Index

A

any-time algorithm 259-260, 276
Artificial Neural Networks (ANN) 246
Association Rule Mining (ARM) 162
   Association Rules (ARs) 162
asymmetric coefficients 112, 115, 117-121

B

back-end testing 92

C

choropleth map
   classified 11, 17
   unclassified 11, 17
clustering subsequences 259-260, 276
Composite item Fuzzy ARM (CFARM) 163
Composite Itemset Value (CIV) 167
counting testing 92, 96
conformity test 97
cross visualisation operation 17
Cumulative Replacement Count (CRC) 151

D

data field 307
   equipotential lines 303, 307, 309-311, 313, 316, 319, 322
   field lines 305, 309
   impact factor 311
   mathematical model 308
   nuclear field 308
Data Mining Query Languages (DMQL) 24-25
data world 27
   model world 27
Data Publishing and Mining System (DPMS) 328
data streams 258-264, 268-271, 276-279, 282, 291, 297-298
damped window model 262
landmark window model 262
sliding window model 260-264, 269
data transformation 29, 280-281
   Extract-Transform-Load (ETL) 281
Data Warehousing
   near-real-time 280-281
Department of Homeland Security 46
Detailed Cost Saving Ratio (DCSR) 135
Directed Acyclic Graph (DAG) 138
discovery-driven analysis 66-67, 70-71, 82, 86, 88
datacubes 66-67, 70
drill-down differences 68-69, 72, 74, 76, 79, 81
DynaMat 132, 135-137, 139, 141, 150-157, 159
dynamic view materialization 132, 134, 157, 161
   Dynamic View Pool 139

E

early loading test 98, 102, 104
Extract, transform and load (ETL) testing 98

F

fact test 96
forced-error tests 99
Frank-Wolfe Theorem 249
frequent subsequences 259-268, 273
front-end testing 92, 99, 101
Fuzzy Association Rule 162, 165, 168, 170-171, 184
Fuzzy Multiple Criteria Linear Programming (FM-CLP) 246
Fuzzy Transactions (FT) 165
G
Geographical Information Systems (GISs) 11
GeoPKDD system 25-26, 33, 39
  algorithms manager 35
  controller 34
  database manager 33
  data constructor algorithms library 35
  model constructor library 36
  models interpretation 39
  object-relational database 33
  parser 34
  relation library 38
  transformation library 38

H
hierarchical clustering 37, 303-305, 318-319, 321-324
  Balanced Iterative Reducing and Clustering using Hierarchies (BIRCH) 304
  CHAMELEON based on clustering feature tree (CBCFT) 305
  Clustering Using Representatives (CURE) 304
  hierarchy test 97
homomorphic cryptographic methods 49
  public key encryption scheme 49
  secret sharing scheme 49-50
hybrid coefficients 112, 115, 120-121

I
impact analysis 103
incremental algorithms 260-262
integration test 92-93, 99
Inverse Distance Weighting 192
item weighting 187-188, 191, 203-204
linear local interpolation 4

L
Location-Based Services (LBS) 2
logical testing 98

M
maintainability testing 102
Markov chain model 139-141
MDX queries 66, 72, 82, 88
monotonicity property 264-266, 273-276
Moving Object Database (MOD) 2, 33
multi-criteria optimization 245
multidimensional databases 67, 70, 108
Multiple Criteria Mathematical Programming (MCMP) 246
Multiple Criteria Nonlinear Programming (MCNP) 246
Multiple Criteria Quadratic Programming (MCQP) 246

N
Network Application Simulator (NAS) 61

O
Online Analytical Processing (OLAP) 2
Open Source Security Testing Methodology Manual 100, 108

P
penetration testing 100
physical testing 100
Principal Components Analysis (PCA) 194
privacy 326
  guided approach 333
  naïve approach 333
  optimal approach 334
privacy attacks 325-326, 329
privacy-preserving clustering algorithm 51
  Secure Closest Cluster Computation 53
privacy preserving data mining 45-48, 65, 326-327, 345-346
Probabilistic Reasoning Query Predictor (PR_Q_Predictor) 142
  Bayes’ rule 144
  conditional probability 144
  Naïve Bayes’ rule 144
Pure Quantitative Transactional Database (PQTD) 211-212, 243

R
ratio rules
  Boolean Association Rules (BAR) 208-212, 217
  Weak Ratio Rules (WRR) 208-214, 217-218, 244
Recommended Daily Allowance (RDA) 175
recommender systems 66, 88-89
  collaborative filtering methods 66
  computing 78
  content-based methods 66
  processing 76
regression test 92, 96, 103
Regularized Multiple Criteria Linear Programming (RMCLP) 245, 247, 256
Relational OLAP (ROLAP) 95, 158
relation operators 30
roll-up factor 97
router mining 111
rule extraction algorithm 249
decompositional method 249-250
pedagogical method 249

S
secret sharing 46
Secure Multiparty Computation (SMC) 47
Select-Project-Join (SPJ) 140
Sequential Minimal Optimization (SMO) 315
similarity based searching 110
similarity coefficients 109-113, 117, 120-122
accuracy calculation 114
evaluating 113
matrix 113
precision calculation 114
recall calculation 114
software artifacts 110, 112, 114, 121
Spatial Data Warehousing (SDW) 17
spatial neighborhood 110
Spatio-Temporal Data Warehouses (STDW) 17
Static View Pool 139
stream-based join 280, 282, 286, 297
Double Pipelined Hash Join (DPHJ) 283
Early Hash Join (EHJ) 283
Hash-Merge Join (HMJ) 283
Hybrid Join (HYBRIDJOIN) 280, 286
Index Nested Loop Join (INLJ) 280-281, 283, 286, 293
Mesh Join (MESHJOIN) 280, 283
symmetric hash join (SHJ) 283
Support Vector Machines (SVMs) 246
symmetric coefficients 112, 115, 118-120
synthetic datasets 112-114, 118, 179, 196, 293

T
Term Frequency–Inverse Document Frequency (TF-IDF) 188, 197
test coverage 104
text mining 188-189, 196-199, 203, 205-206
time series data mining 327
Trajectory Data Warehouse (TDW) 2
distributive 9
holistic 9
Visual 1, 3
trajectory reconstruction 1, 3-5, 28
cell-oriented (COA) 8
trajectory-oriented (TOA) 8
transformation operators 29

U
uncertainty reasoning 208, 210, 215, 237, 239, 241-243
unit test 92-93, 99

V
Valency model 187-189, 192-200, 203-204
view selection 134
dynamic technique 132, 134, 157, 161
static technique 134

W
Web Usage Mining 71
Weighted Association Rule Mining (WARM) 187, 189-190, 199
