About the Contributors

**Jemal Abawajy** is a faculty member at Deakin University and has published more than 100 articles in refereed journals and conferences as well as a number of technical reports. He is on the editorial board of several international journals and edited several international journals and conference proceedings. He has also been a member of the organizing committee for over 60 international conferences and workshops serving in various capacity including best paper award chair, general co-chair, publication chair, vice-chair and program committee. He is actively involved in funded research in building secure, efficient and reliable infrastructures for large-scale distributed systems. Towards this vision, he is working in several areas including: pervasive and networked systems (mobile, wireless network, sensor networks, grid, cluster, and p2p), e-science and e-business technologies and applications, and performance analysis and evaluation.

**Mukaddim Pathan** is a Research Scientist at CSIRO, the national government body of scientific research in Australia. He also holds the position of an adjunct lecturer at the Australian National University. His research interests include data management, resource allocation, load balancing, and coordination policies in wide-area distributed systems such as content delivery networks, cloud computing, and sensor networks. He is the editor of “Content Delivery Networks” book, published by Springer. He has authored and co-authored a number of research papers in internationally recognized journals and conferences. He is involved in the organization of the UPGRADE-CN and IDCS workshops and is a PC member of several international conferences. He has edited a few research issues in reputed international journals and also serves as a reviewer and editorial board member of several renowned journals. He is a member of IEEE, IEEE Computer Society, and ACM.

**Mustafizur Rahman** is a Consultant of Business Analytics and Optimization service line at IBM Australia. He also worked as Endeavour Research Fellow at the Institute of High Performance Computing, Agency for Science Technology and Research (A*STAR), Singapore. He received PhD degree from Department of Computer Science and Software Engineering at the University of Melbourne, Australia. His research interests include workflow scheduling and resource management in Grid/Cloud computing systems as well as fault-tolerance and load balancing in P2P and self-managing systems. He has been actively engaged in the research and development projects of CLOUDS Lab at the University of Melbourne and received 2010 Endeavour Research Fellowship Award from Australian Government. He has authored and co-authored several research papers in internationally recognized journals and conferences. He is a member of IEEE, IEEE Computer Society, and ACM. He has been involved in the organiza-
About the Contributors

Al-Sakib Khan Pathan received Ph.D. degree in Computer Engineering in 2009 from Kyung Hee University (KHU), South Korea. He received B.Sc. degree in Computer Science and Information Technology from Islamic University of Technology (IUT), Bangladesh in 2003. He is currently an Assistant Professor and FYP Coordinator at Computer Science Department in International Islamic University Malaysia (IIUM), Malaysia. Till June 2010, he served as an Assistant Professor at Computer Science and Engineering department in BRAC University, Bangladesh. Prior to holding this position, he worked as a Researcher at Networking Lab, KHU, South Korea till August 2009. His research interest includes wireless sensor networks, network security, and e-services technologies. He has served as a Chair and a PC member in numerous international conferences/workshops. He is currently serving as the Editor-in-Chief of IJIDCS, an Area Editor of IJCNIS, and editor of several other well-known journals and books. He also serves as a referee of a few renowned journals. He is a member of IEEE, IEEE ComSoc Bangladesh Chapter, and several other international organizations.

Mustafa Mat Deris received Ph.D degree in Computer Science in 2002 from University Putra Malaysia. He is currently a Professor in the faculty of Computer Science and Information Technology, Universiti Tun Hussein Onn Malaysia. He has published more than 150 articles in refereed journals and proceedings. He is on the editorial board of several international journals and conferences and also guest editor of International Journal of BioMedical Soft Computing and Human Science for Special Issue on “Soft Computing Methodologies and Its Applications” a reviewer of several international journals such as IEEE Transaction on Parallel and Distributed Computing, Journal of Parallel and Distributed Databases, Journal of Future Generation on Computer Systems, Elsevier, Journal of Cluster Computing, Kluwer, Journal of Computer Mathematics, Taylor & Francis, UK, and IEEE Conference on Cluster and Grid Computing. He has served as a program committee member and co-organizer for numerous international conferences/workshops including Grid and Peer-to-Peer Computing, (GP2P 2005, 2006), Autonomic Distributed Data and Storage Systems Management (ADSM 2005, 2006, 2007), and Grid Pervasive Computing Security, organizer for Rough and Soft Sets Theories and Applications (RSAA 2010), Fukuoka, Japan, and Soft Computing and Data Engineering (SCDE 2010), Jeju, Korea. His research interests include distributed databases, data grid, soft computing, and data mining.

Raja Al-Jaljouli is a Ph.D. student in Science and Technology Faculty at Deakin University and a holder of Masters Degree in Software Engineering, University of New South Wales. She is currently in the stage of submitting Ph.D. thesis. The Masters Degree thesis was on the security of data gathering mobile agents. She has published a number of conference papers, technical reports, and a book chapter. She served as a reviewer of book chapters for publication. Her research interests are in multi-agent systems, security of mobile agents, security protocols, negotiation strategies, utility function in E-commerce application, E-negotiation, and formal verification methods.
About the Contributors

Nancy Alonistioti has a B.Sc. degree and a PhD degree in Informatics and Telecommunications (Dept. of Informatics and Telecommunications, University of Athens). She has working experience as senior researcher and project manager in the Dept. of Informatics and Telecommunications at University of Athens. She has participated in several national and European projects, (CTS, SS#7, ACTS RAINBOW, EURESCOM, MOBIVAS, ANWIRE, E2R, LIAISON, E3, SELFNET, SACRA, CONSERN, UNIVERSELF etc) and has experience as Project and Technical manager of the IST-MOBIVAS, IST-ANWIRE, ICT-SELFNET projects, which had a focus on reconfigurable mobile systems, cognitive mobile networks, and FI. She has served as PMT member and WP Leader of the FP6 IST E2R project. She is co-editor and author in “Software Defined Radio, Architectures, Systems, and Functions,” published by John Wiley in May 2003. She has served as Lecturer in University of Piraeus and she has recently joined the faculty of Dept. Informatics and Telecommunications of Univ. of Athens. She is TPC member in many conferences in the area of mobile communications and mobile applications for systems and networks beyond 3G. She has over 55 publications in the area of mobile communications, reconfigurable, cognitive, and autonomic systems and networks and Future Internet.

Alagan Anpalagan received the B.A.Sc. (H), M.A.Sc. and Ph.D. degrees in Electrical Engineering from the University of Toronto, Canada. He joined the Department of Electrical and Computer Engineering at Ryerson University in 2001 and became Professor in 2010. He served the department as Graduate Program Director (2004-09) and the Interim Electrical Engineering Program Director (2009-10). During his sabbatical (2010-11), he was a Visiting Professor at Asian Institute of Technology and Visiting Researcher at Kyoto University. Dr. Anpalagan’s industrial experience includes working at Bell Mobility on 1xRTT system deployment studies (2001), at Nortel Networks on SECORE R&D projects (1997) and at IBM Canada as IIP Intern (1994). Dr. Anpalagan directs a research group working on radio resource management (RRM) and radio access & networking (RAN) areas within the WINCORE Lab. His current research interests include cognitive radio resource allocation and management, wireless cross layer design and optimization, collaborative communication, green communications technologies, and QoE-aware femtocells.

Afshin Behzadan holds a M.A.Sc degree in Electrical and Computer Engineering from Ryerson University, Canada. He was a member of RRM+RAN research group in WINCORE Lab at Ryerson University. He received his B.Sc. degree in Software Engineering from Yazd University, Iran, in 2005. He also holds a M.Sc. degree in Software Engineering from Amirkabir University of Technology, received with honour in 2008. His research focuses on energy efficient routing and clustering strategies and the related techniques in wireless sensor and ad-hoc networks.

Jorge Bernal Bernabé received the Computer Engineering and the MSc in Computer Science from the University of Murcia. Currently, he is a research staff in the Department of Information and Communications Engineering of the University of Murcia. He has been working in several European projects while pursuing his PhD. His scientific activity is mainly devoted to the security and management of distributed systems.
Jose M. Alcaraz Calero received the Computer Engineering, MSc and PhD degrees with honors at the University of Murcia. He has been working at University of Murcia since 2004 in several European and international projects. Currently he is research staff at Hewlett Packard Laboratories.

Felix J. Garcia Clemente is an Assistant Professor of Computer Networks at the Department of Computer Engineering of the University of Murcia. His research interests include security and management of distributed communication networks. He received an MSc and PhD degrees in Computer Science from the University of Murcia.

Olivier Festor is a research director at INRIA Nancy-Grand Est where he leads the MADYNES research team. He has a PhD degree (1994) and a Habilitation degree (2001) from Henri-Poincare University, Nancy, France. He spent 3 years at the IBM European Networking Center in Heidelberg, Germany and one Q4 year at the EURECOM Institute in Nice, France. His research interests are in the design of algorithms and models for automated security management of large scale networks and services. This includes monitoring, fuzzing, and vulnerability assessment. Application domains are IPv6, Voice over IP services, and dynamic ad-hoc networks.

Wolfgang Fritz received Diploma in Information Technology in 2009 from the department of Electrical Engineering at Technische Universität München. In late 2009, he joined the Leibniz Supercomputing Centre in Garching/Munich as a research assistant at the network planning group. His current research focuses on multi-domain circuit management and monitoring, especially within the European Géant project. Of special interest is not only a network structure of static, dedicated links between all participants, but also the aspect of dealing with transatlantic connections of a more dynamic nature. Both technical and organizational aspects are essential to cover management procedures as well as a holistic monitoring of these circuits, covering the whole life cycle from their ordering to their decommissioning.

Mohd Farhan Md Fudzee is a faculty member at Tun Hussein Onn University of Malaysia (UTHM) and Software & Multimedia Research Centre, UTHM. Currently, he is attached to Deakin University, Australia, as a post graduate student/researcher. He has completed Diploma in Computer Science, Bachelor of Science in IT (honours), and Master of Science in IT. He has completed several research grants, won several medals in research and innovation competitions, and awarded a teaching and learning award. He has published a book in IT, book chapters, several papers in reviewed conferences and journals as well as technical reports and contributed to the academic activities as reviewer. He has also been a member of IEEE, ACM, and NAUI Scuba Diver. His research interest includes multimedia computing (content adaptation, performance modelling, and analysis) and e-learning applications.

Vangelis Gazis holds B.Sc., M.Sc., and Ph.D. degrees from the Dept. of Informatics and Telecommunications at the University of Athens, and an M.B.A. degree from the Athens University of Economics and Business. He is a senior researcher at the Communication Networks Laboratory (CNL) group at the Dept. of Informatics and Telecommunications and has participated in national (OTE-DECT, GRNET, GUNet) and European IST projects (MOBIVAS, ANWIRE, GEANT-2, SELFNET). He specializes in mobile service provision, reconfigurable mobile systems, cross-layer design, adaptable protocol stacks, ontology languages for autonomic systems and self-managing cognitive systems and has over 40 publications in these thematic areas.
About the Contributors

**Wolfgang Hommel** has a PhD in Computer Science from Ludwig Maximilians University, Munich, and heads the network services planning group at the Leibniz Supercomputing Centre (LRZ) in Germany. His current research focuses on IT security and privacy management in large distributed systems, including identity federations and Grids. Emphasis is put on a holistic perspective, i.e., the problems and solutions are analyzed from the design phase through software engineering, deployment in heterogeneous infrastructures, and during the operation and change phases according to IT service management process frameworks, such as ISO/IEC 20000-1. Being both a regional computing centre for higher education institutions with more than 100,000 users and a national supercomputing centre, the LRZ offers a plethora of real world scenarios and large projects to apply and refine the research results in practice. Wolfgang Hommel is also a member of the MNM-Team.

**Yang Hong** received B.S. degree in Electronic Engineering from Shanghai Jiao Tong University, China, M.E. degree in Electrical Engineering from National University of Singapore, Singapore, and Ph.D. degree in Electrical Engineering from University of Ottawa, Canada. His research interests include SIP overload control, Internet congestion control, modeling and performance evaluation of computer networks, and industrial process control.

**Changcheng Huang** received his B.Eng. in 1985, and M.Eng. in 1988, both in Electronic Engineering from Tsinghua University, Beijing, China. He received a Ph.D. degree in Electrical Engineering from Carleton University, Ottawa, Canada in 1997. From 1996 to 1998, he worked for Nortel Networks, Ottawa, Canada where he was a Systems Engineering Specialist. He was a systems Engineer and Network Architect in the Optical Networking Group of Tellabs, Illinois, USA during the period of 1998 to 2000. Since July 2000, he has been with the Department of Systems and Computer Engineering at Carleton University, Ottawa, Canada where he is currently an Associate Professor. Dr. Huang won the Canada Foundation for Innovation (CFI) new opportunity award for building an optical network laboratory in 2001. He was an Associate Editor of IEEE Communications Letters from 2004 to 2006. He is currently a senior member of IEEE.

**King Tin Lam** received his B.Eng. degree in Electrical and Electronic Engineering and M.Sc. degree in Computer Science both from the University of Hong Kong in 2001 and 2006, respectively. He worked in the IT Department of the Hong Kong and Shanghai Banking Corporation for five years between graduations of the two degrees. Mr. Lam is currently a full-time Ph.D. candidate in the Department of Computer Science at the University of Hong Kong. His research interests include distributed Java virtual machines for cluster computing, software transactional memory, and server clustering technologies.

**Asish K Mukhopadhyay** holds a M.Tech (ECE) from Indian Institute of Technology, Kharagpur and PhD(Engg) from Jadavpur University, Kolkata, India. He has long experience in teaching, administration and industry in various academic institutions and industry for more than three decades. His current area of research includes next generation wireless and mobile networks. He has about 50 publications in national/ international journals and conference proceedings. He is a Life Fellow of the Institution of Engineers (I), Sr.Member, IEEE, Sr. Life Member, CSI; Life Member of ISTE, SSI, and IETE.
Manzur Murshed received his BScEng (Hons) degree in Computer Science and Engineering from Bangladesh University of Engineering and Technology (BUET), Dhaka, Bangladesh in 1994, and PhD degree in Computer Science from the Australian National University, Canberra, Australia in 1999. He is currently an Associate Professor and the Head of Gippsland School of Information Technology, the Faculty of Information Technology, Monash University, Australia. He has so far published more than 125 refereed research papers. His ten most-cited publications have more than 1200 citations. He received two Australian Research Council Discovery Project grants in 2006 and 2010. He has been serving as a guest editor of a special issue series of the Journal of Multimedia since 2009. He received 2007 Vice-Chancellor’s Knowledge Transfer commendation award from the University of Melbourne and 2006 Early Career Research Excellence award from the Faculty of IT, Monash University. He was also awarded 1994 BUET Gold Medal.

Mohamed Nassar works currently as an expert research engineer at the INRIA research center Nancy-Grand Est. His research interests are networks and services security. He holds a PhD diploma in Computer Sciences from Nancy-I University. His PhD research focuses on monitoring and intrusion detection in VoIP networks. He holds a research Master degree from the Nancy-I University and an Engineering diploma from the Lebanese University.

Eleni Patouni received the B.Sc. and M.Sc degrees (with honours, ranked 1st in her class) from the Department of Informatics and Telecommunications, NKUA in 2003 and 2005, respectively. In 2010, she received the PhD degree from the same department. Since October 2004, she has been participating in the European IST-FP6 Integrated Projects “E2R,” “E2R II” (End-to-End Reconfigurability phase I and II), IST-FP7 E3 (End-to-End Efficiency), and IST FP7 Self-NET. Currently she is involved in the FP7 EC ICT-2007-216248 Large Scale Integrating Project UniverSelf, as a senior research associate and delegate work package leader for WP4 “Deployment & Impact”. Since 2009, she is also a laboratory assistant and adjunct Lecturer in department of Informatics, TEI Athens. She is currently an adjunct Lecturer in department of Statistics and Insurance Science, University of Piraeus. She has more than 30 publications in the thematic areas of beyond 3G, cognitive networks, and autonomic communication systems; she received the best paper award in the IFIP Autonomic Networking Conference, 2006. She has also contributed in OMA. Her main research interests include mobile network and reconfigurable protocols, component-based models, network-management and decision-making aspects as well as cognitive, and autonomic networking issues.

Ricky K.K. Ma received his B.Eng. degree in Computer Engineering and M.Phil. degree in Computer Science both from the University of Hong Kong in 1997 and 2002 respectively. He worked in Hong Kong Productivity Council for more than six years. Mr. Ma is currently a part-time Ph.D. candidate in the Department of Computer Science at the University of Hong Kong. His research interests include cloud computing and task migration techniques.

Gregorio Martínez Pérez is an Associate Professor in the Department of Information and Communications Engineering of the University of Murcia. His research interests include security and management of distributed communication networks. He received an MSc and PhD in Computer Science from the University of Murcia.
About the Contributors

Juan M. Marín Pérez is a research staff in the Department of Information and Communications Engineering of the University of Murcia. He received Engineering and MSc degrees in Computer Science from the University of Murcia. He has been working in several European projects while doing his PhD. His research interests include security and management of distributed systems.

Jesus D. Jimenez Re is a research staff member in the Department of Information and Communications Engineering of the University of Murcia. He received Engineering and MSc degrees in Computer Science from the University of Murcia. He has been working in several European projects while doing his PhD. His research interests include security and management of distributed systems.

Yacine Rebahi holds a PhD in Mathematics and a Bachelor degree in Computer Science. Currently he works as a Senior Scientist leading the Reliable Networking Infrastructure (RNI) team at the Fraunhofer FOKUS competence center NGNI. Prior to joining FOKUS in 2002, he worked at Ericsson on Voice-over-IP (VoIP). At FOKUS, he has worked on various European and industry projects. His research activities are mostly dedicated to emergency services in next generation networks, security, and Future Internet. Dr. Rebahi’s over 50 publications between journal and conference papers, and chapter books. Dr. Rebahi has been leading several research and industry projects in the following fields of security: Trust in ad-hoc networks, Security and privacy issues in the context of policy making process, DoS attack detection in VoIP networks, spam mitigation in VoIP environments, fraud and service misuse in VoIP networks. In addition Dr. Rebahi is member of the IEEE.

Reinhard Ruppelt received his Diploma in Mathematics in 1979 from the University of Bremen. Since 1981 he worked as a researcher at the Institut für Luft- und Raumfahrt of Technische Universität Berlin before he joined the Hahn-Meitner-Institut Berlin in 1985. From 1987 to 2000 he was with GMD Fokus working on error correction algorithms and network protocol development. Since 2001 he is with Fraunhofer Fokus with primary interests in NGN, IMS, IPv6, and VoIP. His main fields of interests are attack detection in VoIP networks, spam mitigation in VoIP environments, and fraud and service misuse in VoIP networks.

Tishna Sabrina received her BScEng (Hons) degree in Electrical and Electronics Engineering from Bangladesh University of Engineering and Technology, Dhaka, Bangladesh, in 2005. She is currently enrolled as a PhD student at Gippsland School of Information Technology, the Faculty of Information Technology, Monash University, Australia. Her research interests include telecommunications, sensor networks, participatory sensing networks, and security and privacy.

Sajal Saha is an Assistant Professor in the department of Computer Application, Narula Institute of Technology, Kolkata, India since August 2004. He is ME in Information Technology from West Bengal University of Technology (2007), MCA from Sikkim Manipal Institute of Technology, Sikkim (2004) and BSc (Physics) from Calcutta University (2001). Currently he is pursuing PhD from National Institute of Technology, Durgapur, India. He is engaged in research in the area of overlay based heterogeneous networks, and Mobile IP route optimization. He is the recipient of Silver medal for securing 2nd position in ME examination. He has many publications in international/national journals of repute and various conference proceedings. He is a member of IEEE and member of ACM, as well as a Global member of Internet Society (ISOC).
Kouichi Sakurai received the B.S. degree in mathematics from Faculty of Science, Kyushu University and the M.S. degree in applied science from the Faculty of Engineering, Kyushu University in 1986 and 1988, respectively. He was engaged in research and development on cryptography and information security at the Computer and Information Systems Laboratory of Mitsubishi Electric Corporation from 1988 to 1994. He received his Doctorate in Engineering from the Faculty of Engineering, Kyushu University in 1993. From 1994, he worked for the Department of Computer Science of Kyushu University as an Associate Professor, and became a full Professor in 2002. His current research interests are in cryptography and information security. Dr. Sakurai is a member of the Information Processing Society of Japan, the Mathematical Society of Japan, ACM, IEEE, and the International Association for Cryptologic Research.

Antonio F. Gómez Skarmeta received the MS degree in Computer Science from the University of Granada and BS (Hons.) and the PhD degrees in Computer Science from the University of Murcia Spain. He is a Full Professor in the same Department and University. He has worked on different research projects at regional, national and especially at the European level in areas related to advanced services like multicast, multihoming, security, and adaptive multimedia applications in IP and NGN networks.

Cho-Li Wang received his Ph.D. degree in Computer Engineering from University of Southern California in 1995. He is currently an Associate Professor of the Department of Computer Science at the University of Hong Kong. Dr. Wang’s research interests mainly focus on distributed Java virtual machines on clusters, Grid middleware, and software systems for pervasive/mobile computing. Dr. Wang is serving in a number of editorial boards, including IEEE Transaction on Computers (TC), Multiagent and Grid Systems (MAGS), and the International Journal of Pervasive Computing and Communications (JPCC). He is the regional coordinator (Hong Kong) of IEEE Technical Committee on Scalable Computing (TCSC).

Mark Yampolskiy first studied applied mathematics at one of the technical universities in Moscow and later on computer science at the Technical University Munich (TUM). He defended his PhD thesis in the area of computer networks and network management. The focus of his current research is dedicated to quality assurance in multi-domain network connections. Situated at the Leibniz Supercomputing Centre (LRZ), he is working in the Géant research collaboration. Within this collaboration, he is involved in numerous research and service activities tackling network management issues in multi-domain environments. Among other duties, he is in charge for the design and development of the monitoring system for multi-domain backbone connections, Géant E2E Links. Mark Yampolskiy is a member of the Munich Network Management (MNM) team, a team of researchers focusing on various aspects of networking, network management, and collaborative distributed environments.

James Yan is currently an Adjunct Research Professor with the Department of Systems and Computer Engineering, Carleton University, Ottawa, Canada. Dr. Yan received his B.A.Sc., M.A.Sc., and Ph.D. degrees in Electrical Engineering from the University of British Columbia, Vancouver, Canada. From 1976 to 1996 with Bell-Northern Research (BNR) and from 1996 to 2004 with Nortel, he was a telecommunications systems engineering manager responsible for projects in performance analysis of networks and products, advanced technology research and assessment, planning new network services.
and architectures, development of network design methods and tools, and new product definition. From 1988 to 1990, he participated in an exchange program with the Canadian Federal Government, where he was project prime for the planning of the evolution of the nationwide federal government telecommunications network. Dr. Yan is a member of IEEE and Professional Engineers Ontario.

Laiping Zhao received the B.E. degree and M.E. degree in Software Engineering from Dalian University of Technology in 2007 and 2009, respectively. Now he is a Ph.D. candidate in Kyushu University, supported by China Governmental Scholarship. His research interests include cloud computing, fault tolerance computing, and resource scheduling.
