Index

A
access services  221
action alignment (AA) model  285–286
activity domain  262–263
activity domain theory (ADT)  253–275
activity domain theory (ADT), origins  262–265
activity modalities  255, 263
activity theory  254
Air Force (AF)  316
Air Force Materiel Command (AFMC)  314
alignment  190–192, 196–198, 210, 257–258
alignment, business and knowledge strategies  267–271
alignment, concepts of  197–198
alignment, definition  190
alignment, dimensions of  199
alignment, importance  190–191
alignment, in KM  191–192
alignment, models  200–201
alignment, organizational  235
alignment, strategic  283–286
alignment, zones of  200
analytic hierarchy process (AHP)  240, 243
appreciative systems  115–117

B
“Ba”  235–236
“Ba”, artificial (virtual)  236–246
“Ba”, artificial-design  238–241
“Ba”, artificial-indwelling  241–245
“Ba”, artificial-knowledge strategy  236–238
“Ba”, definition  235
“Ba”, greater. See “Basho”
“Ba”, types of  235
“Basho”  235
balanced scorecard  286
boundary objects  122–124
boundary spanners  122–124
business intelligence  255
business process re-engineering (BPR)  140
business strategy  138, 341
business strategy (BS)  193, 195, 197
business strategy, definition  257

C
case-based reasoning  175–176
change management  2
chief knowledge officers (CKOs)  48. See knowledge leaders
cognition  113
collaboration-supporting methods  124
collaboration-supporting systems  124
collaborative support tools  59
competencies  284
competencies, core  284–286, 286–292
competitive advantage  3
complex adaptive system (CAS)  12–13, 14–20
complex adaptive system (CAS), characteristics of  13
complex adaptive system (CAS), organizations as 14–20
complexity theory 12–13
computer-based knowledge management systems (CKMS) 124
continuous learning 31
critical success factors (CSFs) 289
customer relationship management (CRM) 301

D
data 93
data analysis procedures 345
data mining 174–175
Delphi method 51
demand-pull 343
Department of Defense (DoD) 316
deskbook 317
deskbook project 317
directorate of requirements (DR) 316
document management systems 59
domain construction process 266–267

E
E-mail 59
employee attitudes 341
event-driven process chain 219
experiences 220
external knowledge search strategy 71–83

F
face-to-face relationships 343
firm performance measurement 34–35
firm performance measurement scale validation 38–39

G
group support system (GSS) 238–241

H
high-touch collaborative technology 344

I
ICT layer 220–223
information 93
information infrastructure 341, 345–346
information management (IM) strategy 197
information retrieval 176
information retrieval engines 58–59
information sources 346

information systems (IS) strategy 197
information technology (IT) strategic alignment model (ITSAM) 191, 196–197
information technology (IT) strategy 197
infrastructure services 221
instrument development 344
integration services 221

K
knowledge 93, 138–139
knowledge, as a strategic resource 234–235
knowledge, as strategic asset 30
knowledge, assumptions about 7
knowledge, definitions of 230–233
knowledge, explicit 92, 212, 230
knowledge, external 71–72
knowledge, internal 71
knowledge, organizational 138–139, 261–265
knowledge, resource perspective of 192–194
knowledge, tacit 92, 212, 230, 287
knowledge-based approach (KBA) 28–42
knowledge-based view of the firm (KBV) 194
knowledge-management infrastructure 341
knowledge-management strategy 341
knowledge-sharing culture 341, 345
knowledge-sharing methods 345, 347
knowledge as a factor of production 4
knowledge as an objectified transferable commodity 5
knowledge as a process 6
knowledge distinctive competences 30, 34
knowledge distinctive competences measurement scale validation 38
knowledge ecology 14–15
knowledge integration 144, 165–182
knowledge integration case study 179–181
knowledge leaders 47–61. See chief knowledge officers (CKOs)
knowledge leaders, roles of 56–57
knowledge leaders, skills of 57–58
knowledge management (KM), as management fad 19, 140
knowledge management (KM), balanced strategy 80–82
knowledge management (KM), cartographic school 269
knowledge management (KM), definition of 33–34
knowledge management (KM), first order 7–9
knowledge management (KM), first order as management fad 9–11
knowledge management (KM), general goal 298
knowledge management (KM), holistic framework 299–301
knowledge management (KM), initiatives 304–306
knowledge management (KM), key issues of 195
knowledge management (KM), learning-supporting strategy 122–125. See boundary objects; See boundary spanners
knowledge management (KM), management scale validation 36–38
knowledge management (KM), model testing 202–203
knowledge management (KM), organizational school 270
knowledge management (KM), practice based approach 271–273
knowledge management (KM), process school 269–270
knowledge management (KM), second order 11–13. See complexity theory; See systems thinking
knowledge management (KM), state of practice 211–214
knowledge management (KM), strategic levels 198–199
knowledge management (KM), strategic perspective of 194–195
knowledge management (KM), strategic school 270–271
knowledge management (KM), systems approach 298
knowledge management (KM), systems school 269
knowledge management (KM) adoption 31
knowledge management (KM) alignment concepts 201–202
knowledge management (KM) benefits 53–55
knowledge management (KM) implantation 32
knowledge management (KM) initiatives 284
knowledge management (KM) needs 169–171
knowledge management (KM) needs, exterior 171
knowledge management (KM) needs, interior 170
knowledge management (KM) obstacles 55–56
knowledge management (KM) problems 213–214
knowledge management (KM) service layer 222–223
knowledge management (KM) services 210–225
knowledge management (KM) services, conceptual layer 218–220
knowledge management (KM) services, infrastructure 216–218
knowledge management (KM) services, infrastructure layers 218
knowledge management (KM) strategic alignment model (KMSAM) 357
knowledge management (KM) strategy 297
knowledge management (KM) systems 268–271
knowledge management (KM) technologies 58–64
knowledge management (KM) technology, characterization scheme 171–174
knowledge management (KM) technology, evaluation 174–178
knowledge management, organizational 138
knowledge management strategic alignment model (KMSAM) 191, 201
knowledge management strategy (KMS) 192, 196–201
knowledge positioning matrix (KPM) 288–289, 292
knowledge resources 140
knowledge search, conditions of 72–76
knowledge search, exploitation 74–75
knowledge search, exploration 75–76
knowledge search, external geographical dimension 77–78
knowledge search, internal geographical dimension 77
knowledge search, organizational 76–80
knowledge search, social dimension 78–80
knowledge search, social dimension-formal 79–80
knowledge search, social dimension-Informal 78–79
knowledge search, technology 74–76
knowledge services 221
knowledge sharing 137, 349
knowledge sharing culture 345
knowledge strategic alignment model (KSAM) 192, 201
knowledge strategies, internal 144
knowledge strategy (KS) 137, 139–141, 192, 195–203, 360
knowledge strategy (KS), definition 257
knowledge strategy (KS), in practice 143–147
knowledge strategy (KS), socialization approach 133–158
knowledge strength, weaknesses, opportunities, and threats (K-SWOT) analyses 198
knowledge structures 14–15
knowledge transfer (KT) 91–100
knowledge transfer (KT), and learning 94–95
knowledge transfer (KT), process perspective 94
knowledge transfer (KT) contexts 95
knowledge transfer (KT) models 95–96
knowledge transfer (KT) paradigms 96–97
knowledge transfer (KT) strategy 91–100

L
leadership support 319
lessons learned project 317

M
managerial orientations 16–19
meaning 258–260
meaning construction 265–267
mental model 114–126
mental models, complex 114–115
methodology tree 167
modular organizations 111–113, 121–122
modular products 111

N
“not-invented-here” syndrome 343
new product development (NPD) 302

O
objectified modalities 263
ontologies 177–178
organization-wide simulation model (OWSM) 238–241
organization-wide simulation model (OWSM), development 241–242
organizational actors 2
organizational cognition 256
organizational context 237
organizational culture 2
organizational development 256
organizational information processing 255
organizational knowledge 233–234
organizational knowledge, definition 233
organizational learning 4, 114
organizational learning, absorptive 114
organizational modularity 109–126
organizational performance (OP) differentials 193
organizational practices 341
organizational values 147–152
organizational values, integrated model 149–150
outsourcer 314

P
Penrose rents 142
personalization services 221
Porter’s five forces model of strategy 141
post-merger environment 341
praxis 254
process-oriented knowledge management (pKM) 214–215, 218–219
processes, socialization 152–155

R
research setting 344
resource-based view of knowledge (RBV) 3–4, 28–42, 194
resource-based view of knowledge (RBV) perspective 139
resources-processes-values (RPV) framework 145–149
resources-processes-values (RPV) model 151
Russian theory of activity 255, 259, 261, 262

S
Sample Selection 344
scenario planning 124–125
SECI-model 235
service-oriented architecture (SOA) 216
service layer architecture 216–218
StratAchieve method 287–294
StratAchieve structure 289–291
strategic alignment 353
strategic alignment, argument against 152
strategic conversation 17–19
strategic flexibility 110–111, 116, 121–122
strategic knowledge integration 144–145
strategy development 324
strategy domains 358
strategy formulation process 113–117
strategy trees 288
system dynamics 117–121
systems thinking 11–12
System Usage 321

T
technology forecasting 166–169
technology forecasting, methods 167–169
technology transfer 94
Telecom Reform Act of 1996 342
temporalization 263
topic maps 176–177
Index

V

valuation procedure 238–241
values, socialization 154–155
values systems 148–149
values systems, individual 150
values systems, institutional 150–152
