About the Authors

**Lawrence M. Oliva** is director of Infrastructure Project Management for the CSC PRIME Alliance Project, which is focused on modernizing many of the U.S. Treasury Department’s communications and computing infrastructure. He has more than 25 years of experience with information security practices and procedures from both the technical and executive management perspectives, and has implemented many of the security management best practices mentioned in this book. As a certified project management professional (PMP), Oliva has managed several extraordinarily high-risk, mission-critical projects up to $160 million in budget. As vice president for a computer security firm developing biometric security solutions, his team developed and delivered procedures to quickly, securely and inexpensively migrate hundreds of financial and health care IT users from password-only conditions to multi-factor, high security biometric access environments. He is a faculty member at the University of Phoenix.

**Chrisan Herrod** is serving as both department chair of the Information Operations and Assurance Department where she is responsible for curriculum, including information security, assurance, and operations and as a professor of Information Security and Systems Management. Previously she was director of Global IT Security at GlaxoSmithKline (GSK), a large pharmaceutical company, and she was director of Information Security at Fannie Mae. While at Fannie Mae she became involved in the White House sponsored Partnership for Critical Infrastructure Security as the Information Sharing and Analysis Working Group Chair, and is currently serving as a special advisor to the Health Care Industry Information Sharing and Analysis Center initiative. She is an adjunct professor teaching information security and leadership courses with both the University of Fairfax and the University of Phoenix. From 1999 to 2001, she taught information security graduate courses at the George Washington University.

**Craig E. Kaucher** is a professor of Information Operations and Assurance at the National Defense University. He served in a variety of security and systems management assignments from the tactical to the strategic level, and in the U.S. Intelligence community, over a 21-year career of military service. He holds a BA in Communications from Temple University, an MS in Software Engineering Administration from Central Michigan University, and is currently pursuing a PhD in Information Systems. He also holds the Department of Defense CIO and CISO Graduate Certificates, and is a certified information security manager (CISM). He has published articles on various aspects of information security, and has spoken at numerous government and industry conferences.

**LTC Clifton H. Poole**, CISSP, CISM, IAM, is a 20-year veteran of the U.S. Army. Clifton H. Poole currently instructs information assurance, policy development, security standards and wireless security at the Infor-
Information Resources Management College, National Defense University, Washington, DC. He was featured in the *Washington Post* newspaper (2003) for his research in wireless computing as he war drives the area mapping local wireless access points. He is a doctoral student in the Graduate School Computer and Information Sciences, NOVA Southeastern University.

Charles Rex IV is the chief information officer and director of academic operations at the National War College in Washington, DC. He received a bachelor’s degree from the Virginia Military Institute, an MBA from the University of Phoenix, and holds the chief information officer certification and Information Assurance certification from the Information Resources Management College at the National Defense University. Mr. Rex owns a business consulting firm and is a member of the faculty at the University of Phoenix.
