About the Contributors

John Wang is a professor in the Department of Information & Operations Management at Montclair State University, USA. Having received a scholarship award, he came to the USA and completed his PhD in operations research from Temple University. Due to his extraordinary contributions beyond a tenured full professor, Dr. Wang has been honored with a special range adjustment in 2006. He has published over 100 refereed papers and seven books. He has also developed several computer software programs based on his research findings. He is the Editor-in-Chief of International Journal of Applied Management Science, International Journal of Operations Research and Information Systems and International Journal of Information Systems and Supply Chain Management. He is the Editor of Data Warehousing and Mining: Concepts, Methodologies, Tools and Applications (six-volume) and the Editor of the Encyclopedia of Data Warehousing and Mining, 1st (two-volume) and 2nd (four-volume). His long-term research goal is on the synergy of operations research, data mining and cybernetics.

***

Sweety Law is an Associate Professor of Marketing in the College of Business and Economics at California State University – East Bay in Hayward, California. Her research has centered on leadership, audiences, innovation diffusion, persuasion, cross-cultural communication, media campaigns and behavior change. Major research projects have included women’s leadership and management development programs of the National Dairy Development Board (NDDB) of India and media campaigns for public health program initiatives in the US, Africa, Asia, and Mexico. Winner of top papers, she has published refereed book chapters and journal articles in leading journals including Journal of Workplace Learning, Journal of Communication, Journal of Business Leadership, International Journal of Liability and Scientific Enquiry, and Journal of Employment Counseling.

Jacques Verville is an Associate Professor of Information Technology Management in the Faculty of Management at the University of British Columbia, Okanagan campus. He holds degrees in Linguistics (BA), International Relations (MA), Information Resource Management (MSc) and a PhD in Organizational Information Systems. Dr. Verville has published in a number of journal including Decision Support Systems; IEEE Transaction of Professional Communications; Long Range Planning; Decision Sciences Journal of Innovation in Education; Industrial Marketing Management; Journal of Enterprise Information Management; International Journal of Technology Management; International Journal of Enterprise Information Systems. Dr. Verville is co-author of Acquiring Enterprise Software: Beating the Vendors at their Own Game.
Nazim Taskin is a doctoral student in Interdisciplinary Studies at the University of British Columbia, Okanagan campus. His research interests focus on IS strategic planning, ERP systems and Data Warehousing.

Gøril Hannås is an Associate Professor at the Department of Economics and Business Administration, University of Agder, Kristiansand, Norway. She obtained her PhD degree in Logistics from Molde University College. Her research interests include industrial buying behaviour, supply chain management and e-business.

Otto Andersen is a Professor at the Department of Economics and Business Administration, University of Agder, Kristiansand, Norway. His research interests include transaction cost theory, organizational buying behaviour, international marketing.

B. S. Sahay is Director of Indian Institute of Management, Raipur India. He did his M.Tech. and Ph.D. from Indian Institute of Technology (IIT) Delhi, India. He is the Editor of International Journal of Value Chain Management and Guest Editor of International Journal of Physical Distribution and Logistics Management, International Journal of Technology Management, and International Journal of Integrated Supply Management. He is on the Editorial Board of five international journals and many national journals. He has published/presented over 130 papers in international/national journals and conferences. He has published seven books titled Productivity Management- A Systems Approach (Narosa), World-Class Manufacturing: A Strategic Perspective (Macmillan), Indian Supply Chain Architecture (Macmillan), Supply Chain Solutions (Macmillan), Supply Chain Management for Global Competitiveness (Macmillan), Supply Chain Management in the Twenty-First Century (Macmillan) and Emerging Issues in Supply Chain Management (Macmillan). His book on Productivity Management was given Escorts Book Award and ISTD National Book Award.

Vinita Sahay is a PhD in the area of Customer Value and an MBA in Marketing. She secured first class first with Gold Medal in M.A. in Economics. She has about 16 years of experience in teaching and training with organizations like ICFAI Business School Gurgaon, Amity Business School. She was founder Editor of Synergy: Journal of IT and Management. Prof. Sahay has published and presented many research papers in International and National journals and conferences.

Kareem Abdul Waheed is an Assistant Professor of Marketing at the Institute of Management Technology, Dubai, UAE. He was awarded Ph.D at School of Management, Indian Institute of Technology, Bombay, India. His research interest includes Trust in buyer-seller relationships, brand personality and societal marketing. He presented his research papers in conferences such as North America Association for Consumer Research Conference, World Marketing Congress of the Academy of Marketing Science, Multicultural Marketing Conference of the Academy of Marketing Science and Academy of International Business. His research papers have appeared in Supply Chain Management: An International Journal, Corporate Environmental Strategy – International Journal of Corporate Sustainability, Journal of Services Research and Journal of Insurance & Risk Management.
Honggeng Zhou is Associate Professor in the Whittemore School of Business and Economics at University of New Hampshire, where he teaches courses to both undergraduates and MBA students. His primary research interests include supply chain management and information system management. He received his PhD in operations management from The Ohio State University, Columbus, Ohio. He has a bachelor degree in computer science and engineering and a master degree in applied statistics. His research has been published in journals such as *Journal of Operations Management, Decision Sciences, International Journal of Production Economics, International Journal of Internet and Enterprise Management, International Journal of Productivity and Performance Management*, and *Enterprise Information Systems*.

Alvaro García-Sánchez finished his PhD in Industrial Engineering at the Technical University of Madrid (UPM). Currently, he is an associate professor at the Department of Industrial Engineering, Business Administration and Statistics, Technical University of Madrid (UPM), Madrid, Spain. His main areas of interest are discrete-event simulation, optimization and, in general, quantitative modeling in production and logistics. The result of this work has been published both in journals and research books. He develops teaching activities both at the University and in other institutions, provides training for companies and offers consultancy services in the area of quantitative modeling and simulation.

Miguel Ortega-Mier finished his PhD in Industrial Engineering at the Technical University of Madrid (UPM). He is currently an associate professor at the Department of Industrial Engineering, Business Administration and Statistics, Technical University of Madrid (UPM), Madrid, Spain. His main areas of interest are discrete-event simulation, quantitative modeling and production management. The result of this work has been published both in journals and research books. He develops teaching activities both at the University and in other institutions, provides training for companies and offers consultancy services in the area of quantitative modeling and simulation.

Patrick Hirsch is an Assistant Professor of Business Administration and Logistics at the Institute of Production and Logistics, University of Natural Resources and Applied Life Sciences, Vienna, Austria. He obtained his doctoral degree in Business Administration from University of Vienna. He received two awards for his doctoral thesis. His research interests include transportation logistics and disaster management. The author and his team obtained some research grants in this area. In his research projects he works together with other universities, companies, and nonprofit organizations like the Austrian Red Cross. He presented his work at several international conferences, including IFORS, ALIO-INFORMS, EURO, TRISTAN, ODYSSEUS, and MIC. He published some book chapters and journal articles. Patrick Hirsch teaches courses in business administration and optimization.

D. Guimarans is a PhD student and assistant teacher at the Telecommunication and Systems Engineering Department at the Universitat Autònoma de Barcelona. His research is mainly focused on tackling hard combinatorial problems by using hybrid algorithms. Among techniques used, Constraint Programming and Metaheuristics are especially relevant. He also performs active research on embedding heuristic methods within different Constraint Programming search processes to explore large neighbourhoods more efficiently. Mr. Guimarans is a member of the Logism Research Group, included in the Network of Support Centers of Technological Innovation, where he has participated in different research and technology transfer projects. In this sense, he possesses experience in planning techniques, distributed simulation and real-time decision making tools.
R. Herrero is a PhD Student holding a fellowship at the Telecommunication and Systems Engineering Department at the Universitat Autònoma de Barcelona. She is a member of the Logisim Research Group, included in the Network of Support Centers of Technological Innovation. Her research interests are integer programming and techniques to solve industrial combinatorial problems. Indeed, her interest is mainly focused on the hybridisation of different techniques such as Lagrangean Relaxation, Constraint Programming and Metaheuristics.

J. J. Ramos is an associated professor at the Telecommunication and Systems Engineering Department at the Universitat Autònoma de Barcelona. His research interests are related to modelling, simulation and optimisation of logistics problems. He possesses wide experience in designing and developing real-time decision making support tools. Dr. Ramos is coordinator and an active member of the Logisim Research Group (Network of Support Centers of Technological Innovation), where he has leaded and participated in a variety of research projects aimed to tackle real industry problems. His work has been published in a number of academic journals, conference publications, and books.

S. Padrón received a Master degree in Computer Engineering, specialization in Intelligent Systems, from Universitat Rovira i Virgili (Tarragona, Spain) on 2009. Since 2009, she is a PhD Student holding a fellowship at the Telecommunication and System Engineering Department at the Universitat Autònoma de Barcelona. She is a member of the Logisim Research Group. Her research interests are modelling, simulation and optimisation of logistics problems. She is also interested in the application of Artificial Intelligence techniques, specially distributed search, ontologies and logic programming to the solution of real-life applications in logistics, planning, scheduling, supply chain management and the development of logistics information systems and decision support systems.

Javier Faulin is an Associate Professor of Statistics and Operations Research at the Public University of Navarre (Pamplona, Spain). He holds a PhD in Economics, a MS in Operations Management, Logistics and Transportation and a MS in Applied Mathematics. His research interests include logistics, vehicle routing problems, environmental problems related to transportation and supply chain management and simulation modelling and analysis. He is a member of INFORMS and EURO societies and an editorial board member of the International Journal of Applied Management Science and the International Journal of Operational Research and Information Systems.

Fernando Lera-López is an Associate Professor of Applied Economics in the Department of Economics at the Public University of Navarre (Pamplona, Spain). He holds a PhD and a MS in Economics and Business. His research interests include economic analysis about environmental problems related to transportation and logistics and information and communication technologies and its implementation effects at national and firm levels.

Angel A. Juan is an Associate Professor of Simulation and Data Analysis in the Computer Science Department at the Open University of Catalonia, Spain. He holds a PhD in Industrial Engineering, an MS in Information Technologies, and a MS in Applied Mathematics. His research interests include applications of Modelling & Simulation, Quantitative Data Analysis, and Computer Supported Mathematical e-Learning. He is an editorial board member of the Int. J. of Data Analysis Techniques and Strategies as well as of the Int. J. of Information Systems & Social Change, and a member of the INFORMS society. His web page is http://ajuanp.wordpress.com.
About the Contributors

Jairo R. Montoya-Torres is Associate Professor and former Director of the undergraduate program on International Marketing and Logistics Management at the School of Economics and Management Sciences, Universidad de La Sabana, Chía, Colombia. He received a Ph.D. in Industrial Engineering from École Nationale Supérieure des Mines de Saint-Étienne, France, a Master of Science in Industrial Engineering and Management from Institut National Polytechnique de Grenoble, France, and the degree of Industrial Engineering (highest honors) from Universidad del Norte, Barranquilla, Colombia. He has been Guest-Editor of the *Annals of Operations Research*, *the Journal of Intelligent Manufacturing*, and *the International Journal of Information Systems and Supply Chain Management*. His current research interests include scheduling, simulation of production and logistics systems, and design and management of supply chains under collaborative and sustainable environments.

Fabián Vargas-Nieto holds the degrees of Industrial Engineer and Master of Science in Industrial Engineering both from Universidad del Norte, Barranquilla, Colombia. He is currently working as Production Manager at Finotex, S.A. This paper presents the results of his master research work.

Mehmet Savsar is a Professor of Industrial and Management Systems Engineering at the College of Engineering and Petroleum in Kuwait University. He obtained his Ph.D degree in Industrial Engineering and Operations Research and his master’s degree in Industrial Engineering both from the Pennsylvania State University. He has worked as a faculty member in Anadolu University (Turkey), in King Saud University (Saudi Arabia), and presently in Kuwait University (Kuwait). His research interests include modeling of production systems, just-in-time production control (JIT), reliability and maintenance management, simulation, and facilities planning and location analysis. He has published more than 60 papers in international journals and more than 60 papers in international conference proceedings. He has been senior member of the Institute of Industrial Engineers (IIE), member of INFORMS, New York Academy of Sciences, Turkish Operations Research Society, and Turkish Society of Mechanical Design and Production. He is also on editorial board and reviewer for several international journals.

Vikram Sharma is the Associate Professor in Mechanical Engineering Department at Galgotias College of Engineering and Technology, Greater Noida, India. He holds a PhD degree from GGSIP University, Delhi, India. His research interests include supply chain modeling and supply chain performance measurement. He has presented several papers in National/ International Conferences and Journals.

G. D. Sardana is the Professor of operations management at Birla Institute of Management and Technology, Greater Noida, India. He is a Chartered Engineer and holds a mechanical engineering degree from Punjab University and Ph.D. from IIT Delhi in areas of Business Performance. He has published over 40 papers in national and international journals and presented at conferences. Three of his paper-shave won Best Paper Awards from Indian Institution of Industrial Engineering. Dr. Sardana has a rich corporate experience of over 40 years both in the public and private sector companies occupying senior managerial, CEO and director level positions for 25 years with BHEL, ABB; Usha, Singer (India) and Ujala respectively.
Leslie S. Hiraoka is Professor of Management at Kean University and is the author of Underwriting the Internet: How Technical Advances, Financial Engineering, and Entrepreneurial Genius Are Building the Information Highway (2005) and Global Alliances in the Motor Vehicle Industry (2001). He was awarded the Shigeo Shingo Prize for his research on Japanese auto transplants in the USA. He was an AACSB Federal Faculty Fellow at the U.S. Department of Commerce in Washington, D.C. and a contributor to Wiley Interscience’s Encyclopedia of Electrical and Electronics Engineering (1999). He has an MS and Doctorate of Engineering Science from Columbia University and an MBA from Rutgers University.

Sanjaysingh Vijaysingh Patil is the Training and Placement Officer, G. H. Raisoni College of Engineering and Management, Pune, India. Born on Aug-31st, 1976, Sanjaysingh hails from Moygaon Bk. Village of Jalgaon, India. He has completed Masters in Production Engineering with specialization in Manufacturing Engineering from University of Mumbai. He also holds a Masters degree in Business Administration. Presently he is pursuing Fellow (Doctoral) programme from National Institute of Industrial Engineering (NITIE), Vihar Lake, Mumbai, India. He has presented three papers in the field of IT applications in Manufacturing at various conferences. He undertook projects on Pneumatics and Electro pneumatics system design, Applications of Neural Networks in manufacturing, Finite Element Methods, Six-Sigma manufacturing, Analytic Hierarchy Process etc. He is presently working on Supply chain management applications in Agri-food chains, its productivity and relation with global peace. He is a life member of Indian Society for Technical Education.
