About the Contributors

**Patrick Hung** is an Associate Professor at Faculty of Business and Information Technology in University of Ontario Institute of Technology (UOIT) and an Adjunct Faculty Member at Department of Electrical and Computer Engineering in University of Waterloo, Canada. He is a founding member of the IEEE International Conference of Web Services (ICWS) and IEEE International Conference on Services Computing (SCC). He is an associate editor of the IEEE Transactions on Services Computing (TSC), International Journal of Web Services Research (JWSR), International journal of Business Process and Integration Management (IJBPIM), and the *International Journal on Systems and Service-Oriented Engineering* (IJSSOE).

***

**Mehmet S. Aktas** received his Ph.D. degree in Computer Science from Indiana University in 2007. During his graduate studies, he worked as a researcher in Community Grids Laboratory of Indiana University in various research projects for six years. During this time period, Aktas has worked for a number of prestigious research institutions ranging from NASA Jet Propulsion Laboratory to Los Alamos National Laboratory. Before joining the Indiana University, Aktas attended Syracuse University, where he received his M.S. degree in Computer Science and taught undergraduate-level computer science courses. He is currently working as a project manager in the Information Technologies Institute of Tubitak - Marmara Research Center. He is also part-time faculty member in the Computer Engineering Departments of Marmara University and Istanbul Technical University, where he teaches graduate-level computer science courses. His research interests span into systems, data and Web science.

**Eduardo Adilio Pelinson Alchieri** received a Master degree on Electrical Engineering from the Federal University of Santa Catarina (UFSC), Brazil, in 2007, with Prof. Joni da Silva Fraga as the advisor. He is presently working toward his Doctorate degree at UFSC. Alchieri’s research interests span all areas of distributed computing, including both theory and practice. However, his current interests are reliable and secure algorithms to dynamic distributed computing systems.

**Matias Alvarado** is a research scientist at the Computing Department of Centre of Research and Advanced Studies, CINVESTAV of México. He obtained a PhD in Computer Science with major in Artificial Intelligence at Technical University of Catalonia, and is graduated in Mathematics from the National Autonomous University of Mexico (UNAM). His research interests include the formal modeling beside the computational simulation of supply chains, decision making, transactions’ concurrency con-
Sundar Balasubramaniam is an Associate Professor of Computer Science at BITS, Pilani. His current research interests include Service Oriented Architectures, Formal Methods and Real Time Systems. His past research and development experience includes design and development of Compilers, research and development on File System Synchronization, Mining and analysis of User Behavior on the web, research on Information Retrieval techniques for web portals, as well as research, design, and development of software for Automatic Management / Provisioning of large scale IT infrastructure.

Jamal Bentahar is an assistant professor of computer science and software engineering at the Concordia Institute for Information Systems Engineering at Concordia University, Montreal. His research interests include multi-agent systems, Web services, argumentation theory, logic and formal methods, and grid computing. He received his Ph.D. in computer science and software engineering from Laval University, Canada. He is a member of the IEEE, ACM and Professional Engineering Ontario.

Albert Benveniste was born in 1949. He graduated in 1971 from Ecole des Mines de Paris. He performed his These d’Etat in Mathematics, probability theory, in 1975, under the supervision of Paul-André Meyer. From 1976 to 1979 he was associate professor in mathematics at Université de Rennes I. From 1979 to now he has been Directeur de Recherche at INRIA. His previous working areas include: system identification and change detection in signal processing and control (until 1995), vibration mechanics, reactive, real-time, and embedded systems design in computer science, and network and service management in telecommunications with emphasis on distributed systems. His current interests also include: component and contract based design of embedded systems, real-time architectures, Quality of Service management of Web services, and distributed active XML documents. In 1980 Albert Benveniste was co-winner of the IEEE Trans. on Automatic Control Best Transaction Paper Award for his paper on blind deconvolution in data communications. In 1990 he received the CNRS silver medal and in 1991 he has been elected IEEE fellow.

Alysson Neves Bessani is a Visiting Assistant Professor of the Department of Informatics of the University of Lisboa Faculty of Sciences, Portugal, and a member of LASIGE research unit and the Navigators research team. He received his B.S. degree in Computer Science from Maringá State University, Brazil in 2001, the MSE in Electrical Engineering from Santa Catarina Federal University (UFSC), Brazil in 2002 and the PhD in Electrical Engineering from the same university in 2006. His main interests are distributed algorithms, Byzantine fault tolerance, coordination, middleware and systems architecture.
About the Contributors

Maricela Bravo is a posdoctoral research fellow at the Computing Department of CINVESTAV-IPN, México D.F. In 2006 she obtained a PhD in Computing Science, specialized in Distributed Systems, at the National Centre of Research and Technological Development (CENIDET), Mexico. In 2003 she obtained a MSc in Computer Science at CENIDET. In 1996 she obtained a BSc in Information Systems at Zacatepec Institute of Technology, Mexico. Her research interests include Web service architecture design, development and integration. Web service specialized tasks, such as classification, composition, substitution and QoS optimization. Ontology design and integration for electronic commerce applications that use Ontologies for interoperability issues. She was a full-time professor of the Informatics Engineering program at Morelos State Polytechnic University, México (from 2007 to 2008). A part-time professor of the Computer Science program at Pablo Guardado Chávez University, Chiapas, México (from 2005 to 2008). A part-time professor of the Computer Engineering program at UniSol University, Morelos, México (from 2006 to 2007). A part-time professor of the Telecommunications and Computer Science Engineering program at Baja California Institute of Technology, Baja California, México (from 1998 to 2000). She has published over 15 scientific papers in journals and proceedings of international conferences.

Schahram Dustdar is Full Professor of Computer Science with a focus on Internet Technologies heading the Distributed Systems Group, Institute of Information Systems, Vienna University of Technology (TU Wien). He is also Honorary Professor of Information Systems at the Department of Computing Science at the University of Groningen (RuG), The Netherlands. He is Chair of the IFIP Working Group 6.4 on Internet Applications Engineering and a founding member of the Scientific Academy of Service Technology. More information can be found at http://www.infosys.tuwien.ac.at/Staff/sd.

Walid Fdhila is a Ph.D. student at Nancy University, France. He is a member of the ECOO team of the LORIA-INRIA research laboratory and teaching assistant at National Polytechnic Institute of Lorraine. His research interests are in the area of Decentralized Workflows, Service Oriented Computing and Business Process Management.

Geoffrey C. Fox received a Ph.D. in Theoretical Physics from Cambridge University and is now professor of Computer Science, Informatics, and Physics at Indiana University. He is director of the Community Grids Laboratory of the Pervasive Technology Laboratories at Indiana University. He previously held positions at Caltech, Syracuse University and Florida State University. He has published over 550 papers in physics and computer science and been a major author on four books. Fox has worked in a variety of applied computer science fields with his work on computational physics evolving into contributions to parallel computing and now to Grid systems. He has worked on the computing issues in several application areas – currently focusing on Earthquake Science.

Joni da Silva Fraga is a Professor in the Department of Automation and Systems at Federal University of Santa Catarina, in Brazil. His research interests include distributed computing systems, algorithms, security and fault tolerance in distributed systems. He served as reviewer and as member of the PC in the main dependability related international conferences and as program chair. He is a member of the IEEE and the Brazilian Computer Society.
Claude Godart (Ph.D.) is full time Professor at Nancy University, France and scientific director of the INRIA ECOO project. His centre of interest concentrates on the consistency maintenance of the data mediating the cooperation between several partners. This encompasses advanced transaction models, user centric workflow and Web services composition models. He has been implicated in several transfer projects with industries (France, Europe, and Japan) for a wide range of applications including e-commerce, software processes and e-learning.

Osama Al-Haj Hassan received the BS degree in Computer Science from Princess Sumayya University for Technology (PSUT) and the MS degree in Computer Science from New York Institute of Technology (NYIT). Currently a PhD student in the Computer Science department at the University of Georgia (UGA). His research interests are in distributed systems, Web 2.0, caching and replication techniques, Peer-to-Peer networks and event based systems.

Claude Jard graduated as an engineer in telecommunications in 1981. He obtained his Ph.D. in Computer Science from the University of Rennes in 1984. He was the head of the protocol validation group at the French National Research Centre in Telecommunications (CNET) from 1981 to 1986. He has been a Research supervisor, and then a Research director at the French National Centre for Scientific Research (CNRS) since 1987. Currently, he is a professor in Computer Science at the Ecole Normale Supérieure de Cachan. He is the Director of the research of the Brittany branch of this school. Prof. Jard’s research works relate to the formal analysis of asynchronous parallel systems. His current interests are the non-functional aspects like time and QoS in large scale systems. He is the author or co-author of more than 140 publications, carried out primarily within three research communities: theoretical computer science, protocol engineering, and distributed systems.

Harshavardhan Jegadeesan works in the Research & Breakthrough Innovation group of SAP Labs, India. His areas of interest include enterprise service-oriented architectures, enterprise systems and business process platforms.

Zhi Jin received the MS degree in computer science and the PhD degree from the Changsha Institute of Technology, China, in 1987 and 1992, respectively. She is now a professor of computer science in the Key Laboratory of High Confidence Software Technologies of the Ministry of Education, Peking University. Her current research is on service-oriented computing, software requirements engineering and knowledge engineering. She is the co-author of a book published by Kluwer Academic Publishers and has published more than 90 referred papers in the area of requirements engineering and knowledge-based software engineering. She is a senior member of the IEEE.

Babak Khosravifar is a Ph.D. candidate in the Department of Electrical and Computer Engineering, Concordia University in Montreal, Canada. He is a research assistant in Multi-Agent and Web Services Laboratory at Concordia University under the direction of Dr. Jamal Bentahar. His research interests include multi-agent systems, trust frameworks, reputation mechanism, Web services, and game theory. He received his master of Computer Engineering from Eastern Mediterranean University, Cyprus.
Freddy Lecue is a researcher in the Centre for Service Research at the University of Manchester. He is working on European Union projects SOA4ALL, COMMIUS and SUDDEN funded by the European Commission 7th Framework Programme. He holds a PhD in Computer Science (Ecole des Mines de Saint-Etienne, France) awarded by the French Association in Artificial Intelligence, a MSc in Computer Science Web Intelligence (Ecole des Mines de Saint Etienne, France) and a BSc in Computer Science (University Jean Monnet of Saint-Etienne, France). Prior to joining the University of Manchester, he was a Research engineer in France Telecom R&D, Rennes, France, from 2005 to 2008. During his research position in France Telecom R&D, Dr Freddy Lecue worked not only on internal projects funded by France Telecom R&D, but also on projects associated with the Network of Excellence KNOWLEDGE WEB and the European Union project SPICE funded by the European Commission 6th Framework Programme.

Philipp Leitner has a BSc and MSc in business informatics from Vienna University of Technology. He is currently a PhD candidate and university assistant at the Distributed Systems Group at the same university. Philipp’s research is focused on middleware for distributed systems, especially for SOAP-based and RESTful Web services. More information can be found at http://www.infosys.tuwien.ac.at/Staff/leitner.

Lin Liu is an Associate Professor at the School of Software, Tsinghua University. Her research interests are in the areas of software requirements engineering, information systems and knowledge engineering. Her past and current researches are centered on agent-oriented requirements engineering methodologies. Dr. Liu has published 20 papers including journal papers with Information Systems Journal and Requirements Engineering Journal, and conference papers in the Proceedings of RE, CAiSE, ER, etc. She has also participated more than 10 research projects, and is currently leading investigation of two research projects in the area of requirements engineering.

Michael R. Lyu received the B.S. degree in electrical engineering from National Taiwan University, Taipei, Taiwan, R.O.C., in 1981; the M.S. degree in computer engineering from University of California, Santa Barbara, in 1985; and the Ph.D. degree in computer science from the University of California, Los Angeles, in 1988. He is currently a Professor in the Department of Computer Science and Engineering, Chinese University of Hong Kong, Hong Kong, China. He is also Director of the Video over Internet and Wireless (VIEW) Technologies Laboratory. He was with the Jet Propulsion Laboratory as a Technical Staff Member from 1988 to 1990. From 1990 to 1992, he was with the Department of Electrical and Computer Engineering, University of Iowa, Iowa City, as an Assistant Professor. From 1992 to 1995, he was a Member of Technical Staff in the applied research area of Bell Communications Research (Bellcore), Morristown, NJ. From 1995 to 1997, he was a Research Member of Technical Staff at Bell Laboratories, Murray Hill, NJ. His research interests include software reliability engineering, distributed systems, fault-tolerant computing, mobile networks, Web technologies, multimedia information processing, and E-commerce systems. He has published over 270 refereed journal and conference papers in these areas. He has participated in more than 30 industrial projects and helped to develop many commercial systems and software tools. He was the editor of two book volumes: Software Fault Tolerance (New York: Wiley, 1995) and The Handbook of Software Reliability Engineering (New York: IEEE and New McGraw-Hill, 1996). Dr. Lyu received Best Paper Awards at ISSRE’98 and ISSRE’2003. Dr. Lyu initiated the First International Symposium on Software Reliability Engineering (ISSRE) in 1990.
About the Contributors

the Program Chair for ISSRE’96 and General Chair for ISSRE’2001. He was also PRDC’99 Program Co-Chair, WWW10 Program Co-Chair, SRDS’2005 Program Co-Chair, PRDC’2005 General Co-Chair, and ICEBE’2007 Program Co-Chair, and served in program committees for many other conferences including HASE, ICECCS, ISIT, FTCS, DSN, ICDSN, EUROMICRO, APSEC, PRDC, PSAM, ICCCN, ISESE, and WI. He has been frequently invited as a keynote or tutorial speaker to conferences and workshops in the U.S., Europe, and Asia. He has been on the Editorial Board of the IEEE TRANSACTIONS ON KNOWLEDGE AND DATA ENGINEERING, the IEEE TRANSACTIONS ON RELIABILITY, the Journal of Information Science and Engineering, and Software Testing, Verification & Reliability Journal. Dr. Lyu is an IEEE Fellow and AAAS Fellow for his contributions to software reliability engineering and software fault tolerance. He was also named Croucher Senior Research Fellow in 2008.

Nikolay Mehandjiev is Senior Lecturer with the Centre for Service Research at the University of Manchester. He received his Ph.D. in 1997 from the University of Hull, where he also held academic position. He has held visiting positions with BT Research Labs, the University of New South Wales, Atos Origin, SAP Research and the University of Sussex. He researches the design of flexible service systems, using software agents and collaborative service composition models. He has co-authored two books and has guest-edited three special issues of international journals, including the Communications of ACM.

Anton Michlmayr received the MSc degree in computer science from Vienna University of Technology. He is currently a PhD candidate and university assistant in the Distributed Systems Group at Vienna University of Technology. His research interests include software architectures and middleware for distributed systems with an emphasis on service-oriented architectures and distributed event-based systems. More information can be found at http://www.infosys.tuwien.ac.at/Staff/michlmayr.

John A. Miller is a Professor of Computer Science at the University of Georgia and has also been the Graduate Coordinator for the department for 9 years. His research interests include database systems, simulation, Web services and bioinformatics. Dr. Miller received a B.S. in Applied Mathematics from Northwestern University in 1980 and an M.S. and Ph.D. in Information and Computer Science from the Georgia Institute of Technology in 1982 and 1986, respectively. During his undergraduate education, he worked as a programmer at the Princeton Plasma Physics Laboratory. Dr. Miller is the author of over 140 publications covering all areas of his research interests. He is an Associate Editor for the ACM Transactions on Modeling and Computer Simulation, IEEE Transactions on Systems, Man and Cybernetics and SIMULATION: Transactions of the Society for Modeling and Simulation International as well as an Editorial Board Member for the Journal of Simulation and International Journal of Simulation and Process Modeling.

Ahmad Moazin is a research assistant in Multi-Agent and Web Services Laboratory at Concordia University under the direction of Dr. Jamal Bentahar. His research interests include multi-agent systems, trust and reputation, Web services, and argumentation theory. He received his master of Information Systems Security from Concordia University.
Dunlu Peng is an associate professor of University of Shanghai for Science and Technology, Shanghai, China. He received his Ph.D degree from Fudan University, Shanghai, China in June 2006. His research interests include Web Applications and Service-Oriented Computing.

Marlon Pierce has focused his postdoctoral research on computational sciences with an emphasis on Grid computing and computational Web portals, since earning his Ph.D in computational condensed matter physics. Prior to joining the Community Grids Laboratory (CGL), Pierce served as Information and Communication/Enabling Technologies On-Site Lead at the Aeronautical Systems Major Shared Resource Center for the U.S. Department of Defense. In his role as Assistant Director of the Community Grids Lab Pierce supervises the research activities of numerous Ph.D. students and acts as principal investigator on multiple federally-funded research projects. Pierce leads research efforts in the following areas: the application of service-oriented architectures and real-time streaming techniques to geographical information systems and sensor networks; the development of open source science Web portal software for accessing Grid computing and data resources; and Grid-based distributed computing applications in computational chemistry and material science, chemical informatics, and geophysics.

Lakshmish Ramaswamy received the PhD degree in Computer Science from Georgia Tech in 2005. He is currently an assistant professor in the computer science department at the University of Georgia. His research interests are broadly in the area of distributed systems, and more specifically in performance, scalability, security and privacy of Web services, overlay networks, events-based middleware, and mobile systems. He is the recipient of best paper award of the 13th World Wide Web conference (WWW-2004) and the 2005 Pat Goldberg best paper award. He has served on the program committees of several international conferences and workshops. He was the program co-chair of DEPSA-2007 and SENS-2006 workshops. He is a member of IEEE and the IEEE computer society.

Christoph Ringelstein is a senior researcher and doctoral student in the institute Web Science and Technologies (WeST) at the Department of Computer Science at the University of Koblenz-Landau since 2005. His research focuses on distributed data processing, provenance, SOA and Web services.

Sidney Rosario is a Ph.d candidate in the DISTRIBUTCOM team at INRIA Rennes, under the supervision of Albert Benveniste and Claude Jard. He got his bachelors’ degree in Computer Science in the year 2004 and his masters’ degree in 2006. His research interests include the formal modelling of distributed systems and their performance evaluations.

Florian Rosenberg is currently a research scientist at the CSIRO ICT Centre in Australia. He received his PhD in June 2009 with a thesis on “QoS-Aware Composition of Adaptive Service-Oriented Systems” while working as a research assistant at the Distributed Systems Group, Vienna University of Technology. His general research interests include service-oriented computing and software engineering. He is particularly interested in all aspects related to QoS-aware service composition and adaptation. More information can be found at http://www.florianrosenberg.com.
Mohsen Rouached (Ph.D.) is a postdoctoral researcher at Claude Bernard University of Lyon. He is a member of the BD team of the LIRIS research laboratory, France, where he is involved in the S-Cube European Network of excellence. Before joining LIRIS, he was a researcher in the ECOO team of the LORIA-INRIA research laboratory and teaching assistant at Nancy University. His research interests lie in the area of Service Oriented Computing, Business Process Management, Semantic Web and ontologies, Formal verification and validation techniques, and Process Intelligence.

Steffen Staab (Ph.D.) is a full professor for databases and information systems in the Department of Computer Science at the University of Koblenz-Landau and heads the institute Web Science and Technologies (WeST). His research interests range from ontology management and ontology learning to the application of Semantic Web technologies in areas such as multimedia, personal information management, peer-to-peer - and web services. Before his current position Prof. Staab held positions as researcher, project leader and lecturer at the University of Freiburg, the University of Stuttgart/Fraunhofer Institute IAO, the University of Karlsruhe, and at Ontoprise GmbH. His research led to over 200 refereed publications and 7 books, including the Handbook on Ontologies (now in its 2nd edition). He is Editor-in-Chief of the Journal of Web semantics and on the editorial board of several other journals.

Philippe Thiran is an associate professor in Web and Science Engineering at the Faculty of Computer Science of the University of Namur (Belgium). His research interests include Web services, databases, and distributed information systems. He received his Ph.D. in computer science from the University of Namur. He is a member of the PReCISE Research Center.

Puwei Wang received the PhD degree in computer science from the Institute of Computing Technology, Chinese Academy of Sciences in 2008. He is now a faculty in the Key Laboratory of Data Engineering and Knowledge Engineering of the Ministry of Education, Renmin University of China. His current research interests include semantic Web Services and knowledge grid.

Xiaoling Wang received the Ph.D. degree in computer application from Southeast University, China, in 2003. She is an associate professor in East China Normal University, China. Her research interests include XML data management and Web Services.

Budan Wu received the PhD degree in computer science from the Academy of Mathematics and Systems Science, Chinese Academy of Sciences in 2009. She is now a faculty in the State Key Laboratory of Networking and Switching Technology, Beijing University of Posts and Telecommunications. Her current research interests include service-oriented computing.

Zibin Zheng received his B.Eng. degree and M.Phil. degree in Computer Science from the Sun Yat-sen University, Guangzhou, China, in 2005 and 2007, respectively. He is currently a Ph.D. candidate in the department of Computer Science and Engineering, The Chinese University of Hong Kong. He received SIGSOFT Distinguishe Paper Award at ICSE’2010, Best Student Paper Award at ICWS’2010, and IBM Ph.D. Fellowship Award 2010-2011. He served as program committee member of IEEE CLOUD’2009 and CLOUDCOMPUTING’2010. He also served as reviewer for international journal and conferences, including TSE, TPDS, TSC, JSS, DSN, ICEBE, ISSRE, KDD, SCC, WSDM, WWW, etc. His research interests include service computing, software reliability engineering, and cloud computing.
About the Contributors

Aoying Zhou is currently a professor of computer science at East China Normal University, Shanghai, China. He received his Bachelor and Master degree in computer science from Sichuan University in Chengdu, China in 1985 and 1988, respectively, and his Ph.D. degree from Fudan University in 1993. He severed as the program co-chair of WAIM’2000, the conference co-chair of ER’2004, and PC member of SIGMOD’2008, WWW’2007, SIGIR’2007, SIGMOD’2007, EDBT’2006, VLDB’2005, ICDCS’2005, DASFAA, PAKDD, etc. His research interests include Web Data Management, Web Search and Web Mining, Web Services, Data Streams, and Peer-to-Peer Computing.
