**Ali Acılar** is an Assistant Professor in the Department of Business Administration, Bilecik Şeyh Edebali University, Bilecik, Turkey. He graduated from the Department of Business Administration at Hacettepe University, Ankara, Turkey, received his MS in Operation Research and Statistics from Rensselaer Polytechnic Institute (RPI), Troy, NY, USA and obtained his Ph.D in Business Administration from Dumlupınar University, Kütahya, Turkey in 2007. His research interest includes information technology usage in SMEs, ethical use of information technology, gender issues in computer ethics, e-commerce and e-government.

**Ángel Francisco Agudo-Peregrina** is M.Sc. and Ph.D. Candidate in Telecommunication Engineering at the Universidad Politécnica de Madrid, Master in Domotics and Digital Home by the UPM and Master in Economics and Innovation Management by the UPM, UCM and UAM. Ángel is Assistant Professor at the UPM’s School of Telecommunication Engineering. Ángel focuses his research on customer segmentation and adoption of digital technologies, and on innovation and entrepreneurship.

**Michelle Carter** is a Ph.D. candidate in Management, majoring in Information Systems, at Clemson University, Clemson, South Carolina. She also holds an M.S. in Management Information Systems from Georgia State University, Atlanta, Georgia, U.S.A and a M.Sc. in Computer Science from Anglia Polytechnic University, Cambridge, U.K. Michelle’s research focuses on individuals’ interactions with information technologies and consumer decision making in online environments. She has a particular interest in developing understanding of the interplay between the interactions with information technologies and individuals’ self-concepts. Her work has appeared in *MIS Quarterly Executive, ACM Trans-
actions on Management Information Systems, and in the proceedings of various information systems conferences and workshops.

**Opal Donaldson** is a Lecturer at the University of Technology, Jamaica (UTECH) where she teaches Computer Science and Information Technology courses. She obtained her B.Sc. and Masters from UTECH in Computer Science and Information Technology and Information Systems respectively. She is currently a PhD Candidate in the Information Systems programme at the University of the West Indies where her focus of study is concentrated on Social Networking Services for the mobile space. In 2008 she was a nominee for the prime minister youth award for academic excellence. In 2011 she won the ICT Young Researchers Competition which was sponsored by the IDRC and Mona School of Business. Ms. Donaldson has several international publications in the field of Information System. Her research interest includes: Mobile Computing, Design Science, Information System Usage continuance and Social networking.

**Evan W. Duggan** is the Executive Director of the Mona School of Business and Professor of Management Information Systems (MIS) at the University of the West Indies (UWI). He obtained the Ph.D. and MBA degrees from Georgia State University with concentrations in Decision Sciences and Computer Information Systems and the B.Sc. from the University of the West Indies, Mona. His research interests include the management of information systems (IS), with particular reference to IS quality, and systems delivery methodologies. He has published extensively in IS and allied journal and has also written papers for edited books, and major conference proceedings, and the book *Measuring Information Systems Delivery Quality* with co-editor, Han Reichgelt. Professor Duggan is a Section Editor for the *African Journal of Information Systems*, Associate Editor for *Communications of the Association for Information System*, and he is on the editorial boards of several international journals, scholarly publishing companies and book series. He has taught MIS and Decision Sciences courses in several US institutions and at UWI He was honoured by his inclusion in Marquis Who’s Who in Science and Engineering, 2005-2006.

**Uchenna Cyril Eze** is a Senior Lecturer at Monash University, Malaysia. Previously he was the Chair of Centre for eServices, Entrepreneurship, and Marketing (CeSEM) at Multimedia University. He holds a PhD from Nanyang Technological University (NTU), Singapore. He is involved in several research collaborations with partners in various countries, and has published numerous peer-reviewed papers in international journals such as Australasian Journal of Information Systems, International Journal of E-business Research, Journal of Global Information Technology Management, Journal of Knowledge Management Practice, Asia Pacific Journal of Marketing and Logistics, and Library Review. His research interests include knowledge management, e-business, supply chain management, SMEs, responsible consumption, and sustainable initiatives.

**Lauri Frank** is a University Researcher of Electronic Commerce and Business with the Department of Computer Science and Information Systems at the University of Jyväskylä. He also holds an adjunct professorship at the School of Business at the Lappeenranta University of Technology in the field of technology research. His research interests include the diffusion, adoption and business models of information and communications (ICT) innovations in the information society. Previously he has worked
in research and teaching positions at the Lappeenranta University of Technology and the University of Joensu, and at TeliaSonera Ltd.

**Torsten J. Gerpott**, a DBA from Helmut-Schmidt-University Hamburg, is a full Professor in the Mercator School of Management at the University of Duisburg-Essen (Germany). His research interests include marketing strategies of telecommunications operators for new services and regulatory economics in network-based industries. Dr. Gerpott has 25 years of top management consulting expertise. He has published more than 350 scientific articles in refereed journals such as *Telecommunications Policy, Information Economics and Policy, Journal of Management Studies* and *International Journal of Mobile Communications*. He currently serves as a consultant to both private firms and public institutions in the German and Swiss telecommunications and IT-sectors.

**Varun Grover** is the William S. Lee (Duke Energy) Distinguished Professor of Information Systems at Clemson University. He has published extensively in the information systems field, with over 200 publications in major refereed journals. A recent article ranked him as third among the top 200 most influential IS researchers based on the citation impact of his work. He is Senior Editor (Emeritus) for *MIS Quarterly, the Journal of the AIS and Database*, and is a Fellow of the Association for Information Systems (AIS).

**Johanna Gummerus**, Ph.D., is a Assistant Professor at Hanken School of Economics in Helsinki, Finland. Her research interests include service innovation, social media and consumer empowerment, value creation, and customer service experiences. Her research has been published previously in *Journal of Marketing Management, Journal of Services Marketing*, and *Journal of Retailing and Consumer Services*. She has forthcoming articles in *Management Research Review, Journal of Brand Management*, and *Marketing Theory*.

**Ángel Hernández-García** is M.Sc. and Ph.D. in Telecommunication Engineering by the Universidad Politécnica de Madrid. Ángel is Assistant Professor at the UPM’s School of Telecommunication Engineering and Master SAP in Integrated Information Systems. Currently, Ángel focuses his research on technology acceptance and refusal behaviors, mobile web technologies and indicators of performance in learning and e-learning. Ángel has published research papers in international journals and conference proceedings and is reviewer for leading journals.

**Hartmut Hoehle** is a Lecturer at the School of Accounting and Business Information Systems at the Australian National University. Dr. Hoehle completed a PhD at Victoria University of Wellington, New Zealand. Prior to his academic career he worked for Deutsche Bank AG, Frankfurt in the corporate and investment banking division. Over the past few years, he has been involved within multiple research projects and has published in leading IS conferences and journals.

**Sid Huff** is Professor of Information Systems at Victoria University of Wellington, New Zealand. His teaching and research address IS strategy, IT governance and IS management. His work has appeared in numerous academic and practitioner journals, including *MIS Quarterly, Information Systems Research, Journal of MIS, Journal of Strategic Information Systems*, and *Communications of the ACM*. His most recent book is *Managing IT Professionals in the Internet Age*, co-authored with Dr. Pak Yoong. He currently serves as Senior Editor for *Information Systems Management Journal* and for *Journal of*...
Information Technology, and as Associate Editor for MIS Quarterly. He has also written over 60 teaching cases for educational use. He received his Ph.D. in Information Systems from the M.I.T. Sloan School of Management.

Santiago Iglesias-Pradas is M.Sc. and Ph.D. in Telecommunication Engineering and MBA by the Universidad Politécnica de Madrid (UPM). He is Associate Professor in Economics and Information Systems at the Business Administration Department of the UPM. Santiago is member of the “Innovation, Industrial Property and Technology Policy” research group at the UPM. He is author of several papers and articles about interactions between Information Technologies and Organizations in international journals and conferences.

Sudarsan Jayasingh is a Lecturer at the School of Business and Design, Swinburne University of Technology, Malaysia. He is a Ph.D. candidate with the faculty of Business and Law, Multimedia University, Malaysia. His research interests include mobile commerce, electronic word of mouth, and permission-based marketing. His work has been published in several referred journals and conference proceedings.

Wesley J. Johnston (Ph.D. University of Pittsburgh) is the Director of the Center for Business and Industrial Marketing and a Research Partner in the Center for Process Innovation in the Robinson College of Business at Georgia State University. He is also the CBIM RoundTable Professor of Marketing and teaches courses in business-to-business marketing and sales. Professor Johnston’s research interests include business-to-business marketing, organizational buying behavior, customer relationship management and sales force automation. Professor Johnston was a summer fellow at the Center for Creative Leadership and a Presidential Fellow at the American Graduate School for International Management. He is a member of the American Marketing Association, where he was the president of the Relationship Marketing special interest group for a number of years. He is an Advisory Board Member for the National Research University in Moscow and a Professor in the Oulu Business School in Finland.

Hanna Kiehelä has a M.Sc. (Econ.) in marketing from Hanken School of Economics, Helsinki, Finland. She is a Doctoral student at the Department of Marketing at Hanken and associated with the Centre for Relationship Marketing and Service Management (CERS). In her research, she focuses on colours and their effect on value-in-use experiences. Currently she is located in Zürich, Switzerland, and has a status of a visiting Doctoral student at University of St. Gallen, Switzerland.

Hanna Komulainen is a Postdoctoral Researcher (Finnish Academy of Science) at the University of Oulu, Finland, where she also received her Ph.D. in 2010. Her thesis deals with customer perceived value within emerging technology-intensive business services. Her main research interests include business-to-business relationships, service marketing and value creation. Currently she is working on a research project focusing on value co-creation and related business models in service contexts, especially in developing new mobile services. She has published e.g. in the International Journal of Service Industry Management, International Journal of Entrepreneurship and Innovation Management and International Journal of Internet Marketing and Advertising.
Veronica Liljander is Professor of Marketing at Hanken School of Economics, Helsinki, Finland, and the director of the Finnish National Programme of Business Studies. She has been head of department for eight year and first vice rector for three years. Her current research interests include service marketing, consumer experience, and brand experience. She has published in, for example, Journal of Service Marketing, Journal of Service Industry Management, Journal of Retailing and Consumer Services, Psychology & Marketing, Journal of Business and Industrial Marketing, Journal of Marketing Management, and International Journal of E-business Research. She has forthcoming articles in Management Research Review and Journal of Brand Management. She is on the Editorial review board of several international journals, for example, Journal of Service Research and European Journal of Marketing. She is on the Academic Panel of the Google Online Marketing Challenge Competition.

Moutusy Maity is an Assistant Professor of Marketing at the Indian Institute of Management Lucknow, India. She holds a Ph.D. in Business Administration from the University of Georgia, Athens, GA, USA. Her research interests include consumer decision-making across various channels such as e-commerce, m-commerce and traditional retail. Her work has been published or is forthcoming in international journals such as Journal of Marketing Channels, International Journal of Mobile Marketing, and Journal of Direct, Data and Digital Marketing Practice.

Markus Makkonen is a Researcher at the Department of Computer Science and Information Systems at the University of Jyväskylä. He received his M.Sc. (Information Systems) from the University of Jyväskylä in 2006 and is currently writing his doctoral dissertation on the business models of digital music stores and services. His main research interests include electronic commerce, business models and consumer behavior, especially in the context of digital music and other digital contents.

En Mao is Associate Professor of information systems and Agnes Candies Endowed Professor at Nicholls State University. She joined Nicholls State University’s College of Business Administration in 2006. She earned her Ph.D. from the University of Memphis. Her current research interests include information technology diffusion and acceptance, end-user behavior, knowledge management, global IT, IT in China, and cross-cultural issues. She has published in the Information and Management, Database, Journal of Global Information Technology Management, Communications of the AIS, International Journal of Knowledge Management, Journal of Consumer Psychology, and Psychology and Marketing. Her research has also appeared as book chapters in Knowledge Mapping and Management and Global Information Technology Management. Currently, she is serving as an associate editor on the editorial board of the Journal of Information Privacy and Security. She is also a member of the Editorial Review Board of the Journal of Global Information Technology Management.

Dr. Vanessa Ratten (PhD) is a Senior Lecturer in Strategic Management and Entrepreneurship at Deakin University, Australia. Her research interests include technological innovation (including m-commerce, social cognitive theory and strategic alliances) and entrepreneurship (including sport entrepreneurship, international entrepreneurship and social entrepreneurship). She has published in numerous journals including the Asia Pacific Journal of Marketing and Logistics, International Journal of Entrepreneurship and Small Business, Journal of High Technology Management, European Journal of Innovation Management, Journal of Management & Organisation, International Journal of Educational Manage-
About the Contributors

Thomas Olsson works as a Researcher and Teaching Fellow in the Unit of Human-Centered Technology at Tampere University of Technology. He is currently finalizing his doctoral thesis on user experience of mobile augmented reality services. His research interests include user experience and user acceptance of novel technologies and interaction paradigms, especially related to ubiquitous systems, augmented reality, ambient intelligence, and social media. He has published almost 30 scientific papers in refereed journals and conference proceedings.

Minna Pihlström is a Senior Researcher at the Centre for Relationship Marketing and Service Management (CERS) at Hanken School of Economics in Helsinki, Finland, where she received her PhD in 2008. She also acts as a senior consultant at Segmento Oy. Her primary research interests include strategic customer segmentation, mobile and e-commerce, customer perceived value, customer equity and loyalty. Her research has appeared in Journal of Service Research, Psychology & Marketing, Qualitative Market Research, Journal of Retailing and Consumer Services, the Journal of Services Marketing, Managing Service Quality, and the Journal of Information Technology, Theory and Applications.

Yew Siang Poong’s research interests include information technology acceptance, technology for sustainable development in developing countries, and application of mobile technology for learning, education, and health promotion. He holds a Masters degree from Multimedia University Malaysia in e-commerce acceptance, and a degree in Information Systems Engineering. He has published papers in journals and conferences. He has six years of teaching and research experience in computer science and IT management domains in Multimedia University and Taylor’s University. He is currently pursuing his Doctoral degree in Tokyo Institute of Technology, focusing on technology implementation to promote world heritage site preservation. He actively involved in joint researches with partners from Malaysia, Japan, Lao P.D.R. and Mongolia.

Annu Ristola, D.Sc. (Economics and Business Administration) and Postdoctorial Researcher at the University of Oulu, Finland, where she also received her Ph.D in 2010. Her thesis deals with consumers’ acceptance of technology in novel mobile services. Her research interests include the different perspectives of consumer behavior, electronic markets, mobile business, and methodological issues in marketing research, especially structural equation modeling and postmodernism. She is also active in developing business education and researcher training. She has published e.g. in the Journal of Euromarketing and Behaviour & Information Technology. Currently, she is working as a Coordinator in University of Oulu Graduate School.

Markus Salo is a University Teacher of Electronic Commerce and Business employed by the Department of Computer Science and Information Systems at the University of Jyväskylä. He received his M.Sc. (Econ.) from the University of Jyväskylä in 2009. He is currently working on his doctoral dissertation on user adoption and consumer value aspects of mobile interaction with the real world. His other
About the Contributors

research interests include online auctions, trust and reputation in electronic commerce, and innovation ecosystems. His teaching tasks consist of lecturing and supervising theses.

**Ozlem Hesapci Sanaktekin, Ph.D** is an Assistant Professor of Marketing at the Department of Management of Bogazici University. She has degrees in management and psychology. She teaches research methods and marketing courses at undergraduate and graduate levels. She studies consumer behavior, particularly the processes underlying consumers’ cognitive and attitudinal responses. Much of her recent research focuses on emotions and personality.

**Eusebio Scornavacca** is Senior Lecturer in Information Systems in the School of Information Management at Victoria University of Wellington, New Zealand. His research interests include mobile business, electronic business, electronic surveys, and IS teaching methods. During the past 15 years he has conducted qualitative and quantitative research in a wide range of industries, including research sponsored by the private sector. Dr Scornavacca’s research has appeared in journals such as Journal of Information Technology, Communications of the ACM, Communications of the AIS and Journal of Computer Information Systems. He is currently chair of the standing committee of the International Conference on Mobile Business.

**Masood H Siddiqui** is a Ph.D. in Operations Research and was also a CSIR-UGC Fellow Scholar. His overall experience spans over sixteen years. He also has an administrative experience of three years as Statistical-Officer. His research areas are Structural Equation Modelling, Optimization Models and Soft Operations Research. He has sixteen publications in various refereed international and national journals like Journal of Targeting, Measurement and Analysis of Marketing; Vikalpa; International Journal of E-Business Research; AIMS International Journal of Management; International Journal of Business Science and Applied Management; ASCI Journal of Management; AIMA Journal of Management & Research etc.

**Irem Somer**, is a Graduate Student at Media and Communication System Department of Istanbul Bilgi University. She received a joint B.A. degree in Global and International Affairs and Sociology from the Bogazici University and State University of New York at Binghamton in 2010. Her areas of interest are medium studies and mass communication.

**Adam Sutherland** is Procurement Analyst in the Ministry of Economic Development (MED) of New Zealand. Before taking this role at MED he was the Procurement Specialist for Westpac New Zealand Bank. Mr. Sutherland has a BCA (Hons) from Victoria University of Wellington.

**Jason Thatcher** is an Associate Professor in the College of Business and Behavioral Sciences at Clemson University. He received his Ph.D. in Management Information Systems from the College of Business at Florida State University. His work has appeared in *MIS Quarterly, Journal of Management Information Systems, Journal of Applied Psychology* and *Organizational Behavior and Human Decision Processes*. In his free time, Dr. Thatcher enjoys the smell of football in the fall, watching the Tigers
crash into Death Valley, and waiting for the sea turtles to come to shore on the beaches of Edisto Island, South Carolina.

**Shalini Nath Tripathi** is a Ph.D. in Marketing and Advertising. Her overall experience spans over fifteen years. Her teaching and research interest includes Strategic Marketing and Services Marketing. She also has to her credit six years of corporate experience as a Customer Relations Manager with Modi Korea Telecommunications Ltd. She has eighteen publications in various refereed international and national journals like Journal of Targeting, Measurement and Analysis of Marketing; Vikalpa; International Journal of E-Business Research; AIMS International Journal of Management; International Journal of Business Science and Applied Management; ASCI Journal of Management; Paradigm etc.

**Pauliina Ulkuniemi** is a Professor of Marketing at the University of Oulu, Finland, where she also received her Ph.D. in 2003. Her publications and research interests lie in the various aspects of value creation in business relationships in different industry contexts, especially in software business and in business services. Currently she is the Head of Department of Marketing at Oulu Business School, University of Oulu. She is leading a research project focusing on digital marketing in industrial firms. She has published e.g. in the International Journal of Service Industry Management, Industrial Marketing Management and Journal of Business & Industrial Marketing.

**Kaan Varnali**, Ph.D. is an Assistant Professor of Marketing at Faculty of Communication, Istanbul Bilgi University, Turkey, where he teaches courses on various topics related with marketing through new media and consumer behavior. His prior research has appeared in various highly regarded scholarly outlets as journal articles, case studies, and book chapters. He also authored a book entitled “Mobile Marketing: Fundamentals & Strategy” published by McGraw-Hill, New York. His current research interests include human behavior in digital contexts, implications of social media on the universe of marketing, and mobile marketing strategies.

**Jing Zhang** is Assistant Professor of Marketing in the Department of Marketing and Decision Sciences in the College of Business at San Jose State University. She received her Ph.D. from the University of Illinois at Urbana-Champaign. Her current research interests include consumer behavior, marketing communications, high-tech media, and international advertising and marketing. She has published in several academic journals, including the Journal of Consumer Psychology, Journal of Advertising, Psychology & Marketing, and Journal of International Consumer Marketing. Her work has also appeared as a book chapter in Encyclopedia of Applied Psychology. She is current a member of the Editorial Board of Journal of International and Intercultural Communication.
