About the Contributors

***

Ahmad Ahmadpour is a faculty member of the Dept. of Accounting at Mazandaran University. He is also the present chancellor of Mazandaran University, a member of the Iranian Accounting Society, regulator of Tehran stock Exchange, member of Tehran University’s Accounting Society, member of Iran’s Accounting Society, member of editorial board of several journals including Journal of Financial Accounting Research, and editor in chief of the Quarterly Journal of Security Exchange. His main research interests include managerial accounting, financial accounting, and financial management.

Oguzhan Aygoren is a Ph.D. candidate of marketing and research assistant at Department of Management, Bogazici University, Turkey. He has a B.S. in Electrical and Electronics Engineering from Middle East Technical University, and an MBA from Koc University/London Business School. He has previously held managerial positions in Procter and Gamble and also established a start-up company in mobile business. His current research interests focus on interactive marketing, digital marketing, and choice behavior in varying contexts. He is currently conducting consumer experiments on choice and preference to explore the role of digital environments in consumer decision-making processes as a part of his Ph.D. dissertation.
**Simona Fabrizi** is a Senior Lecturer in Economics at the School of Economics and Finance (Albany), and Associate of the New Zealand ‘Social Innovation and Entrepreneurship Research Centre’ - SIERC, at Massey University; as well as an External Affiliate of the ‘Centre for Mathematical Social Sciences’ - CMSS, at the University of Auckland. She has obtained a PhD in Economics from the Toulouse School of Economics and the University of Bologna for theoretical and policy oriented research on competition and regulation in the telecommunications industry. Her studies on roaming in the mobile Internet and on telecom operators’ pricing strategies in particular have contributed to the literature on Network Economics as much as on Information Technology, with publications in leading international journals, such as *Telecommunications Policy*. Besides continuing working on Information Technology issues, Simona’s most recent research focuses on the Economics of Innovation and Behavioral Industrial Organization.

**Torsten J. Gerpott**, DBA from Helmut-Schmidt-University Hamburg, is a full professor in the Mercator School of Management at the University of Duisburg-Essen (Germany). His research interests include marketing strategies of telecommunications operators for new services and regulatory economics in network-based industries. Dr. Gerpott has almost 25 years of top management consulting expertise. He has published more than 330 scientific articles in refereed journals such as *Telecommunications Policy*, Information Economics and Policy, Information Systems Frontiers and International Journal of Mobile Communications. He currently supports both private firms and public institutions in the German and Swiss telecommunications sectors in exploiting innovative business.

**Slimane Hammoudi** is an associate professor at ESEO in Angers-France, a graduate school of engineering in electronics, computing, networking and telecommunications. Since 2003 his research interests have been in the main area of Model Driven Engineering with the focus on two application domains: Web Services and Context-Awareness. Since 2005 he is a co-organizer of the FTMDD workshop (Future Trends of Model-Driven Development) a satellite workshop of ICEIS conference.

**Mikko V.J. Heikkinen**, M.Sc. (Tech.), is Research Scientist at the Department of Communications and Networking, Aalto University School of Science and Technology. His research interests include techno-economics of mobile peer-to-peer services and technologies, and consumer attitudes and behavior regarding mobile peer-to-peer services and technologies. He participates in two research projects investigating mobile peer-to-peer services and mobile usage measurements. In 2010, he is Visiting Student at Massachusetts Institute of Technology.

**Sally Rao Hill** is a Senior Lecturer at the Business School of the University of Adelaide. She is an active researcher in the area of marketing and information systems. She has published in leading academic journals, presented papers at leading academic conferences and is an ad-hoc reviewer of several academic journals. One of her papers has won the “Best Paper” in an international conference. She has written 8 book chapters and several case studies for marketing textbooks. Her research has been published in the *European Journal of Marketing, Australasian Marketing Journal, Industrial and Business Marketing, Young Consumers, and International Journal of Mobile Communications*. She serves as an ad-hoc reviewer for several IS and marketing journals. Dr Rao Hill’s research interests involve service co-creation, self-service technologies, consumer innovation adoption, relationship marketing, service encounters, and on-line word-of-mouth.
**About the Contributors**

**Mabel T. Kung** is professor of information systems and decision sciences, Mihaylo College of Business and Economics, at California State University, Fullerton. Her PhD is from the McCombs School of Business at The University of Texas at Austin. Her research publications and industrial experience include the fields of e-business, corporate training, strategic planning and benchmark technology, web component development and enterprise database systems.

**Paul Madden** is the Program Director for Standard Business Reporting (SBR). The SBR Program is being led by the Australian Treasury. Paul was responsible for the overall SBR Program including design, development, stakeholder relationships and management, and implementation. Paul also coordinated the work of teams in the other agencies in this multi-government agency Program. Prior to taking up this role, Paul was a First Assistant Commissioner with the Australian Tax Office responsible for the overall design (systems and business process) of a major transformation program, as well as developing business and system designs to support policy and administrative reforms with a client and staff experience focus. Within the Tax Office, Paul also had responsibility for Whole-of-Government service delivery and interoperability, and was the ATO’s Business owner for On-line Security and Authentication Processes.

**Valérie Monfort** is an associate Professor in Paris 1 Sorbonne University and associate researcher in Dauphine University, LAMSADE CNRS. She did a long carrier in industry where she was an IBM senior consultant architect in Integration Solutions. Microsoft gave her the title of Most Valuable Professional several times. She wrote several books and papers about Interoperability with Web Services and aspects based Web Services.

**María Ortiz** has a master degree in telecommunications engineering with a major in Communications Planning and Management from the Carlos III University of Madrid. She has worked in operations management for IBM Global Business Services. At the present time she is working as a supply chain manager in Airbus, one of the world’s leading aircraft manufacturers. Her research interests include sustainability, operational efficiency, eco-friendly business practices and nonmarket strategies.

**Yasin Ozcelik** is an Assistant Professor of Information Systems and Operations Management at the Dolan School of Business, Fairfield University. He obtained his PhD degree in Management Information Systems and master’s degree in Economics both from Purdue University. His articles appeared in the following journals: *Journal of Management Information Systems, Information Systems and E-Business Management, International Journal of Project Management, International Journal of Business Information Systems, International Journal of Services and Operations Management, International Journal of Information Systems in the Service Sector,* and *Journal of Global Business Issues.* He presented his research at several international conferences, including Americas Conference on Information Systems (AMCIS), European Conference on Information Systems (ECIS), INFORMS, and Workshop on Information Systems and Economics (WISE). He also published several book chapters. He taught courses at Fairfield University and Purdue University, and received three awards for distinguished teaching.
About the Contributors

Zafer D. Ozdemir is an Associate Professor at the Farmer School of Business, Miami University. He received his doctorate from Krannert Graduate School of Management, Purdue University. His research focuses mainly on economics of e-health and information systems and has appeared in highly recognized scholarly journals such as *Journal of Management Information Systems, International Journal of Electronic Commerce, Decision Support Systems, Information & Management, Communications of the ACM*, and *Communications of the AIS*. In addition, he has presented his research in several national and international academic conferences and served as a reviewer for many MIS journals and conferences.

Panagiota Papadopoulou holds a BSc (Hons) in Informatics from the National and Kapodistrian University of Athens, an MSc (Distinction) in Distributed and Multimedia Information Systems from Heriot-Watt University and a PhD in Information Systems from the National and Kapodistrian University of Athens. She is a research fellow in the Department of Informatics and Telecommunications at the National and Kapodistrian University of Athens. She has extensive, university-level teaching experience, as an adjunct faculty member at the University of Athens, the University of Pireaus, the University of Peloponnese, the University of Central Greece and other educational institutions in Greece. Dr. Papadopoulou has also actively participated in a number of European Community and National research projects. She has published more than 30 papers in international journals and conferences, with her current research interests focusing on online trust, e-commerce, interface design, web-based information systems and social computing.

Jean-Eric Pelet owns a doctorate in marketing with distinction (Nantes University, France) and a MBA in information systems with distinction (Laval University, Quebec, Canada). He works as an assistant professor at SupAgro Montpellier (France) on problematic dedicated to the interface and to the consumer behaviour facing a website or any information system (e-learning, knowledge management, e-commerce platforms). Its main interest lies on the variables that enhance the navigation in order to help people to be more efficient on these. He works as a visiting professor in several places in France thanks to its Knowledge Management and Content Management System platform (kmcms.net) in Design School (Nantes), Business Schools (Paris, Reims), and Universities (Paris Dauphine – Nantes), on lectures focused on e-marketing, ergonomic, usability, and consumer behaviour. Dr. Pelet has also actively participated in a number of European Community and National research projects. His current research interests focus on web-based information systems, social networks, interface design and usability.

About the Contributors

**Fumiko Satoh** received her Master’s degree in physics from Tokyo Institute of Technology in 2001, and received Doctoral degree in computer science from Tokyo Institute of Technology in 2010. She joined IBM Research - Tokyo in 2001. She worked on metadata for video digest, security for SOA applications (Web Services security runtime and tooling, WS-Security related specifications, security policies, security configuration and validation), and model-driven development. Her current research interests include Business Process Management, Cloud computing, Emission Trading and Management, and XBRL.

**Masood H. Siddiqui** is a Ph.D. in Operations Research and was also a CSIR-UGC Fellow Scholar. His overall experience spans over thirteen years. He also has an administrative experience of three years as Statistical-Officer. His research areas are Marketing Research, Optimization Models and Soft Operations Research. He has fourteen publications in various refereed international and national journals like Journal of Targeting, Measurement and Analysis of Marketing; Vikalpa; AIMS International Journal of Management; International Journal of Business Science and Applied Management; American Journal of Mathematical & Management Sciences; AIMA Journal of Management & Research etc.

**Ching-I Teng** is an associate professor in Chang Gung University, Taiwan. He received his PhD in Management from National Taiwan University. He has been a visiting scholar to University of Washington, Seattle. His research interests include Internet marketing, service marketing, and health care management. He has 33 papers published or accepted by academic journals, including International Journal of E-Business Research, British Journal of Management, CyberPsychology & Behavior, Internet Research, Technovation, Psychological Reports, The Service Industries Journal, Journal of Advanced Nursing, Journal of Nursing Scholarship, Journal of Professional Nursing, Journal of Nursing Care Quality, and other journals. He has been the principle investigator for 11 funded research projects and has obtained the Distinctive Researcher Award by Chang Gung University.

**Juuso Töyli,** D.Sc. (Econ. & Bus. Adm.), D.Sc. (Tech.), is Professor at Turku School of Economics, Finland. Earlier Töyli has served as Professor at Helsinki School of Economics, and Post-Doctoral Researcher at Turku School of Economics, as well as Senior Researcher at Helsinki University of Technology. Töyli is also the founder of Oy J&AT Management Ltd, and has developed the SIMBU business management simulation game. His research areas include logistics and financial performance, management of services and technology, networking business, and business simulation games.

**Shalini Nath Tripathi** is a Ph.D. in Marketing and Advertising. Her overall experience spans over twelve years. Her teaching and research interest includes Strategic Marketing and Services Marketing. She also has to her credit six years of corporate experience as a Customer Relations Manager with Modi Korea Telecommunications Ltd. She has fifteen publications in various refereed international and national journals like Journal of Targeting, Measurement and Analysis of Marketing; Vikalpa; AIMS International Journal of Management; International Journal of Business Science and Applied Management; AIMA Journal of Management & Research; ICFAI Journal of Management Research; Paradigm etc.
Indrit Troshani, PhD MSc is a Senior Lecturer in Information Systems at the University of Adelaide Business School. He holds a PhD in Computer Science from Edith Cowan University (Western Australia), an MSc in Computer-based Information Systems (Sunderland, UK), and a BBA (Hons) from Malaysia. His research interests include adoption and diffusion of network innovations in Business-to-Business (B2B) settings and mobile services. Dr Troshani has contributed to the body of knowledge in electronic commerce and information systems by co-authoring refereed journal and international conference publications. His work has appeared in Information Technology & People, Electronic Markets, European Journal of Innovation Management, International Journal of E-Business Research, Journal of Theoretical and Applied Electronic Commerce Research, International Journal of Mobile Communications and others.

Fan-Chen Tseng is an Associate Professor in the Department of Information and Electronic Commerce at Kainan University (KNU), Taiwan. He received his BSEE and MSEE degrees from the department of electrical engineering at Taiwan University in 1984 and 1986, respectively. After that, he was with the Swire Group (Taiwan), United Microelectronics Corporation (UMC), and National Yi-Lan University. He started his PhD study in 1998, and received his PhD degree in Information Engineering at Taiwan University in 2002. His current research and teaching interests are in the area of e-commerce, online consumer behavior, and Internet marketing. He has papers published or accepted by Technovation, International Journal of E-Business Research, International Journal of Electronic Business Management, and International Journal of Innovation and Technology Management, and has papers presented at IEEE international conferences.

Belén Usero holds a PhD. in economy and a Diploma in telecommunications economics from University of Carlos III Madrid (Spain). At present, she is an associate professor of strategy at the Business Management Division of this university. Her main research interests centers on competition, nonmarket strategy and business models in mobile telecommunications industry. In addition, her current research focuses on topics such as the internationalization, family firm’s performance and cultural industries. She has published in refereed journals such as Telecommunications Policy, Journal of Business Research and Service Business.

Kaan Varnalı, Ph.D. is an assistant professor at Department of Advertising, Istanbul Bilgi University, Turkey, where he teaches courses on various topics related with marketing through new media and consumer behavior. His prior research has appeared in various highly regarded scholarly outlets as journal articles, case studies, and book chapters. He has also authored a book on mobile marketing published by McGraw-Hill, NewYork. His current research interests include consumer behavior in digital contexts, implications of social media on the universe of marketing, and mobile marketing strategy.

Harris Wu received the Ph.D. in Business Administration from the University of Michigan at Ann Arbor. He is an assistant professor at the College of Business and Public Administration, Old Dominion University. He has studied various business problems in data quality, information retrieval, software engineering, automated control, and technology innovation. His current research interests include social computing, data quality, complex systems, and inter-organizational collaboration. He has published in journals such as Communications of the ACM, Decision Support Systems, IEEE Software, and Journal of American Society for Information Science. He has presented at various ACM, IEEE and other conferences. He is a member of XBRL US.
About the Contributors

Yi Zhang is associate professor of information systems and decision sciences, Mihaylo College of Business and Economics, at California State University, Fullerton. She earned her PhD in information systems from the New Jersey Institute of Technology. Her research areas are mainly focused on e-business, knowledge management, virtual communities, virtual teams, and business intelligence.

Hongwei Zhu received the Ph.D. in Technology, Management and Policy from MIT. He is an Assistant Professor of Information Technology at the College of Business and Public Administration, Old Dominion University. Prior to that, he was a Research Scientist at the MIT Information Quality Program. He has also worked in industry as a consultant and a senior software engineer. His research interests include semantic data integration, data mining, data reuse, quality of data standards, information quality management, and information policy. His research has been published in such journals as Data and Knowledge Engineering, Journal of Management Information Systems, Communications of the ACM, and MIT Sloan Management Review. He is a member of XBRL US and the XBRL Best Practice Committee.
