About the Contributors

M’hammed Abdous is the Assistant Vice-President for Teaching and Learning with Technology and the Director of the Center for Learning Technologies at Old Dominion University in Norfolk, Virginia, where he provides leadership and assistance to the Provost’s Office and to the Distance Learning office to (1) conceive, implement, and evaluate processes for effectively integrating technology into teaching and learning practices, and (2) manage and produce quality online programs and courses. His responsibilities include, among other things, the development of institution-wide faculty development programs and the management of online program/course production projects. Dr. Abdous’ research interests include emerging technologies, process re-engineering, and quality assurance for online courses. Dr. Abdous works also as a UNICEF consultant for the Tunisian and Syrian Ministries of Education, where he has conducted a series of workshops on program and project evaluation, textbooks and curriculum design, and evaluation and project review.

Tannaz Alinaghi completed a bachelor degree in software engineering in University of Tehran, Iran in 2007. She was a member of Multi Agent System Research Group at the same university. She completed a master degree in information technology at Tarbiat Modares University, Iran in 2010. She is specialized in J2EE technology and she is currently working as a software developer in a leading banking solution provider company in Iran. Her research interests include e-learning, recommendation systems, data mining and multi agent systems.

Carmelo Ardito received the Laurea degree in Computer Science with full marks and honors in October 2004 and the PhD in Computer Science in May 2008, both at the University of Bari, Italy. Since April 2008 he is research fellow at the Computer Science Department of the University of Bari. He is member of the Interaction, Visualization and Usability (IVU) Lab, coordinated by Prof. Maria Francesca Costabile. His current research interests are in Interaction with mobile and ubiquitous systems, information visualization, usability and user experience, educational pervasive games, end-user development. Dr. Ardito served as Demo Co-Chair in the International Conference IDC 2009 (Interaction Design and Children). He is Local Arrangement Chair of the third International Symposium on End-User Development (IS-EUD 2011). He is member of ACM, ACM SIGCHI and SIGCHI Italy (the Italian Chapter of ACM SIGCHI). He is Working Group Member in the EU COST Action IC0904 “TWINTIDE (ToWards INtegration of Trans-sectorial IT Design and Evaluation)”.

Ardeshir Bahreininejad obtained his PhD in Computational Solid Mechanics from Heriot-Watt University, Edinburgh, UK in. From 2000 to 2002 he pursued a postdoctoral research fellowship at Georgia Institute of Technology, Atlanta, USA working in the area of Manufacturing Information Systems. He
was an assistant professor at Tarbiat Modares University, Tehran, Iran from 2002 to 2010. He is currently an associate professor at the department of Engineering Design and Manufacture, University of Malaya. Dr. Bahreininejad has published numerous journal papers, book chapters and conference articles. His book which is co-authored with Professor BHV Topping is titled “Neural Computing for Structural Mechanics”. His research interests include: Soft Computing Applications, Information Technology and Enterprise Integration, Computational Solid Mechanics, Manufacturing Information Systems, Neural Computing, Optimization and Metaheuristics, Parallel, Cluster and Grid Computing in Engineering.

**Donglin Cao** is assistant professor of natural language processing at Department of Cognitive Science, Xiamen University in China. He graduated in Computer Science department of Xiamen University, China, in 2000. He earned his master degree in Computer Science at Xiamen University, China, in 2003. He received his PhD degree in Computer Software and Theory from Institute of Computing Technology, Chinese Academy of Sciences, in 2009. His research interests are about Web information retrieval, Large-scale Content Mining, Natural Language Processing and Image Automatic Annotation. In his related research directions, he has published more than 10 papers in domestic and international journals and conferences.

**Hung-Fan Chang** is a Ph.D. student in the Institute of Management of Technology at National Chiao Tung University in Taiwan. His research interests include management of technology and innovation management. Mr. Chang has published articles in *The Service Industries Journal (SSCI)*, *Business Strategy Series (ABI)*, *Journal of Technology Management & Innovation*, *International Journal of Innovation and Learning*, *Journal of Innovation and Management*, *Innovation Management Review* and others. He is a member of IEEE and Chinese Society for Management of Technology.

**Te-Jeng Chang** received Ph.D. degree in the Department of Industry Education at the National Taiwan Normal University (NTNU). His research interests include dynamic assessment technology, cognitive load, learning diagnostic techniques, adaptive e-learning, and organizational learning. He received the Master of Science degree in mechanical engineering from the University of Michigan, USA. Since 1990, he has been worked in mechanical manufacturing industry more than 20 years and been the executive operation officer for several global enterprises. The practical experiences in both applying e-learning for human resources training and constructing organizational learning environment and system enlighten him in related researches.

**Ying Dai** received her B.S. and M.S. degrees from Xian Jiaotong University, China in 1985 and 1988, respectively. After some years working in the same university, she attended Department of Information Engineering, Shinshu University, Japan in 1992. She had a Dr. Eng degree from Shinshu University in 1996. She was granted JSPS Research Fellowships for Young Scientists from 1995 to 1997. She joined the Iwate Pref. University in 1998. She has been an associate professor in the Faculty of Software and Information Science, Iwate Pref. University since 2002. Her main research interests are in the area of Pattern Recognition, Image Understanding, Kansei Information Processing, and Soft Computing Techniques. She is the member of IEEE, IEICE (the Institute of Electronics, Information and Communication Engineers), and JSKE (Japan Society of Kansei Engineering).
**Stavros Demetriadis** is with the Department of Informatics, Aristotle University of, Greece. He is currently Assistant Professor, holding a PhD in Educational Technology, MSc in Electronic Physics and BSc in Physics from Aristotle University of Thessaloniki. He has published more than 80 research papers in scientific journals and conference proceedings and has been awarded three “best-paper” awards in international conferences. His research focuses on adaptive systems for collaborative learning, computer-supported collaborative learning, multimedia and blended learning.

**Ru-Lin Duan** is a postgraduate student in School of Educational Information Technology at South China Normal University in China. He received his bachelor’s degree from College of Computer and Information Science at South West University in China. His research interests include semantic web, ontology, intelligent search, computer assisted learning and information technology education.

**Vanessa Garza** is a PhD candidate at the Texas A&M International University College of Business Administration. She holds a degree in Business Administration (BBA) with concentrations in Accounting and Management Information Systems, as well as a Master of Professional Accountancy (MPAcc). She has published in the *Decision Sciences Journal of Innovative Education*. Her research interests include electronic communication, electronic collaboration, and distance education.

**Angela Guercio** received the Ph.D. in Computer Science from Kent State University, Kent, OH in 2004, the MS in Computer and Information Sciences from the Knowledge Systems Institute, Skokie, IL, in 2000 and the Doctor in Computer Science “cum laude” from the University of Salerno, Italy in 1984. She is currently Assistant Professor at Kent State University at Stark in Ohio. She has been Assistant Professor at Hiram College and Senior Research Associate at University of Salerno, Italy. She has been doing research and teaching at both graduate and undergraduate level. Her research interests include multimedia languages and multimedia computing, e-Learning, web programming, and software-development environment. She has published over 50 papers in scientific journals, refereed conferences, and books. She has been winner of several awards and fellowships for her research. She has chaired and participated in the organization of several international conference and coedited special issues of international journals. Dr. Guercio is member of the IEEE, the IEEE Computer Society, and of the ACM.

**Feng Guo** is the assistant professor in Xiamen University, China. He received his B.S. and M.S. degrees from Xiamen University, China in 2002 and 2005, respectively. Since 2002, he has been a teacher in Xiamen University and involved in a number of horizontal and vertical issues. Till now, he has published 12 articles, and most of them were included EI and ISTP. His research interests lie in the areas of artificial intelligence, especially computer vision, moving target detection and recognition, and the machine learning. He is the member of Fujian Institute of Artificial Intelligence, China.

**Yu-Qing Guo** is a currently Ph.D. student at East China Normal University, P.R China. She earned her Master degree in Network, Telecommunication and Service form INSA-Lyon (Institut National des Sciences Appliquées de Lyon),France in 2005. Her research interests involve web-based education, social computing and open source software.
Charles Haiber is currently completing a BS in Computer Science at Kent State University. His research interests include eLearning and legal issues in cyberspace. He is currently working on a research project on internet censorship. Charles Haiber hopes to graduate next year and continue to graduate school. Charles Haiber is a student member of both the IEEE and of the ACM.

Aiguo He received his M.E. and Ph.D degrees from Nagoya University, Japan in 1985 and 1988, respectively. Now he is an associate professor at the Graduate Department of Computer and Information Systems, The University of Aizu, Japan. He currently is working on distant education, computer science education, software engineering, computer vision, software visualization and computer network. He is a member of IEEE, IEICE, IEEJ and IPSJ.

Pi-Shan Hsu is currently a Ph.D. candidate in the Department of Industry Education at the National Taiwan Normal University (NTNU). Her research interests include dynamic assessment technology, learning diagnostic techniques, adaptive e-learning, and Creativity. She received the Master of Art degree in teacher education from the Eastern Michigan State University, USA. She is an instructor of human resource development at Ching Kuo Institute of Management and Health, Taiwan. Since 1993, she has been a teacher more than 19 years. In the period of her Ph.D. program, she played a major role in several research teams of the national projects from National Science Council which focuses on creativity and learning diagnostic technique development.

Chang-Qin Huang is currently working as a professor in School of Educational Information Technology at South China Normal University, P.R China, and is also doing postdoctoral research at Sun Yat-Sen University. His research interests involve service-oriented computing, semantic web and enabling technology for e-learning. He earned a BSc in Computer Science from National University of Defense Technology (China, 1998), a MSc (Eng) in Computer Science from East China Normal University (China, 2001), and a PhD (Eng) in Computer Science from Zhejiang University (China, 2005). Dr. Huang was awarded the topmost honor of Zhejiang University-ZhuKeZhen Fellowship in 2004, and became one of cultivated teachers of Thousand-Hundred-Ten Engineering in Guangdong Provincial University in 2006.

Nan-Ching Huang received his M.S. degree in Computer Science from Tamkang University Taiwan, in 2007. He is currently a lecturer both in the Department of Computer Science and Information Engineering at Tamkang University and the Department of information management at National Taipei University of Nursing and Health Sciences, Taiwan. His research interests include multimedia, data mining, distance learning, mobile computing, and data base.

Tien-Chuan Huang is a Professor of General Education Center at National Taipei University of Nursing and Health Sciences in Taiwan. He received his B.S. degree in Department of Chemistry National Cheng Kung University, 1980 and his Master Degree in Graduate Institute of Chemistry at Tamkang University and Ph. D in Institute of Chemistry, National Taiwan University in Taiwan. His current main research areas include Biotechnology and Molecular analysis.

Xiao Ke is currently a Ph.D. student in computer vision at the Department of Cognitive Science in Xiamen University of China. He received his B.E. degree in computer science and technology from the Hebei University of China in 2006. He was a graduate student in Xiamen University of China from
2006 which major is computer application, and he became a PhD candidate from 2008 which major is artificial intelligence. His research interests are related to computer vision, natural language processing, machine learning and their relations with innovative technologies, including: Image automatic annotation, image retrieval, named entity recognition, topic tracking and detecting and so on.

Huan-Chao Keh received his B.S. degree in Horticulture Science from National Chung-Hsing University, Taiwan, in 1980, and his M.S. and Ph.D. degrees both in Computer Science from Oregon State University in 1985 and 1991 respectively. He is currently a Professor in the Department of Computer Science and Information Engineering at Tamkang University, Taiwan. His research interests include multimedia database systems, data mining, distance learning, and mobile computing.

Yasushi Kodama received his Bachelor of Engineering (BE) in 1987 from Keio University and his Master of Business Administration (MBA) in 1991 from the University of Tsukuba. He worked at Tokyo University of Science as Research Associate from 1994 through 2000 and worked at Nanzan University as Assistant Professor from 2000 through 2004. In 2004, he joined the faculty of Business Administration at Hosei University where he is currently a Professor of Informatics.

Andreas Konstantinidis holds a BSc in Computer Science and an MSc in Information and Communication Technology in Education (ICTE) from the Aristotle University of Thessaloniki and is currently studying for a PhD on 3D Virtual Environments for Collaborative Learning. His research activities are in the areas of Collaborative Virtual Environments, Collaborative Learning and Computer Supported Collaborative Work. He is also interested in e-Learning Systems. He has published his research in a number of international conferences and journals and has also written chapters in books and encyclopedias.

Rosa Lanzilotti is currently research fellow at the Department of Computer Science, University of Bari (Italy). She is member of the Interaction, Visualization and Usability (IVU) Lab, coordinated by Prof. Maria Francesca Costabile. She got the PhD in Computer Science in May 2006. Her research interests focus on multimodal and multimedia human-computer interaction, usability engineering, accessibility,
user experience, e-learning and m-learning systems, educational pervasive games. She served as Demo Co-Chair in the International Conference IDC 2009 (Interaction Design and Children). She is Publicity Chair of the third International Symposium on End-User Development (IS-EUD 2011). She is member of ACM-SIGCHI (ACM’s Special Interest Group on Computer-Human Interaction) and SIGHCHI Italy. She is Italian Management Committee Substitute Member for the EU COST Action IC0904 “TWINTIDE (ToWards INtegration of Trans-sectorial IT Design and Evaluation)”.

Shaozi Li is professor and PhD supervisor of multimedia information processing at Department of Cognitive Science, Xiamen University in China. He graduated in computer science department of Hunan University, China, in 1983. He earned his master degree in Systems Engineering at Xi’an Jiaotong University, China, in 1988. He received his PhD degree in Computer Science from University of Defense Technology, China, in 2009. His research interests are about Artificial Intelligence and its application, Machine Learning and Computer Vision, Natural Language Processing and Multimedia Information Retrieval, Network Multimedia and CSCW Technology, Intelligent Traditional Chinese Medicine. He was Program Committee Chair of ICIS2010, WCNIS2010, ICIS2009, ITME2009, ISKE2008 and ITME2008. He is also Associate Editor of The International Journal of Computers and Applications. He has published more than 130 papers in domestic and international journals and conferences.

Wenhao Li obtained his Bachelor and Master degrees of Engineering from Shan Dong University in China in 2007 and 2010. He participated in a program funds by National Natural Science Foundation of China during his postgraduate studies and published several papers on national and international journals. He is currently a PhD Candidate in Faculty of Information and Communication Technologies, Swinburne University of Technology, supervised by Professor Yun Yang and Doctor Jinjun Chen. He’s research interests include parallel and distributed computing, cloud and grid computing, workflow technologies and data management in distributed computing environment.

Chin-Hung Lin is an Assistant Professor in the Department of Information Management at Chung Chou Institute of Technology, Taiwan. He got his PhD in educational computing technology from Barry University, U.S.A. and MS in Computer Science from the Fairleigh Dickinson University, U.S.A. From the year of 2006, he has conducted many projects related planning e-training program with profit organization. His areas of Interest are Program planning, program evaluation, learning styles and technology, instructional delivery systems.

Jinjiao Lin received the B.S. degree in electrical engineering and the M.S. degree in control theory and control engineering in 2000 and 2003, respectively, from Shandong University of Science and Technology, Qingdao, China, and the Ph.D. degree in computer software and theory in Shandong University, Jinan, China, in 2008. Her research interests include database management and software theory.

Ying Lin is the assistant professor in Xiamen University, China and the member of Fujian Institute of Artificial Intelligence, China. She received her B.S. and M.S. degrees from Xiamen University, China in 2002 and 2005, respectively. Since 2002, she has been a teacher in Xiamen University and involved in a number of horizontal and vertical issues. Till now, she has published 10 articles, and most of them were included EI and ISTP. Her research interests lie in the areas of artificial intelligence, especially computer vision, moving target detection and recognition, and the machine learning.
**About the Contributors**

**Fasheng Liu** received the B.S. degrees in mathematic from Shandong Normal University, Jinan, China, in 1982, and the Ph.D. degree in operational research and cybernetics in Dalian University of Technology, Dalian, China, in 1999. He joined the Lancaster University, England, in 1986, as a visiting scholar. He joined the Montreal University, Canada, in 1992, as a visiting scholar. He is now a Professor with the department of electrical engineering and information technology, Shandong University of Science and Technology. His main research interests are entropy optimization, intelligent traffic, and their industrial application. Dr. Liu is now a director of Shandong operational research academy, Shandong computer research academy, and academic leader of traffic engineering of Shandong University of Science and Technology.

**Yan Liu** graduated with a BA degree from Qingdao Agricultural University in China in 2007. He is currently a research student with School of Engineering of Swansea University with research interest in multimedia communications in wireless mesh networks. He has other interests in media design, Web design, and photography.

**Yuqin Liu** received the M.E from the Department of Graduate School of Education, Naruto University of Education, in 1997. She received Ph. D degrees from the Department of Information Science and Intelligent Systems, Tokushima University, Japan, in 2000. She is an Associate Professor in the Software School of Dalian University of Technology, China. Her current interests are in Computer Supported Collaborative Learning.

**Vuyisile Msila** is an Associate Professor at the University of Johannesburg where he teaches Educational Management courses to postgraduate students. His interests include Educational Policy, Educational Leadership as well as research in distance education. He is currently conducting a longitudinal study in mixed mode delivery and open learning systems. He has previously taught at the University of South Africa in a distance teacher programme, the NPDE.

**Hiroaki Ogata** received the B.E., M.E. and Ph. D degrees from the Department of Information Science and Intelligent Systems, Tokushima University, Japan, in 1992, 1994 and 1998, respectively. He was a visiting researcher of the Center of Lifelong Learning and Design, the University of Colorado at Boulder, USA from 2001 through 2003. He is an Associate Professor in the Faculty of Engineering, Tokushima University. His current interests are in Computer Supported Collaborative Learning. He received the best paper award from JSiSE in 1998 and from WebNet in 1999. Prof. Ogata is a member of IPSJ, JSiSE, IEEE, ACM, APSCE, and AIED.

**Pantelis M. Papadopoulos** is a Postdoctoral Research Associate in the Information Systems of the Carnegie Mellon University in Qatar. He received his B.Sc. ('02), M.Sc. ('05), and Ph.D. ('09) degrees from the Informatics Department of the Aristotle University of Thessaloniki, Greece. He has published 20 research papers in scientific journals and conference proceedings. His research interests include educational technologies, case-based learning, learning in context, open and distance learning, learning environments, software engineering education, and computer-supported collaborative learning.
Haitao Pu received the B.S. degree in electrical engineering and the M.S. degree in computer application in 2000 and 2007, respectively, from Shandong University of Science and Technology, Qingdao, China, where he is currently working toward the Ph.D. degree. His research interests include system optimization and mobile computing.

Guojun Qiao received the M.E. degrees from the Department of Language & Literature, Tianjin Foreign Studies University, China, in 1981. He is a Professor in the Software School of Dalian University of Technology, China. His current interests are in Computer Supported Collaborative Learning and Japanese Language Learning.

Ruey-Shiang Shaw is an associate professor of the Information Management department and the director of TKU incubation Center at Tamkang University in Taiwan. He received his Ph.D. in Business Administration of Management Sciences from Tamkang University. His current main research areas are information education, information security awareness, IT Governance, and IT Service Management.

Ru-Shuo Sheu is an Associate Professor and Head of Department of Travel Management at Hsin-Wu Institute of Technology. He is also an Associate of the Society of Actuaries (ASA). Ru-Shuo obtained MSc in statistics from Iowa State University and PhD in statistics from the University of Auckland. He lectured at Chinese Culture University and Kainan University for a number of years before joining Hsin-Wu Institute of Technology in 2009. His current research interests include stochastic networks and queueing theory.

Yanwei Song is currently working toward the Ph.D. degree in computer software and theory in Shandong University, Jinan, China. His main research interest is workflow management.

Kathleen A. Stirbens received her MBA from Indiana University of Pennsylvania in 1984. She has worked in the private sector, and in government positions including Holmes County Auditor’s IT department in Ohio. She has been on the faculty of Kent State University at Stark since 1993, teaching in both the Business department and the Computer Science department. She is currently working on her MS degree in Computer Science. Her research interests include online teaching methods, distance learning and web programming. Professor Stirbens is a member of the IEEE Computer Society.

Yuichi Takahashi is a director of a software company at foreach ltd., Japan. His current research interests include Human Computer Interaction, Service Engineering, Software Engineering, Pair Programming and Open Source Software community. He received his undergraduate degree and postgraduate degrees in engineering at Tokyo University of Science. He is a one of the developer of an Open-source Software such as Learning Management System, CFIVE and Unit testing tools, WebUnit. He has presented his research at many international conferences in the USA, Tiwan and Europe.

Hui-Wen Vivian Tang, Associate Professor of the Department of Applied English at Ming Chuan University. Her current research focuses on leadership development, globalization process, emotional intelligence, and cross-cultural studies. In 2007, she co-authored a study on “projecting school enrollment using grey prediction”, which won the third place award in overall doctoral research category at the Texas A&M University System Research Symposium. Recent publications include “emotional intelligence

Yong Tang has long been engaged in research, development and teaching of computer science in Department of Computer Science as a professor, Sun Yat-Sen University. He earned a BSc in Computer Science from Wuhan University (China, 1985), a MSc (Eng) in Computer Science from Wuhan University (China, 1990), and a PhD (Eng) in Computer Science from University of Science and Technology of China (in the Graduate School at Beijing) (China, 2001). His major fields of study include computer science and its applications.

Yuki Terawaki is a research associate in the Research Center for Computing and Multimedia Studies at Hosei University, Japan. Her current research interests include Requirements Engineering, Software Engineering, Operations Research, Text mining, and Open Source Software community. She received her undergraduate degree in engineering at Tokyo University of Science and her postgraduate degrees in Interdisciplinary Information Studies at the University of Tokyo. She is a one of the developer of an Open-source Learning Management System, CFIVE. She is a member of ACM. She has presented her research at many international conferences in the USA, Japan and Europe.

Thrasyvoulos Tsiatsos is currently Lecturer in the Department of Informatics, Aristotle University of Thessaloniki, Greece. He obtained his Diploma, his Master’s Degree and his PhD from the Computer Engineering and Informatics Department of Patras University (Greece). His research interests include Networked Virtual Learning Environments, Computer Uses in Education, Evaluation methods of Internet Learning Environments and Open and Distance Education using Multimedia and Internet Technologies. He has published more than 90 papers in Journals and in well-known refereed conferences and he is co-author in 3 books. He has been a PC member and referee in various international journals and conferences. He has participated in various national and European R&D projects in the area of e-learning.

Li-Jyu Wang was a Master of Arts Degree graduated from Chaoyang University of Technology in Taiwan. She is an administrative assistant working on center for teaching and learning development in Aletheia University in Taipei, Taiwan. Ms. Wang’s research was included in English Teaching and Language Assessment.

Xinheng Wang obtained his BSc and MSc degrees from Xi’an Jiaotong University in China in 1991 and 1994, and PhD degree from Brunel in 2001, respectively. He was a postdoctoral research fellow at Brunel University and Kingston University and a senior lecturer at Kingston University until September 2007. He then joined Swansea University as a senior lecturer in wireless communications. He is currently leading the Intelligent Wireless Networks for Healthcare (IWinHealth) research group in School of Engineering of Swansea University. His current research interests include wireless mesh and sensor networks, software defined radios, mobile computing, and applications of wireless networking technologies in healthcare.
**Moji Wei**, born in 1981, Ph.D. candidate in Department of Computer Science, Ocean University of China. Moji Wei graduated from Shandong Economic University in 2005 with a Bachelor Degree in information management and information system, and then he earned a Master Degree in management science and engineering from Shandong Economic University (China, 2008). His current research interests are Semantic Web, knowledge representation and reasoning, ontology theory and application, web service about digital home.

**Joseph Williams** is graduating in Spring 2011 with a BS degree in Integrated Mathematics and a minor in Computer Science at Kent State University. His research interests include eLearning and web programming. Joseph Williams plans to continue his education by pursuing his Master and Ph.D. in Mathematics.

**Jing Xiong**, born in 1979, received his Ph. D in computer application technology from Ocean University of China in 2010, advised by Prof. Jianliang Xu on the topic of Research and Application of Marine Ecology Ontology Modeling. Now He is a lecturer in Anyang Normal University. His main research interests are Semantic Web, knowledge representation and reasoning, ontology theory and application.

**Jianliang Xu**, born in 1969, received the B.E. and M.E. degrees in software engineering from Shandong University, China, in 1991 and 1994 respectively, and the Ph.D. degree in system engineering from Yamaguchi University in 1998. From 1998 to 2001, he was with NEC Soft, Ltd. He is presently a professor in the Department of Computer Science and Technology, Ocean University of China. His research interests include automata theory, computational complexity and semantic web.

**Yong-Jian Yan** is an undergraduate student of South China Normal University majoring in Educational Technology. He is a member of a team of the Chinese College Student Innovation Experiment on the development of intelligent search engine. Currently, he is participating in the ACM/ICPC Programming Contest. His research interests are algorithm design and computer programming.

**Kazuo Yana** received the B.S. M.S. and Ph.D. degrees from Waseda University in 1974, 1976 and 1979 respectively. He continued research in the field of biomedical engineering as a research associate at Juntendo University, Tokyo. Since 1984 he has been with HoseiUniversity, Tokyo. He was a visiting associate professor at MIT in 1989-1990. He is currently a professor of applied informatics, faculty of science and engineering Hosei University. His research areas of interest are digital signal processing, biomedical engineering and distance education technology. He is a member of IEEE, The Institute of Electronics, Information and Communication Engineers, Japan Society for Medical and Biological Engineering and Japan e-Learning Association. He is the editor in chief of the International Journal of Bioelectromagnetism.

**Shu-Ching Yang** is an Assistant Professor in the Department of Accounting Information at Aletheia University, Taiwan. She took her Ph.D. Degree in educational computing technology from Barry University, U.S.A. and MS Degree in Management Information System from the Fairleigh Dickinson University, U.S.A. She is invited as a reviewer in issue related to Educational Technology by National Science Council. Her areas of Interest are PBL, program evaluation, Collaborative learning in pedagogical technology, learning styles and technology, instructional delivery systems, adult learning.
About the Contributors

Yoneo Yano is currently a full professor at the Faculty of Engineering. He received his B.E., M.E., and Ph. D degrees in communication engineering from Osaka University, Japan, in 1969, 1971, and 1974, respectively. Since 1974 he has worked as a research associate at the Dept. of Information Science and Intelligent Systems, Tokushima University, Japan. He was a visiting Research Associate at the Computer-Based Education Research Lab, University of Illinois, USA. He is currently the president of APSCE (Asia-Pacific Society for Computers in Education) from 2008, and a vice president of JSET (Japanese Society for Educational Technology) from 2005. His current interests are in technology enhanced learning and e/u-Learning. He is a member of the IEICE, JSET, JSiSE, AACE and a senior member of IEEE.

Cherng-Jyh Yen is an Assistant Professor of Educational Research and Statistics at Old Dominion University. Previously, he served as a Quantitative Research Methods faculty at the George Washington University. Dr. Yen holds an M.S. in Counselor Education from Indiana University, Bloomington, and Ph.D. in Educational Research from the University of Virginia. His main research interests are in the applications of research designs and statistical analyses in educational studies. In the past, he collaborated with colleagues on research projects of test validation using Structural Equation Modeling (SEM), and multilevel modeling of longitudinal data in the Special Education Elementary Longitudinal Study (SEELS) using Linear Mixed Models (LMM). As a result, various presentations have been made in national conferences, such as AERA annual conference. Papers also appear in different peer-reviewed journals, such as Journal of School Psychology, International Journal on E-Learning, and Quarterly Review of Distance Education.

Chengjiu Yin received his M.E. and Ph. D degrees from the Department of Information Science and Intelligent Systems, Tokushima University, Japan, in 2005 and 2008. He is an Assistant Professor in the Research Institute for Information Technology, Kyushu University. Currently he is committing himself in mobile learning, ubiquitous computing, language learning and SNS. He received the best paper award from ICIE in 2009. Dr. Yin is a member of JSiSE, JSET, and APSCE.

Mu-Shang Yin is an Associate Professor of the Department of Travel Management at Hsin-Wu Institute of Technology. His research focuses on web-based learning environment, multiple attribute decision making and grey system theory. In 2007, he co-authored a study on “projecting school enrollment using grey prediction”, which won the third place award in overall doctoral research category at the Texas A&M University System Research Symposium. Recent publications include “the impact of organizational culture on self management: information technology versus service-type business” published in the Proceedings of 2008 International Conference on Business and Information Management, and “emotional intelligence characteristics of IT professionals in Taiwan” published in the Proceedings of 2008 IEEE International Symposium on IT in Medicine and Education.

Hongyan Yun, born in 1971, Ph. D. candidate in Department of Computer Science, Ocean University of China. Associate professor of the College of Information and Engineering, Qingdao University. She graduated from North West University (Xi’an, China) in 1993 with a Bachelor Degree in computer software, and then she earned a Master Degree in computer software and theory from North West University in 2000. Her current research interests are Semantic Web, knowledge representation and reasoning, ontology theory and application.
Liqiang Zhao obtained his PhD degree in communication and information systems from Xidian University, China in 2003. Currently, he is a professor within State Key Laboratory of Integrated Services Networks (ISN), Xidian University. His research focuses on broadband wireless mobile communications and green communications. Moreover, he is researching inter-disciplinary topics, e.g., introducing game theory from mathematics and economics into broadband wireless access, and green networks. He has been awarded more than 8 projects funded by a number of sources, e.g., Europe, Chinese government and direct industrial funding. His participation in various projects has yielded a number of concrete results including enormous high-level publications, patents, etc. Due to his excellent works in education and research, he was awarded by the Program for New Century Excellent Talents in University, Ministry of Education, China in 2008.

Changle Zhou, professor, PhD supervisor, is the dean of College of the Information Science and Technology in Xiamen University, the chief editor of “Mind and Computing” and the director of Xiamen University Art Cognitive and Computational Laboratory. He received his PhD from Peking University in 1990. His research interests lie in the areas of artificial intelligence, especially computational linguistics, brain theory and computational musicology with an emphasis on computational models for metaphor, awareness and creativity, and intelligent techniques for Traditional Chinese Medicine information processing. His philosophical works lie in ancient oriental thoughts of Chinese, such as ZEN, TAO, YI etc., viewed from science.

Zhi-Ting Zhu is currently working as a professor in college of Net-based Education, East-China Normal University, P.R China, and is also an adjunctive professor of Beijing Normal University. His research interests involve web-based education, knowledge management technology and instructional system design. Prof. Zhu graduated from Mathematics Department at East China Normal University (China, 1974), and received a PhD (Eng) in educational technology from Twente University, Netherlands in 1996.
