Index

3G mobile phones 182-183, 185-186, 192-193

A
acoustic OFDM 90-103, 185, 206
acrostic 352-353
adaptive differential pulse code modulation (AD-PCM) 43
adjacent-block detection 318
advanced audio coding (AAC) 100
amplitude adjustment 22-27, 30
amplitude modulation (am) 44
amplitude overflow 32
analog domain 6
analogue robustness 207
analysis of variance (ANOVA) 55
Anoto 397
artificial fiber (AF) pattern 267
attack characterization 11, 16, 125
attacks 336
averaging 337-338, 341, 347-348
benchmark 432, 434
blind pattern matching (BPM) 433
collusion 337, 341, 348
frequency mode Laplacian removal (FMLR) 336
malicious 3, 6, 10, 42, 287, 294, 306-307, 336, 412, 425, 432, 436
multiple-image 335-338, 341-343, 347
single-image 336, 338, 341
attack tool 57
audible band 103
audio signal 73
Audition software 118
auditory brainstem response (ABR) 46
augmented reality (AR) 184

B
band extension method 15, 40, 69, 131, 154, 160, 164-165, 173, 177, 179-181
band-split filter 114
basic trace algorithm (BTA) 405
basilar membrane (BM) 45
benchmark tools 335-338, 347
bijection 371, 394
binary code 216, 351-353
bit-detection test 54, 58
bit error rate (BER) 117
bit-plane complexity segmentation (BPCS) 209-210, 218, 233
bit rate 72
bit replacement 5
blind watermarking 43-45, 53, 66, 75, 349
block-mapping sequence 314, 317-319, 325
Bogomjakov’s algorithm 378-379, 381

carruset transmission 96
cascade architecture 60-63, 65
cascading style sheet (CSS) 354
certification authority 306, 417, 420, 430, 439
color map 217, 373, 375, 382
circular linked list 365
CMY color 282
cochlea 45-47
cochlear delay (CD) 42, 45-51, 58, 61-62, 66-67, 127
codec 129
code-excited linear prediction (CELP) 5
color 217-219, 236
color reduction measure (CRM) 220
Index

command line-based user interface (CUI) 338
composite architecture 59, 62-65, 67
compressive sensing (CS) 311
conjugate image 211-212
context-free grammar 384, 386-387, 393-394
copyright protection 12, 18, 43, 72, 130, 185, 303, 351, 412-418, 420-422, 425, 427, 429-432, 434-439
cover generation 372-373, 384, 387, 389-390, 393
cropping test 298
cross-correlation 7-9, 26-27, 29-30, 107-108, 111, 113-114, 127
cryptographic one-way hash function 242, 247-248

data-dependent interchannel delay 107, 121
data detection 50-51, 58, 61, 63
data embedding 50, 60-61, 63
data-embedding pen 396-399, 401, 408-411
data hiding 258
data hiding capacity 262
deading 366
decision tree 392
de-correlation 127
dereference expansion (DE) 214
differential binary phase shift keying (D-BPSK) 94
digital archives 184
digital-audio watermarking 42-43, 45, 48, 50, 53, 58, 66
digital pen 397
digital signal signature (DSS) 415
digital watermarking 72
direct feature (DeFeat) based method 413, 420
directivity angle 94, 100
direct spread spectrum (DSS) 44
direct spread spectrum (DSS) method 116
 discrete cosine transform (DCT) 20
discrete wavelet transform (DWT) 226, 295, 311
distortion-free method 372, 394
dual auditory stream segregation 186-187

echo hiding 6

echo-hiding 7, 44, 52, 121
embedding limitations 42, 45, 58, 60-61, 63-66
emergency sirens 14
encoding 25
extended audio watermark 183, 194
extraction 74-75, 277
extraction rate (ER) 262
extraction ratio (ER) 83

F
fixed bit rate 129, 146, 160
flat fading 92
forward error correction (FEC) 96
four-connectivity neighborhood method 211
Fourier series 71, 76-78, 84-86
frame synchronization 8-9, 13, 26-27, 29, 38, 108, 110
frequency hopping 7
frequency masking 103
full wave rectification 173, 177, 180-181

G
G.711 129
Gabor filter 260-261
Geographic Information System (GIS) 435
grammar 359, 386, 389
guard interval (GI) 93

H
halftone dot mesh pattern 259-260
Hamming codes 194-195, 199, 207
handwriting 396
hash digest-based authentication 415
hidden description 247-248
highly efficient advanced audio coding (HE-ACC) 121
histogram expansion 19-21
histogram-preserving data mapping (HDPM) 222
histogram shifting 21
host signal 3, 6-7, 9-12, 22, 24-25, 28, 30-31, 34-36, 39-40, 72, 105, 107-108, 110, 116, 121-122, 130, 149, 237-238, 419-420, 422, 432
human auditory system 1, 105

I
image-dependent location map 240, 243
inaudibility 43
index image 210, 216-218, 235
infinite impulse response (IR) 42, 48
input speech 131-134
instruction set architecture (ISA) 367
integer Discrete Cosine Transform (intDCT) 22
integer Modified DCT (intMDCT) 22
intellectual property 207, 238, 413, 420, 432, 436
intensity ratio 270-275, 277-282

471
inter-aural coherence (IC) 107
interaural level difference (ILD) 107, 127
interaural time difference (ITD) 107, 127
interpolation 73
inverse fast Fourier transform (IFFT) 92
iterative deviation shrink algorithm 328-329

J
Java 193, 362, 365, 368, 370
JPEG2000 encoder 228
JPEG compression 222, 302, 304, 308, 319, 336-337, 348, 425-426
J-Steg 221

L
least significant bit (LSB) replacement 43
linear prediction 5, 19-20, 31, 38, 71, 76, 78-79, 84-87, 89, 127, 154, 161
line shifting 355-356
linguistics 356, 358
log spectrum distortion (LSD) 53
lossless compression 20
lossy compression-based formats 210
lowpass filtering 300, 304
luminance value 217-218, 235

M
machine translation (MT) system 358
Markov information source model 360
markup language 354
masking 44-45
mean opinion score-listening quality objective (MOS-LQO) 138
mean opinion score (MOS) 138, 173
median-cut color reduction algorithm 392
media signature scheme (MSS) 415
message embedding 306, 334, 354, 356, 359, 361, 376, 382
metadata 382
modified patchwork algorithm 13
modulation transfer function (MTF) 288
modulo operator 132, 377
monaural source acoustic signal 187
MPEG 1 Audio Coding Layer 3 (MP3) 128
multiple-stimulus hidden reference and anchor (MUSHRA) method 97, 119
museum guide system 183, 186, 200-201, 207
music scores 361, 369

N
neural network output 422
noise canceling 185-186
non-overlapping block 242
null cipher 352

O
objective difference grade (ODG) 28, 35, 54, 83-85
orthogonal frequency division multiplexing (ODFM) 91, 94, 96-97, 100-101, 103, 206
OutGuess 221

P
packet loss concealment 129-130, 154, 161, 164-165, 167-168, 171-172, 179-181
palette-based images 210
paper media 258-259
parallel architecture 60-63
parametric stereo coding 121, 128
parity check 319, 401-402, 405
patchwork method 10, 13, 16, 340, 343-344
payload data 2-3, 5-11, 19-24, 26-29, 31-32, 34-37, 39-40
pen interface 411
perceptibility index 80-81
perceptual evaluation of sound quality (PEAQ) 53
periodical phase modulation (PPM) 44
permutation 371, 394
permutation steganography 372-374, 376-378, 382, 393-394
perpetual transparency 420
phase coding 91
phase modulation 44-45, 52, 66, 69, 106, 124
phase shift keying (PSK) 50, 60
piracy 287, 351-352, 361-362, 371, 422
pitch waveform replication (PWR) 167
PN code 103
prediction error expansion 20, 30-32, 40-41, 257
pseudo array code 14
psychoacoustic 11, 43-44
pulse code modulation (PCM) 131, 161, 181
push-aside operation 323-324

Q
quantization index modulation (QIM) 10, 221, 226, 237
Index

R
real-time transport protocol (RTP) 129
redundant recursive call 362
Reed-Solomon error correction 402, 406-407
reference sharing 305, 312, 326, 330, 334
reflection factor 281
register allocation 364, 369-371
reverb parameter 191
reverse-polarity stereo echo method 110-111, 113-115, 117-122
reversible data hiding 19-22, 30, 39-41, 254-256, 367
robustness 57, 263
room reverberation 186, 202-203
round-robin extraction 273

S
sample rate conversion 13, 104, 116, 118-119, 122
scraping 383
Secure Digital Music Initiative (SDMI) 427
side information 128-130, 154, 156, 159-161, 164-165, 170, 174, 176-177, 179, 181, 362, 367-368
signal to noise ratio (SNR) 4, 9
simple bit rate control algorithm 146
single dot pattern 258-261, 264-265, 283-284
single watermarked image counterfeit original (SWICO) 414
sinusoidal amplitude modulation (SAM) 12
sound quality 80
spammimic 389, 394
spatial location detection 197-198
spline 77
spline function 76
spread spectrum 92, 130
steganalysis 230
steganography 3, 130, 211, 351
stego signal 3-4, 30, 74
stereo signal 106
stroke recovery 404-405, 408, 411
subjective difference grade (SDG) 4
Sudoku 361, 370
surjection 394
symbol synchronization 95, 101
synchronization blob 400-401, 405
synonyms 356

T
tampered block recovery algorithm 322
tampering coincidence problem 316-317, 326, 329, 334
telephone communication 164-165, 179
timestamp 383
tolerable distortion 133, 150
total error (TER) 219
transmission distance 99-101
trusted third party (TTP) 414
two-dimensional location detection 196

U
ubiquitous acoustic space 183-184, 203, 206
ubiquitous communicator (UC) 184, 204

V
vector quantization counterfeiting attack 309, 316, 319, 334
visual cryptography 415-418, 422, 437-438
visual quality 259-262, 268, 283
Voice over Internet Protocol (VoIP) 129, 162

W
watermark 2
watermark detection 13-14, 43, 88, 109, 290, 294, 298-300, 303-304, 348, 422, 428-429
watermark graph 363, 365
watermarking 351
watermark weighting factor 286, 288, 290-292, 294-295, 297-298, 300-302, 304
waveforms 78
whole-column moving phenomenon 323
windowing 94

Y
Yule-Walker equation 79

Z
zero-watermark 304, 429, 437-438
