About the Contributors

Varadharajan Sridhar is a Professor in Information Management at the Management Development Institute (India) and is currently a visiting research fellow at Sasken Communication Technologies (Bangalore, India). He received his BE from the University of Madras (India), Post Graduate Diploma in Industrial Engineering from the National Institute for Training in Industrial Engineering (Mumbai, India), and PhD in MIS from the University of Iowa (USA). He had taught at Ohio University and American University in the US; University of Auckland in New Zealand, and at the Indian Institute of Management (Lucknow, India). Dr. Sridhar’s primary research interests are in the area of telecommunication management and policy and global software development. He has published many research articles, business cases, and chapters in edited books in his area of research. Dr. Sridhar is a member of the Committee on Allocation and Pricing of Spectrum for Access Services set-up by the Indian Government. He was the recipient of the Nokia Visiting Fellowship awarded by the Nokia Research Foundation. He is on the editorial board of the Journal of Global Information Management and is a member of ACM and AIS.

Debashis Saha is a professor with the MIS Group, Indian Institute of Management (IIM)-Calcutta. Previously, he was with CSE Department at Jadavpur University (Kolkata, India). He received his BE (Hons) degree from Jadavpur University (Kolkata, India), and the M Tech and PhD degrees from the Indian Institute of Technology (IIT-Kharagpur, India) all in electronics and telecommunications engineering. His research interests include pervasive communication and computing, network operations, management and security, wireless networking and mobile computing, ICT for development, and network economics. He has supervised thirteen doctoral theses, published about 230 research papers in various conferences and journals, and directed four funded research projects on networking. He has co-authored several book chapters, a monograph, and five books including Networking Infrastructure for Pervasive Computing: Enabling Technologies and Systems (Norwell, MA: Kluwer, 2002) and Location Management and Routing in Mobile Wireless Networks (Boston, MA: Artech House, 2003). Dr. Saha is the recipient of the prestigious career award for Young Teachers from AICTE, Government of India, and is a SERC Visiting Fellow with the Department of Science and Technology (DST), Government of India. He is a Fellow of West Bengal Academy of Science and Technology (WAST), Senior Life Member of Computer Society of India, Senior Member of IEEE, member of ACM, member of AIS, and member of the International Federation of Information Processing Working Group’s 6.8 and 6.10. He was the founding Chair of Calcutta Chapter of IEEE Communications Society (2003-2008).

About the Contributors

Bessam Abdulrazak, PhD, is an Assistant Professor of Computer Science and director of the Research Center on Intelligent Habitats at the University of Sherbrooke, Canada. His research interests include ubiquitous and pervasive computing, Ambient-Intelligence, Smart-Environments, Assistive Technologies and Rehabilitation Robotics.

Takeshi Abekawa is a research assistant professor at National Institute of Informatics. His research interests include natural language processing and information retrieval, especially information extraction from various data. He received Doctor of Engineering from Tokyo Institute of Technology in 2006.

Femi A. Aderohunmu obtained First Class BS in applied mathematics from the University for Development Studies, Ghana, in 2007, and MS from the University of Otago, New Zealand, in 2010. He is currently a PhD candidate at the Department of Information Science, University of Otago. His research interests focus on wireless sensor networking and its application.

Mohamed Aissa received the engineering diploma, MEng in computer Engineering in 1988 from Kiev Polytechnic Institute. In 1992, he received the PhD in computer networks from the same institute. In September 1996, he joined Sur College, Oman, to serve as assistant professor and as head of computer section. From 2004 to 2009, he worked at Al-Imam M. Ibn Saud Islamic University, where he served as head of computer department at the Community College. In 2009, he joined University of Nizwa, Oman, where he is serving as Assistant professor. His the author of many research papers in multicast routing and quality of service (QoS) provisioning in wired and wireless networks.

Hussein Al-Bahadili is an associate professor at Petra University, Jordan. He received his PhD and M.Sc degrees from University of London (Queen Mary College) in 1991 and 1988, respectively. He received his B.Sc in Engineering from the University of Baghdad in 1986. He is a visiting researcher at the Centre of Wireless Networks and Communications (WNCC) at the School of Engineering, University of Brunel (UK). He has published many papers in different fields of science and engineering in numerous leading scholarly and practitioner journals, and presented at leading world-level scholarly conferences. He recently published two Chapters in two prestigious books in IT and Simulations. He is also a reviewer for a number of books, and currently, he is engaged in edition a book titled Simulation in Computer Network Design and Modeling: Use and analysis. His research interests include computer networks design and architecture, routing protocols optimizations, parallel and distributed computing, cryptography and network security, data compression.

Markus Aleksy received the Management Information Systems Degree in 1998, and the Doctorate Degree in 2002 from the University of Mannheim, Germany, and the Doctorate Degree in Information Science in 2007 from Tokyo Denki University, Japan. He lectured in University of Mannheim, Germany, and Queen’s University, Canada. Markus is the author or coauthor of more than 80 research papers published in international journals and conference proceedings. He was/is involved in the organization of several conferences as member of the steering committee, general (co-)chair, program (co-) chair, workshop (co-)chair etc as well as was/is a member of various program committees. His current research focuses on distributed systems, mobile computing, and life cycle science.
Markus Aleksy received the Management Information Systems Degree in 1998, and the Doctorate Degree in 2002 from the University of Mannheim, Germany, and the Doctorate Degree in Information Science in 2007 from Tokyo Denki University, Japan. He lectured in University of Mannheim, Germany, and Queen’s University, Canada. Markus is the author or coauthor of more than 80 research papers published in international journals and conference proceedings. He was/is involved in the organization of several conferences as member of the steering committee, general (co-)chair, program (co-)chair, workshop (co-)chair etc as well as was/is a member of various program committees. His current research focuses on distributed systems, mobile computing, and life cycle science.

Eiji Aramakii is a senior researcher of the University of Tokyo Japan. He leads the research of medical Natural Language Processing projects (MEDNLP). His research interests lie in both NLP and medical informatics. He received his Ph.D. in informatics degree from the University of Tokyo in 2005.

Yacine Belala is a senior research scientist at SAP Labs, Montreal, Canada. His research interests include design, performance, and security issues related to adaptive mobile multimedia applications and service architectures. He received a M.Sc. degree in Electronics from Pierre et Marie Curie University in Paris and a PhD degree in Computer Science (Artificial Intelligence) from the University of Paris-Sud Orsay (France).

Fernando Beltrán is currently a Senior Lecturer in the Information Systems and Operations Management Department, University of Auckland Business School, New Zealand, where he leads the Pricing in Next-Generation Networks (PING) research group. He received a B.S. degree in Electrical Engineering from the Universidad de Los Andes, Bogotá, Colombia, and a Ph.D. in Applied Mathematics from SUNY, Stony Brook, NY. His research focuses on pricing in Next-Generation networks. He has been a visiting scholar at the FCC and the CITI Columbia Business School.

Marco A. Casanova has a BSc in Electronic Engineering from the Military Institute of Engineeringing (1974), a MSc in Computer Science from the Pontificia Universidade Católica do Rio de Janeiro (1976), and a PhD in Applied Mathematics from the Harvard University (1979).

Kevin Curran BSc (Hons), PhD, SMIEEE, FBCS CITP, SMACM, FHEA is a senior lecturer in Computer Science at the University of Ulster. His achievements include winning and managing UK & European Framework projects and Technology Transfer Schemes. He has published over 600 published works to date. He is the Editor in Chief of the International Journal of Ambient Computing and Intelligence (IJACI). Dr Curran is a Fellow of the Higher Education Academy, a Fellow of the British Computer Society and is listed by Marquis in their prestigious Who’s Who in Science and Engineering. He is also listed in the Dictionary of International Biography and by Who’s Who in the World.

Jeremiah D. Deng obtained the BEng degree from the University of Electronic Science and Technology of China in 1989, and the MEng and PhD both from the South China University of Technology in 1992 and 1995 respectively. He is now a Senior Lecturer at the Department of Information Science, University of Otago. Dr. Deng’s research interests include wireless communications, machine learning and multimedia data mining.
José Antonio Fernandes de Macêdo has a graduate in Processamento de dados from the Universidade Católica do Rio de Janeiro (1997), an MSc in Informática from the Pontifícia Universidade Católica do Rio de Janeiro (2000), an PhD at Informática from the Pontifícia Universidade Católica do Rio de Janeiro (2005) and Postdoctorate from the Polytechnique Fédéral de Lausanne (2009).

Sylvain Giroux, PhD, is a professor at the University of Sherbrooke, Canada. He co-founded DOMUS laboratory of the University of Sherbrooke in 2005. His main research interests are mobile computing, pervasive computing, distributed artificial intelligence, multi-agent systems, user modeling and intelligent tutoring systems.

Charles Gouin-Vallerand, MSc, is a Ph.D. candidate in computer science at the University of Sherbrooke, Canada, jointly with the Institut Telecom /University of Pierre and Marie Curie, France. His main research interests are Pervasive Computing, Distributed Computing, Smart Spaces, Context Awareness and Assistive Technologies.

Jairo A. Gutiérrez is a Full Professor with the Systems Engineering Department, Universidad Tecnológica de Bolívar (UTB), Cartagena, Colombia. He is also the Director of Research and Innovation at UTB, and was the Editor-in-Chief of the International Journal of Business Data Communications and Networking (2004–2008). He received his Systems and Engineering degree from the Universidad de Los Andes, a Masters degree in Computer Science from Texas A&M University, and a Ph.D. in Information Systems from the University of Auckland. His current research is on network management systems, viable business models for mobile commerce, and quality of service in Internet protocols.

Thomas Janke holds a master’s degree in computer science from the Technische Universität Dresden. In 2009 he joined SAP Research as a PhD student. His research work mainly focuses on ontology engineering as well as on the application of semantic technologies in real world business applications. Moreover, Thomas has many years of experience as a software engineer working for various companies. He has a strong background in the field of model driven development (MDD), service oriented architectures and mobile application development.

Andreas Konzag is a doctorate researcher at the Chair for Industrial Information Technology at the BTU Cottbus, Germany and employee at BMW AG. He received his engineer degree in industrial engineering and management at the same university in 2009 for the research on a methodology to provide customer related product features for quality controls of vehicles. Since 2009 he works on a methodology for providing context sensitive information for the development of vehicle concepts. His advisor is Prof. Uwe Meinberg. He is team leader of the German BMBF project Aletheia considering semantic federation of product information.

Mousumi Kundu got her Bachelor of Engineering (B.E.) degree in ETCE in 2005 and Master of Engineering (M.E.) degree in ETCE in 2007, both from JU, Kolkata. She got a total of two Gold Medals for standing first in the order of merit at M.E. (ETCE) Exam., and for securing the top position among all the courses of M.E. Exam. of JU, both in 2007. She also got the Third Prize in IEEE All India M. V. Chauhan Students Paper Contest in 2007. She got the Ministry of Human Resource Development
(MHRD), Govt. of India Scholarship in Engineering for the year 2005 – 2007. She is at present working as a Design Engineer with Society for Applied Microwave Electronics Engineering and Research (SAMEER) – Kolkata Centre since 2007.

**Johannes Meinecke** is a researcher at the Business Intelligence Practice at SAP Research Dresden, SAP AG. Before joining SAP, he worked for 5 years as a research associate at the University of Karlsruhe as well as at the University of Chemnitz, where he received a PhD in Computer Science. His research at that time has been concerned with Web Engineering, Federated Identity Management and Semantic Web. He is currently working on architectural issues of semantic information systems and question answering in a Business Intelligence context. He is also a founding-member and treasurer of the International Society for Web Engineering e.V. and coauthor of over 25 research papers.

**José Luis Melús** is a Full Professor at the Polytechnic University of Catalonia in the Telecommunications Engineering Department. He holds both a B.S. degree and a Ph.D. degree in telecommunications from Escuela Técnica Superior de Ingenieros de Telecomunicación, Barcelona, Spain. His present research interests include network management, quality of service, planning and evaluation of networks of computers, and security and pricing telecommunications services.

**Adel Ben Mnaouer** received his BS degree in computer science from the “Ecole Supérieure des communications (SUP’COM)” of Tunisia in 1985 and the Meng and PhD degrees in electrical and computer engineering from the University of Fukui and from Yokohama National University, Japan, in 1993 and 1997 respectively. From 1997 to 2010 he served as an academic staff in several Universities such as Yokohama National University (1997-1999), CS dept of Sultan Qaboos University, Oman (1999 - 2002), School of Computer Engineering at Nanyang Technological University, Singapore, (2002-2005), the “Ecole Supérieure de Technologie et d’Informatique”, 7th November university, Tunisia (2005-2008). Dr. Ben Mnaouer served in the Centre of Information and Communication technologies of the University of Trinidad and Tobago (UTT) as an associate professor (2008-2010). Since September 2010, he is an associate professor with the college of computer engineering and information technology of Dar Al Uloom University, Saudi Arabia. His research interests are in the areas of protocol design and analysis of wired and wireless (4G, MANETs, VANETs, Sensor and Mobile) networking and in cluster and grid computing. He served/serving in the TPC of scores of international conferences, such as the IEEE ICC, GLOBECOM, LCN, and WCNC. He organized and chaired workshops, and technical sessions in several international conferences. He offers regular peer review services to several international journals on computer science and networking. Dr. Ben Mnaouer is a senior member of the IEEE Communication Society.

**Yohei Murakami** is a senior researcher of National Institute of Information and Communications Technology, Japan. He currently leads the research and development of Service Grid platform, the purpose of which is to share various resources as Web services and enable users to create new services. His research interests lie in services computing and multiagent systems. He founded the Technical Committee on Services Computing in the Institute of Electronics, information and Communication Engineers (IEICE) in 2009. He received his Ph.D. in informatics degree from Kyoto University in 2006.
About the Contributors

Rion Murray received his associate degree in information systems management in 1999 from the National Institution of Higher Education, Research, Science and Technology of Trinidad. In 2002, he acquired a bachelor of science in computer science from the University of the West Indies in Trinidad and Tobago. He graduated from the University of Trinidad and Tobago in 2010 with a master of science in information communications and technology where he received an award for the most outstanding student of his department from the student’s guild. His research interests are in the areas of protocol design of wired and wireless networking.

K. Murugesan is working as an Associate Professor in the Department of Mathematics, National Institute of Technology, Tiruchirappalli, Tamil Nadu, India. He has 20 years of teaching and research experience. He has also visited several countries for delivering lectures and presenting papers at conferences. He was a Visiting Research Professor in the Department of Mathematics, Pusan National University, Pusan, South Korea during 2003-04. His research interests are Numerical Techniques, Cellular Neural Networks, Web services and Data mining and he has published around 45 papers in various International Journals related to Numerical Methods and Computer Applications.

Akiyo Nadamoto is a professor of Konan University, Japan. Her research interests lie in Web computing and database, especially search system, web mining and ser generated Content analysis. She received her Doctor of Engineering from Kobe University in 2002.

Rabindranath Nandi is a Professor in the Dept. Of ETCE, JU, Kolkata, India. His areas of interest are Analog Signal Processing (ASP), DSP and Computer Communication. He has authored more than 110 research papers in National / International Journals and some in Conferences / Seminars. He served as the Head of ETCE Dept., JU during 1999-2001 and served as the Chair of IEEE Calcutta Section during 2003-2005. He has taught in various Institutes abroad.

Sean O’Brien is an undergraduate student studying Computer Science at the University of Ulster. His research interests include web programming and e-business.

Kevin O’Hara is an undergraduate student studying Computer Science at the University of Ulster. His research interests include Internet Technologies and the World Wide Web.

Kanika Orea is pursuing her B.E. Degree in ETEC from JU, Kolkata. Her field of research is Wireless Communication Networks which includes Mobile Ad hoc networks, 3G and UMTS technology. She presented a research paper entitled “Simulation and Performance Analysis of OLSR Protocol under Identity Spoofing Attack in Mobile Ad-Hoc Networks” in the Second International Conference on Advances in Communication, Network and Computing (CNC 2011), during March 2011 in Bangalore, India. The Proceedings of CNC 2011 was published by Springer-Verlag Berlin Heidelberg in CCIS 142 (pp. 308-310).

João C. Pinheiro has a BSc in Computer Science from the Universidade Federal do Maranhão (1999), an MSc in Computer Science from the Universidade de São Paulo (2001), and I’m currently a PhD student from the Computer Science from Universidade Federal do Ceará (2011).
Fabio Porto has a BSc in Matemática Modalidade Informática from the Universidade do Estado do Rio de Janeiro (1987), an MSc in Informática from the Pontifícia Universidade Católica do Rio de Janeiro (1996), and a PhD in Informática from the Pontifícia Universidade Católica do Rio de Janeiro (2001), and Postdoctorate from the Polytechnique Fédéral de Lausanne (2006).

Martin Purvis, BS (Yale), MFA (Columbia), MS, PhD, Massachusetts) is a professor of information science, and also the director of both the Telecommunications and Software Engineering programmes in Applied Science at the University of Otago. Prof. Purvis has been the principal investigator on a number of externally-funded research projects. His teaching and research activities include both mobile telecommunications and software engineering.

A. Raghunathan is Deputy General Manager, Informatics Centre, Bharat Heavy Electricals Ltd., Tiruchirappalli, India. He has a B.E. degree in Electrical Tech and Electronics from the Indian Institute of Science, Bangalore, India and an M.E. degree in Computer Science from the National Institute of Technology, Tiruchirappalli, India. He has over 25 years of experience in Software Design and Development, Database Management, Server Administration, Web services and ERP. He also serves as External Faculty and Examiner at leading Engineering and Management Institutes. His research interests include Databases, Data mining, Information Integration and Web services. He has published and presented several papers in journals, conferences and IT Conventions. He is currently pursuing PhD in Computer Science at the National Institute of Technology, Tiruchirappalli, India in the area of Web Services.

Till Riedel is a researcher at the TecO at the Karlsruhe Institute of Technology. He received a diploma degree in computer science from the University of Karlsruhe in 2005. Since 2005 he has been actively contributing to a number of national and international research projects that work on augmenting real world business processes with internet of things technology. His research interests include the design and modeling of software for ubiquitous computing systems. He is coauthor of over 40 peer-reviewed publications in the area of ubiquitous computing, internet of things and wireless sensor networks.

Patrice Roy is a senior lecturer and a PhD candidate at the University of Sherbrooke, Canada. He has been teaching Computer Science in college since 1998, and has been a lecturer at Université de Sherbrooke since 2001. His research gravitates around Context-aware autonomous agents and open intelligent spaces.

Alia Sabri is an assistance professor at the Applied Sciences Private University, Jordan. She received her PhD and M.Sc in Computer Information Systems from the Arab Academy for Banking & Financial Sciences (Jordan) in 2009 and 2005, respectively. She received her B.Sc degree in Computer Science from Jordan University of Science and Technology (Jordan) in 2002. Her current research interests are in developing efficient dynamic routing protocols for mobile ad hoc networks, wireless networks management and security, and ad hoc networks modeling and simulation.

Daniel Schuster is a post-doc researcher and lecturer at the Professorship for Computer Networks at TU Dresden, Germany. His advisor is Prof. Alexander Schill. His research interests are in the areas of real-time collaboration (RTC) and semantic information retrieval. He is involved in the German-Brazilian project Mobilis that deals with mobile RTC and gives a lecture about RTC technologies and protocols. He is also team leader and work package leader of the German BMBF lighthouse project Aletheia considering
About the Contributors

Daniel Schuster received a PhD in Computer Science from TU Dresden, Germany, in 2007 and a Master’s Degree from the same university in 2004. During his master and doctoral studies he has been working in industry cooperation projects in the area of real-time collaboration (especially distribution of multimedia content).

Amin Shaqrah is currently Assistant Professor of Management Information Systems at Al Zaytoonah University of Jordan. He holds a PhD in MIS from Arab Academy for Banking and Financial Sciences, and received MA in MIS from Amman Arab University for Graduate Studies. He is a Certified e-business Consultants and a KM Professional. He is affiliated with a number of international professional societies on KM, E-business, and a member of editorial review boards for a number of International Journals. He had a leadership role in the design and implementation of MIS program at the undergraduate level. His research interests are mainly knowledge sharing and transfer, organizational knowledge theory, knowledge culture, CRM value strategies, data mining techniques, Innovative work environment, human and social implications of Enterprise systems (ERP, CRM, and SCM). His work appears in number International Journals and conferences.

Srishti Shaw is currently pursuing her B.E. Degree in ETCE from JU. Her field of research is the Performance Evaluation and Network Modeling for Mobile Ad-Hoc Networks. She presented a research paper entitled “Joint Optimization of 2-tier Dual-homing for NodeBs and RNCs in UMTS Meta-heuristic Techniques” in the Fifth Workshop on Intelligent Networks: Adaptation, Communication & Reconfiguration (IAMCOM 2011) during January 2011 in Bangalore, India. She was selected for the Internship in Federal University of Parana, Brazil under the Dept. of Science and Technology (DST), Govt. of India Scheme entitled “Summer Internship Programme for Students from India in Brazil” in 2011.

Alan D. Smith is presently University Professor of Operations Management in the Department of Management and Marketing at Robert Morris University, located in Pittsburgh, PA. Previously he was Chair of the Department of Quantitative and Natural Sciences and Coordinator of Engineering Programs at the same institution, as well as Associate Professor of Business Administration and Director of Coal Mining Administration at Eastern Kentucky University. He holds concurrent PhDs in Engineering Systems/Education from The University of Akron and in Business Administration (OM and MIS) from Kent State University, as well as author of numerous articles and book chapters.

Bernd Stieger studied Management Information Systems at the University of Mannheim, Germany, where he received his Master’s degree in 2007. Afterwards, he joined the life cycle science group which belongs to the department of Industrial Software and Applications of ABB Corporate Research Center Germany. He is conducting research and is responsible for managing global projects in the areas of service process optimization as well as mobile and knowledge management applications and technologies.

M. Umaparvathi completed her BE(ECE) from Madras University in the year 1995. She completed her M.Tech (Communication Systems) from NIT, Trichirapalli in the year 2005. Currently she is doing PhD in Anna University of Technology, Coimbatore. Her research interests are wireless networks, Information security and Digital Signal Processing.
Dharmishtan K. Varughese completed his BS(Engg.) from College of Engineering, Trivandrum in the year 1972. He completed his MS(Engg.) from College of Engineering, Trivandrum in the year 1981. He completed his PhD from Indian Institute of Science, Bangalore in the year 1988. He was working as Senior Joint Director from the year 2003 to 2007. Currently he is working as a Professor in Karpagam College of Engineering, Coimbatore. His research interests are microstrip antennas, microwave theory, information theory and optical fiber communication.

P. Venkateswaran has been working as an Associate Professor in the Dept. of Electronics & Tele-Communication Engg. (ETCE), Jadavpur University (JU), Kolkata, India since October 2001. He has published over 40 papers in various National / International, Journal / Conference Proceedings. His fields of interest are Computer Communication, Microcomputer Systems and Digital Signal Processing (DSP). He is a Member of IEEE(USA), and the present Secretary of IEEE Communications Society Calcutta Chapter.

Vânia M. P. Vidal has a graduate degree in Engenharia Civil from the Universidade Federal do Ceará (1979), master’s at Informática from the Pontifícia Universidade Católica do Rio de Janeiro (1982), PhD at Engenharia de Sistemas from the Universidade Federal do Rio de Janeiro (1994), and Postdoctorate from the Polytechnique Fédéral de Lausanne (2008).

Matthias Wauer is a doctorate researcher at the Chair for Computer Networks at TU Dresden, Germany. He received his Diplom Degree in Media and Computer Science at the same university in 2008 for research on dynamic resource management using REST based Web services at IBM Deutschland Research & Development GmbH, Germany. His advisor is Prof. Alexander Schill. He currently works on a system architecture and resource selection mechanisms for semantic product information federation for the Aletheia project, which is funded by the German BMBF. His research interests include distributed information retrieval, Web services, semantic resource representations, and information system architectures.
