About the Contributors

**Felix B Tan** is Professor of Information Systems and Chair of Business Information Systems discipline at Auckland University of Technology (New Zealand). He serves as the Editor-in-Chief of the Journal of Global Information Management. He is on the Executive Council and is Fellow of the Information Resources Management Association. He was also on the Council of the Association for Information System from 2003-2005. Dr. Tan’s current research interests are in electronic commerce, global information management, business-IT alignment, and the management of IT. Dr. Tan has published in MIS Quarterly, Information & Management, IEEE Transactions on Engineering Management, IEEE Transactions on Personal Communications, Information Systems Journal, Journal of Information Technology, International Journal of Human-Computer Interaction, International Journal of Electronic Commerce, as well as other journals and refereed conference proceedings. Dr. Tan has over 25 years experience in information systems management and consulting with large multinationals, as well as university teaching and research in Singapore, Canada, and New Zealand.

***

**Pamela Abbott** is a lecturer in the Department of Information Systems and Computing, Brunel University, UK. She obtained her Ph.D. at the Judge Business School, University of Cambridge, UK. Her research interests include implications of information systems use, implementation and development in developing countries, socio-cultural implications of the globalisation of information technology, and discourses on globalisation and the organisation of work practices such as offshore outsourcing. She has published papers in journals such as Communications of the ACM and MIS Quarterly Executive.

**Shizhong Ai** is a Ph.D. candidate and Associate Professor at Xidian University, China. He holds a Master Degree from Northwestern Polytechnical University, China. During 2006-2007, he worked as a visiting researcher in the Quinn School of Business, University College Dublin, Ireland. His research interests include knowledge management and decision science. He has published papers in journals such as International Journal of Information Technology & Decision Making, European Journal of Operational Research, and Expert Systems with Applications.

**Bongsug (Kevin) Chae** is Associate Professor in the department of management at Kansas State University. He has consulted global manufacturing firms in IT & SCM. His research & teaching areas include complex adaptive systems, service sciences, business analytics, and global IT & SCM.
About the Contributors

Suranjan Chakraborty is an assistant professor in the Department of Computer and Information Sciences at Towson University. He also has prior industry experience, having worked for seven years in Wipro Technologies. His research interests include requirements engineering, behavioral processes in ISD, distributed ISD, and use of qualitative methods in IS research. His research has been published (or accepted for publication) in Decision Sciences Journal, Journal of Association of Information Systems, European Journal of Information Systems, Decision Support Systems, and Group Decision and Negotiation. His work has also been presented or appeared in the proceedings of ICIS, AMCIS, HICSS, ECIS, and the annual SIG-ED conference.

Patrick Y. K. Chau is a Professor of Information Systems at the University of Hong Kong. He received his Ph.D. in business administration from the Richard Ivey School of Business at the University of Western Ontario, Canada. His research interests include IS/IT adoption and implementation, information presentation, knowledge management and IT outsourcing. He has published papers in journals like MIS Quarterly, Communications of the ACM, Journal of the AIS, Journal of Management Information Systems, Decision Sciences, Information and Management, Decision Support Systems, Journal of Global Information Management, and among others.

Dam Hieu Chi is a Lecturer in the Graduate School of Knowledge Science of Japan Advanced Institute of Science and Technology (JAIST), Japan. Dam Hieu Chi graduated from the University of Tokyo in 1998 with BA in Physics. He has obtained his doctoral degree in Physics in 2003 and worked as a lecturer in the Graduate School of Knowledge Science of JAIST since 2005. His current research interests include the Fusion of Natural and Social Sciences.

Rong Du is Professor of Management at Xidian University, China. She received her Ph.D. in Applied Mathematics from Xidian University. In the past years, she worked as a visiting professor in the Department of Information Systems and Computing, Brunel University, UK. and the Quinn School of Business, University College Dublin, Ireland. Her research interests include knowledge management, marketing and cross-cultural management. Her publications appeared in journals such as the European Journal of Operational Research and Expert Systems with Applications. She is a scholar selected into the New Century’s Excellent Talent Supporting Program by the Ministry of Education in China.

Simon Fraser is a lecturer in information systems at The University of the West Indies in Trinidad and Tobago. Prior to returning to academia he held senior management positions in Fujitsu-ICL, the Tourism and Industrial Development Company of Trinidad and Tobago and managed a group of Internet Service Providers. Since returning to academia his research interests have centered on electronic commerce, information security and learning management systems.

Haiyan Huang is a graduate of the Pennsylvania State University (Ph.D. in Information Sciences and Technology). Her research and teaching interests include global information systems development, global IT offshore outsourcing, virtual teams, computer supported cooperative work and learning, knowledge management, knowledge economy, and global IT workforce development. She has published journal articles, book chapters and conference papers in these areas. She is current working at Purdue University Calumet.
**Shin-Yuan Hung** is Professor and Chair of Department of Information Management at National Chung Cheng University in Taiwan. He was a visiting scholar of the MIS Department at the University of Arizona during summer 2007-spring 2008. Prior to the leave, he had been the Secretary General of the same university. Dr. Hung received his bachelor degree in Statistics from the National Chung Hsing University and his master and doctoral degrees in Information Systems from the National Sun Yat-sen University. His current research interests include decision support systems, knowledge management, electronic commerce, and data mining. He has published a number of papers in Decision Support Systems, Information & Management, Electronic Commerce Research and Applications, Information Technology & People, Communications of the AIS, Journal of Global Information Management, Journal of Organizational Change Management, Government Information Quarterly, Pacific Asian Journal of Association for Information Systems, among others.

**Wei-Hsi Hung** is an Assistant Professor of Information Management at National Chung Cheng University, Taiwan. He received his Ph.D. and Master degree (with 1st Class Hons) from the Department of Management Systems at the University of Waikato, New Zealand. His research interests are in the areas of B2B e-commerce, IS alignment, and supply chain management. His research papers appeared in journal such as Decision Support Systems, Journal of Information Management, and Pacific Asian Journal of Association for Information Systems.

**Nguyen Thu Huong** is currently a doctoral student at Graduate School of Knowledge Science, Japan Advanced Institute of Science and Technology in Japan. She received a bachelor in international trade from Hanoi Foreign Trade University, Vietnam (2003) and master degree in Knowledge science at Graduate School of Knowledge Science, Japan Advanced Institute of Science and Technology. She has been working at Hanoi Foreign Trade University as a International Marketing lecture for 3 years (2003-2005). Her research interests include Knowledge Management, Cross-cultural management, Inter-organizational management and Offshore Outsourcing relationship.

**Jau-Jeng Jou** is a doctoral student of Information Management, National Sun Yat-Sen University, Taiwan. His research interests include supply chain management, knowledge management, and e-commerce.

**Suwan Juntiwasarakij** is a PhD candidate in the College of Information Sciences and Technology at The Pennsylvania State University where he is a Royal Thai Government Science and Technology Scholar. His research and teaching interests include global information systems, the knowledge economy, knowledge management, conversational knowledge management, and collaborative intelligence for innovation.

**Rüdiger Kabst** is Professor of Business Administration specializing in Human Resource Management, Small and Medium Sized Enterprises, and Entrepreneurship at the University of Giessen/Germany. He had been a visiting researcher at the University of Illinois/Urbana-Champaign in 1996, at the University of California/Berkeley in 2001, and at EWHA University in Seoul/South Korea in 2006. His research interests include international comparative human resource management, expatriate management, hu-
human resource practices (e.g. outsourcing, downsizing, interim-management, working time flexibility, work-family-practices, eHRM, employer branding), interfirm cooperations (e.g. joint ventures), young technology start-ups, international entrepreneurship, and internationalization of medium sized enterprises.

**Umemoto Katsuhiro** is a Professor in the Graduate School of Knowledge Science of Japan Advanced Institute of Science and Technology (JAIST), Japan. Katsuhiro Umemoto graduated from Kyushu University in 1975 with BA in Economics. He has worked as research associate for Ikujiro Nonaka at Hitotsubashi University and obtained his doctoral degree in public policy from George Washington University in 1997. His current research interests include knowledge management in non-business sectors such as public administration, health care, social welfare, NPOs, etc. He was a member of the project for the Knowledge-Creating Company that initiated the knowledge management movement and has translated the book into Japanese. He has also translated Davenport and Prusak’s Working Knowledge and Nancy Dixon’s Common Knowledge, worldwide bestsellers in the field of knowledge management.

**Jeffrey Katz**, is Dean and Professor of Management at Western Kentucky University’s Gordon Ford College of Business (effective in June 2011). A former Fulbright Scholar, his research focuses on global competitors, strategic decision making and corporate governance. His doctorate is in management from the University of Florida’s Warrington College of Business Administration. He is a past president of the Midwest Academy of Management. He may be contacted at jeffrey.katz@wku.edu.

**Wen Ting Lee** is a doctoral student of Information Management at National Chung Cheng University in Taiwan. She received her Masters’ degree of Healthcare Information Management at National Chung Cheng University in Taiwan. Her research interest mainly focuses on knowledge management.

**Robert J. McQueen** is Professor of Electronic Commerce Technologies at the Waikato Management School, University of Waikato. He holds a PhD from Waikato, a MBA from the Harvard Business School, and a BApSc in electrical engineering from The University of Waterloo. His research interests are in electronic commerce, computer mediated group communication, and technology support for tacit knowledge building in individuals.

**Ranganadhan Nadadhur (Ranga)** is a Principal Consultant in Talent Transformation, Wipro Technologies. He has worked on several IT projects for Fortune 500 customers globally in the roles of Business Analyst, Architect and Account Manager. He has over seventeen years of professional experience in the IT industry. In his current role as a hands-on trainer for the last five years, he has trained and coached more than three thousand project managers, delivery managers, architects and project leads in the areas of Requirements Gathering, Requirements Modeling and Requirements Change Management. His interests are primarily in better management of Software Requirements for successful delivery of software.

**Alain Pinsonneault** is a James McGill Professor and the Imasco Chair of information systems in the Desautels Faculty of management at McGill University. His current research interests include the organizational and individual impacts of information technology, user adaptation, ERP implementa-
About the Contributors

J. Bruce Prince is a Professor of Management at Kansas State University where he has been since 1995. He research focuses on human resource management with particular interests in global strategic HRM, high performance work systems, performance management and employee development and career processes. He received his Ph.D. from the Marshall School of Business at the University of Southern California and was previously on the faculty at Concordia University in Montreal.

Wen Guang Qu is a research fellow in the School of Management at Zhejiang University, China. He received his Ph.D in information systems from McGill University. His research interests include IT business value, IT outsourcing, inter-organizational systems, and IT issues at macro level. His work has been published in Technovation, R&D Management (Chinese), Americas Conference on Information Systems, Pacific-Asia Conference on Information Systems and other conferences.

Sudhanshu Rai received his PhD from the Copenhagen Business School. He has two Masters Degrees, one in International Economics, Banking and Finance from The University of Wales and the other in Economics from the University of Copenhagen. He has also been a visiting research fellow at the London School of Economics. He was a key member of the Euro-India team that successfully completed the Innovation Mapping project, a first of its kind aimed at scientifically and systematically mapping ICT Innovation in India. His main research interests are ICT Innovation in emerging economies, co-creation of innovation and knowledge management, ICT for development, Institutional logics and Indian logics.

Saonee Sarker is currently an associate professor in the Department of Information Systems at Washington State University. Professor Sarker received her Ph.D. in Management Information Systems from Washington State University, and an M.B.A. from the University of Cincinnati prior to that. Her research focuses on globally distributed software development teams and other types of computer-mediated groups, technology adoption by groups, technology-mediated learning, and information technology capability of global organizations, and has appeared (or scheduled to appear) in outlets such as MIS Quarterly, Information Systems Research, Decision Sciences, Journal of the Association of Information Systems, Journal of Management Information Systems, Decision Support Systems, and Journal of Computer-Mediated Communication.

Suprateek Sarker is a Professor and Philip L. Kays Distinguished Professor of Information Systems at Washington State University. Until recently he held the Microsoft Chair of Information Systems at Copenhagen Business School, Denmark. Much of his research has involved the use of qualitative research approaches, including positivist or interpretive case studies, grounded theory methodology, hermeneutics, and virtual ethnography to study phenomena such as IT-enabled organizational change, ERP implementation, offshoring, and virtual and mobile collaboration. He is currently serving on the editorial boards of journals such as MIS Quarterly, Journal of the AIS, IEEE Transactions of Engineering Management, IT & People, IT for Development, and JITCAR.
About the Contributors

Peijian Song is an Assistant Professor at School of Management, Nanjing University. He received his Ph.D. in management science from Fudan University in 2009. His research interests include information technology innovation adoption and diffusion, information technology in supply chain. His work has been published in IEEE Transactions on Engineering Management, Decision Support Systems and conferences such as ICIS and AOM.

Larry Stapleton is director of the Centre for Information Systems & Techno-culture (INSYTE) at Waterford Institute of Technology, Ireland and is founder of “Knewfutures”. He holds several visiting positions including visiting professorships at the Technical University of Vienna and the University of Business and Technology in Kosovo. He has published over sixty academic papers, drawing on research involving hundreds of companies. He advises the European Commission and a number of national governments. Published research topics and advisory work include values and visioning, information systems development, the relationship between culture and IT, technology management and technology adoption in developing countries.

Angsana A. Techatassanasoontorn is an Assistant Professor of Information Sciences and Technology at the Pennsylvania State University. Dr. Techatassanasoontorn’s research is concerned with theory building and empirical analysis on ICT-enabled social innovations, the adoption and diffusion of technology, technology policy, and technology-mediated learning. She has published in IEEE Security & Privacy, Information Technology and Management, Journal of the Association for Information Systems, and Telecommunications Policy. Her research has been supported by grants from ACM SIGCSE, the Commonwealth Fund Foundation, Microsoft, the National Science Foundation, and Qualcomm.

Eileen M. Trauth is Professor of Information Sciences and Technology, Women’s Studies, and International Affairs at The Pennsylvania State University. Dr. Trauth’s research is concerned with societal, cultural and organizational influences on information technology and the information technology professions with a special focus on the role of diversity and social inclusion. Her research has been supported by two Fulbright Scholar Awards, and grants from the National Science Foundation, the Australian Research Council and Science Foundation Ireland.

Chia-An Tsai is a doctoral student in the Department of Information Management at National Chung Cheng University in Taiwan. His research interests include issues related to IS/IT adoption, project management, electronic commerce, and knowledge management. He has papers forthcoming in journals such as Decision Support Systems and Journal of Global Information Management.

Ke Wang is an Assistant Professor at School of Management, Fudan University. He received his Ph.D. from Ohio State University in 2009. His research interests cover design and analysis of discrete choice experiments, spatial statistics, and statistical methodology in business and industry applications. He has published in Journal of Statistical Planning and Inference, Statistics and Probability Letters and other journals and conferences in statistics field.
About the Contributors

William Wresch is a professor of Information Systems at the University of Wisconsin Oshkosh. His PhD is from UW Madison. In the 1970s he was a Peace Corps volunteer and worked in a health center in Korea. In 1993 he was a Fulbright Scholar and taught Computer Science at the University of Namibia in southern Africa. His book about the uneven impact of the Internet, Disconnected: Haves and Have Nots in the Information Age, was published by Rutgers University Press in 1996. He has authored a number of articles on the economic development implications of information technology.

Ling Xue is an Assistant Professor at the Kania School of Management, University of Scranton. He received his Ph.D. in Information Systems from the University of Texas at Austin in 2007. His research interests include IT business value, IT governance, and IT security. He has published in Information Systems Research, International Journal of Electronic Commerce and Journal of Information Privacy and Security.

Cheng Zhang is an Associate Professor at School of Management, Fudan University. His current research interests include information sharing strategies, information technology diffusion and electronic markets. His works have been published by journals such as Decision Support Systems, Electronic Markets, IEEE Transactions on Engineering Management, International Journal of Electronic Commerce, International Journal of Production Economics, International Journal of Production Research, Journal of Global Information Management, Omega, and Simulation Modeling Practice and Theory, and conference proceedings such as ICIS and AOM.

Chenghong Zhang is an associate professor at School of Management, Fudan University. His research interests include information system planning and knowledge management. He has published in Electronic Markets, Journal of Global Information Management, IEEE Transactions on Professional Communication and Simulation Modeling Practice and Theory, and other information systems journals and conferences.

Yingqin Zheng is a Senior Lecturer at the Center of Computing and Social Responsibility at De Montfort University, UK and a Research Associate at the London School of Economics. She obtained her Ph.D at the Judge Business School, University of Cambridge, UK. Her research interests encompass the implications of information and communication technology in social development, information society and information culture, and distributed innovation. She has published papers in journals such as Information Systems Journal and Journal of Information Technology for Development.
