has a teaching experience of 15 years. Her areas of interest include Database Management Systems and Data Warehousing. She has published work in various national and international journals.
Niki Papailiou graduated from the School of Mechanical Engineering of the National Technical University of Athens (Greece) in 2002. Her Diploma Thesis was on Risk Management in construction project. She then received her Diplom as Wirtschaftsingenieurin (equivalent to Master of Business Administration & Economics) from RWTH Aachen. Her thesis was on Quality Management in multinational corporations, in which she took account of cultural differences and approaches. Her current research interests include knowledge management and business engineering. She is a teaching assistant in the Project Management course.

Hadrian Peter holds the B.Sc and M.Sc in Mathematics from the University of the West Indies (UWI), the MS in Computer Science from the Ohio State University, and the PhD in Computer Science from the UWI. He is currently a Senior Lecturer in Computer Science at the UWI, Barbados. He has over 30 years of teaching experience in several areas of Computer Science / IT, and has also taught at UWI, Jamaica, University of Central Florida, Florida, USA, Cornell College, Mount Vernon, Iowa, USA, and Lander University, Greenwood, South Carolina, USA. His research activities span the areas of Formal Specification and Object-Oriented Design, Neural Networks/Artificial Intelligence (with applications to Medical Diagnosis), Data Warehousing and, more recently, the Semantic Web. He has published widely, has supervised several graduate students, and serves as a member of the editorial board of the International Journal of Data Mining, Modelling and Management (IJDMMM).

Vladimir Platonov is a professor at St. Petersburg State University of Economics and Finance. He also teaches courses at Stockholm School of Economics. He obtained Ph.D. in Innovation Management and master’s degree in Economics and Management of R&D both from St. Petersburg State University. His research interests are innovations, knowledge assets and management accounting. Prof. Platonov worked for KPMG Barents L.L.C., was director for research of the Russian Center for Analysis and Monitoring of Universities’ Innovations, and was partner in smaller consultancy firms. In 2009 Prof. Platonov was invited as visiting researcher to Lappeenranta University of Technology by grant of Academy of Finland.

Uwe V. Riss is a Senior Researcher in the Research Program Collaborative Business at the CEC Karlsruhe, SAP Research, Germany. He obtained his PhD degree in Theoretical Chemistry from the Ruprecht Karl University of Heidelberg and a diploma (master’s degree equivalent) in Mathematics from the Philipps University of Marburg. His research interests include knowledge management, knowledge maturing strategies and models, process-oriented knowledge management, and the philosophical foundations of computer science. He presented his research at several international conferences, including International Conference on Knowledge Management and Knowledge Technologies (I-KNOW), European Conference on Knowledge Management (ECKM), International Conference on Business Process Management (BPM), European Conference on Computing and Philosophy (E-CAP), and Workshop on Business Rules and Process Management at the AAAI Spring Symposium. His articles appeared in Knowledge Management Research & Practice and Computers in Industries.

Alejandro Rodríguez-González is a Research Assistant and Ph.D. candidate of the Computer Science Department in University Carlos III of Madrid. He is working as researcher in Computer Science Department involved in several projects of the Spanish ministry of industry. His main research interests are Semantic Web, Artificial Intelligence and the build of medical diagnosis systems using these
techniques. He has a degree in Computer Science and an M.Sc in Computer Science and technology in the specialty of Artificial Intelligence. He is also studying an M.Sc in Engineering Decision Systems.

Josune Sáenz is PhD in Economics and Business Administration and member of the Finance department of the Faculty of Economics and Business Administration of the University of Deusto (San Sebastián, Spain). She is also head of the Innovation chair sponsored by BBVA at Deusto Business School. She specializes in Management Accounting and Strategic Management Control. Her research focus is currently on Innovation, Intellectual Capital, and Knowledge Management. Her research work has been published in several international journals, such as the Journal of Intellectual Capital, the Journal of Knowledge Management, The Learning Organization, and the International Journal of Learning and Intellectual Capital.

Madjid Tavana is a Professor of Management Information Systems and Decision Sciences and the Lindback Distinguished Chair of Information Systems at La Salle University where he served as Chairman of the Management Department and Director of the Center for Technology and Management. He has been a distinguished research fellow at NASA’s Kennedy Space Center, NASA’s Johnson Space Center, Naval Research Laboratory - Stennis Space Center, and Air Force Research Laboratory. He was awarded the prestigious Space Act Award by NASA in 2005. He holds an MBA, a PMIS, and a PhD in Management Information Systems. Dr. Tavana received his post-doctoral diploma in strategic information systems from the Wharton School of the University of Pennsylvania. He is the Editor-in-Chief for the International Journal of Strategic Decision Sciences, the International Journal of Enterprise Information Systems, and the International Journal of Applied Decision Sciences. He has published in journals such as Decision Sciences, Interfaces, Information Systems, Annals of Operations Research, Information and Management, Journal of the Operational Research Society, Computers and Operations Research, and Advances in Engineering Software, among others.

Paolo Terenziani is Full Professor in the Department of Computer Science of the Università del Piemonte Orientale. His research activity covers different areas of Computer Science: Artificial Intelligence, Databases, and Medical Informatics. In Artificial Intelligence, his activity concerned Knowledge Representation, Temporal Reasoning and Diagnosis. In Databases, he focused on temporal extensions to the “standard” relational models and algebras, and with data semantics. In Medical Informatics, since 1997 he is involved with Azienda Ospedaliera S. Giovanni Battista in Turin in a project for the development of GLARE, a semi-automatic manager of clinical guidelines. Paolo Terenziani published more than 100 papers about these topics in refereed international journals and conference proceedings. As a recognition of his research merits, in 1998 he got the annual “Artificial Intelligence Prize” from the Italian Association for Artificial Intelligence.

Garima Thakur is pursuing her M.Tech in Information Technology from Guru Gobind Singh Indraprastha University, Delhi, India. She has done her B.Tech in Computer Science branch from the same university in the year 2009. She is doing her research work in the field of Data Mining and Knowledge Discovery.
About the Contributors

**Mauro Torchio** received the medicine degree in 1982, majoring in Internal Medicine and Pathology. Attending physician (Internal Medicine) from 1989; head physician from 2008. From 1989 clinical and social care in the management of alcohol-related problems following the Hudolin methodology. Clinical Research activities in hepathology (diagnostic optimization, hepatic blood flow investigation with dynamic tests in different clinical conditions, study of serum monoaminoxidases activity in hepatic fibrosis) and medical informatics (artificial intelligence in Medicine, with realization of prototypical decision support systems and learning tools for medical students). From 1996 research activities mainly in the domain of the computerized clinical diary and the computerized clinical guidelines (diagnostic and therapeutic). More than 130 publications.

**Efthymia Tsamoura** received the Diploma degree in computer science with honors (9.15/10) in 2007. She is currently pursuing the Ph.D. degree in the Computer Science Department, Aristotle University of Thessaloniki (AUTH). During October 2007–June 2008, she was a research assistant in the Multimedia Knowledge Laboratory of the Informatics and Telematics Institute (ITI) of Greece, where she participated in the European project Vidi-Video. Her research interests lie in the field of distributed and adaptive query optimization and grid computing. She was awarded from the State Scholarship Foundation of Greece, for exceptional performance during the academic years 2003-2004, 2004-2005, 2005-2006 and 2006-2007.

**Yawei Wang** is currently an Assistant Professor in the Department of Marketing at Montclair State University, NJ, USA. She holds a PhD in Recreation and Tourism from Clemson University, SC, USA. Her research focuses on travel and tourism, with emphasis on mature tourism and ageing issues. Her teaching interests include introduction to marketing, introduction to leisure and tourism, behavioural concepts in leisure and tourism, and research methods in leisure and tourism. Prior to joining Montclair State University, Wang worked with the Gerontology Research Interdisciplinary Team in the College of Health Education & Human Development at Clemson, SC. William Colucci holds a PhD, Communication, 2003, Rutgers University, New Brunswick. His dissertation examined social network ties as a factor in information system implementation outcomes. His research interests include hybrid distance education learning, socio-technical factors in organizations, social networks, and technology in culture.

**Zhongxian Wang** is a Professor at Montclair State University, NJ, USA. Professor Wang teaches operations analysis, production/operations management, decision support and expert systems, business statistics, operations research and management sciences. He is a member of the Institute for Operations Research and the management Sciences (INFORMS), the Information Resources Management Association (IRMA), the Decision Sciences Institute (DSI) and the Production and Operations Management Society (POMS).

**Tan Yigitcanlar** has a multi-disciplinary background and over two decades of work experience in private consulting, government and academia. Currently holding a senior academic position at the School of Urban Development, Queensland University of Technology, Brisbane, Australia, the main foci of his research are advocating and promoting knowledge-based urban development and sustainable urban, infrastructure and transport development in city-regions. These two broad research areas are clustered around several themes: knowledge economy, knowledge-intensive activities, knowledge city, ubiquitous
city, local governance, civic engagement, sustainable urban and infrastructure development, urban and transportation modelling, accessibility planning, online planning support systems, and understanding urban structures, processes and driving forces in the knowledge era. Dr Yigitcanlar is one of the lead-ing researchers in the field of ‘knowledge-based and sustainable urban development’, and he has been responsible for research, teaching, training and capacity building programmes on urban and regional planning, transport modelling, environmental science, policy analysis and information and communication technologies in respected Turkish, Japanese and Australian universities.

Yanli Zhang is currently an Assistant Professor in the Management and Information Systems Department at Montclair State University, NJ, USA. She graduated with a PhD in Management from Rutgers University, USA in May 2007, concentrating on strategy and international business. Her research interests focus on topics of knowledge, networks and innovation. She has a BA in International Economics from Beijing University, China. Prior to obtaining her PhD, she worked as an Economic Analyst in the Ministry of Foreign Affairs of China, and a Management Consultant in Accenture Beijing.
