Index

A
A* algorithm 45, 238
accelerating nodes 230, 233, 254-258
neighboring nodes 233, 254
sudden blockage 254
Artificial Intelligence (AI) 2
intelligent robotics 2, 25
artificial neural networks 198
Learning 145
Multi-Layer Perceptron (MLP) 144
perception 143
artificial potential fields 54, 56, 71, 73-74, 76, 281

B
Bellman Ford Algorithm 54, 56-60, 70, 73, 76
Bezier Curve 93
Breadth First Search (BFS) 39

C
coarser-level planning 229, 238
coarser map 218, 232
coarser path planning 193
computation time 35
curve smoothing 92
diffusion 31

d
D
D* algorithm 26, 49, 51, 53, 284
Darwin, Charles 78
Defense Advanced Research Projects Agency (DARPA) 55
Depth First Search (DFS) 41
Dijkstra’s Algorithm 59
dynamic obstacles 221
Dynamic Programming (DP) 56-57

E
evolutionary algorithms 238

evolutionary computing 100
Evolutionary Algorithms (EA) 154, 158, 178, 200
evolutionary robotics 77, 79, 94, 97, 99-100, 124, 192
evolutionary strategies 77, 79, 94-95, 97, 99, 101, 111
adaptation 95
mutation 95
Execution Extended RRT (ERRT) 64

F
fuzzy inference systems 126, 128, 134, 145, 150, 231-232
defuzzification 134
fuzzy sets 126, 128, 130, 134, 150-152
membership function 129
fuzzy operators 130
fuzzy planner 231

G
Gaussian Mutation 122
Genetic Algorithm (GA) 79, 230, 232, 250
real coded 83
genealogic optimizations 239
Genetic Programming (GP) 110
path planning 121
Index

Grammatical Evolution (GE) 117
Backus-Naur Form (BNF) 118
grammar 119
graph search 36
graph search algorithms 27

H
heuristic cost 44-45, 60, 170, 238
heuristics 43
hierarchical evolutionary algorithm 191, 215-216, 220
hierarchical path planning 190, 194, 258
hierarchical planning 18, 159, 190, 234, 285
Hybrid Genetic Algorithm Particle Swarm Optimization (HGAPSO) 191-192, 211-212
hybridization 155-156, 187, 190, 192-193, 226, 231, 285

L
Linear Discriminant Analysis (LDA) 12
localization 16
Global Positioning Systems (GPS) 16

M
mobile robots 5
momentum 198
motion planning 20-21, 23, 26-27, 31, 34, 39, 42, 44-45, 54, 78, 83, 101
Motion Planning Rapidly Exploring Random Trees (RRTs) 60
motion planning tests
no obstacles 32, 162, 164, 168, 171-172, 186-187, 235, 240
scalability 172-173, 175
scattered obstacle 172, 245
single obstacle 171, 174, 186-187, 203, 240
Multi-Neuron Heuristic Search (MNHS) 47, 154, 156
hierarchical MNHS 160
multi-objective optimizations 196, 208
multi-resolution path planning 194, 285
multi-robot coordination 19, 260, 274-275, 279
multi-robot system problems
path planning 271
RoboCup 259, 270, 278, 280
robotic formation 270
robotic swarms 259, 269, 278
tasking 268
multi-robot systems 264
centralized 275, 277
communication 267
cooperation 266
decentralized 276

N
neural dynamics 150
Neural Networks 139
Artificial Neural Networks 52, 124, 126, 142, 151, 153, 159, 189-190, 198, 228, 284
neuro-fuzzy controller 160, 233
non-holonomic constraints 4, 22, 25, 31, 79, 92, 94, 97, 194, 197, 230-232, 244, 256, 284, 287

O
occupancy grids 13-14
optimization 78

P
path optimality 51
planning algorithm 21
Principle Component Analysis (PCA) 12
Printed Circuit Board (PCB) 4
probabilistic fitness 170
Probability-Based Incremental Learning (PBIL) 108

R
real time environments 150
Reinforcement Learning (RL) 72
Q-Learning Algorithm 72
robotic mapping 15
Voronoi Maps 15, 73
robotic planning problems 260
complete coverage 261
maze solving 261
pursuit evasion 259, 261, 263, 278
robotics
academic school of thought 283-285
Applications 7
artificial limbs 8
autonomous 5
humanoid 4
industrial school of thought 283
planning 17
Unmanned Aerial Vehicles (UAVs) 6

305
Index

S
Sense-Plan-Act 3-5, 10, 13, 17, 21, 25
sensor fusion 13
Simple Genetic Algorithm (SGA) 81
crossover 85
scaling 84
selection 84
swarm intelligence 100-102, 109, 122, 125, 228
Ant Colony Optimization (ACO) 104
Artificial Bees Colonies (ABC) 107
Particle Swarm Optimization (PSO) 102
path planning 109

T
trajectory generation 17

U
uniform cost search algorithm 45
uniform stochastic selection 180
